Auditor's Report

San Francisco, Cal., November 21, 1911.

Hon. P. H. McCarthy,

Mayor, City and County of San Francisco.

Sir:

In compliance with Article 16, Section 9, of the Charter of the City and County of San Francisco, I have the honor to submit herewith the report of the Auditor for the fiscal year ending June 30, 1911.

The report as submitted covers all financial transactions during the year and such other information as the Auditor is required by law to include in this statement.

Your particular attention is called to the new system of compiling this report, comprising the classification of each Department of the Municipal Government. For the first time this report shows a comparative statement of the revenue and expenditures for the fiscal year as against the previous year, and is prepared to comply with the latest and most approved system of accounting.

During the past year there has been demands on the Treasury audited amounting to seventeen million three hundred fifty-six, thousand two hundred eighty-six and 29/100 (\$17,356,286.29) Dollars.

It pleases me to state that I find in a thorough examination of the records of the Auditor's office that the City and County has never incurred any financial losses in Departments over which the Auditor has had control, and, for this reason, recommend that all special deposits, including Absent Heirs, County Clerk's deposits, Inheritance Tax, and Public Administrator deposits, should be under control of the Auditor

Respectfully submitted,

THOS. F. BOYLE,

Auditor.

Report of Playground Commission

San Francisco, August 23, 1911.

To the Honorable P. H. McCarthy,
Mayor of the City and County of San Francisco.

Dear Sir:—Pursuant to Section 9, Article XVI, of the Charter of the City and County of San Francisco, the Playground Commission herewith presents the report for the fiscal year 1910-11.

Very truly yours,

JOSEPH R. HICKEY, Secretary.

The practical results of the municipal playground system have been clearly demonstrated during the fiscal year of 1910-11. Although considerable attention has been given to the construction of the grounds under the jurisdiction of the Playground Commission, the actual operation of four playgrounds during the year has substantiated the claims of the department and the value of the innovation now established as part of the child welfare institutions.

Attendance on the playgrounds and the interest displayed by the residents of the various communities has warranted every expenditure made for the betterment of the youth of the city. The problem that has confronted the Playground Commission has been to provide sufficient sites in those sections of the city which are still without the modern civic improvements enjoyed on the locations now cared for by this Commission.

The following is a record of attendance during the month of June and an indication of the manner in which the playgrounds were patronized during the past year.

	North Beach	Southside	Madison	Triangle
Total	19,575	6,330	5,400	3,627
Daily Average	652	211	180	128

During the winter months there is of course a decrease in the attendance. The above, however, is considered a satisfactory showing, although in the case of the Madison playground, now known as the Pacific Heights Ground, the attendance has been gaining.

The operation of the playgrounds has been marked by law and order throughout, the directors seldom experiencing difficulty in maintaining authority on their respective grounds. Accidents have been few and of minor nature while the directors have done everything possible to guard the young children against injury.

Rapid progress is now being made on the construction of the Jackson Park playground at Seventeenth and Arkansas streets and the Playground Commission anticipates offering this site to the public shortly. This playground will surpass all others in the city as it will include an elaborate field house with an assembly hall and stage, baths and lockers. The field will be a grass surface with running track and baseball diamond. An appropriation of \$25,000 has been set aside for the completion of this playground.

During the past year the Commission has been unable to finish the swimming tanks on the North Beach playground, due to the limited allowance. It is recommended that sufficient funds should be forthcoming for this improvement

PLAYGROUND COMMISSION

as well as an appropriation for the Hamilton Square playground recently turned over to the Playground Commission by the Park Commission.

The purchase of a playground site in the Excelsior Homestead district by the Board of Supervisors has added greatly to the department although it will be impossible to develop this playground site until next year.

The experiment of leasing vacant lots for playground purposes in such neighborhoods not otherwise provided for, has been successfully demonstrated in the case of the playground at Twenty-eighth and San Jose Avenue.

The Playground Commission is greatly indebted to the cooperation of the Board of Public Works and the Board of Education during the past year. Both of these departments have assisted possible developments undertaken by this Commission.

Report of Board of Health

REPORT OF THE PRESIDENT AND OF THE HEALTH OFFICER.

San Francisco, Cal., August 15, 1911.

Honorable P. H. McCarthy,

Mayor of the City and County of San Francisco, Cal.

Sir:—Pursuant to the provisions of Section 9, Article XVI of the Charter of the City and County of San Francisco, I have the honor to submit herewith a full and detailed report of the work of the Department of Public Health for the fiscal year ending June 30th, 1911.

On September 30th, 1910, Dr. T. B. Roche, a member of the Board, resigned his position, owing to pressure of private business, and on November 11, 1910, Henry D. Brusco, M. D., was appointed to fill the vacancy.

On January 10, 1911, George Lee Eaton, M. D. was unanimously elected President of the Board, and assuming the duties of his position made the following appointments on the various committees:

HOSPITAL COMMITTEE.

Henry D. Brusco, M. D., Chairman; Guy E. Manning, M. D. and Mr. Germain Pouchan.

FINANCE COMMITTEE.

Mr. G. Pouchan, Chairman; D. J. Murray and A. M. Sharp.

BUILDING COMMITTEE.

A. M. Sharp, Chairman; Frank J. Klimm and G. Pouchan.

SANITATION AND LEGISLATION COMMITTEE.

F. J. Klimm, Chairman, H. D. Brusco, M. D., and D. J. Murray.

JOINT COMMITTEE BOARD OF EDUCATION AND BOARD OF HEALTH ON SCHOOL MEDICAL INSPECTION.

Guy E. Manning, M. D. was appointed to fill this chair.

Much important legislation has been enacted during the year just closed and many measures looking towards proper sanitation and improvement of hygienic conditions have been adopted. Perhaps one of the most important steps yet taken by any Board of Health in the history of this city, was the establishment of the

MUNICIPAL CLINIC.

The work of "Red Plague" suppression has been the theme of medical men and municipal authorities for numberless years, and as the history of these movements appeared to indicate that they were not at all times entirely successful, yet your Board of Health, after due deliberation and a thorough discussion of the point at issue, at a meeting of the Board of Health held on December 2, 1910, adopted the following resolution:

BOARD OF HEALTH

"RESOLUTION"

"Whereas, The California State Board of Health through public announcement has called the attention of this Board to the fact that it has become the duty of Boards of Health to encourage and maintain a progressive campaign against all communicable and avoidable diseases, and

Whereas, amongst this class of diseases are those which are classed under the general head of "Venereal," and

Whereas, The San Francisco Board of Health, fully realizes the imminent danger to the citizens at large through the dissemination of this form of infection, and also the important bearing that it naturally has on future generations, and

Whereas, this Board fully recognizes and appreciates the enormity of the task involved in any effort that may be made to regulate the social evil, and through intelligent cooperation and proper legislation to bring this phase of Health Department work under a proper control, therefore be it

Resolved, that this Board of Health extend an invitation to the various officials and organizations, State and Municipal, and representatives of the various religious denominations throughout the city, to attend a conference to be held in the rooms of the Board of Health with the members of said Board, on Wednesday, December 14th, 1910, at the hour of 8 P. M., for a full and free discussion as to the proper method to pursue in order to inaugurate a successful movement in the direction of regulating the social evil."

Pursuant to the call embodied in the foregoing resolution, representatives of the California State Board of Health, San Francisco County Medical Society, representatives from the Catholic, Protestant and Hebrew churches, members of the several civic bodies in San Francisco, the Chief of Police and various other citizens interested in this movement met with the Board of Health on several occasions and on February 14th, 1911, the following regulations were adopted:—

REGULATIONS OF THE MUNICIPAL CLINIC OF THE CITY AND COUNTY
OF SAN FRANCISCO, STATE OF CALIFORNIA, FOR THE PRE-
VENTION OF VENEREAL DISEASES, 1911.

REGULATIONS OF THE BOARD OF HEALTH OF THE CITY AND
COUNTY OF SAN FRANCISCO, STATE OF CALIFORNIA.

PREAMBLE.

In an effort to prevent the promiscuous dissemination of infection through the medium of venereal diseases, which class of diseases are included under the heading of "Communicable Diseases," to minimize as far as it may be possible the dangers arising from these loathsome maladies, and to that end to exercise an intelligent and systematic medical supervision over that class of individuals, who, through the nature of their habits, render possible the spread of this class of diseases, the Board of Health hereby enacts the following regulations with reference thereto:

SECTION 1.

Limits and Boundaries.

Par. 1. The class of individuals referred to in the foregoing preamble shall confine themselves to the following named limits and boundaries, to wit: Commercial street from the westerly line of Kearny street to the easterly line of Grant avenue; Jackson street from the westerly line of Kearny street to the easterly line of Grant avenue; Pacific street from the easterly line of Montgomery street to the westerly line of Front street; Bartlett alley (now Beckett) from the north side of Jackson street between Kearny and Grant avenue north to Pacific street; Washington place (now Wentworth place) from north side of Washington street between Kearny and Grant avenue north to Jackson street.

SECTION 2.

Establishment of Clinics.

Par. 1. There shall be established at appropriate locations (hereafter to be selected as circumstances may require) clinics for the reception and proper medical examination of all such individuals heretofore mentioned, all of said clinics to be under the control of a Board of Supervision, appointed by the President of the Board of Health, said Board to consist of a Chief Clinician, who shall be a reputable duly registered physician, and a Superintendent, who shall have complete control of the operation of said clinic or clinics, subject only to such regulations as may be put into effect by the Board of Health or such Advisory Committee or Commission as may hereafter be appointed for the purpose of carrying out the object of these regulations.

Par. 2. Said Chief Clinician and Superintendent shall be appointed by the Board of Health upon the nomination of such Advisory Committee or Commission as aforesaid, and all employees of said clinic or clinics shall be appointed by the Board of Supervision as mentioned in paragraph 1 of this section, subject to confirmation by the President of the Board of Health.

Par. 3. All officers and employees of said clinic or clinics shall receive such compensation as may be hereafter determined upon and such compensation shall be in full for all services.

SECTION 3.

Par. 1. All orders covering the working of the clinic shall be signed by the Chief Clinician and Superintendent jointly.

Par. 2. The hours in which physicians must be in attendance at said clinics are hereby fixed as follows:

At least one physician between the hours of 1 and 3 p. m. of each week day and at least one between the hours of 3 and 5 p. m. of each week day (legal holidays excepted.) The arrangement of service to be determined by the Chief Clinician.

BOARD OF HEALTH

Par. 3. The nurse or nurses shall be in attendance each week day from 9 a. m. to 5 p. m. (legal holidays excluded).

Par. 4. All other employees shall be in attendance each week day from 9 a. m. to 5 p. m. (legal holidays excluded).

Par. 5. It shall be the duty of the physician on duty to make a complete physical and microscopical examination of each and every individual who may present themselves for such purpose, particularly with a view to determining the existence of local and general conditions which might tend to the dissemination of diseases of a venereal character.

Par. 6. The result of such examination shall be reported to the office of the clinic and entered in full on the office records of said clinic on a suitable record card, provided for such purpose, which record shall contain the name, age and residence of the person so examined, also a physical description of such person, i. e., color, height, weight, shade of hair, general build, and enumeration of any and all visible marks or scars, or any physical peculiarity that may be of value in establishing the identity of such individual. A photograph of such individual shall also be attached to the record of each.

Par. 7. It shall be the duty of the properly designated person in charge of the office of each clinic to affix his signature, also the date of each examination, to a card to be carried by each such individual, which signature shall certify to the fact that the regular examination of such person has been made and found satisfactory, on the date mentioned, in the event that such person be not found affected with venereal disease, but should such person be found to be infected, the card or book of such person shall be taken up by the office, and an appropriate card indicating that such person is under treatment shall be issued, and said card shall entitle the holder thereof to free medical treatment at such clinic and it shall be the duty of the clinic physician to administer the necessary medical treatment requisite to render said individual a healthy person, or if necessary to enter such person in a hospital for proper treatment. When such person has been declared entirely recovered a new card shall be issued to the individual as provided for in paragraph 2 of section 4 of these regulations.

Par. 8. It shall be the duty of the nurse to receive and prepare for medical examination and treatment all such applicants and to assist the attending physician in all cases applying at such clinic for examination and treatment, and to execute all orders for such attending physicians in matters relating to the purpose of these regulations.

Par. 9. It shall be the duty of the Superintendent to see that a true and correct record is made of all cases examined and treated by the attending physicians, as provided in paragraphs 5, 6 and 7 of this section, said record to be so kept as to be easily available at all times for ready reference. All such record cards shall be appropriately numbered, and such numbers shall accurately correspond to the number appearing on the card to be carried by each individual. Said Superintendent shall execute all orders issued by the Supervisory Board in relation to the purposes of these regulations.

Par. 10. Said Superintendent shall designate a proper person (who shall be confirmed by the President of the Board

of Health) to receipt for all fees paid in for medical examinations as called for in these regulations as hereinafter provided. Said receipts to be in duplicate, appropriately numbered, the original to be handed to the individual paying the fee, the duplicate to remain in a bound book kept for such purpose. A full, detailed and accurate record must be kept for all fees collected, such fees to be turned over to such custodian, in such manner and at such times as may be hereafter designated, and a receipt taken therefor.

Par. 11. Clinic record cards shall not be open for inspection by any person, other than the authorized employees of such clinics, the Chief of Police, and such members of the regular Police Department of this City and County, as may be designated by the written order of such Chief of Police and such other persons who may present a written order to such clinics, authorizing such inspection said order to bear the signature of the Health Officer, and the President of the Board of Health, these officials to exercise a sound and reasonable discretion in the matter of issuing permits of this character.

SECTION 4.

General Regulations.

Par. 1. All individuals of the class mentioned in the foregoing sections shall confine their activities solely to that portion of this city within the limits hereinbefore defined in paragraph 1 of section 1 of these regulations.

Par. 2. Every such person must submit to a medical examination at the hands of the duly appointed clinic physician at least twice in each week at such intervals as may hereafter be designated. Each person will be furnished with a clinic card bearing a number corresponding to the record card in such cases on file in said clinic, such card to contain all the particulars as enumerated in paragraph 6 of section 3 of these regulations, and to be accompanied by a photograph of the holder of such card.

Par. 3. Such clinic cards shall be retained by such individual as their personal property as evidence of conformity with these regulations and shall be readily available at all times for inspection by any person interested, and shall be produced on demand at any and all times when required so to do by such members of the regular police force of this City and County as described in paragraph 1 of section 5 of these regulations.

Par. 4. For each and every examination had by such individual, a fee of fifty cents will be charged, such amount to be in full payment for each such examination, said fee to be paid to the properly designated person as set forth in paragraph 10, section 3, of these regulations, who will furnish an official receipt for such amount to each person so examined. Under no circumstances shall any other fee or any gratuity whatever be demanded or accepted by any physician, nurse or other attendant.

Par. 5. Clinic cards shall not be transferable under any circumstances, and any individual violating this section of these regulations will be arrested and prosecuted.

BOARD OF HEALTH

SECTION 5.

Duties of the Police.

Par. 1. As sanitary officers, it shall be the duty of the Chief of Police and such members of the regular police force of this City and County as may be particularly designated to co-operate with the Board of Health in the enforcement of the foregoing regulations.

Par. 2. A vigilant police supervision and inspection shall be maintained over all persons known to be or suspected to be of a questionable character, within the meaning and intent of these regulations, and at all times when necessary all such should be compelled to exhibit their clinic cards for the purpose of determining whether they have complied with the order requiring medical examination as provided for in paragraph 2 of section 4 of these regulations. In the event they should have failed to comply with such provisions, they should be ordered to appear for examination at once under penalty of arrest for failure so to do.

Par. 3. Any person found violating these regulations in regard to limits and boundaries, as set forth in section 1 of these regulations should be properly instructed as to said provisions and in the event that they fail to comply with same they will be arrested and prosecuted.

This Clinic was put into active operation on March 25th, 1911, the initial cost of same being met by a \$500.00 subscription donated by a prominent citizen. Thus without one cent of expense to the city this very important branch of Health Department work was started into being, and has become absolutely self-supporting. As this report will no doubt prove of much interest to many, including students of the social problem, there is submitted herewith a financial statement of the clinic dating from March 25th to June 30th, 1911.

FINANCIAL STATEMENT OF THE MUNICIPAL CLINIC.
MONTHS: MARCH TO JUNE 30, 1911.

RECEIPTS.

Subscription	\$ 500.00	
Registrations	596.00	
Examinations	4,036.50	
Overage	2.50	
		\$5,135.00

DISBURSEMENTS.

Rent	\$ 560.00	
Light, heat, water and telephone	36.30	
Stationery and printing	363.84	
Office expense	98.87	
Furniture and fixtures	233.37	
Surgical equipment	445.86	
Repairs, installations, etc.	325.58	
Medicines	216.60	
Salaries	2,581.39	4,861.81
		\$ 273.19
Balance cash on hand		

FORCE EMPLOYED.

1 Chief Clinician at	\$100.00	a month
2 Examining physicians, each	50.00	" "
1 Chief Nurse at.....	75.00	" "
1 Assistant Nurse at.....	60.00	" "
1 Matron at.....	60.00	" "
1 Janitress at.....	25.00	" "
1 Superintendent at.....	150.00	" "
1 Cashier at.....	60.00	" "
1 Stenographer at.....	60.00	" "

The original regulations called for the employment of a limited number of attendants, but the work increased at such a rapid rate that it was found necessary to add to the working force almost immediately. The actual work accomplished can best be shown by the accompanying statement of cases registered and treated and while mere figures but seldom give an indication of the real work accomplished, still it would appear as if the following statement would readily indicate that much work of a valuable and lasting character has been accomplished:

Cases registered	1,196
Examinations	9,265
Syphilis	25
Syphilis and Gonorrhoea	2
Total diseased cases	227
Treatments	1,650
Cured	129
Sent to Hospital	14
Left the city	278
Quit and furnished work	22

In view of the fact that predictions had been more or less freely made by the opponents of this movement to the effect that same would not prove to be a success, the foregoing statement should prove to be of more than ordinary interest. The report shows that 22 individuals have voluntarily abandoned their former precarious mode of living and have sought respectable occupations. This alone, if no other object were accomplished, should commend this very important work to every right thinking citizen, and is an evidence of the fact that the establishment of this feature of Health Department work has at least been of some slight benefit to the members of the human family.

BUREAU OF TROPICAL MEDICINE.

As recommended in my last annual report, the Chair of Bureau of Tropical Medicine was filled by the appointment of Dr. Herbert Gunn on January 3, 1911.

Prior to the making of this appointment or on November 25, 1910, the following resolution was adopted by the Board of Health:

Whereas, It appears that numbers of Asiatics immigrating to this country are afflicted with or carry with them germs of diseases which are endemic in Oriental countries, such as Uncinariasis, Filariasis and the like, and

Whereas, The detection of such diseases requires microscopic examination of the blood, sputum, excretia, etc. etc.; and

BOARD OF HEALTH

Whereas, The spread of these diseases in this city can be prevented by a careful examination of the people from the countries where they exist; therefore be it

Resolved, That the Board of Health of San Francisco commends the careful scrutiny by the immigration officers that has resulted in the exclusion of large numbers of aliens who were found to be afflicted; and be it

Resolved, That the Board of Health of San Francisco recommends a continuation of this character of examination and the debarrment of any who may be found to carry the bacilli or parasite of contagious disease; and be it further

Resolved, That a copy of this resolution be furnished the Commissioner of Immigration at this port, one to the Bureau of Immigration in Washington, D. C., and one to the Surgeon General of the Public Health and Marine Hospital Service, Washington, D. C. and California State Board of Health.

That the establishment of this Bureau was a wise move is best indicated by the following report submitted by Dr. Herbert Gunn which shows the work accomplished by him during the six months of his incumbency.

‘I have the honor to make the following report of the work done in the Bureau of Tropical Medicine for the six months ending June 30, 1911:

Total number of individuals examined.....355

Of these about one hundred were in City Hospitals and specimens were forwarded to the laboratory for examination.

The remaining 255 were mostly visited in their abodes in various parts of the city and represented people recently arrived from tropical countries.

Total number of stools examined	233	pos. 57	neg. 166
Total number of blood smears examined.....	176		
Total number of night blood for Filaria.....	64		
Total number of Urine.....	5		
Total number of Sputum	12		

DISEASES ENCOUNTERED.

Hook worm.....	26
Trichocephalus Dispar	33
Ascaris Lumbricoides	7
Oxyuris Vermicularis	3
Schistosomum Mansoni (bilharzia Haematobium).....	1
Taenia Nana	5
Strongyloides Intestinalis	2
Balantidium Coli	5
Amebiasis	1
Sprue	1
Pinta	1
Beriberi	1
Malaria	7
Filariasis	2

While this Bureau has been investigating as far as possible all tropical diseases encountered here especial attention has been given to the subject of the importation of hookworm disease.

With the assistance of the Associated Charities 171 persons recently arrived from the sugar plantations on the Hawaiian Islands where they had been employed, were examined for this disease with the following result:

Natives of Spain—Total examined.....	135
Blood examination for eosinophilia.....	135

Eosinophile Count 5% and higher 68 or 50% plus.

Stool examinations	60
Ova hook worm present	9
Percentage infected with hookworm.....	15

Twenty-six of the sixty, or over 40% were found to harbor parasites of some sort—among which may be mentioned *Ascaris Lumbricoides*, *Oxyuris Vermicularis*, *Tricocephalis Dispar*, *Taenia Nana* and *Balantidium Coli*.

Porto Ricans examined	36
Blood examination for eosin	13
Eosin count 5% or higher	11 84%

These men were en route to Alaska and no stools could be obtained:

In the following no blood examinations have yet been made.

Porto Ricans, stools examinations, number.....	23
Hookworm ova present	12
Percentage infected with hookworm, 56 plus.	

17 of the 23 or over 73% showed parasites of some sort among which were *Ascaris Lumbricoides*, *Oxyuris Vermicularis*, *Tricocephalis Dispar*, one case of *Schistosomum Mansoni* or lateral spined *Bulharzia*, *Strongyloides Intestinalis* and *Balantidium Coli*.

In these examinations specimens were obtained from entire families and in no case was special selection made on account of apparent sickness, so that the percentage of infection, from 15 to 56, may be taken as a fair average. Many of those examined showed marked evidence of the disease, some being quite incapacitated for work, and depending on the Associated Charities for their food supplies.

Many of the children were undeveloped, some in height, and weight, being 30 to 40% below the standard for their ages.

It is quite apparent that these unfortunate people in addition to being a menace to the rural districts in which they reside, must be a source of considerable expense to the counties on account of sickness and its resultant poverty.

Most of the Hawaiian Plantation laborers after a longer or shorter sojourn in the Islands, come to the States by way of San Francisco, many locating in this city to go into the country

BOARD OF HEALTH

districts throughout the State when labor is required, or to go to the fisheries in Alaska during the fishing season. At the present time there were thousands of these people in this State or temporarily in the Alaska fisheries to return in the fall of the year.

In San Francisco there is a big colony of them always, but especially in the winter months when there is no employment in the country districts and when the Alaska fishermen have rejoined their families.

At the present time the subject is being investigated in regard to other nationalities but though cases have been encountered, a sufficient number have not yet been examined upon which to draw conclusions.

Respectfully submitted,

(Signed) HERBERT GUNN,
Bureau of Tropical Medicine."

NEW HEALTH ORDINANCES.

FOOD INSPECTION LAW.

On December 2, 1910, a resolution was adopted by the Board of Health, the following of which is a copy:

RESOLUTION.

Whereas, The adulteration of foods and the mislabeling or misbranding of food and food products, constitute a serious menace to the health of the citizens of this community, and

Whereas, The indulgence in this practice has led to the enactment of legislation through the efforts of the State Board of Health in an endeavor to check this evil, and

Whereas, The City of San Francisco is at the present time operating under ordinances which appear to be ineffective insofar as securing the conviction of offenders in general is concerned, and for this reason the Board of Health has been subjected to criticism for not enforcing the law, therefore,

Be It Resolved, That the Board of Health petition the Board of Supervisors to adopt the attached proposed ordinance which is the McCartney Pure Food Law of the State of California so modified as to permit the enforcement of same by the Board of Health of the City and County of San Francisco.

In conformity with the terms of the above resolution the Board of Supervisors on December 20th, adopted as a law the following ordinance drafted by this Department:

ORDINANCE NO. 1426 (New Series.)

(Approved December 20, 1910.)

Regulating the Manufacture, Production, Compounding, Packing, Selling, Offering or Keeping for Sale Articles of Food or Liquor, and Prohibiting the Adulteration, Mislabeling Misbranding of the Same.

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The manufacture, production, preparation, compounding, packing, selling, offering for sale or keeping for sale within the City and County of San Francisco, or the introduction into this City from any other country, State, Territory or the District of Columbia, or from any foreign country, of any article of food or liquor which is adulterated, mislabeled or misbranded within the meaning of this Act is hereby prohibited. Any person, firm, company or corporation who shall import or receive for many other county, State or Territory, or the District of Columbia, or from any foreign country, or who having so received shall deliver for pay or otherwise, or offer to deliver to any other person, any article of food or liquor adulterated, mislabeled or misbranded within the meaning of this act, or any person who shall manufacture or produce, prepare or compound, or pack or sell, or offer for sale, or keep for sale in the City of San Francisco any such adulterated, mislabeled or misbranded food, or liquor, shall be guilty of a misdemeanor; provided that no article of food shall be deemed adulterated, mislabeled or misbranded within the provisions of this Act when prepared for export beyond the jurisdiction of the United States and prepared or packed according to the specifications or directions of the foreign purchaser, when no substance is used in the preparation or packing thereof in conflict with the laws of the foreign country to which said article is intended to be shipped; but if such food shall be in fact sold, or kept or offered for sale for domestic uses and consumption, then this proviso shall not exempt said article from the operation of any provision of this Act.

Section 2. The term food as used in this Act shall include all articles used for food, drink, liquor, confectionery or condiment by man or other animals, whether simple, mixed or compound.

Section 3. The standard of purity of food and liquor shall be that proclaimed by the Secretary of the United States Department of Agriculture, where standards are not fixed by Ordinance of the City and County of San Francisco.

Section 4. Food shall be deemed adulterated within the meaning of this Act in any of the following cases:

First—If any substance has been mixed or packed, or packed with the food so as to reduce or lower or injuriously affect its quality, purity, strength or food value.

Second—If any substance has been substituted wholly or in part for the article of food.

Third—If any essential or any valuable constituent or ingredient of the article of food has been wholly or in part abstracted.

Fourth—If the package containing it or its label shall bear in any manner whereby damage or inferiority is concealed.

Fifth—If it contain any added poisonous or other added deleterious ingredient.

BOARD OF HEALTH

Sixth—If it consists in whole or in part of a filthy, decomposed or putrid animal or vegetable substance, or any portion of an animal or vegetable unfit for food, whether manufactured or not, or if it is the product of a diseased animal, or one that has died otherwise than by slaughter; provided that an article of liquor shall not be deemed adulterated, mislabeled or misbranded if it be blended or mixed with like substance so as not to injuriously lower or injuriously reduce or injuriously affect its quality, purity or strength.

Seventh—In the case of confectionery: If it contains terra alba, barytes, talc, chrome yellow, or other mineral substances or poisonous color or flavor, or other ingredient deleterious or detrimental to health, or any vinous, malt or spirituous liquor or compound or narcotic drug.

Eighth—In the case of vinegar: If it be artificially colored.

Ninth—If it does not conform to the standard of purity therefor as proclaimed by the Secretary of the United States Department of Agriculture, when not fixed by Ordinances of the City and County of San Francisco.

Section 5. That the term "misbranded" as used herein shall apply to all articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food product which is falsely branded as to the county, city and county, city, town, State, Territory, District of Columbia or foreign country in which it is manufactured or produced.

Section 6. Food and liquor shall be deemed mislabeled or misbranded within the meaning of this Act in any of the following cases:

First—If it be an imitation of or offered for sale under the distinctive name of another article of food.

Second—If it be labeled or branded or colored so as to deceive or mislead, or tend to deceive or mislead the purchaser, or if it be falsely labeled in any respect, or if it purport to be a foreign product tending to mislead the purchaser, or purport to be a foreign product when not so, or if the contents of the package as originally put up shall have been removed in whole or in part and other contents shall have been placed in such package.

Third—If in package form, and the contents are stated in terms of weight or measure, they are not plainly and correctly stated on the outside of the package.

Fourth—If the package containing it or its label shall bear any statement, design or device regarding the ingredients or the substance contained therein, which statement, design or device shall be false or misleading in any particular.

Fifth—When any package bears the name of the manufacturer, jobber or seller, or the grade or class of the product, it must bear the name of the real manufacturer, jobber or seller, and the true grade or class of the product, the same

to be expressed in clear and distinct English words in legible type; provided that an article of food shall not be deemed misbranded if it be a well known product of a nature, quality and appearance and so exposed to public inspection as not to deceive or mislead, nor tend to deceive or mislead a purchaser, and not misbranded and not of the character included within the definitions 1 to 4 of this section.

Sixth—If, having no label, it is an imitation or adulteration, or is sold or offered for sale under the name, designation, description or representation which is false or misleading in any particular whatever; and in case of eggs and poultry, if they have been kept or packed in cold storage, or otherwise preserved, they must be so indicated by written or printed label or placard plainly designating such fact when offered or exposed for sale.

Section 7. The term "package" as used in this Act shall be construed to include any phial, bottle, jar, demijohn, carton, bag, case, can, box or barrel, or any receptacle, vessel or container of whatsoever material or nature which may be used by a manufacturer, producer, jobber, packer or dealer for enclosing any article of food.

Section 8. The possession of any adulterated, mislabeled or misbranded article of food or liquor by any manufacturer, producer, jobber, packer or dealer in food, or broker, commission merchant, agent, employe or servant of any such manufacturer, producer, jobber, packer or dealer, shall be prima facie evidence of the violation of this Act.

Section 9. The Board of Health and all its officers, agents and employes shall have the right at any time to obtain by purchase a sample of food from any person, persons or concern selling or exposing for sale or exchanging in the City and County of San Francisco, such sample to be taken and sealed in full view and in the presence of the person from whom said sample is taken, and shall then and there furnish to the person from whom such sample is taken approximately one-half such sample sealed, and shall deliver to the said Board of Health immediately the sample so taken properly sealed.

Section 10. No dealer shall be prosecuted under the provisions of this Ordinance when he can establish a guaranty signed by the wholesaler, jobber, manufacturer or other party residing in the United States from whom he purchased such article to the effect that the same is not adulterated, mislabeled or misbranded within the meaning of this Ordinance, designating it. Said guaranty to afford protection, must contain the name and address of the party or parties making the sales of such article to said dealer, and an itemized statement showing the articles purchased; or a general guaranty may be filed with the Secretary of the United States Department of Agriculture by the manufacturer, wholesaler, jobber or other party in the United States and be given a serial number which number shall appear on each and every package of goods sold under such guaranty, with the words, "Guaranteed under the

food and drugs act June 30, 1906.''' In case the wholesaler, jobber, manufacturer or other party making such guaranty to said dealer resides within this State, and it appears from the report of the City Chemist that such article or articles were adulterated, mislabeled or misbranded within the meaning of this Ordinance, or the National Pure Food Act, approved June 30th, 1906, the District Attorney must forthwith notify the Attorney General of the United States of such violation.

Section 11. Any person, firm, company or corporation violating any of the provisions of this Ordinance shall be guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than twenty-five dollars, nor more than five hundred dollars, or shall be imprisoned in the County Jail for a term not exceeding six months, or by both such fine and imprisonment. Food found to be adulterated, mislabeled or misbranded within the meaning of this Ordinance may be seized and destroyed.

Section 12. This Ordinance shall take effect and be in force immediately after its passage.

The operation of the foregoing ordinance now renders it possible for this Department to reach violators of the Pure Food Law, where heretofore they had been practically immune from punishment, owing to the fact that in order to secure prosecutions we were obliged to proceed under the state law. This ordinance now invests us with the power to proceed against offenders directly and in many instances we have issued citations directing store keepers and others to appear before the Board on their first offense and a severe reprimand has in most every instance proved to be sufficient warning. In the case of persistent offenders we have no difficulty in securing convictions in the Police Court under the terms of our ordinance.

REGULATING THE SALE OF BUTTER.

An act approved November 22nd, 1910, regulating the sale of butter and preventing fraud in the sale thereof and fixing penalties for selling same at less than true weight, was adopted and is here reproduced as passed, for the reason that it has some bearing on the preceding pure food law.

ORDINANCE NO. 1383 (New Series.)

(Approved November 22, 1910.)

An Ordinance Regulating the Sale of Butter; Preventing Fraud in the Sale Thereof, and Prohibiting such Sale by Less than True Net Weight Thereof.

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. It shall be unlawful for any person, firm or corporation to sell, or offer for sale, or to cause or permit to be sold or offered for sale, any butter in prints or packages, or otherwise, other than by, or in terms of pounds and ounces, avoirdupois, or far a greater weight than the true net weight thereof.

Section 2. Any person, firm or corporation who shall violate any of the provisions of this Ordinance shall be punished by fine of not less than \$10.00 nor more than \$100.00, or by imprisonment in the County Jail for a period of not less than five days, nor more than fifty days, or both such fine and imprisonment.

Section 3. This Ordinance shall take effect and be in force immediately.

REGULATING BREAD CONTAINERS.

On December 9th, 1910, the Sanitation Committee of the Board of Health submitted a proposed draft of an ordinance covering the matter of receptacles for bread and bakery products and after many conferences with the master bakers of the City, and others interested said proposed ordinance was adopted by the Board of Health and forwarded to the Board of Supervisors, was signed by his Honor the Mayor, and on May 11th, 1911, became a law, said ordinance here being given in full:

BILL NO. 1738. ORDINANCE NO. 1550. (New Series.)

An ordinance to provide against the receiving or delivering of bread or other bakery products at any bakery store, shop or stand when the same is closed, except that for the reception and delivering of such bread or bakery products a proper receptacle be provided, prescribing the character of such receptacle, and the penalties for the violation of this Ordinance.

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. It shall be unlawful for any person, firm or corporation to conduct and maintain, or carry on, or cause to be conducted, maintained or carried on, any bakery, store, shop or stand where there is to be received or delivered bread or other bakery products, unless the said bakery, store, shop or stand be provided with proper receptacles for bread, or other bakery products, as herein provided.

Section 2. Every bakery, store, shop or stand where bread or other bakery products of any kind are received or delivered, shall be provided with a wooden receptacle for the reception and protection of bread or other bakery products, and into which all bread or other bakery products shall be placed when delivered as herein provided.

Section 3. (a) The said receptacle for the reception of bread or other bakery products as aforesaid shall be constructed of clear pine board, dressed on both sides, and shall have not less than two coats of paint on the outside. The outside must present a smooth surface, with no bottom or side mouldings thereon. The receptacle shall be furnished with four bent iron legs, each two inches in height, fastened to two cleats which shall extend across the bottom of the receptacle,

one inch from the ends of the receptacle, and the ends of said cleats shall extend to within one inch from the side thereof. The inside corners shall be filled and reinforced with right angle pine uprights with smooth surfaces to exclude dust accumulating in corners of receptacle.

(b) There shall be no aperture, no openings in the said receptacle, and the top thereof shall be placed in a position slanting toward the front and shall extend one inch over the sides and front of said receptacle, and shall be used as a cover therefor, and shall be attached thereto with two hinges at the top and back, and be furnished with appliances for locking the cover on receptacle at the front.

(c) The minimum size of such receptacle shall be twenty (20) inches in length, fifteen (15) inches in width, and eighteen (18) inches in height, exclusive of legs, and of whatever size said receptacle shall be built, it shall, in the main, adhere to the proportions in the minimum size as hereinbefore set forth.

Section 4. Such a receptacle as aforesaid shall be placed and kept in a convenient place for the reception and delivering of bread or other bakery products outside any bakery, store, shop or stand as aforesaid at any time, and at all times, when the said bakery, store, shop or stand is closed between the hours of six (6) o'clock in the afternoon of any day and eight (8) o'clock in the forenoon of the following day, and the said receptacle shall be taken into and kept inside said bakery, store, shop or stand at and during all times when bread or other bakery products may be delivered to and into said bakery, store, shop or stand.

Section 5. Any person, firm or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be punished by a fine not to exceed five hundred (\$500) dollars, or by imprisonment in the County Jail for not more than six (6) months, or by both such fine and imprisonment.

Section 6. This ordinance shall take effect and be in force thirty (30) days after its passage.

The Board of Supervisors, San Francisco, May 8, 1911.

After having been published five successive days, according to law, taken up and finally passed by the following vote:

Ayes—Supervisors Bancroft, Cutten, Deasy, Hayden, Healy, Herget, Kelly, Knowles, Loughery, Minehan, Murdock, Nelson, Nolan, O'Dowd, Pugh, Walsh.

Absent—Supervisors Harris, Hocks.

W. R. HAGERTY, Clerk.

Approved, San Francisco, May 11, 1911.

P. H. McCARTHY,
Mayor and ex-officio President of the Board of Supervisors.

REGULATING VENTILATION OF NICKELODEONS.

On May 22nd, 1911, the Board of Supervisors at the urgent request of the Board of Health adopted an amendment to the Building Law in order to give the Board of Health power to abate nuisances in nickelodeons, etc., where the cubic air law was being constantly violated. On May 23rd, His Honor the Mayor affixed his signature to said amendment and same became a part of the Building Law. The amendment as adopted is here submitted:

BILL NO. 1608. ORDINANCE NO. 1567. (New Series.)

Amending Ordinance No. 1008 (New Series), known as "The Building Law," by adding a new section thereto, to be numbered 189A, relating to cubic air space.

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. Ordinance No. 1008 (New Series), known as "The Building Law," is hereby amended by adding a new section thereto, to be numbered Section 189A, to read as follows:

Section 189A. In all buildings which are designated to be used in whole or in part as public buildings, public or private institutions, school houses, churches, public places of assemblage, or places of public resort, and all buildings which are designed to be used in whole or in part as factory, workshop, mercantile or other establishment, and with accommodations for ten or more employes, provision shall be made for at least fifteen square feet of floor space and 200 cubic feet of air space for each occupant to be accommodated in each room therein, and for supplying at least thirty cubic feet of pure air per minute for each occupant thereof.

In every building or part of building, intended for audience room only, as a theater, hall or nickelodeon, provision shall be made for supplying at least thirty cubic feet of pure air per minute for each occupant thereof.

Section 2. This Ordinance shall take effect immediately.

In Board of Supervisors, San Francisco, May 22, 1911.

After having been published five successive days, according to law, taken up and finally passed by the following vote:

Ayes—Supervisors Bancroft, Cutten, Deasy, Hayden, Healy, Herget, Hocks, Kelly, Knowles, Loughery, Minehan, Murdock, Nelson, Nolan, O'Dowd, Pugh, Walsh.

Absent—Supervisor Harris.

W. R. HAGERTY, Clerk.

Approved, San Francisco, May 23, 1911.

P. H. McCARTHY,
Mayor and ex-officio President of the Board of Supervisors.

In connection with the foregoing ordinance an arrangement has been effected with the co-operation of the Police Commission that no license to operate a show of this character will be granted by said commission, nor will old licenses be renewed until an inspection has been made by the officials of this department and a certificate issued to the effect that all the requirements of the above mentioned ordinance have been complied with. This in itself is a very important piece of legislation as there are 72 show houses rated as "nickelodeons" now operating in this city, and they are most liberally patronized, therefore the provisions made for an adequate supply of fresh air for the patrons of these places of amusement is an essential necessity for the protection of the public health.

REMOVAL OF DEAD ANIMALS.

The Board of Health, by virtue of the difficulties experienced in the proper handling of dead animals, fowl, etc., found upon the public streets, deemed it expedient to adopt the following resolution at a meeting held on January 17th, 1911:

RESOLUTION.

Whereas, It has come to the notice of the Board of Health that the terms of the contract made by the Board of Supervisors to purchase all of the rights, privileges, franchises and property of the Sanitary Reduction Works and the Standard Manufacturing and Supply Co., will be consummated about the 23rd day of February, 1911, and

Whereas, Upon completion of said purchase the City will take over the plant of the Reduction Works and either operate it through the Board of Public Works or permit private parties to operate same pending the erection of the new crematories provided for by the bond election of May 1908, and

Whereas, The proper disposal of the remains of animals and fowl found dead upon the streets, and the animals destroyed in the Public Pound, or other animals or fowl which may die of disease, accidents, or from other causes, throughout the city and county, is a matter of most vital importance, and

Whereas, The disposition of said class of animals is not at present carried on in a manner thoroughly satisfactory to the Board of Health and the citizens of this community, therefore, be it

Resolved, That the Board of Health in regular meeting assembled, recommends to the Board of Supervisors the issuance of proposal for bids on a franchise for a term of years to cover the removal and destruction of dead fowl and animals found upon the streets and in enclosures, and killed in the public Pound, said work to be under the direct supervision and inspection of the Board of Health.

Up to the close of the fiscal year no action had been taken by the Board of Supervisors on this recommendation, no doubt owing to the fact that pending the construction of the city garbage crematory, etc., the present plan of permitting the Sanitary Reduction Works to attend to this feature has been continued and we have every reason to believe that as soon as the city com-

pletes its own garbage crematory that some arrangement as above outlined will be effected.

All of the foregoing matters of legislation are submitted for perusal as an indication that this Board has fully realized the importance of the enactment of proper health laws for the safeguarding of the health, comfort and happiness of our citizens.

BUREAU OF SANITATION.

A full and detailed report of the work performed by the Sanitary Inspectors of this Department showing the number of inspections on complaints of nuisances and investigation of communicable diseases will be found on Page 195 of this report.

INFANTILE PARALYSIS.

At a meeting of the Board of Health held on September 15th, 1910, the President of the Board stated that such authorities as Dr. Simon Flexner and others have agreed that Acute Anterior Polyomyelitis (commonly known as Infantile Paralysis) is of a contagious character, and inasmuch as a number of these cases have come under the observation of practicing physicians in this city, it would no doubt be for the best interests of the health of the community to declare this a disease to be isolated in the same manner as cases of diphtheria, scarlet fever, etc., and a resolution was adopted by the Board that such recommendation be adopted as a precautionary measure, it being deemed wiser to take this step pending the result of the research work of the authorities on this subject, than to expose children to the possible danger of contagion.

COMMUNICABLE DISEASES.

A full report of contagious diseases reported and investigated appears on page 194 of this report, and should be consulted in order to get an adequate idea of the amount of work performed in this very important division.

CRUSADE AGAINST FLIES.

As indicated in the report for the fiscal year 1909-1910 special attention has been given as far as it has been possible so to do to eliminate the common house fly as a carrier of contagion. On September 2nd, 1910, five special inspectors were appointed for this particular purpose and that good results have been obtained are best substantiated by the fact that we have kept down the number of cases of typhoid fever of local origin to a very small figure, as compared to previous years. This work is still being carried on and will continue until every feature which encourages the propagation of this dangerous insect is eliminated.

DISPOSAL OF REFUGEE SHACKS AND INSANITARY STABLES AND DWELLINGS.

The special attention of the reader is called to the report of "Board Actions on Insanitary Premises" which appears on pages 192 and 193 of this report. This will give a very clear and comprehensive idea as to the important work done by this Board in the direction of cleaning up the city and removing unsightly and insanitary buildings.

BUREAU OF PLUMBING INSPECTION.

In conformity with the usual custom, the Chief Plumbing Inspector of the Department attended the conference of the American Society of Inspectors of Plumbing and Sanitary Engineering at Milwaukee, Wisconsin, during February, 1911, as a representative of this Department. No legislation of great importance was enacted, but the presence of a representative from the city is always deemed necessary at these conferences inasmuch as San Francisco is recognized as one of the leading cities in the country in so far as its plumbing and drainage laws are concerned.

One of the most important matters brought before the Board of Health during this year was that which is known as "The Red Sea" nuisance, this consisting of a pond of impounded water covering an area of two square blocks in what is known as the "Potrero District." This condition was created by the filling in of railroad properties which had the effect of cutting off from the main portion of the bay this body of water, which became a very grave nuisance owing to the fact that the plumbing fixtures of a number of dwellings were emptying therein, and vast quantities of water from adjacent factories were daily being emptied into this pond. After numerous conferences with Improvement Associations and other civic bodies, on November 4th, 1910, a resolution was adopted by the Board of Health to the effect that all premises, the plumbing and drainage fixtures of which were emptying sewage or other matter into this body of water be condemned. This brought the matter to an immediate issue with the result that the factories in the vicinity of this point constructed a private sewer connecting with one of the city's main sewers, and the plumbing fixtures of the various dwellings mentioned were connected to this private sewer with the result that the nuisance, in so far as sewage discharges therein was concerned, was abated. The next step towards the complete obliteration of this body of water will be through the filling in of the entire area with solid rock. This will not alone abate an insanitary condition that has long existed, but will open up to use a valuable tract of land.

DIVISION OF DAIRY AND MILK INSPECTION.

A complete tabulated report of the work of these divisions will be found on pages 207 and 208 of this report. The inspection of milk is considered by the Department of Public Health to be one of its most important functions and an idea of the work performed can best be obtained by consulting the reports of these divisions. In connection therewith reference should also be made to the record of arrests appearing on pages 212 and 213 of this report. It will be readily seen from the number of arrests made and fines imposed upon offenders that we are leaving no stone unturned to render the milk supply of our city pure and wholesome.

Some difficulty having been experienced in securing convictions owing to the efforts of technical lawyers to nullify the provisions of Section 16 of Ordinance No. 660, known as the "Milk Law," the Board of Health deemed it necessary on September 15th, 1910, to add to said ordinance the following section:

"SECTION 16A."

"It shall be unlawful for any person or persons, firm or corporation by themselves, or by their agents, servants or employees to bring, or cause to be brought within the city and county of San Francisco, State of California, any impure, adulterated, unhealthful or unwholesome milk."

The adoption of this amendment has tightened up our milk ordinance so that we are now enabled to secure more convictions against offenders than formerly. The prevailing sentiment among the Police Judges before whom this type of offender is brought appears to be on the side of the enforcement of our ordinances, with the result that in several instances we have secured single fines as high as \$200 or \$300 against persistent offenders who previously have been satisfied to pay their fine of \$10 or \$20, risking the chance of being caught again. The imposition of these heavy penalties has had a salutary effect and as a consequence we have been enabled to stop the traffic in impure milk among a number of chronic offenders.

Under the report of the Chemical Laboratory, there will be found a statement touching upon the refractive index for determining the presence of added water in milk.

In this connection it may be well to state that over 1,000 cows have been examined and tested for the purpose of refractometer readings in this connection.

DAIRIES WITHIN THE CITY LIMITS.

In, my previous report I stated that Ordinance known as "No. 731," regulating the keeping of cattle would become effective from and after August 1st, 1910. Immediately after this law became operative, efforts were made to enforce same with a view to clearing out all of the dairies within the city limits. All of the dairymen interested (nine in number) upon conviction in the Police Court, appealed to the Superior Court. These cases are still pending, and no doubt some time will elapse before the hands of this Department are freed sufficiently to proceed to enforce the terms of this law.

BUREAU OF MEAT INSPECTION.

The full text of the Meat Inspection Law was given in our previous annual report. Up to the adoption of said Ordinance No. 1265, approved on August 1st, 1910, five inspectors had covered the field of meat inspection. On August 26th, 1910 this force was increased to ten additional inspectors, bringing the working force up to fifteen. The report of the Division of Market Inspection which appears on pages 204-206 of this report, will readily demonstrate that magnificent work is now being performed in the line of meat inspection. On a number of occasions we have had minor difficulties with the matter of shipment of carcasses from outside points through a misunderstanding or misinterpretation of the wording of our ordinances and in all cases where carcasses have been shipped into the city, they have been promptly confiscated, coal-oiled and sent to the Sanitary Reduction Works. This mode of treatment has proved most effective and has in several instances induced local Boards of Health in the counties adjacent to San Francisco to formulate laws along the same lines as our own and establish a Bureau of Meat Inspection which will be recognized by this Department according to the terms of the ordinance.

On November 25th, 1910, in compliance with the request of representatives of the Allied Butcher's Trades of San Francisco, a resolution was adopted by the Board of Health to the effect that cards be printed and posted in every meat market and fruit store in San Francisco, prohibiting the entrance of dogs into such premises. Such cards were subsequently prepared and freely distributed throughout the city with the result that a long standing nuisance has been abated.

DIVISION OF SCHOOL MEDICAL INSPECTION.

In connection with this most important work of the Health Department a resolution was adopted under date of October 14th, 1910 the following of which is a copy:

"RESOLUTION."

"Whereas, Experience has demonstrated that school medical inspection is one of the most important duties devolving upon the Board of Health, and

Whereas, Since the inauguration of said system of inspection considerable work of inestimable value has been performed by the corps of women inspectors now engaged in this work, and

Whereas, There are eighty-five schools in operation in this City and County, and the present force at the command of the Board of Health are unable to cover but twenty of this number, and the demand for more inspectors is becoming very urgent, owing to the fact that many schools now uncovered by said inspection are requesting assistance, and

Whereas, The plan of school medical inspection is one that makes it possible to keep under control and minimize to a large extent the dissemination of contagious diseases peculiar to children, such as diphtheria, scarlet fever, measles, chicken-pox, whooping cough, contagious skin diseases, etc., etc., therefore,

Be It Resolved, That the Honorable Board of Supervisors be and they are hereby requested to set aside a sum sufficient to enable the Board of Health to employ ten (10) additional women inspectors of schools at a salary of \$75.00 per month each for the remainder of the fiscal year 1910-1911."

In compliance with the terms of the foregoing resolution, the Board of Supervisors set aside a sum sufficient to enable this Department to employ six additional Health Inspectresses of Schools bringing our force up to ten, which has rendered it possible to greatly increase the scope of our work. It is an assured fact, that upon the opening of the fiscal year, namely July 1st, 1911, four additional Health Inspectresses and two assistants to the Chief Medical Inspector will be appointed, thus enabling the Department to cover every school operating in the city.

A detailed report of the work performed in this division, also remarks by the Chief Medical Inspector of Schools, will be found on pages 188 and 189 of this report, to which the reader is respectfully referred for interesting information.

CHEMICAL LABORATORY.

A detailed tabulated report of the work performed in this division will be found on pages 214-283 of this report, all of the work accomplished being given in comprehensive shape for ready reference.

COPPER IN OYSTERS.

In November, 1910, the Food Inspectors of this Department discovered in various places oysters offered for sale, that appeared to possess a peculiar color. Samples of these were taken from various places around the city and submitted to the Chemist for analysis, with the result that copper in large quantities was found in these bivalves. When this result became known the inspectors of the Food Bureau were directed to bring in more samples and of eight submitted seven showed the presence of copper in quantities. All of the samples submitted were of oysters shipped in to the city from Eastern points by the gallon,

that is, open and ready for use. Analysis made of native grown oysters failed to show the presence of copper. As soon as the findings of the Chemist were published the United States Department of Agriculture in this city, also in Washington, D. C. were advised of the result and a crusade was at once started against the concerns shipping these oysters into the city, and we have succeeded in driving this product out of the local market.

In connection with the subject of oysters, on February 21, 1911, a bill known as "Senate Bill No. 961" was presented to the Board of Health for its perusal. This was entitled "An Act Controlling Sanitation of Shell Fish Grounds and premises where shell fish are opened, packed or prepared for the market, and controlling the Sale of Oysters and Shell Fish for food purposes and providing a penalty." Said bill in its general terms met with the approval of this Board and on our recommendation a section was added to said bill reading as follows:

"Section No. 10. No person, firm or corporation, shall hereafter establish, or cause to be established, any oyster or shell fish grounds at any point within the area of deposit of any sewage system, said area to be determined by the State Board of Health."

ELECTRIC WATER HEATERS.

Much attention has been given to the investigation of so called "Electric Water Heaters." This device heats water or other liquid by immersing same in a vessel, and turning on an electric current. Experiments made by the Chemist demonstrated that the use of these instruments caused a copper deposit to be precipitated into the vessel. This clearly showed that the use of this invention was positively dangerous, especially where it might be used in heating or warming milk to be fed to infants. The Health Officer was at once notified to instruct the firms handling these heaters to discontinue the sale of same under penalty of arrest. This action has had the effect of putting a number of these dangerous devices entirely out of business.

BACTERIOLOGICAL LABORATORY.

A complete report of the work performed in this division will be found on pages 284-287 inclusive.

In connection with this work I quote herewith a resolution adopted by the Board of Health at a meeting held on December 27, 1910:

"Whereas, It has been the practice in the past of the Department of Public Health to supply free of charge, diphtheritic antitoxin in deserving cases upon the certification of a reputable physician that the people are unable through lack of funds to purchase same themselves; and

Whereas, Experience has demonstrated that the free distribution of said antitoxin within reasonable bounds has proved of inestimable value in saving the lives of young children as well as adults afflicted with diphtheria; and also as a preventive when used on unaffected children in households where diphtheria is prevalent when administered as an immunizing dose; and

Whereas, It has recently developed that the funds at the disposal of the Health Department have been inadequate to

meet the demands made for this serum, and as a consequence it has been found necessary to refuse to furnish said serum to several applicants;

Therefore Be It Resolved, That the Board of Health petition the Health and Hospital Committee of the Board of Supervisors to use all legitimate means within their power to secure an appropriation of \$25.00 per month for the remainder of the current fiscal year to be set aside for the use of the Health Department in the purchase of diphtheritic antitoxin for free distribution."

I am pleased to state that the Board of Supervisors has seen fit to accede to the foregoing request and we are now in a position to supply diphtheritic antitoxin in cases where the parents or patients are unable to purchase same, thus saving lives that might be sacrificed for the want of this very valuable serum.

CITY PHYSICIAN.

INSPECTION OF IMMIGRANTS FROM CHOLERA INFECTED PORTS.

A detailed report of the work accomplished by this official will be found on page 340 of this report.

Beginning with the month of December, 1910, the Secretary of the State Board of Health at Sacramento has been furnishing this Department with a list of the names of immigrants who had arrived at various eastern ports from cholera infected ports in Europe, with San Francisco as their ultimate destination. The information furnished by the State Board of Health gives the location and street number of each immigrant, and it is the duty of the City Physician to make a personal inspection of each individual so named in order to determine if such person is absolutely free from the possibility of Cholera infection. This work still continues and will be carried on indefinitely and no chances will be taken to permit of the slightest opportunity of this disease taking hold in this city.

CITY AND COUNTY HOSPITALS.

The close of this fiscal year marks the passing of Ingleside as a temporary City and County Hospital and the custom which has obtained for the past few years of sending acute city cases to private hospitals has ceased. This is made possible owing to the fact that the Infirmary Building on the Relief Home Tract is now fully equipped for Hospital purposes with the capacity for accommodating 400 patients. The trials and tribulations of the Health Department in the handling of the city's indigent sick have been many and just at the particular time when we thought that our troubles were about to be satisfactorily adjusted, Building No. 3 of the Relief Home for the Aged and Infirm, and housing one hundred bed ridden and helpless patients was destroyed by fire on May 23, 1911. Owing to prompt and efficient work the result of splendid organization, all of these patients were safely removed without a single casualty. It became necessary to find at least a temporary shelter for these unfortunates, and they were removed to Ingleside. This had hardly been accomplished when a notice was received from the proprietor of the Ingleside grounds that we must vacate said premises within a period of sixty days from May 31st, 1911. The problem of handling our acute cases had already been solved through the equipment of the Infirmary Building as before mentioned, but here we were confronted with the proposition of housing 150 tubercular cases and a number of contagious disease cases together with the hundred bed ridden patients from Building No.

3. The Board of Health fully alive to the seriousness of the situation, on May 26th, adopted the following:

“RESOLUTION.”

“Whereas, The Urban Realty Improvement Company of San Francisco has served notice upon the Department of Public Health to vacate the premises whereon is located the temporary City and County Hospital at Ingleside within the period of sixty days from May 31, 1911, and

Whereas, The Department of Public Health is confronted with the problem of taking care of several hundred indigent persons all in need of hospital treatment, and

Whereas, Owing to the destruction by fire of Building No. 3, on the Relief Home Tract, approximately 100 inmates of the Relief Home are at this time being cared for under conditions not of the most favorable character, therefore, be it

Resolved, That the Board of Health in special meeting assembled this 26th day of May, 1911, petitions the Honorable Board of Supervisors to take the necessary steps to provide for the following arrangements for the care of the city's sick and aged infirm:

First: That a temporary barracks be constructed on the Relief Home grounds sufficiently large to house 150 inmates, 100 of said inmates being those taken from Building No. 3, Relief Home, and 50 chronic cases from the City and County Hospital at Ingleside.

Second: That a temporary roof be constructed over the ruins of Building No. 3, Relief Home, for the care of tubercular patients, and that additional bath rooms and toilets be constructed adjacent to same.

Third: That 100 tents be erected for the housing of tubercular patients; platforms to be constructed around No. 3 building, upon which said tents may be set; also, to provide for constructing a fence around said platforms. And be it further

Resolved, That owing to the extraordinary circumstances attending present conditions at Ingleside and the Relief Home, that the Honorable Board of Supervisors be respectfully urged to make immediate provision for the foregoing requirements.”

The recommendations contained in the foregoing resolution were based upon the actual conditions then presenting themselves and appeared to be the most expeditious plan to properly care for the people under our charge. Subsequently, however, plans were adopted whereby temporary frame buildings were constructed upon the site of the new San Francisco Hospital, 22nd and Potrero Avenue, enabling us to remove our 150 tubercular patients thereto, where they are now segregated into three classes, namely incipient, advanced and hopeless cases.

The contagious cases were provided for through the remodeling of the Isolation Hospital on Army and De Haro Street, whereby a section of said hospital was fitted up for the reception of this class of patients. The Relief Home inmates were then taken care of by remodeling certain portions of the Relief Home Buildings, and our troubles are, temporarily at least, at an end.

The work of completion of the new San Francisco Hospital is progressing as rapidly as circumstances will permit, and it is estimated that perhaps two

years more will elapse before this two million dollar group of buildings is fully completed and ready for occupancy. The City and County Hospital as at present constituted consists of three separate and distinct units, practically conducted as one institution and affairs are so arranged that it is possible to give to all patients the best of care at a minimum expense.

REPORTS OF BUREAUS.

The reports of the Bureau of Sanitation including:

- Medical Inspection of Schools
- Board Actions on insanitary premises
- Communicable diseases
- Division of Sanitary Inspection
- Division of Sanitary Disinfection
- Division of Plumbing Inspection
- Examinations for Master Plumbers
- Division of Market Inspection
- Division of Food Inspection
- Division of Dairy Inspection
- Division of Milk Inspection
- Division of Industrial Inspection
- Division of Garbage Inspection
- Division of Truck Garden Inspection
- Records of arrests made

will be found under their respective headings and should be consulted in order to gain an intimate knowledge of the work performed in these various divisions. As these reports are given in detailed and tabulated form it is deemed an unnecessary repetition to again reproduce them under the caption of the President and Health Officer's report.

REPORTS OF INSTITUTIONS.

Complete tabulated reports of the various institutions under the control of the Board of Health will be found as set forth below:

- City and County Hospital, Page 288.
- Relief Home for Aged and Infirm, Page 315.
- Emergency Hospitals, Page 332.
- Isolation Hospital, Page 338.

Respectfully,

GEORGE LEE EATON, M. D.
President Board of Health.

W. F. McNUTT, JR.
Health Officer.

Report of the Bureau of Sanitation

LOUIS P. MONACO, Clerk

REPORT OF THE MEDICAL INSPECTION OF SCHOOLS.

San Francisco, Cal., Sept. 18, 1911.

To the Honorable,
The Board of Health,
of the City and County of San Francisco.

Gentlemen:—I have the honor to submit herewith the annual report of the Department of Medical Inspection of Schools.

During the past year we have succeeded in augmenting the number of Health Inspectresses of Schools, thereby enabling us to cover fifty-seven schools of the eighty-eight in the city. The contrast between the last yearly report and the present one is very marked. We have accomplished a greater and more perfect result.

The following is a tabulated list of the work performed during the fiscal year beginning July 1st, 1910, and ending June 30th, 1911. Tabulation has been compiled from this Department's weekly and monthly reports for the year, the figures being accurate.

DIVISION OF SCHOOL MEDICAL INSPECTION

DR. E. L. WEMPLE, Medical Inspector

Health Inspectresses

Mrs. Madge Dake
Mrs. A. Frisbie
Josephine Graham

Vaccinations:	
Remaining from last month.....	1,657
Found to be Unsuccessfully Vaccinated.....	1,023
Never Vaccinated.....	484
Total.....	2,680
Vaccinated during month.....	56
Remaining to be Vaccinated.....	2,624
Examinations.....	9,716

It will be seen from said tabulation that out of the total number of pupils (26,928), there have been 783 operations performed by the family physician. This has been accomplished by the constant suggestion and urging of the nurse in the school. Also 216 children have been treated for various ailments by the family physician. The volume of work accomplished by the nurse both in the school and the home can be seen by the figures taken from the tabulation, there being 30,958 examined by the nurse in the school, 2,271 dressings, 2,007 treatments. The number of visits made to the home by the nurse recently figures 3,036, which may give some idea of the time consumed by the nurse in following up the various cases needing attention.

Owing to a change in our vaccination law, it will be seen that many children are attending school without being vaccinated. During the year as the nurse goes about among the schools she makes vaccination examinations and it seems that out of the total number of pupils examined, there are 515 who have never been vaccinated. This figure may be an interesting one at some future date.

During the year 3,542 children have been personally seen by the Chief Medical Inspector.

The following is a complete statement of the various diseases found to exist in the schools:

CONDITION—

Anemia	29
Enlarged Glands	100
Poorly nourished	28
Scrofula	10

EAR—

Defective Hearing	145
Discharging ears	100

EYE—

Astigmatism	23
Ch. Inflammation of lids	87
Ch. Inflammation of Conjunctiva	44
Corneal scars	8
Hypermetropia	53
Myopia	136
Strabismus	129
Twitchings	8
Defective vision	175

HEART—

Murmur	16
Irregular	7

LUNGS—

Tuberculosis	1
--------------------	---

MOUTH, NOSE AND THROAT—

Adenoids	627
Defective Palate	9
Hypertrophied Tonsils	1,019
Mouth breathing	670
Nasal obstruction	91
Ozena	7
Tonsillitis, acute	11
Hare lip	1

NERVOUS SYSTEM—

Convulsions	6
Chorea	9
Defective mentality	33
Epilepsy	8
Paralysis	9
Facial paralysis	1

OSSEOUS STRUCTURE—

Deformity of spine	27
Deformity of extremities	29
Hip disease	28

SKIN—

Furunculosis	19
--------------------	----

SPEECH—

Stammering	8
------------------	---

Owing to the fact that the additional six nurses have been employed but six months of the years the results obtained are not in proportion to the field under inspection.

After July, 1911, we expect to have added to our department five inspectresses making a total of fourteen, and also two Assistant Medical Inspectors.

During the ensuing year all of the schools will be under inspection, thereby making the work complete.

The next annual report will show a wonderful improvement in work done and results accomplished.

Through the efforts of the Board of Education, the Superintendent of Schools and the teachers, the work of Inspection has become most efficient.

From year to year the value and importance of School Inspection is being recognized. It plays an important part in the education of the child in that a healthy body promotes a quick and receptive mind.

Respectfully,

E. L. WEMPLE, M. D.,
Chief Medical Inspector of Schools.

Chemical Laboratory

San Francisco, Cal., September 15, 1911.

Dr. Wm. F. McNutt, Jr., Health Officer.

Dear Sir:—I herewith submit the report of the work done in the Chemical Laboratory during the fiscal year of 1910-1911. Since there was no change in the Laboratory staff during the year the work was all done under my direction, and all the results of analyses which were made a basis of legal procedure were personally reviewed by the writer, I also wish to state that the success obtained in this Department is largely due to the able and efficient work rendered by my assistants, Mr. Fred West as 1st Assistant and Mr. George Ahlers acting as 2nd Assistant, Miss Esther Kilsby, although not rated as an assistant Chemist, did a great deal of the mechanical work which would naturally fall to a 3rd Assistant Chemist, and therefore should receive special mention in this report.

In order to give a complete and comprehensive idea of the work, I have arranged it in tabular form, Table No. 1 is arranged to show work done by months. As milk is the most important food stuff used by almost every inhabitant of our city, we naturally paid more attention to it than to all other foods combined. During the year we analysed 3,412 samples as shown in column 1 of this table.

Column 2 shows the number of water analyses made each month, making a total of 256 for the year.

Column 3 designated as "miscellaneous" represents all the rest of the work done during the year. Under this head is grouped everything from a mere qualitative test for preservative to a complex analysis in research work, thus covering a complete work in food chemistry. As special items in this work should be mentioned the work done on candies for coal tar dyes and adulterants, more than 300 samples were analysed during the months of February and March of the present year.

Another series of analyses which received a great deal of publicity at the time constitute the research work on oysters. We were the first Chemists on the Coast to discover the presence of copper in large quantities in the oysters shipped here from various points on the Atlantic Coast.

We should here also mention the work done on coloring matter in ice cream cornucopias as constituting another item of this column. The reason for not giving these analyses in separate columns is that the work covered only a short period of time and was not carried out throughout the year.

In column 4 we find the totals of each month giving a grand total of 4,308 analyses for the year. Column five gives the number of cases for arrest for each month, showing a total of 171 for the year. Column six shows the number of convictions obtained each month making a total of 70 for the year. This number would have been considerably increased if Ordinance 22 had not been found defective, thus necessitating the dismissal of some 20 add cases as shown in column during the month of September.

Column 7 gives the number of cases dismissed each month, showing a total of 103 during the year. Column 8 shows cases carried over each month. Column 9 gives the sum of fines obtained each month, making a total of \$1,635.00 for the year.

TABLE TWO.

This table gives complete report for each month of all the samples of milk which were found below standard with the full analyses of each sample. This table is to show at a glance which shippers and dealers were supplying the milk to the inhabitants of our city, which was declared by Ordinance "unfit for food." All samples which were not up to the standard in butter fat 3.4%, total solids 12%, solids not fat 8.5%, are here listed. All samples found to be 3.2% or less in butter fat, or 11.5% or less in total solids, or 8.25% or less in solids not fat, are designated as cases for arrest.

We have no Ordinance requiring a refractive index for milk serum as a standard for watering, or water in milk. This defect in our ordinance should be corrected, and I would herewith recommend that an index of refraction of not less than 41.5 be fixed for pure unwatered milk. In this connection I should state that we have investigated various herds from which milk is shipped into this city, and have found that the average per cent of butter fat varies from 3.6% to 3.98% per herd in a mixture of Durham and Jersey cattle. In a herd of Holstein cattle this per cent is reduced to from 3.4% to 3.6%. The index of refraction obtained in these herds is always more than 41.5 when the average is taken. These average results were obtained from samples of milk taken by our Inspectors when the cows were milked and therefore give us an absolute result.

TABLE THREE.

This table shows what disposition was made of each case brought to court, giving not only the name of the Inspector who swore to the complaint but also the name of the Judge who tried the case with the fine imposed or dismissal given. This table gives in detail what is shown in columns 5, 6, 7, 8 and 9 of table No. 1.

TABLE FOUR.

Number four gives in detail the results of analysis of every sample of water made throughout the year and therefore is very valuable as an index of San Francisco water supply as furnished by the various sources available at present.

In conclusion would state that the most approved methods were followed in the making of all analyses in the Laboratory. The instruments and apparatus used is the best to be obtained here and abroad, and graduated as accurately as possible, therefore I have no hesitancy in stating that all analyses are as accurate as it is possible to make them.

Respectfully submitted,

A. C. BOTHE, M. D., Chief Chemist.

TABLE NO. 1—COMPARATIVE TABLE FOR YEAR, SHOWING TOTAL WORK DONE EACH MONTH; ALSO TOTAL AMOUNT OF FINES OBTAINED IN COURT CASES. 1909-1910.

A. C. Bothe, M. D., Chief Chemist.

1910 to 1911	Milk.....	Water.....	Miscellaneous.....	Total Analysis.....	Arrests.....	Continuations	Dismissals	Case Pending	Fines.....

Convicted	8
Dismissed	17
Pending	4
Proof Total	29
Total fines	\$150

RECORD OF ARRESTS

JUNE, 1911—

Arrested	NAME	VIOLATION	COMPLAINANT
May 22	I. B. Parsons	Ord. 660.....	Lendrum
May 23	Antone Rosa	Ord. 660.....	O'Connor
May 30	John M. Silva	Ord. 660.....	Lydon
May 31	John M. Silva	Ord. 660.....	Lendrum

ARRESTED DURING

June 24	Chas. Ballhaus	Ord. 660.....	Lydon
June 28	Manuel Silveira	Ord. 660.....	Lendrum
June 29	Edward Leach	Ord. 660.....	Lendrum
June 30	Frank LaBrucherie	Ord. 660.....	Lendrum

ORDINANCE NUMBER DEFINED.

660—Regulating disposal of milk.

PENDING AT LAST REPORT.

JUDGE	DISPOSITION CONTINUANCES	FINAL ACTION
Shortall	Case dismissed June 1.
Shortall	Case dismissed June 27.
Sullivan	Found guilty and fined \$25 June 1.
Sullivan	Found guilty and fined \$25 June 1.

THE MONTH.

Deasy	Case dismissed June 26.
Deasy	Continued to July 29.....
Sullivan	Continued to July 22.....
Deasy	Continued to July 22.....

SUMMARY.

Pending at last report	4
Arrested during month	4
Total	8
Convicted	2
Dismissed	3
Pending—April arrests, 3.....	3
Proof Total.....	8
Total fines	\$50

	Dr. Davenport

Among the most beneficial results as observed by the clinicians of the City and County Hospital is the diminution of venereal cases in the male the last few months of the fiscal year. This desideratum has undoubtedly been brought about by the advent of the so-called "Municipal Clinic." This institution has been organized and maintained by the Honorable Board of Health and has for its objects the purposes the limiting or stopping of the supply of venereal infection, by forcing each prostitute to submit to a bi-weekly examination. The female is either sent to the City and County Hospital or treated at the Clinic and the decrease in the ratio of venereal cases is very gratifying indeed; what was tried as an experiment has proven among the most valuable assets to the health of San Francisco.

The new San Francisco Hospital rapidly nearing completion is the most imposing group of buildings in San Francisco. The steel work is completed and the brick work 98% completed. The Nurses' Home is plastered as is also four of the Ward Buildings, and unless something unforeseen occurs, the entire group should be ready for occupancy within the next fiscal year.

The Tubercular patients are to be housed in a temporary \$30,000 group of wooden buildings consisting of 7 buildings; 6 lean-tos, 2 of which are double deckers, and an administration building. The plan is similar to that accepted as the most modern elsewhere but there are a number of modifications, among

which are the fact that the Diet Kitchens are separate and that the buildings are nothing but dormitories.

It seems as though measures should be at once taken by those in authority to put these unfortunate patients in places outside of a city. It also seems as though the Federal Government should be aroused to action to care for this class of patients as their disease is lasting and communicable and no municipality should be expected to bear the expense.

SAN FRANCISCO TRAINING SCHOOL FOR NURSES.

The following is the report of the twentieth year of the San Francisco Training School for Nurses.

	Remaining July 1, 1910.....	Entered	Transferred to	Graduated	Resigned	Dismissed	Transferred from	Remaining June 30, 1911.....

Instruction has been given in the following subjects during the year:

TO THE NURSES.

Fever Nursing (1st Class), 14 lessons; Miss McGinnes.

Bacteriology (1st Class), 6 lessons; Dr. Somers.

Hygiene (1st Class), 6 lessons; Miss McGinnes.

Dietetics (1st Class), 12 lessons; Miss A. May.

Materia Medica (1st Class), 12 lessons; Dr. Bradfield.

Anatomy (1st Class), 12 lessons; Dr. Castle.

Anatomy (2nd Class), 12 lessons; Miss McGinnes.

Obstetrics (Lectures at Alexander Maternity), Dr. Adelaide Brown.

Practical Nursing and Demonstrations (1st Class), 10 lessons; Miss McGinnes.

Practical Nursing and Demonstrations, 10 lessons; Miss McGinnes.

Bandaging (1st Class), 6 lessons; Dr. Smith.

TO THE ORDERLIES.

Bandaging, 6 lessons; Dr. Smith.

Practical Nursing and Demonstrations, 12 lessons; Miss McGinnes.

Anatomy and Physiology, 12 lessons; Dr. Bradfield.

Hygiene, (2nd Class), 6 lessons; Miss McGinnes.

Bacteriology, 6 lessons; Dr. Somers.

Materia Medica, 12 lessons; Dr. Bradfield.

Report of Relief Home

San Francisco, August 10, 1911.

To the
Honorable Board of Health,
San Francisco.

Gentlemen:—

I respectfully submit herewith my report for the fiscal year ending June 30, 1911, in accordance with the provisions of the Charter.

APPROPRIATION

The appropriation granted during the fiscal year by the Board of Supervisors, to wit, \$175,000.00, would have been sufficient had it not been for a fire which destroyed Building No. 3, making a deficit in our funds of \$625.00 for the fiscal year. The total cost for the present year averaged 39 cents per day for each inmate, a figure which is under that of most institutions of a like nature.

POPULATION

The average population of the Relief Home during the year 1910-1911 was 1,279. The minimum number of inhabitants was 1,235, on July 11, 1910. The maximum number of inhabitants was 1,323, on March 4th, 1911.

BURNING OF BUILDING NO. 3.

The burning of Building No. 3 will necessitate the erection of a new building at the earliest possible moment, to house the 102 inmates who occupied this building. They are at present housed in stables at the Ingleside Race Track. It was with the utmost difficulty that all the inmates of No. 3 were saved, and special mention should be made of the following employes who assisted in the removal of these patients: Jos. Tomalty, Watchman; D. M. Nicholas, Asst. Engineer; Con Cullen and many others. This fire should impress upon the minds of our Supervisors the danger of wooden buildings, and it is to be hoped that a fireproof building will replace the burned structure.

WATER SYSTEM.

The reconstruction of our water system is now under way, the Board of Supervisors having granted \$16,000.00 for this purpose. It is our intention to bore a new well 300 feet in depth, duplicate the pump now in use, put in an air lift pump, reconstruct cistern at pump house and construct a new pipe line to reservoirs, following the low levels and avoiding the deep cuts which, through their sliding in the past, have caused trouble in the winter season.

POWER PLANT.

During the year a new roof was put on our power plant which makes the building much lighter and more comfortable for the engineers and firemen working in it.

The new generator sets installed during the past year are giving perfect satisfaction and enable us to produce a surplus of electricity beyond the needs of both the Relief Home and the City and County Hospital, and being in duplicate, they insure us against any breakdown. As an additional safeguard, the San Francisco Gas and Electric Co. have run their wires to our switch board, and we are now enabled to use either our own electricity, or in case ours is not available, to get it from the city company.

IMPROVEMENTS REQUIRED.

It is to be hoped that the coming year will see our buildings thoroughly painted on the outside, as part of them are badly in need of this attention. Another improvement needed is a new floor in the dining room, as the present floor is badly worn and should be replaced by a maple floor. A new range for the kitchen is also becoming a necessity.

CHAPEL.

The chapel, which was erected through the efforts of the Catholic and Episcopal Archbishops some fifteen years ago, and at a time when the institution contained but 600 people, is too small and should be replaced by a larger structure.

Another structure which is urgently needed is a building to serve as quarters for the women employes of this institution. At the time the buildings were erected, quarters of this kind were omitted, and the women employes are occupying part of a section which is occupied by inmates. A bungalow or cottage to accommodate some 15 women employes could be erected at a moderate cost and would be a great improvement upon our present system.

Respectfully submitted,

C. M. WOLLENBERG,
Superintendent.

Report of Emergency Hospitals

San Francisco, August 7, 1911.

Honorable Board of Health,
City and County of San Francisco.

Gentlemen:—I have the honor to submit the annual report of the number of patients treated in the various Emergency Hospitals under my supervision, including the Central, Harbor, Mission, Potrero, Park and the Insane Detention Hospitals; also the number of Ambulance Calls responded to during the fiscal year ending June 30, 1911.

The work performed in the various Emergency Hospitals during the past fiscal year, 1910-1911, shows an increase of 3,515 cases over last year and an increase of 459 Ambulance Calls. The total number of cases treated in all the Emergency Hospitals during the past fiscal year is 29,203, as against 25,688 of last year and 18,481 cases the year previous, which shows an increase of over 10,000 cases within the last two years. The total number of Ambulance Calls responded to is 5,133 as against 4,654 of last year and 3,511 the year previous, which shows an increase of over 1,600 calls during the same period.

In regard to the condition of the various Emergency Hospitals, I would state that they are in good condition and well equipped.

The Central Emergency Hospital building, also the first temporary municipal structure built immediately after the catastrophe of 1906, has indeed served its purpose well, but is now inadequate on account of the tremendous increase of patients treated during the past five years. However, we expect to move within the next eight months into the new temporary and modern Central Emergency Hospital on Stevenson street, between Eighth and Ninth, provision having been made by the Honorable Mayor and the Honorable Board of Supervisors for a new Central Emergency Hospital in the rear of the new temporary City Hall.

The Harbor and Mission Emergency Hospitals are in good condition and also well equipped in every particular.

The Potrero Emergency Hospital is just being renovated and is also well equipped. In connection with this Emergency Hospital station I desire to state that the Honorable Board of Supervisors were unable to appropriate money in the last Budget for a new and permanent Hospital on city property on Twentieth and Kentucky streets, adjacent to the new Potrero Police Station in course of construction. I would respectfully request your Honorable Board to urge upon the Honorable Board of Supervisors to set aside a sufficient appropriation for a permanent Potrero Emergency Hospital in the next Budget.

The Park Emergency Hospital is in good condition and also well equipped, and this Department is looking forward with pleasure to see the first motor ambulance installed within the next two months in this Emergency Station, and I sincerely hope that your Honorable Board will recommend to the Honorable Board of Supervisors to install motor ambulances in the near future for every Emergency Hospital Station, in order to be able to give the best possible service, and it is my endeavor to maintain the highest standard of efficiency in this important branch of the Municipal Government.

Respectfully submitted,

E. S. HOWARD, M. D.
Chief Surgeon, Emergency Hospitals.

Report of Isolation Hospital

San Francisco, Cal., July 1, 1911.

Dr. W. F. McNutt, Jr.,
Health Officer, Department of Public Health,
San Francisco, Calif.

Dear Sir:

I have the honor to submit the following report of the various departments of the Isolation Hospital for the fiscal year 1910-1911:

LEPER DEPARTMENT

Summary of patients—

Number remaining end of fiscal year 1909-1910.....	17
Number admitted during fiscal year 1910-1911.....	2
Number escaped during fiscal year 1910-1911.....	1
Number of deaths during fiscal year 1910-1911.....	0
Number remaining at end fiscal year 1910-1911.....	18

It will be noted that no deaths have occurred during the past year. The patients are doing well, and as has been the case in the past, the disease is in each individual running a very benign and chronic course.

During the past twelve months the Leper Hospital has been visited by physicians in charge of similar institutions in various parts of the world, and in each case they have remarked on the superior accommodations existing at this place.

The therapeutic effect of Ehrlich's "606" has been tried in five of the more active cases, but even after three intravenous injections in one instance, nothing but negative results have been noted.

SMALLPOX DEPARTMENT

Summary of patients—

Number remaining end fiscal year 1909-1910.....	0
Number admitted during fiscal year 1910-1911.....	17
Number discharged during fiscal year 1910-1911.....	17
Number of deaths during fiscal year 1910-1911.....	0
Number escaped during fiscal year 1910-1911.....	0
Number of diagnostic visits during fiscal year 1910-1911.....	517
Number remaining end of fiscal year 1910-1911.....	0

San Francisco has been remarkably free from smallpox of late. Considering the fact that recent statistics show the disease to be very generally distributed throughout the United States, and to be particularly prevalent in many localities, such as Utah, Illinois and South Carolina, we should congratulate ourselves on having so few cases.

Careful investigation has in almost every instance demonstrated that the disease has been acquired in some other locality, and it may be assumed with reasonable certainty that no foci of infection now remain within the City and County of San Francisco.

What might have been a serious epidemic occurred in the County Jail during August, 1910. This fortunately was confined to two prisoners, who were immediately removed to the Isolation Hospital.

I have visited all cases of Chickenpox reported to the Health Office, but regret to say there is still a great disinclination on the part of the medical men of San Francisco to report this disease. The result is that children are frequently not excluded from the public schools; as a result class room infection is constantly occurring, with a consequent great aggregate loss of time to the pupils. This condition of affairs is unnecessary and it is hoped that physicians will in future give the matter more serious consideration.

AMBULANCE SERVICE.

Number of trips to the City and County Hospital.....	137
Number of trips to the Isolation Hospital.....	17
	<hr/>
Total number of calls during fiscal year 1910-1911.....	154

PLAGUE DEPARTMENT

Fortunately no cases of human plague have been discovered in San Francisco during the past year, in fact none since February, 1908.

Respectfully submitted,

LOUIS D. MEAD,
Visiting Physician, Isolation Hospital.

Report of City Physician

San Francisco, Cal., September 18, 1911.

Dr. W. F. McNutt, Jr., Health Officer.

Sir: I have the honor to submit for your attention my report for the year July 1, 1910, to July 1, 1911:

The office of City Physician throughout the past year has progressed smoothly and there has been little cause for complaint in that department. During the past year the patients have still continued in the private hospitals, but at the present writing of this report we have been able to accommodate all of our poor in the City and County Hospital in the Infirmary Building at the Relief Home, and I must say, in my report, that the care and the service at the Infirmary Building is fully equal to any service that we have received at any of the private hospitals.

The conditions at the County Jail during the past year have been materially improved; running water has been put in each cell; a small hospital has been established, and in conjunction with Dr. Ring, service has been extended to the inmates which has never been equaled before.

The condition of the City Prison is still in a lamentable shape. We have not been able to do much in the way of improvement on account of the fact that it is only a temporary quarters. We hope soon to be in the Hall of Justice, where we expect to have one of the finest furnished and equipped prisons in the United States. The sanitary conditions there will be especially good.

The vaccination of school children has continued. In the past year the service has been extended to each of the Emergency Hospitals, thereby not requiring the parents to travel a long distance to have their children vaccinated. With the passage of the new law of non-compulsory vaccination we have had but slight diminution of applications for vaccination, and in the main most parents seem to desire their children to be vaccinated.

The condition of the city poor remains about the same. The past year having been a hard one, we have had more calls upon our service than is usually required, but we trust with improved conditions we will find that we are called upon less and less to care for the poor of our city.

An added feature of the City Physician's work this year has been superintending the inspection of all the immigrants from cholera infected ports. We are glad to say the inspection has been a thorough one and that not one case of cholera has been discovered in our city.

I hereby respectfully submit my report.

GEO. W. GOODALE,
City Physician.

REPORT OF AUDITOR

San Francisco, Cal., July 31, 1911.

To the Honorable, the Board of Health.

Gentlemen:—The report of the Auditing Department for the fiscal year 1910-1911 consists of five statements:

1. A general statement of the expenditures of the entire department.
2. Statement of expenditures in sanitation work in connection with the U. S. Public Health and Marine Hospital Service.
3. Receipts from transcripts and permits issued by Bureau of Vital Statistics.
4. Statement of city cases in private hospitals, the number and cost.
5. A statement giving the unit cost of each bureau or division of the Central Office of the Department of Public Health.

The first four statements are the usual ones issued yearly, the last is new and the result of some general criticism of the keeping of the municipal accounts, particularly regarding costs. The units of work of each bureau or division are taken from their annual reports, and the cost from a careful and minute analysis of the expenditures of the funds of the Central Office, and the expenditures for rent, water, gas, printing, stationery, postage, janitor and police detailed to the Health Officer, and paid from funds not controlled in this office. Some of the costs seem unusually low for the service rendered, others are somewhat higher. There is, however, no comparison of these costs, to be made with previous years nor with the work of other departments of health in the different cities of the United States or other countries, their reports containing no such information. These unit costs are entirely new and will be of interest as the reports of other fiscal years are filed and then comparisons can readily be made and efficiency and costs thoroughly tested.

There were issued in this office during the fiscal year just closed 4705 requisitions for supplies for the Central Office and the hospitals and institutions under the control of the Board of Health and signed by the Health Officer, and 1876 salary and 3616 maintenance demands, audited by the Finance Committee and approved by the Board of Health.

I have to thank the Finance Committee, which consists of Mr. Pouchan, Chairman, and Mr. Murray and Mr. Sharp, for their kindness in always being so willing to put aside many of their personal duties to attend to the laborious and oftentimes arduous work of signing these demands.

Respectfully,

PERCY R. HENNESSY,
Auditor, Department of Public Health.

REPORT OF AUDITOR

EXECUTIVE OFFICE

	Funds Dept. of P. H.	Other Funds
Salaries—		
H. O., chief clerk, two stenographers, two-third salary of telephone operator.....	\$9,500.00

Respectfully submitted
 LAURENCE WALSH,
 Disinterment Inspector

Report of Board of Education

San Francisco, California, August 1, 1911.

To the Honorable Board of Supervisors,
City and County of San Francisco.

Gentlemen:

In accordance with provision of the Charter, I have the honor to submit herewith the annual report of the Board of Education, embracing the report of the Superintendent of Schools, for the fifty-ninth fiscal year of the School Department, ending June 30, 1911.

Respectfully,

H. G. VAUGHAN,
President Board of Education, City and County of San Francisco.

BOARD OF EDUCATION City and County of San Francisco

OFFICERS, 1910-11

President: July-December, Thomas R. Bannerman; January-June, Hiram G. Vaughan.
Secretary: Melvin G. Dodge.

MEMBERS, 1910-11

Mary W. Kincaid, July-June.
Thomas R. Bannerman, July-December.
Henry Payot, July-June.
Richard I. Whelan, July-December.
Hiram G. Vaughan, January-June.
James E. Power, January-June.
Alfred Roncovieri, Superintendent of Schools, *ex-officio* Member.

Report of Superintendent of Schools

San Francisco, August 1, 1911.

To the Honorable the Board of Education, in and
for the City and County of San Francisco.

Mrs. Kincaid and Gentlemen:—I have the honor to submit herewith the annual report on the condition of the public schools of this City and County, as required by the Charter for the fifty-ninth fiscal year of the School Department, ending June 30, 1911.

ALFRED RONCOVIERI,

Superintendent of Common Schools, in and for the City and County of San Francisco.

WORK OF TRUANT OFFICERS.

The following statement concerning the work performed by the five truant officers for the year ending June 30, 1910, was presented by Mr. T. J. Dugan, officer in charge.

Complaints of truancy, etc., investigated	4,055
Found on street during school hours	3,058
Children brought before Juvenile Court	116
Parents brought before Juvenile Court	69
Boys brought before the Board of Education	13
Children found on street having working certificates	281
Children not located	23

7,615

Commenting on the foregoing statement, I desire to say that the enforcement of the Compulsory Education Law and the repression of truancy have been promoted very much during the past year. This is due to the efficient work of the attendance or truant officers. In the discharge of their duties they have exercised diligence, courtesy and firmness, and their work merits commendation.

Since last October the number of officers has been reduced from five to three; therefore, the foregoing statement of activity is the more commendable.

SCHOOL LECTURES.

FREE PUBLIC LECTURE SYSTEM FOR ADULTS.

As far back as my report of 1907 (page 62), I respectfully recommended the holding of free public lectures in school buildings, believing that they would "be educational and elevating . . . and appreciated by the general public and by the school patrons." Again in my report of 1908-09 I made the same recommendation, urging the Board of Education to take action upon the matter at once (page 37). The language of my recommendation at that time is herewith repeated:

"I regret that so few of our school houses have assembly rooms. The building of auditoriums, as a feature of school equipment, will be appreciated by the general public and particularly by the school patrons. They will afford a common place of meeting with small expense for all the people where there can be no bickerings, political or sectarian. The home life and the school life can be brought together in harmonious unity and much permanent good will result.

"I would, therefore, recommend that every school building planned under the new Bond Issue be provided with an assembly hall to be built on the ground floor or the first floor, where in addition to its use for general exercises, music and gymnastics for the pupils of the school, it can be used for social center development. In such a room the principal can address a large number of pupils in a more impressive way than in separate class rooms. Such a room can be used for stereopticon exhibitions, for graduating exercises or as already indicated as a social center for citizens and parents of the district. The school houses belong to the people and under proper restrictions should be used for the diffusion of information and the promotion of a civic spirit among the adult population.

"I respectfully recommend that free public lectures on American history, physics, mechanics, economics, etc., for the student and adult population be given in the auditoriums of the Mission High School, the Crocker, Girls' High, Polytechnic, Lowell, Hearst and the Horace Mann, and wherever possible in smaller buildings.

"These lectures, combined with musical numbers, will be educational and elevating and will be appreciated by the general public and by the school patrons."

"Our evening schools are in session five evenings a week. The same buildings should be used for public lectures on educational subjects. There are many public spirited citizens who would give such lectures without charge. We should have lectures on all subjects pertaining to civic welfare. We should not wait till bubonic plague comes again before teaching the people to be clean. Cleanliness in kitchens, back yards, alleys, streets, public and private morals, public and private decency, should be taught to both young and old. Such civic pride should be created that ugly billboards will disappear from our streets and that all entertainments of doubtful character will be prohibited."

"Lectures should be given on public and private health, such as the prevention of tuberculosis. Physicians should give lectures on the physical care and training of children, and upon the dangers besetting adolescence."

Early in January, 1910, primarily through the active efforts of Mrs. Louis Hertz of the California Club, the Board of Education endorsed the plan to hold

in school auditoriums lectures for adults, and co-operated with the following committee to take charge of the movement:

Mrs. Mary Kincaid, representing the Board of Education; Dr. Caroline Rosenberg, the Council of Jewish Women; Miss Amy Sussman and Miss Katherine Felton, the Collegiate Alumnae; Mrs. Louis Hertz, the California Club; Mrs. James Crawford, the Women's Auxiliary to the Juvenile Court; Dr. R. G. Brodrick, the Board of Health; Walter Macarthur, the Civic League; Dr. Langley Porter, the San Francisco Milk Improvement Association, and William P. McCabe, R. I. Wisler and Leo Michelson representing the community at large.

The ideas of the Committee were well set forth in the beginning in an interview by Mr. Walter Macarthur, who said:

"This innovation in educational work has proved extremely successful in other cities and has been indorsed by numerous labor organizations. The meetings will be short, beginning at 8 o'clock p. m. and ending about 9.30 o'clock. The lectures will, whenever possible, be accompanied by stereopticon views or moving pictures. The services of the lecturers and others will be gratuitous and admission will be free."

The Board of Education designated the Mission High, Washington Grammar, Portola, Laguna Honda, Monroe, Lafayette and Girls' High School buildings as centers in which the lectures should be held. The first lecture, under the direction of Mrs. Hertz, was delivered at the Mission High School on January 19, 1910 by Mr. J. C. Astredo, his subject being "The Panama Canal," and his address being illustrated by moving pictures of life in the canal zone. Introductory remarks were made by Mr. Thomas Bannerman, President of the Board of Education, and musical selections were rendered by Mrs. Joseph Artigues and Dr. M. W. Fredericks. The event was signalized by the attendance of 1,200 persons, the total capacity of the assembly room. During the year illustrated lectures on "British Columbia" by Mr. E. J. Le Breton, "Russia" by Mr. Harris Weinstock, and "Syria" by Mr. W. H. Jordan were delivered. To Mrs. Hertz and Dr. Caroline Rosenberg, secretary of the committee, we tender our thanks for their untiring zeal in establishing and carrying on this work in its preparatory period.

At this stage, a new friend of the idea appeared in the person of Mr. Henry Payot, who had been appointed to a seat upon the Board of Education. He, henceforth, fathered the movement, and at his request toward the opening of 1911, the Board firmly established the system by adopting a resolution, to wit:

"Whereas, the Board of Education believes that a system of free public lectures for school pupils and adults is desirable, said lectures giving the results of the latest developments in science, history, hygiene, art, music, travel, and political science, etc., thereby encouraging reading and study to definite ends, and developing a wider and deeper interest in the schools on the part of the people, by making said schools and their equipment more effective social and community centers; therefore be it

"Resolved, That such a system to be known as the Lecture Bureau be and is hereby ordered instituted under the control of the Board of Education, in the City of San Francisco, the lectures to be at once arranged for, and lecture centers established for the present, at the following school buildings:

Lincoln	Monroe
Girls' High	Adams
Sheridan	Spring Valley
Yerba Buena	Sutro
Frank McCoppin	Laguna Honda
Burnett	Junipero Serra
Hancock	Mission High
Mission Grammar	Glen Park

also

“Resolved, That the following named persons interested in all that makes for the betterment of conditions in this city, be invited to act as an Advisory Commission to this Board of Education in carrying out the purposes above mentioned, namely:

Mr. J. P. Young,	Dr. R. G. Brodrick,
Dr. Langley Porter,	Raphael Weill,
James Ferguson,	Dr. C. Rosenberg,
Walter Macarthur,	C. S. Stanton,
Willis Polk,	Harris Weinstock,
E. S. Simpson,	Paul Steindorff,
Thos. E. Hayden,	James Rolph, Jr.

and further

“Resolved, That Prof. M. E. Blanchard, Ph. D., of the Mission High School, and Prof. G. O. Mitchell, A. B., of the Girls' High School, be and they are hereby appointed Secretary of the Lecture Bureau and Director of Lectures, respectively, each in his own line, to arrange for and carry out all details necessary for the proper and successful outcome of the system hereby instituted, and each to serve for such time and at such compensation as this Board may determine.”

These public-spirited citizens having accepted the invitation, the body in control became:

COMMITTEE ON LECTURES

H. G. Vaughan.....	President of the Board of Education
Mary W. Kincaid.....	Member Board of Education
Henry Payot	Member Board of Education
Jas. E. Power.....	Member Board of Education
Alfred Roncovieri.....	Superintendent of Schools
Milton E. Blanchard, Ph. D.....	Supervisor of Lectures
G. O. Mitchell, A. B.....	Director of Lectures

ADVISORY COMMISSION ON LECTURES

Raphael Weill	Willis Polk
Harris Weinstock	Dr. Caroline Rosenberg
John P. Young	Paul Steindorff
Ernest S. Simpson	Dr. Langley Porter
C. S. Stanton	Dr. R. G. Brodrick
James Rolph, Jr.	James Ferguson
Walter Macarthur	A. J. Cloud
Thos. E. Hayden	

The aims and ideals of the course, and their practical realization, are best seen in the appended list of topics and speakers for the year.

It is to be readily observed from the above programs that the staff of lecturers has been drawn from all walks of life and that the subjects of the discourses have covered a very broad expanse of human thought and experience. The schedule for the month of May, 1911, gives the best index to the number and location of the lecture centers. A striking proof that the system has met with popular approval is to be found in the fact that the audiences have been very large in numbers, 25,000 people in all having attended the set of sixty lectures, or approximately 400 to an evening. The cost of installing and operating the bureau has been relatively very small. The equipment expense for moving picture machines, stereopticons, lanterns, screens, curtains, wiring, etc., has approximated \$3,000. The schools that have been equipped with stereopticon apparatus are: Bryant Cosmopolitan, Crocker, Garfield, Glen Park, Hancock, Horace Mann, Junipero Serra, Laguna Honda, Madison, Mission Grammar, Frank McCoppin, Monroe, Portola, Sheridan, Sutro, Yerba Buena, Girls' High and Mission High. The salary of the operator of the lantern was \$100 for the year. The speakers have without exception very kindly offered their services free of charge, and to them we gladly acknowledge our obligation.

For the coming year great prosperity for this valuable work is predicted. The Board of Supervisors has provided, at the request of the Board of Education, the sum of \$2,500 for the furtherance of this movement. Out of this amount payments for services will be made to the directors of the Bureau and to such speakers as should receive remuneration. Three new lecture centers are projected.

LECTURES FOR TEACHERS.

During the year, the Board of Education and the Superintendent were enabled to secure a number of speakers to address the Department. The principal ones of these and their subjects were:

November 28, 1910, Christian Science Hall, "Songs and Stories of Nature," by Mr. Kellogg, "The Nature Singer."

February and March, 1911, a series of four lectures by Professor B. R. Baumgardt, including "The Age of Pericles" and "Castles and Legends of the Rhine."

March 7, 1911, Mission High School Building, "Modern Boys and Girls—Assets or Liabilities," by Dr. A. E. Winship.

July 31, 1911, Mission High School Building, "The Problem of the Exceptional Child," by Dr. Maximilian P. E. Groszmann.

August 8, 1911, Mission High School, "New Thought in Education," by W. L. Tomlins, and "The Chicago Teachers' Victory," by Miss Margaret Haley.

LECTURES IN SCHOOLS FOR PUPILS.

Side by side with the Free Public Lectures for adults, there has been conducted during the year 1910-11 a system of lectures for pupils in the auditoriums of the different schools. These lectures have been of two kinds, one under the immediate direction of the lecture bureau of the Board of Education, the

other arranged by the Board in conjunction with the San Francisco Association for the Study and Prevention of Tuberculosis, under the immediate supervision of Dr. R. G. Brodrick.

The lectures given by the Bureau, Dr. M. E. Blanchard, Director, were as follows:

December, 1910, Crocker School, "The True Sportsman."	DR. M. E. BLANCHARD.
December, 1910, Crocker School, "Personal and National Thrift."	DR. M. E. BLANCHARD.
March, 1911, Girls' High School, "Dickens: The Man and His Works."	MRS. C. W. PLATT.
March, 1911, Girls' High School, "The Yosemite and Hetch-Hetchy."	MR. CHAS. W. REED.
March, 1911, Girls' High School, "The Chateaux of Northern France."	MR. HENRY PAYOT.
April, 1911, Bryant Cosmopolitan School, "Our Animals."	MR. MATTHEW McCURRIE.
May, 1911, Mission High School, "Fur Seals of Bering Sea."	MR. G. A. CLARK.

These addresses were all illustrated by stereopticon views.

The lectures given under the direction of Dr. Brodrick were authorized by a Resolution passed by the Board of Education on January 4, 1911, as follows:

'RESOLVED: That this Board hereby authorizes the giving of stereopticon lectures on Tuberculosis, to pupils in the high schools and in the 7th and 8th grades of the grammar schools, by Dr. R. G. Brodrick, in accordance with the following schedule:

Girls' High	Friday,	Jan. 20,	2:00 P. M.
Mission High	"	Jan. 27,	"
Mission Grammar	"	Feb. 3,	"
Sutro Grammar	"	Feb. 17,	"
Laguna Honda	"	Mar. 3,	"
Sheridan	"	Mar. 24,	"
Monroe	"	Mar. 31,	"
Glen Park	"	April 14,	"
Crocker	"	April 28,	"
Horace Mann	"	May 12,	"

Each school auditorium was furnished with black curtains, fitted in such manner that day light could be excluded and stereopticon lamps already furnished these schools through the Lecture Bureau were employed. Mr. Richard C. M. Page, a pupil at the Mission High School, kindly offered to operate the lamp.

So far as we know, San Francisco is the only city in the United States, in which stereopticon lectures on Tuberculosis are given to the pupils during school hours.

Through these illustrated lectures several thousand children were shown the cause and nature of this scourge, statistical data, such as mortality compared with other diseases, and its relative prevalence in various states and cities; the evil effects of violating the tenement house law; insanitary factories and workshops; good results which have followed municipal and state control; benefit of outdoor treatment in homes or sanitarium, and illustrations of outdoor schools. Great emphasis was laid on the truth that consumption is a preventable disease, and that it is also curable, if wise treatment be begun early. It was vividly shown that impure air and unclean surroundings are conditions favorable to its spread while, on the contrary, fresh air and clean surroundings destroy its

possibilities of existence. Great credit is due Dr. Brodrick for having contributed his time, energy, and thought to this cause.

In this connection I respectfully call to the special attention of the Board the necessity of providing our teachers with a card form, outlining briefly a practical program that will aid the teacher in understanding and dealing with simple cases as they arise. A copy of such a form issued in a Massachusetts city is herewith added:

Some general symptoms of disease in children which teachers should notice and on account of which the children should be referred to the School Physician:

Emaciation.
 Pallor.
 Puffiness of the Face.
 Shortness of Breath.
 Swellings in the Neck.
 General Lassitude and other Evidences of Sickness.
 Flushing of the Face.
 Eruptions of Any Sort.
 A Cold in the Head with Running Eyes.
 Irritating Discharge from the Nose.
 Evidences of a Sore Throat.
 Coughs.
 Vomiting.
 Frequent Requests to Go Out.

MOVING-PICTURES.

I also respectfully recommend, most earnestly, that the lecture system for pupils in our schools be extended so as to include moving-picture films on educational themes. In other places such a plan has been tried with eminent success. While it is true that the moving-picture has its limits of usefulness, and can only supplement and reinforce the work of the class-room, it is also true that it has been proved to have great value in impressing geographical facts, historical events and natural phenomena on the minds of children. From these pictures the facts of geography gain a form, size, mass, movement and color impossible in verbal presentation only. The reality of historical events is strengthened by reason of the stimulus given to the imagination by this device. In no other way can the study of nature be so powerfully developed, for plant and bird life are thus brought before the child directly in their own environment. It is helpful in the teaching of literature, because it gives optical illustration of the idea presented by the author.

A writer on this subject, Mr. John Collier, says:

"The school will use the motion picture because it is graphic. The growth of a plant from seed to harvest is shown in a ten-minute space on the screen, not with gaps and halts, but in a continuous process amazing to behold. The almost infinitely swift motion of an insect's wing has been dissected by pictures at the rate of 2000 a second. Too much passive instruction weakens the will of a child. The motion picture, when it presents a dramatic theme, impels the child away from a merely receptive attitude and into an active mood. 'Education through doing the thing, not merely studying about it,' is a watchword of pedagogical reform, and the school which believes this will find a great use for motion pictures."

Believing that we should move ever in the van, I again respectfully urge that our schools be equipped with these machines, and that competent operators and lecturers be employed for this purpose.

THE COMPETITIVE EXAMINATION SYSTEM OF APPOINTMENT OF
TEACHERS TO THE SAN FRANCISCO SCHOOL DEPARTMENT.

Upon the recommendation of Alfred Roncovieri the present system of civil service examinations was formally adopted by the Board of Education in May, 1904, as a part of the Rules and Regulations of this Department. It provides for the appointing of teachers to this Department solely on merit, (and without any reference to personal, social or political influence), as determined by competitive "Civil Service" examinations among applicants who already hold regular teachers' certificates.

The object of these examinations is to enable the Board of Education to select the best for its corps of teachers. No one who does not possess high personal character, liberal education and perfectly sound bodily health and vigor need apply as a candidate for examination. No married woman need apply, or any teacher who may not be in position to accept an appointment to the substitute list whenever such appointment may be made during the year.

The details of the plan and the method of operation are best found in the following excerpts from the pamphlets on the subject issued by the Board of Education:

The original rule ran:

"It shall be the duty of the Board.....

9. To annually conduct a competitive Civil Service examination for the appointment of teachers to the substitute list of the elementary schools of the City and County of San Francisco, provided that such examination shall be both written and oral on the Theory and Practice of Teaching, and on such other topics as may from time to time be announced by the Board of Education; and, further provided, that no person shall be permitted to take said examination unless, after examination by physicians to be appointed by the Board, he or she shall be pronounced sound in health mentally and physically. Every applicant must be the holder of a teacher's certificate of a grade not lower than the grammar grade, valid under the laws of the State of California. Teachers successful in said examination shall be placed on the substitute list in the order of their standing, and shall be appointed to regular positions in the same order, subject however, to a satisfactory probationary service of two years before final election."

To this first section, the following amendments have been joined:

March 2, 1910:

"1. The competitive examinations for the appointment of teachers shall include all teachers for both day and evening elementary schools.

2. The examination shall consist of three parts: a. Written examination in Arithmetic and Grammar. b. Written examination in Methods of Teaching, School Management, Hygiene, etc. c. Oral examination in Methods of Teaching, School Management, Hygiene, and the references submitted by the candidate.

3. Any candidate who falls below 70% in either Arithmetic or Grammar, or below an average of 75% in both subjects, or below 65% in Methods of Teaching, School Management, Hygiene, etc., shall be barred from the oral and hence from any appointment as a result of that examination, provided that failure in one examination shall not bar the candidate from any future competitive examination.

4. Each of the three parts of the examination designated in "2" shall be marked on the basis of 100, and the average of the three shall be the candidate's percent. in the examination, on which he or she shall be ranked.

5. The subjects and method of conducting this examination shall be given the widest publicity at the earliest date, to the end that the best possible teachers may be secured.

6. Each answer shall be credited by two readers, and the average of their credits shall be the credit assigned to the answer."

March 22, 1911:

"7. To complete each examination, applicants shall be allowed two hours and thirty minutes from the time, when having received the questions, they begin to write their answers."

These examinations are held annually, or more frequently, as occasion demands. Application blanks will be furnished all those asking for them. They should be filled out and forwarded to the Secretary of the Board of Education, if possible, not later than one week prior to the examination. Applicants must furnish full information relative to their academic preparation, their professional training (if any), and their experience in teaching (if any). Each applicant shall give not less than three references to persons who are competent to speak of his or her fitness for the work of teaching. Such references shall include the persons whose official position enables them to give the most exact and pertinent information with reference to the applicant's scholarship, training, experience and general efficiency. The Board of Education will not consider general letters of recommendation; but it will request from the persons referred to by the applicant a confidential statement as to the applicant's qualifications; such statement to be given in answer to a uniform list of questions, to be furnished by the Board. The Board will also, in case of doubt, call for and make use of supplementary information, relating to the same set of questions, from other persons, who may be deemed competent to speak intelligently of the candidate's qualifications.

Before entering the examination each candidate must have secured from one of the physicians appointed by the Board a certificate stating that he or she is in sound health. The expense of the physical examination must be borne by the applicant, each physician having agreed upon a uniform charge of \$2.50.

Those applicants will be considered as having successfully passed the examination who receive an average grade of 75% for both written and oral tests. All such will be notified at the close of the oral examination that they have been successful, and will be placed at once on what is known as the "Eligible List," to be called upon for substitute duty as soon as needed. A new list from which to select substitutes shall be formed annually after the competitive examination.

All assignments to teaching positions in the schools of San Francisco shall be from the Substitute List, and no person shall be so assigned except by a unanimous vote of the Board, and from the three highest on the list at the time.

Before becoming eligible to be elected Regular Teachers in the Department, those who have been thus elected to positions must serve two years as probationers. Before receiving final election the teachers must receive the recommendation of the Superintendent of Schools. After such final election they shall hold their positions for life, provided they shall at all times comply with and be subject to the rules of the Board of Education and the laws of the State, and the Charter of the City and County of San Francisco, so far as the same relate to the School Department.

The examinations of December, 1910 were taken by 125 candidates, of whom 46 were successful; those of June, 1911 by 115 candidates, of whom 67 passed.

The following sets of examination questions from 1902 through 1911 give an idea of the general character of the questions asked:

QUESTIONS GIVEN IN 1902.

1. Interest. How would you rouse it? Is it all sufficient for accomplishing results?
2. State and describe three essential features of the class recitation.
3. State some IMPORTANT defects of a strictly graded system of classes and give one GOOD remedy for each defect mentioned.
4. Since about 70 per cent of the pupils attending the public schools, on an average, are in the primary grades, which three subjects of instruction do you regard as the most important in training the great mass of our pupils who never enter the grammar school? Give your reasons.
5. Do you think the State School Law which forbids teachers to assign any home-work to pupils under fifteen years of age is a wise provision, and give your reasons for or against this law?
6. What would you do to advance a very diffident or backward child?
7. Discuss the Use and Abuse of Text Books.
8. Discuss discipline, its necessity, aim or aims.
9. Discuss helps to memory.
10. Point out specifically some of the uses and common abuses of the memory in geography teaching, making your explanation show your knowledge of the psychology involved.
11. Explain what is meant by visual, auditory and motor types of thinking, and illustrate by reference to corresponding types of spellers.
12. Why is it that pupils who write neatly in their copy books frequently do much inferior work in original composition? Explain the psychological causes.

QUESTIONS GIVEN IN 1903.

1. What is the ultimate end of education? State specifically some of the things education should do for the individual. For society?
2. Considering the limited time at your disposal for the instruction of a large class, what methods would enable you to give maximum attention to the special needs of individuals or groups of individuals that are particularly backward or brilliant?
3. How far can you teach parts of one school subject when you are definitely teaching another subject; for example, how far can you correlate geography with history? Should the attention of the child upon the history material be intensified or lessened by such introduction of geography? Point out some dangers in attempting to correlate subjects.
4. What constitutes an ideal teacher?
5. Discuss the intellectual features particularly active in children and their educational significance.
6. Give a description of a model lesson in arithmetic in a primary grade.
7. Discuss the development of the imagination in primary grades—its importance—means to secure it.
8. Discuss maintenance of strict discipline. How it may be tempered and how far relaxation from it may be allowed for the sake of promoting interest, emulation, and fellowship between teacher and pupils?

9. How can you make history teaching contribute directly to training for good citizenship? How far would you require children to learn facts of history, such as dates and names? What importance in history teaching would you give to the ideas and sentiments which have been the causes and results of historical events? What feelings should good history teaching awaken in the pupil?

10. Briefly outline the most approved general methods in use for teaching first grade pupils to read, and show by your explanation your comprehension of the mental process involved.

11. State three advantages and three disadvantages of department teaching in grammar grades.

12. Describe briefly any approved general method of teaching:

- (a) Rapid and accurate addition.
- (b) Geography.

Justify your methods by psychological reasons.

QUESTIONS FOR 1904.

1. Write a model lesson in geography and tell how you would make use of the following in teaching the same: 1, attention; 2, interest; 3, association; 4, memory; 5, imagination.

2. What standards or principles should guide a teacher in advancing or detaining a child at promotion time? Should all subjects have equal weight? If not, suggest some subjects that should have more weight than others. Give reasons in full for your answers.

3. Describe a remedy for each of the following cases: (a) Poor spellers; (b) faulty grammarians; (c) careless calculators; (d) thoughtless memorizing; (e) poor readers.

4. Why is it important to give special attention to ventilation of the schoolroom? Discuss fully the physiological processes involved.

5. What are your standards of good work in composition? Suggest the most effective way or method of correcting compositions in class. In your suggestion explain the defects as well as the merits of your method.

6. Discuss the method best calculated to secure the friendship and co-operation of a class.

7. How would you make use of the school or public library to the best advantage?

8. In teaching literature what would be your chief aims? What are the defects in the present methods? Would you use the sentences in literature as drills in grammar? Give reasons for answers.

9. How would you make the recitation of each pupil an intellectual activity for every member of the class?

10. Outline an inductive lesson in English grammar.

QUESTIONS FOR 1905.

1. By the history lesson, how may patriotism be best inculcated?

2. (a) What studies taught in school are especially adapted to the cultivation of the perceptive faculties?

(b) Give some illustrations.

3. Tell how you would teach a class to add columns of figures with accuracy and rapidity and justify your method by psychological reasons.

4. How would you direct and encourage home reading? Name ten books suitable for Sixth and Seventh grades.
5. Discuss the Art of Questioning with definite suggestions.
6. How would you teach the ready and correct use of the English language to the First, Second, and Third grades of the primary school.
7. How do you teach "pointing off" in division of decimals? Illustrate with examples showing various difficulties that perplex children.
8. Explain the method to be pursued in teaching writing during the first two years' of a child's school life.
9. If you had a pupil with a remarkable gift of memory who succeeds but poorly in original work, such as composition and arithmetic, how would you work to correct the deficiency?
10. What devices would you employ to keep up a good standard attendance in your class?

QUESTIONS FOR 1907.

1. What are the purposes of school discipline?
What different ways of disciplining children has the teacher at command?
Suggest how you would vary in the use of these means: With incorrigible children as opposed to sensitive children. With boys as opposed to girls.
2. Suggest the various ways by which the teacher may rest a child from mental fatigue resulting from classroom instruction. Discuss the special merits of each way suggested.
3. When you find a pupil of normal mind who does not know how to study, how would you proceed to remedy the condition. Suggest as many detailed ways as you can of giving him desire and power, to study by himself.
4. What are the different ways by which you can convey the meaning of an unfamiliar word, phrase, or sentence to a child? Discuss the relative value of each way.
5. What are the different elements which must be associated in the child's mind in order to make him a good speller? Suggest several ways of presenting and associating these elements.
6. What are the main advantages to be derived from nature study? How would you use the school garden and the school excursion in connection with this subject?
7. What are the objects to be kept in view in the teaching of history in the elementary schools? What are the most interesting and valuable kinds of historical facts to be learned in the primary grades? In the grammar grades?
8. In leading a child from home geography to world geography, how would you proceed?
9. State briefly in detail what means you would use in the primary grades to make your pupils speak and write good English.
10. In teaching arithmetic when would you let the child do the work mentally? When have him write it out in full? When mix both methods?

QUESTIONS FOR 1908.

1. There is a growing tendency to abolish corporal punishment as a means of correcting the faults of pupils:
 - (a) If you had charge of a school in which corporal punishment was not

permitted, state briefly how you would maintain order in the case of pupils disposed to be unruly.

(b) If you were allowed to inflict corporal punishment at your discretion, in exceptional cases, state some circumstances under which it might, in your opinion, be resorted to as a just and effective mode of correction.

(c) When a teacher decides that a pupil should be punished for wrong doing, what objects should he (the teacher) have in view; that is, what worthy ends would he expect to reach through the infliction of the punishment?

2. What would you do with a pupil who, from absence or other cause, has fallen behind the class?

3. What rules of order would you insist upon to be observed by pupils in passing from the building during fire drill?

4. (a) Tell how you would teach reading to beginners.

(b) Name the important qualities of good reading.

(c) What are the commonest faults which you have found in the reading of children? How would you correct these faults?

5. Our new Course of Study requires an exercise in rapid addition:

Make out a column of figures for this exercise, and say how you would best secure speed and accuracy in performing it.

6. (a) What is the main benefit to be derived from the study of general History? Of Geography?

(b) How would you use Geography in connection with History?

7. (a) Describe a good method of teaching the geographical idea of day and night.

(b) What conditions give a country large foreign commerce? Domestic commerce?

8. (a) In what school year would you introduce the regular study of fractions?

(b) With what other rules of Arithmetic would you correlate percentage?

9. Suppose you had charge of an elementary class consisting of pupils of two consecutive grades; make out a program of daily exercise therefor in regular form, showing the grades and divisions taught, the simultaneous work in each, the hour and duration of each subject, and the time for reviews, oral or written.

10. A great many pupils find it extremely difficult to concentrate their attention on the instruction and explanations of the teacher, or to record mentally the most important points set forth in their reading matter. In the case of normal children, what, in your opinion, is the chief cause of this defect, and how would you remedy it?

QUESTIONS, DECEMBER 20TH, 1909.

ARITHMETIC.

1 (a) A pupil writes 425 words in 5 minutes 3 seconds. At next lesson she writes 521 words in 4 minutes 5 seconds. At next lesson she writes 593 words in 4 minutes 17 seconds. At what average rate of speed per minute does she write?

(b) Hale & Co., Stockton, bought of Lamont & Co., San Francisco, 3 doz. plain gold rings at \$20.00 per dozen; 4 gold rings, diamond settings, at \$50.00 each; 6 gold watches at \$15.00 each; 4 sets teaspoons at \$6.00 each. Make out the bill, allowing a discount of 25%.

2. (a) A commission merchant received \$50.00 from a country customer with orders to send him ribbon, worth $6\frac{1}{4}$ c per yard, and to pay himself for his trouble. The merchant charged $2\frac{1}{4}$ %. How many yards of ribbon did the merchant send to his customer?

(b) A ship worth \$75,000.00 was insured for three-fifths of its value at $1\frac{7}{8}$ %. The cargo, valued at \$7,500.00, was insured for $\frac{4}{5}$ of its value at $2\frac{1}{2}$ %. Find amount of premiums.

3. (a) If it cost \$312 to fence a piece of land 216 rods long and 24 rods wide, what will it cost to fence a square piece of equal area with the same kind of fence?

(b) Find the interest on \$125.50 from January 1st, 1898, to July 7th, 1899, at 7% per annum.

4. (a) What will it cost to dig a cellar 60x30x9 feet at $3\frac{1}{2}$ cents per cubic yard?

(b) A room is 15 feet square and the walls are 9 feet high. What will it cost to paint the four walls at 25 cents per square yard, making no allowance for doors or windows?

5. (a) If four men build $12\frac{1}{4}$ rods of fence in $3\frac{1}{4}$ days, how long will it take 18 men to build 237 $\frac{6}{13}$ rods?

(b) Four persons engage in manufacturing, and invest together \$22,500.00. At the end of a certain time A's share of the gain is \$2,000.00; B's \$2,800.75; C's share \$1,685.25; and D's share \$1,014.00. How much capital did each put in?

GRAMMAR.

6. "In the bosom of one of those spacious coves which indent the eastern shore of the Hudson, at that broad expansion of the river denominated by the ancient Dutch navigators the Tappan Zee, and where they always prudently shortened sail and implored the protection of St. Nicholas when they crossed, there lies a small market town or rural port, which by some is called Greensburgh, but which is more generally and properly known by the name of Tarry Town."

(a) Draw one line under the entire subject, and two lines under the entire predicate.

(b) Parse the phrases and clauses in black-face type in above.

7. The sun that brief December day
Rose cheerless over hills of gray,
And, darkly circled, gave at noon
A sadder light than waning moon."

Diagram or analyze the above.

8. What is a synopsis?
What is meant by voice?
What is declension?
Give the principal parts of lay, set, go, give and lie (to recline).
Singing birds are silent at this season.
The bird's singing under the window awakened us.

What is the use of "singing" in each of the above sentences?

9. "In the Old Colony days, in Plymouth, the land of the Pilgrim,
To and fro in a room of his simple and primitive dwelling,
Clad in doublet and hose, and boots of Cordovan leather,
Strode with a martial air, Miles Standish, the Puritan Captain.
Buried in thought he seemed, with his hands behind him, and pausing
Ever and anon to behold his glittering weapons of warfare,
Hanging in shining array along the walls of the chamber."

In the above selection, tell the part of speech of each word in black-faced type.

10. (a) Give sentences illustrating the following uses of clauses. (Underline each clause).

1. Adverbial.
2. Adjective.
3. As object.
4. As subject.

Give an example of an infinitive used as subject.

(b) Give an example of a compound and a complex sentence, and explain the difference between them.

METHODS OF TEACHING.

11. (a) Which study do you consider the most valuable in the ordinary school curriculum, and give several reasons for your choice.

- (b)
1. Upon what is the science of teaching based?
 2. What should be the great object of teaching?
 3. What are the characteristics of any good method of teaching?

12. (a) What method would you adopt to prevent tardiness; and to secure regular attendance in school?

(b) What is to be accomplished in teaching English Grammar?

13. (a) What special training is given by Literature, by History?

(b) By Mathematics, by Science?

14. (a) For what definite purpose and to what extent would you use analysis or the diagram?

(b) In teaching composition, in any grade above the fourth, state your method as to choosing subject, writing the composition, or correcting it. Name the grade of class you have in mind.

15. (a) Distinguish between principle, method, device.

Which may change?

- (b)
1. When is a schoolroom in good order?
 2. What incentive will you put before children for study?

March 21, 1910.

ARITHMETIC.

1. (a) The longitude of Portland, Maine, is 70 degrees, 15 minutes, and that of Chicago is 87 degrees, 38 minutes.

What is the difference in time between the two places?

(b) How many square inches of tin are there in a dozen tin pails of cylindrical shape, the diameter of each being 8 inches and the height 10 inches? (No top).

2. (a) A rectangular field having an area of 135 1-5 acres is 3 1-5 times as long as it is wide. Find the length of its diagonal.

(b) If 9 bricklayers can lay a wall 80 ft. long, 20 ft. high, 1 1/2 ft. thick, in 15 days and 9 hours each, in how many days of 10 hours each can 12 bricklayers lay a wall 100 ft. long, 25 ft. high and 2 ft. thick?

3. (a) On \$860.56, \$149.63 interest was paid for 2 years, 8 months, 3 days. What was the rate?

(b) An agent received \$10,200, with which to purchase wheat at \$1.25 per cental at a commission of 2%. How many centals did he buy?

4. (a) The distance from San Francisco to San Jose is 50.6 miles. An automobile party leaves San Francisco at 10:35 A. M., and arrives at San Jose at 1:20 P. M. What was the average speed on the trip?

(b) A man owns $3\frac{1}{5}$ of a ship that is worth \$85,000. If the ship is insured for $57\frac{1}{2}\%$ of its value, how much money would this man receive if the ship were a total loss, and how much would he lose?

5. (a) Subtract 5% from 9.65 and divide the difference by $(3\% - 2.65)$.

What number is that from which if we deduct $3\frac{1}{7}$ of itself and $2\frac{1}{9}$ of the remainder, 28 will be left?

(b) A shed is 15 ft. long and 10 ft. wide. It is 12 ft. high in front and 7 ft. high in the back.

How much lumber (one inch boards) should be ordered to cover the four sides, adding 10% for waste?

How many full bundles of shingles should be ordered for the roof, if there are 250 shingles in a bundle, and they are laid so that one thousand cover an area 80 square feet?

GRAMMAR.

6. Parts of speech of the heavy-faced type words, and why?

- (a) He is **as** honest **as** he looks.
- (b) He came **as** he had promised.
- (c) There is little hope, **but** I shall try.
- (d) **There** is no lad **but** honors his mother.
- (e) The game is not **worth** the candle.
- (f) This is the book **that** I prefer.
- (g) Not **that** I love Caesar less.
- (h) **The** longer we live, the more we learn.

7. Name the principal and subordinate clauses, and tell how subordinate clauses are used:

The drawbridge dropped with a surly clang,
 And through the dark arch a charger sprang.
 Bearing Sir Launfal, the maiden knight,
 In his gilded mail, that flamed so bright
 It seemed the dark castle had gathered all
 Those shafts the fierce sun had shot over its wall.
 In his siege of three hundred summers long,
 And, binding them all in one blazing sheaf,
 Had cast them forth.

8. In the above selection tell what each participial and prepositional phrase modifies.

9. Give the case of nouns and pronouns and why, and parse all finite verbs in the following selection:

The investigations and prosecutions initiated by Secretary Hitchcock and carried on by his successor, Secretary Garfield, demonstrated conclusively that land thieves have been for some time getting possession of the public domain, and that they have had sometimes the direct, sometimes the indirect, aid of public officials in and out of Congress.

10. Are the following correct? Give your reasons:
- (a) I saw him many times this year.
 - (b) One of his best friends were accused of the crime.
 - (c) It looks like it would rain to-day.

METHODS OF TEACHING—SCHOOL MANAGEMENT—HYGIENE.

(Write not more than one page on each lettered division of a question).

11. (a) Discuss the importance of the personal life and character of the teacher in relation to her profession.
Illustrate.
- (b) How much time should a teacher spend daily out of school hours in preparation of her work, and how should that time be spent?
12. (a) How would you handle the "topical method" in History, in study and recitation, and what are its advantages over the "question and answer method"?
- (b) How may the judgment be trained in History study?
13. (a) What are the causes of impure air in a schoolroom, and what are its effects on the children? How can a room be ventilated by doors and windows without subjecting some to cold air?
- (b) Name two books on "Methods", or History of Education, you have read. Give a brief summary of the contents of one of these.
14. (a) Name the most important factors in moral training. Illustrate by suggesting how the different school subjects might contribute.
- (b) How do you teach division and pointing off of decimals? How would you secure accuracy in number combinations?
15. (a) How would you give individual aid to backward pupils in a class of 40 to 50 pupils?
- (b) How do you estimate a pupil's fitness for promotion?

QUESTIONS DECEMBER 30, 1910.

ARITHMETIC.

- 1a. If a note, dated March 20, 1910, due in 90 days, for \$760.00, bearing 6% interest, be discounted on April 9, 1910, what will be the proceeds, if the rate of discount be 4%?
- 1b. If a 5-cent loaf of bread weighs 8 oz. when flour is \$5.00 a barrel, what should a 10-cent loaf weigh if flour is \$8.00 per bbl.?
- 2a. If I buy shoes at \$2.00 per pair, how much must I mark them so that I can abate 25% of the asking price and still make a profit of 12½%?
- 2b. If I sell ½ of an article for ⅔ of its cost, what per cent. do I gain?
- 3a. In how many days of 8 hours each will 10 men build a wall of 120 feet long, 15 feet high, 2½ feet thick, if 12 men build a wall 100 feet long, 12 feet high, and 3 feet thick, in 10 days of 10 hours each?
- 3b. If a field of 30 acres is three times as long as it is wide, what will it cost to fence it at \$2.50 a rod?
- 4a. A ship valued at \$90,000.00 is insured under the "average clause" for \$75,000.00. It is damaged to the extent of \$30,000.00. What is the owner's loss?
- 4b. The longitude of San Francisco is 122° 26' 45" W.; and of Manila,

120° 52' E. When it is 10:30 A. M. solar time, Dec. 30, 1910, at San Francisco, what is the time at Manila?

5a. The floor of a room is 15'x18', and height 12'. What is the distance from the S. E. corner (on floor) to the N. W. corner (on ceiling)?

5b. The circumference of the smaller wheel of a locomotive is 8 feet, and of the larger wheel 20 feet. A spoke of each is red. At the start both of these spokes are at a right angle to the rail. How many times will they occupy this relative position in traversing a mile?

GRAMMAR.

6 (a)

Combine the following into a complex sentence:

1. Napoleon was imprisoned on the island of St. Helena.
2. This happened after the battle of Waterloo.
3. This battle occurred in 1815.

6 (b)

Change the following to a complex and then to a compound sentence:

"Besides being kind, lazy, and good-natured, this boy went continually into debt with the tart man."

7.

Correct where necessary, and write reasons:

1. I saw some one who I took to be she.
2. He gave the books to Alice and myself.
3. I didn't know it was that late.
4. I used to always think that that was correct.
5. Be sure and get your lessons.

8.

Select and name all complements and indirect objects:

1. By perseverance Lincoln became a great man.
2. Honesty of purpose brought the boy his reward.
3. Jack made his brother a kite.
4. He pumped the well dry.
5. The teacher asked them five questions.

9.

1. Write sentences using a present participle as a noun.
2. Past participle as an adjective.
3. An infinitive as an adverb.

Parse all participles and infinitives in the following:

4. It is difficult to learn to paint.
5. He saw the enemy fall.
6. The crew attracted attention by waving the flag.

10.

Parse the black-faced type words in the following:

People talk of liberty as if it meant liberty to do just what a man likes. I call that man free **who** fears doing wrong, **but** fears nothing else. I call that man free who has learned the most blessed of all truths, **that** liberty consists **in** obedience to the power **and** to the will **and** to the law that his higher soul reverences and approves. He is not free **because** he does what he likes; but he is free because he does **what** he ought, and there is no protest **in** his soul against the **doing**.

BOARD OF EDUCATION

METHODS OF TEACHING.

11. (a) What is the value of Psychology to the teacher?
11. (b) Of what educational value is discipline in the school?
12. (a) How would you introduce the subject of number in the lowest primary grade?
12. (b) How would you introduce the study of Geography in the lower primary grades?
13. What would you do to cultivate honesty, truthfulness, and moral courage among your pupils?
14. (a) Give some device to secure regular and prompt attendance.
14. (b) Do you favor giving medals for superior work in school? Give reasons for your answer.
15. (a) If interest on the part of the pupils is lacking, where would you look for the cause?
15. (b) How would you teach a class to study History?

QUESTIONS JUNE 12, 1911.

ARITHMETIC.

1. (a) The people of a school district wish to build a new school house which will cost \$2,850. The taxable property of the district is valued at \$190,000. What will be the rate of taxation?
1. (b) A man had three lots, each containing $6\frac{1}{4}$ acres, which he re-divided into building lots of $\frac{5}{8}$ of an acre each. How many building lots did he have?
2. (a) How many square inches are there in the surface of a cube whose solid contents are 2,744 cubic inches?
2. (b) If 120 bushels of oats last 14 horses 56 days, in how many days will 6 horses consume 90 bushels? (No analysis. To be answered by proportion.)
3. (b) A grocer bought 7 gallons of wine, and lost two gallons by leakage. He sold the remainder for \$8.05 a gallon, making 25% on the whole. What was the cost per gallon?
4. (a) Mary bought a piece of silk for \$63.50; she found, on measuring the silk, that she had only \$61.25 in value. How many inches to a yard were given her?
4. (b) For what sum must a three months note be drawn so that, when discounted at a bank at 6%, the proceeds will pay for 75 barrels of flour at \$8.50 per bbl.?
5. (a) Find the difference between the simple and compound interest, computed annually, of \$1,200, for three years, three months, at 8%.
5. (b) Berlin is $13^{\circ} 23' 53''$ east longitude, and San Francisco is $122^{\circ} 26' 12''$ west longitude. When it is 12 M at San Francisco, what time is it at Berlin?

GRAMMAR.

6. Correct where necessary, giving reasons:
 - (a) "It is them."
 - (b) "Who will the book be read by?"
 - (c) "Than who none higher sat."
 - (d) "Every man, woman, and child lifted their voice in anger."
 - (e) "I do not like those kind of people."

7. Choose the better tense, with reasons:
- "It had happened before I saw him," or
"It had happened before I had seen him."
 - "I should have liked to have done it," or
"I should like to have done it."
 - "We have met on a great battlefield," or
"We are met on a great battlefield."
8. Give the principal parts of:
Awake, begin, blow, break, do, sing, swim, drink, steal, write,
teach, catch, forget, take, fall.
9. Distinguish the adverbs and the adjectives in the following sentences:
He was sick nigh unto death.
The tumult shows the battle nigh.
How ill this taper burns.
All left the world much as they found it.
Much learning doth make thee mad.
10. Tell the part of speech each black-faced type word is, and give reason for your classification:
- Heaven still guards the **right**.
Be sure you are **right** and then go ahead.
He will **right** the wrongs of the innocent.
And that my soul knoweth **right** well.
He is an **American** and glories in the right of an **American** citizen.
- His years **but** young, **but** his experience old.
Quick! **man** the lifeboat.
Man wants but **little** here below.
Nor wants that **little** long.

METHODS OF TEACHING.

June 12, 1911.

Answer to each question to be limited to one page.)

11. (a) How best may the problem of retardation be met by the class teacher.
11. (b) When, if ever, is corporal punishment justifiable? What are the special dangers in its use?
12. (a) State three ways in which interest may be aroused and facility be developed in the writing of compositions.
12. (b) State the educational justification of the school garden?
13. (a) Discuss the relationship between the personal character of the teacher and its effect upon the moral development of the child.
13. (b) Name five essential qualities for a good teacher to possess.
14. (a) What qualities should characterize the work of a "good disciplinarian"?
14. (b) How would you deal with a restless class of fourth grade children placed indefinitely in your charge?
15. (b) Do you favor the holding of examinations at regular intervals in the grades? State your reasons for or against.

15. (b) What degree of self-government would you allow to children in the elementary school? On the playground? In the classroom? On the way to and from school?

MAINTAIN ITS INVIOABILITY.

The system has now been on trial a sufficient time for its worth to be fully tested, and its results to be clearly exhibited. As a result of that test, I am positively of the belief that the present high standing of our teaching force, and the freedom from political scandals in appointments to the service are the outcome of the establishment and enforcement of the provisions of the existing Civil Service plan. I am also sure that my conviction is shared by our foremost educators and our interested citizenry in general.

The Civil Service System for the appointment of teachers to this department was on March 15, 1911, suspended for the first time since it had become a rule of the department. Three teachers now have the unenviable distinction of being the only ones ever appointed to the department under a suspension of the Civil Service System. I wish to register my most emphatic protest against the establishment of such a precedent. No exception should ever be made for any one. No political, religious or social influence should count. Let those who wish to join the San Francisco school department compete in the open. Let them enter this department honorably and through the only door that is open to all, whether strong or weak in "pull." Nothing should count but character, and ability to do the work.

I sincerely trust that no suspension of the Civil Service will ever again take place. Unfortunately, the Civil Service System is but a rule of the Board which can be suspended at any time. As long as it remains only a rule of the Board, it can be suspended in order that certain favored candidates for positions as teachers may be appointed, or it may be abolished altogether. Its beneficial effects, its absolute fairness and justice to candidates have been universally commended by prominent educators as well as by many of those who have taken the examinations. It is the only plan that has permitted absolute independence among candidates.

It is therefore, with the direct object of preserving this institution in all its solidity, and preventing attacks upon its integrity, that I respectfully recommend most strongly that every effort be made to have it incorporated expressly in our City Charter by amendment submitted to the qualified electors of our city. I pledge myself to work assiduously for the adoption of an amendment such as proposed, to the end that neither open assault nor stratagem of any kind, resorted to by any party, should ever succeed in overthrowing or circumventing those on guard behind this bulwark of our educational progress and development.

REPORT OF OBSERVATIONS

made by Sup't. Alfred Roncovieri and Deputy Sup't. A. J. Cloud, on a visit to the Los Angeles Schools, April 3, 4, and 5, 1911.

We visited in Los Angeles four great High Schools, viz., in the order of our inspection, the Los Angeles Polytechnic High School, the Manual Arts High School, the Los Angeles High School, and the Hollywood High School. We were accompanied in all but the latter instance by Sup't. J. H. Francis of Los Angeles, who extended to us every courtesy. Many of the facts which are here-with given were derived from the conversations we had with Mr. Francis and with the principals and teachers of the schools visited. I shall treat of this subject first with reference to such matters as appear to be common to all of the schools; secondly, some particular phases of the work in the individual schools; and, at the end, add certain recommendations which seem to me to be pertinent as the outgrowth of both these general and particular considerations.

GENERAL.

It is a striking fact that the number of students in attendance at the High Schools of Los Angeles, combined, is, at the present time, over 7,000. This student population has been built up from approximately 2,000 within a period of five or six years, having, therefore, more than kept pace with the increase of population, even when the annexation of surrounding territory by the City of Los Angeles is kept in mind.

The second broad fact that cannot escape notice is the very large number of courses of study, something over forty, that is presented to an entering pupil for his choice. It is true that each High School in the Los Angeles system emphasizes a certain specific line of work, as will appear more in detail later in this report; but, nevertheless, the boy or girl living in Los Angeles and wishing to attend a public High School, has the opportunity of choosing between about forty-two different and distinct courses of instruction, so he may practically obtain that which he believes to be best for his own case.

The next general subject worthy of consideration is that of organization. The Los Angeles school authorities have been ready to put into the schools a large corps of teachers, and particularly have not been slow in relieving the principals of these High Schools of routine detail duties, thus leaving the principals free to deal with bigger questions of educational policy, as also will be shown later in this report. The principal is assisted by two vice-principals, one a man, the other a woman, who take from his shoulders and dispose of all the minor matters incident to the conducting of a large institution. Thus the principal becomes in effect the manager of a great business corporation, with assistants upon whom he may depend for relief from petty exactions. In this connection it is important to state that all agree that difficulties of administration decrease rather than increase when the attendance rises above seven or eight hundred. The reason is that more sections in fixed courses of instruction may be formed, and hence a greater flexibility of program result, so that irregularities on study-cards of pupils take care of themselves.

PARTICULAR PHASES.

Los Angeles Polytechnic High School.

The aim of this school is to give its students thorough preparation in specialized branches of education that will prepare them for the actualities of life, both industrially and commercially. Perhaps some emphasis should be laid upon the fact that this school presents not only industrial, but also commercial branches; yet it by no means neglects the cultural elements so necessary in the educating of the boy or girl, if he or she is to be, not a machine, but a human being.

The present attendance at this school is about 2,200, of whom about 1,200 are boys. This student assemblage is contained in a large, fine building with a ground space of perhaps half a city block; yet this seems to be hardly enough room for the institution. This school has eighty-five teachers, a principal, and two vice-principals, averaging a little less than one teacher to twenty-six pupils. The students in this school have a possibility of choice from eighteen different courses of study.

Some of the special features of the work which we inspected were:

A. A domestic science department, in which 240 girls are enrolled. We saw these girls perfecting themselves in the arts of cooking, patterning and designing.

B. The shops in wood-working and iron-working, including blacksmithing. The best line on the results in this department is found in the fact that the school is equipping itself through the labor of these students with furniture

and other school apparatus. Thus we saw in the principal's office, chairs, desks, and a couch, which we were told were the handiwork of students of the school. The boys in the shops have made the stoves that are being used by the girls in the cooking department. In the shops we noticed a sign issued by the Board of Education of Los Angeles reading: "The High School Board of Education of Los Angeles City High Schools will not be responsible for any accident resulting from the use of these machines." Precaution is taken, however, against accidents in the use of the machinery, as was evidenced by the boxes built around the belts connecting one part of a machine with another part. We were told that a single accident only had occurred in the school in this work in the past several years.

C. The physical laboratory is admirably fitted with the most modern apparatus, especially that which bears upon the science of electricity. It has taken about \$10,000 to purchase and install this equipment. One piece alone cost \$460.00.

D. There is an outdoor gymnasium upon the roof. The roof is flat, and it is also used as a lunch place.

E. The assembly hall is of dimensions sufficient to hold nearly the whole student body.

F. The library, containing a complete collection of books of reference, was just being re-fitted so as to give facilities for study at the time of our visit.

G. The most highly organized instruction in all branches of oral English, from the simple personal narrative through the well-prepared debate, including parliamentary law, is being given.

H. A cafeteria, having a holding capacity equal to one-half to two-thirds of the total attendance of the school, is run within the school by the students' organization, of which I shall speak immediately below. Here lunch service is provided for students with the utmost rapidity and at minimum prices. 1,200 students are served within an hour and thirty minutes, from noon on. A commodious kitchen adjoins the lunch-room.

I. A remarkably effective student organization is in full swing. This is chiefly due to the efforts of Sup't. Francis, who was principal of this school for a number of years before he was elevated to his present position. The system is somewhat elaborate, but the end and aim of it is to train the students in the science of self-government. Under this plan, discipline has been reduced to the smallest dimensions in this school. Especially valuable to the student is the training that he gets in the managing of financial affairs. The student body of this school handles the sum of about \$25,000 a year. A rigid system of accounting is maintained under the broad direction of a Faculty member who acts as Treasurer of the Students' Association. This money comes from various sources, particularly from athletic events, and from the receipts of the cafeteria mentioned above. The general effect is to give the students a sense of responsibility and a pride in their school which they otherwise would not have.

POLYTECHNIC HIGH NIGHT SCHOOL.

Our attention was drawn to the fact that a night school is conducted in the building of the Los Angeles Polytechnic High School, having an attendance of 700. These students are admitted to the same courses as if they came in the day-time.

MANUAL ARTS HIGH SCHOOL.

The main distinction between this School and the Polytechnic is that the former does not develop such a high degree of specialization as does the latter. This may be illustrated by saying that the Polytechnic offers a three years'

course in chemistry, while the Manual Arts has but a one year's course of instruction in that subject. This is a new school, which was opened about six months ago only. It is located rather far out in the city, but with good car connections. There are at present three large buildings, with an immediate prospect of a fourth one, to serve as an Administration Building. The school stands on a large tract of land 600 feet square. The present enrollment is slightly over 500. The students are just about evenly divided between boys and girls. The Faculty consists of fifty-three teachers, a principal and two vice-principals, or an average of one teacher to ten or eleven pupils. The students in this school have the choice between six different courses of study, with the further proviso that parents and students may submit others for consideration under the agreement that such course shall include work for at least two years in advance and meet with the approval of the principal. This school is equipped with fine shops, a gymnasium for boys, and one for girls, outdoor playgrounds of every kind, and a cafeteria. The student organization conducts the cafeteria on the same principle as at the Polytechnic. A dry-kiln for the curing of lumber is one of the features of the shops.

THE LOS ANGELES HIGH SCHOOL.

This is the old-line school of the city, which still places the emphasis upon the academic branches of study, but is nevertheless adapting itself to the practical needs of life. It is housed in a fine old brick building which was evidently the original structure, a big brick annex, and a wooden shack across the street, into which it has overflowed. The attendance at this school is about 2,100, with a ratio of three girls to two boys. It was thought, when the Polytechnic High School was opened, that there might possibly come to be a falling-off in the registration at the Los Angeles High School, but quite the contrary has been the case. The number of teachers in this school is eighty-two, besides a principal, two vice-principals and a clerk. This makes an average of about twenty-five pupils to each teacher. Twelve distinct courses of study are presented to the students of this school. Some of the noteworthy points that we had brought to our attention here were:

A. A very fine Art Course of four years' duration is given. The students themselves pose as living models while their fellow-students draw from them. Thus we saw one boy holding a tennis racket in his hand as he stood upon a platform; the other students were drawing his picture from life. Some fine crayon and color work is included in the course of instruction. Architectural drawing is given in the fourth year. Classes for sketching out-of-doors are formed. A complete line of instruction in mechanical drawing, in which surveying is incorporated, is also conducted. All of this work, both in the free-hand and mechanical, is a part of the regular course of the school.

B. Special emphasis is placed upon musical instruction in this institution. Two women devote their entire time to choral and class teaching of music. Besides this, there is a students' glee club. A special room is set aside for the music. This branch is also given full credit upon the school program.

C. There is a gymnasium for boys, and one for girls. The plan in this school is that each student must take some physical exercise every day of his school life throughout the whole time of his attendance there. The first year's work is prescribed in-door gymnastics under the direction of most competent men and women. The second year's work for boys is military drill. A cadet corps has been established in the school with an armory attached. The students of their own accord arrange summer camps in outlying regions. The commandant of this department is a trained military officer. In the third and fourth

years the students are given a very considerable latitude of election of the kind of physical exercise or athletic sport that they will undertake. For example, we saw a group of young men playing a game of tennis on the courts located on the school grounds, and found upon inquiry that these players were performing a given part of the regular school work, and that their attendance at the same had been registered by a teacher in charge.

D. A school garden, in which those interested in agriculture have full opportunity to learn the practical side of the subject, is located at one side of the athletic ground of the school.

E. A very considerable museum, in which has been gathered a collection of fossils and other geological and zoological specimens under the supervision of a competent scientist, who acts as curator, is located in a group of rooms in the main building, and the students who are interested in that department of study have most excellent opportunities to advance.

F. There are here both large and small study rooms. Some of the smallest study rooms are fitted up to bring vividly to the student's mind a realization of a special kind of work, as, for example, one of these smaller study rooms is decorated with many beautiful pictures of California scenes and people, and is known as the "California Room." There is a large assembly hall with a stage such as would be found in a thoroughly equipped theatre.

G. The library is one of the most valuable features of this school. Several hundred volumes for reference purposes are so placed as to be easy of access to the students of the school. A librarian, who is a regular member of the Faculty of the school, is in charge. Perhaps thirty or forty students were quietly and silently studying at tables in this large library room when we visited it. The students are permitted to take out selected lists of books for a period of not over twenty-four hours. The subject-teacher finds it a tremendous gain to be able to post in the library a list of books, especially in the literature and history courses, so that pupils may make further investigation than they would otherwise be able to do from the classroom text-books alone.

H. A cafeteria is conducted by the Students' Association of this school, somewhat on the plan of that at the other two High Schools above noted. We had an excellent lunch here, being waited upon by young ladies of the school, who, we were assured, at the beginning of each term volunteered their services and considered it a privilege to perform this duty for the Students' Association. The average cost of the lunch to each student is between ten and fifteen cents. The student body officers attend to all of the details of management. The chief cook is a woman of most excellent qualifications who is also employed by the student body. As an adjunct to the cafeteria, there stands outside a candy wagon from which the students buy such supplies as they desire. The Students' Association derives a very considerable revenue from this business, which sum it devotes to the establishment of three scholarships in the Universities.

I. The Students are organized here on the basis of self-government along the same lines as at the Polytechnic High School. The financial income of the organization is more than \$40,000 a year. The discipline in this school seemed to us to be remarkably high and to be the direct reflex of the inculcation of ideas of self-government in the minds of the students. There was no monitoring by teachers in the hallways. The students passed from room to room at the end of periods, yet no disorder of any kind whatever was observed.

J. Many beautiful paintings, photographs and pieces of statuary adorned the rooms and hallways of the building. This is also true of the other two schools above named. The aesthetic nature of these students is being cultivated by their being brought daily into association with fine works of art.

HOLLYWOOD HIGH SCHOOL.

This school is located in a recently annexed portion of the City of Los Angeles and therefore has not been long under the control of the City Board of Education. It combines in itself more nearly all of the distinctive features of the other three High Schools just above mentioned than any other secondary school that we have seen. In other words, it is a composite of a highly technical and of a thoroughly organized academic school. It is almost ideally located on a tract of twelve and one-half acres of land. It has six fine buildings, arranged in a group plan at certain intervals apart. The ground was being broken for a new building which, we were told, was to be erected immediately. The total investment in buildings to date is \$180,000 and in land \$30,000. The student population of Hollywood totals 500. A principal, vice-principal and twenty-five teachers direct the lines of work. This gives an average of twenty pupils to a teacher. The pupil has a choice between twelve different courses of study. The school session lasts until 3:10 P. M., out of which time three assembly periods of twenty minutes each are taken to enable pupils and teachers to get together. The school day is divided into eight periods. The teachers hold no more than five recitations each day. The heads of departments are given one-half of their time off for supervision of the work in their respective branches. A few of the noteworthy facts that we found existing in this school were:

A. A most artistic and complete theatre is located in a building by itself with an adjoining music-room and reading-room under the same roof, which may be opened into the theatre by sliding doors if it is desired, to accommodate an overflow. The auditorium proper will seat about 700. The music-room is furnished with a raised platform of sufficient size to seat a class receiving instruction, so that the conductor may direct the recital from below. The acoustic properties are admirable. The reading-room is similarly fitted. In it we found a class holding a session. The individual members were standing upon the platform and reading aloud, with fine expression, to their associates. It was one of the best recitations in oral expression that I have ever had the good fortune to hear.

B. The school has an orchestra taught and led by a regular member of the Faculty. This is a part of the music course of the school, which embraces instruction over a period of four years. We listened to a rendition of good music by this orchestra.

C. In the main academic building the recitation and study rooms are particularly bright and airy and are artistically decorated. The study rooms are organized on the plan of classes; for example, there are study halls for pupils of the upper classes and others for those of the lower classes. It is very easy to locate a given teacher at any time of the day because a type-written schedule of his or her hours and subjects is affixed to the outside of the door of his own room.

Lockers built in the shops of the school are arranged along the sides of the walls in the hallways, and in them the students keep their books and personal property, each student having an individual key to his locker. There are rest rooms for the teachers in this and in several of the other buildings.

D. Two buildings are set aside for Domestic Science and industrial work. The girls in the Domestic Science Department have almost unlimited scope in the choice of subjects they wish to pursue. Sewing, cooking, basketry, leather work, metal work, designing, dress-making and freehand drawing are samples of what they have to choose from. They are given practical instruction in the art of housekeeping. In one part of this building a series of six or seven rooms is set aside for the practice of home-making. It is equipped with all such modern conveniences as would be found in a well regulated household. Here

the girls prepare a meal and perform all of the ordinary duties that devolve upon the housekeeper.

The furniture of this particular set of rooms was made by the boys of the school in the shops, and all of the wall decorations, coverings, cushions, etc., by the girls of the schools. In fact, the same statement would hold for this building throughout, and for the academic building as well.

A thoroughly equipped laundry with tubs, drying apparatus, gas heaters, irons, etc., is established in conjunction with the teaching of Domestic Science here. A hospital is also found in this building.

E. The shops are not so extensive as those at the Polytechnic High School. The courses are chiefly in wood and iron working. The chemical and physical laboratories are as complete as can be made. The principal, who is an expert in this direction, devoted a great deal of time to their building and equipment.

F. Outside, to the rear, comes a ground space of some acres which has been turned into a farm. The land is cultivated by the students, who take two hours every morning to practical application of their knowledge in Agriculture. Athletic grounds also are laid out on the school plot.

G. A cafeteria is conducted, much the same as in the other places already referred to. Gymnasium facilities are also provided.

H. In the matter of administration the principal of this school has established a system to which great praise must be accorded. He has had notices printed with this heading: "Possible Failures." Notices are sent in regularly each week by the class teachers giving the names of pupils who may be lax, with comment by the teacher on the reasons why the given pupil is failing, and what he or she would suggest as a remedy. The entire faculty of the school meets each week to go over these records and to discuss ways and means of coping with the individual problems. Usually the method adopted is that of kind advice to the pupil, with the suggestion of extra work that he may undertake under the guidance of the teacher, who thus becomes, in effect, an "ungraded" teacher for the special case. The result of this plan has been that in the Hollywood High School of over five hundred pupils, there were at the end of last term not to exceed five pupils who were requested to repeat their courses. This method also gives the principal an idea of the work that is being done by each pupil in his school, and thus enables him to keep close watch upon individuals. The principal makes it a point to find out exactly why each pupil leaves his school. The mortality in his school is reduced to the lowest possible figure; thus he is meeting one of the gravest problems in the High Schools today, that of the great number of pupils who drop out before graduation.

GRAMMAR SCHOOLS.

We visited several grammar schools in Los Angeles, but chiefly with the express purpose of looking at the school gardens which we heard were being established. In Los Angeles this year the Board of Education has set aside \$6,000 for the purpose of improving grounds and making school gardens. This development is still in its first stages, however, but will undoubtedly grow larger and larger in proportion.

We saw two school gardens upon grammar school lots and adjacent vacant property that made an excellent appearance. The Los Angeles plan is to give over to a certain class or section of a class, a certain prescribed part of ground for special care. The students plant both vegetables and flowers and, in some places, trees. The aim is not only that the pupils may gain practical knowledge of agriculture, but also that the school grounds may be beautified.

THE LOS ANGELES NORMAL SCHOOL.

We visited this school, but it is not necessary at this time to speak of its work except in one respect, that is the system by which those attending it are enabled to serve in the City Department of Los Angeles, as so-called "Cadet Teachers." This is accomplished by an arrangement between the Superintendent of Schools at Los Angeles and the Normal School authorities. Members of the final year in the Normal School spend a large part of their time in practical teaching in the public schools of Los Angeles, where they act as assistants to the regular teachers in the class rooms or as substitutes without pay. Both the President of the Normal School and the Superintendent of Schools at Los Angeles declare that the plan brings the very best results.

RECOMMENDATIONS.

From the foregoing statements of fact I desire to draw certain conclusions which I respectfully submit as recommendations:

1. The elective system of courses of study should be widely extended in the San Francisco High Schools. This should be done with proper safeguards and with a grouping around certain fundamental studies. This will help to get pupils into the High Schools.

2. We should improve the machinery in our High Schools for watching the progress of individual students and for maintaining a closer personal contact with them. This will keep the students in the schools when we get them there.

3. We should work toward the six year High School plan.

4. We should still continue to have High Schools of various kinds with different ideals and purposes; but in some ways there could well be a closer correlation between them.

5. We should try to make an arrangement with the San Francisco Normal School by which we could gain the services of cadet teachers.

PUBLIC SCHOOL ATHLETICS.

Athletics that make for strong character among our boys and girls have been fostered in our city by the Public Schools Athletic League, an organization of public-spirited citizens consisting of Mr. S. S. Peixotto, President; Mr. Ray Dougherty, Secretary; Mr. Eustace Peixotto, Athletic Director; and Directors T. F. Boyle, John Elliott, Judge F. J. Murasky, Judge T. F. Graham, Robert Roos, L. A. Wolff, A. C. Skaife, J. C. Astredo, Geo. A. Schlitter, Alfred Roncovieri, John Hammersmith, C. W. Conlisk, John McLaren, A. Katschinski, I. F. Moran, Jos. Hickey and A. J. Cloud. The best index of the work of the League during the past season is to be found in the report of Athletic Director Eustace Peixotto, which is here submitted:

"The Public Schools Athletic League has completed a most successful year in all lines of activity undertaken by the organization. In every branch of sport, great and widely distributed interest has been shown by the boys of the city's grammar schools. Competition has been keen, but at the same time there has been a lessening of the intensity of feeling that has characterized some of the school contests in the past. This result is due, I believe, partly to the plan of playing tournaments on a percentage basis, so that everything does not hinge on the winning or losing a single game, and also to the fact that the boys, and teachers as well, are growing to have more confidence in the League, its officials and their rulings. The fact that the same umpires are used all through a given series has greatly contributed to the success of the tournaments. Boys come to understand an umpire and his rulings, and he to understand the

boys. There has been no trouble whatever experienced in the conduct of games or behaviour of boys on the basketball court or on the diamond.

The track meets have been uniformly well conducted. The boys are learning to report for their events promptly and heed the slightest request of the officials, making the work of conducting the meets easier all the time.

Nevertheless, successful as the competitive sports carried on by the League have been, I believe that the future of the League's work is going to lie in other directions. There is a great field of endeavor in public school athletics which we have only just scratched. Although we have had as many as 700 boys taking part in a single meet, and although nearly all the schools have entered one or more teams in baseball and basketball tournaments, still but a small proportion of the pupils in the schools have had an opportunity to take part in the League's activities, and, judging from present indications the proportion is likely to grow smaller rather than larger, especially in track and field events. More and more, as athletics become a settled institution in the schools, the boys of ability along this line become known, the time in which races can be won is known, and boys who feel they have but small chance or no chance at all of winning do not enter in the meets. Much can be done toward getting boys of lesser ability interested in athletics through holding of novice meets and district meets, but even then a great many of those who need the athletics most will not take part. It should therefore be the line of work in the future to develop interclass competition in the various schools, and carry on class athletics and athletic badge contests by which means all the boys can be given the stimulus of athletic competition.

It is a great pity that we have not a more adequate department of physical training in our public schools, for all this athletic work should be supplemented by careful gymnastic training. It is to be hoped that this will come in time. The present system appears to me entirely inadequate. There is but one instructor for 75 schools, and it stands to reason that no matter how competent he may be, he will not be able to accomplish much in the way of results. It may be found possible during the next year for the Public Schools Athletic League to assist in this matter of gymnastic training.

The League should also assist in the development of the school playgrounds, which I am happy to say the Board of Education is now giving its attention to in the construction of the new school houses, and should foster the idea that an adult (preferably one of the teachers) should supervise these playgrounds after school. This system is in vogue in Los Angeles, where the teachers get a small extra compensation for the work.

The League must keep before it the object of getting every school boy and girl, if possible, interested in his physical as well as his mental development, and giving them normal, healthy bodies, without which they cannot be said to be fully equipped for the battle of life. I hope that next year, as I have said, at least a beginning can be made along these lines, although I must confess it is an herculean task. The actual carrying on of the competitive tournaments of the League takes a great deal of time, more perhaps than one would realize at first sight, and with the schedules of the different sports crowding one after another there is but little time left the Athletic Director for such work as outlined above. It is time, however, that a beginning at least should be made, and this will be part of the programme for next year.

We have a splendid beginning here in San Francisco, because we have started in right. We have a control of the athletic situation and are able to manage things from the League headquarters much as athletics are generally carried on within a single school. The Board of Education has given its financial support to the League's work, and with an increase in this regard promised in the future, the outlook is a rosy one.'

In order to strengthen and emphasize one part of this report, I respectfully recommend to the Board of Education that play on school-grounds after school hours be supervised by a teacher in sympathy with this movement, and that he or she be given additional remuneration for this service.

UNGRADED CLASSES.

I desire at this time to repeat the subject matter of my discussion of this theme in the report of 1908-09, pages 28 and 29.

"The individual pupil is still an unsolved problem in all graded schools. Teaching fitted to a majority of a class will not meet the needs of each individual. Some pupils, able to do most of the work, are deficient or slow in a particular subject. Others, more mature than their classmates, are able to work at a more rapid pace than the grade to which their scholarship assigns them. Other pupils, immature or naturally slower of comprehension, will make sure and certain progress if they may take the work at a less rapid pace. Some of the soundest minds work slowly. Pupils from other school systems often do not fit into our course of study and grading. They need a little extra help in some subjects. A teacher with forty-five or fifty pupils cannot give sufficient attention to these individual needs.

Our ungraded class is the best method for combining individual with class instruction. We have several of these classes in operation. They are differently organized according to the needs of the school. In some, pupils go in groups of from six to a dozen for additional teaching in their weak subject. Each grade teacher sends pupils needing this special instruction to the ungraded room during a study period of her own class. The pupils who thus loses a study period must make up the time by home study. If a pupil is weak in arithmetic he gets the regular lesson from his own class teacher and another in the ungraded room. He may be able to understand the operation of percentage in his own grade but is deficient in decimals or common fractions. Or a fifth grade pupil may be able to understand fractions but needs drill in the number combinations. Such pupils go to the ungraded room for drill in back work upon which present grade work depends.

In other schools the teacher has a number of permanent pupils who are either slow in all their work and need time for each grade, or who, because of maturity or ability, are able to do two terms in one or three terms in two, and thus gain time in completing their grammar school course. In addition to these permanent pupils the teacher has a limited number of groups who come from the classrooms for special drill. In the ungraded class the pupils are given either group instruction or individual instruction according to their needs. The principal assigns pupils to this class in conference with the teachers and carefully directs the work. This is never a deportment class and bad conduct or lack of application may at any time forfeit the privilege.

The ungraded class is found most effective in grammar schools, and in primary schools which have a large number of foreign pupils. Several of our large grammar schools are still unprovided with ungraded classes.

As soon as financial conditions permit every school of eight or more classes should have an ungraded class, and the larger schools should have two such. In schools of six or seven classes the principal should be teacher of the ungraded room for a half day and should have the other half of the day for supervising the building. First and second grades are divided into so many groups and the work is so largely individual that the ungraded class is not needed.

Failure of promotion is one of the chief causes for pupils dropping out of school. They are chagrined and discouraged at not going on with their classmates; the repeated work has little interest for them. A sufficient number of

ungraded rooms will go far toward solving the problem of the "left-over." Pupils may be promoted in the subjects in which they are strong, and work in the ungraded room in the weak subjects. If weak in all subjects they are transferred to the ungraded room. Under a well organized system these defects should be remedied as soon as discovered, and discovered as soon as they exist. A pupil who shows marked weakness in any study should enter the proper group in the ungraded class; the pupil who needs more than a term to complete the work of a grade should join the permanent section of the ungraded class.

A larger amount of work for individual pupils should be done by all our grade teachers. It would be wise if a half hour after school were used for helping backward pupils."

In line with the above policy Ungraded Classes have been established in the following schools:

Bergerot, Bernal, Columbia, Crocker, Denman, Emerson, Everett, Fairmount, Fremont, Garfield, Hamilton, Hancock, Hearst, Horace Mann, Irving M. Scott, James Lick, Jean Parker, John Swett, Monroe, Noe Valley, Pacific Heights, Parental (all classes), Redding, Roosevelt, Sutro and Washington.

The Board of Education has satisfied a great need in establishing and maintaining these ungraded classes. The results are already seen in progress that is being made toward the solution of the problem of the "left-over."

NEW VACCINATION LAW.

In accordance with the provisions of an act passed by the last legislature, relaxing to some extent the stringent provisions of former years relative to the vaccination of children enrolled in public schools, the Board of Education has issued a blank form to comply with the statute, as follows:

San Francisco, California.

(Date).....

I hereby declare that I am conscientiously opposed to the practice of vaccination and will not consent to the vaccination of.....

(Signed).....

Parent or Guardian.

AROUSING INTEREST IN HOME INDUSTRIES.

In April of 1911 the Board of Education and the Superintendent of Schools co-operated with the Home Industry League of California in interesting the pupils of the upper grammar grades and of the high schools in "Made in California" goods and products. A competition for prizes was conducted in the schools, it being in the nature of the writing of a composition that would bring out best the character of the work of the League. The following were some of the sub-topics which the pupils were asked to investigate and treat of in their writings:

First: The natural resources of the State of California; the best means to develop these resources.

Second: The different commodities that are manufactured in the State of California. Enumerate products that are finished and made ready for the market.

Third: How will the developing of home industries improve the general business conditions of the State?

Fourth: How can converting raw material into manufactured products ready for the market be encouraged?

Fifth: How may the consumption of California manufactured products be encouraged and increased? What benefits may be derived therefrom?

Sixth: If the home industry movement of California could greatly increase the number of factories in the State, resulting in the employment of thousands of additional factory hands, what effect would it have on the prosperity of your father's business?

Seventh: If it is impossible to increase the number of factories in the State of California, what employment would you suggest for the increased population that we expect during the next ten years?

Such great interest was taken in this contest that about 1,500 compositions were presented to the League. The effects will undoubtedly be beneficial in awakening in our boys and girls a desire to gain more accurate information concerning the opportunities that our State affords for creating the finished article from the raw material. The officials of the League expressed themselves as being more than satisfied with the outcome.

THE CONVENTION OF THE NATIONAL EDUCATION ASSOCIATION.

The Forty-ninth Convention of the National Education Association, popularly known as the "N. E. A.," in our city from July 8th to 14th inclusive, was the most significant educational event of the year in our community. This great meeting was looked upon as the deferred convention of 1906 for which every preparation had been completed by the city of San Francisco when the destruction of the city by fire made the meeting for that year impossible. Since the rebuilding of our metropolis, delegations of eminent educators from California had asked that San Francisco be granted the privilege of entertaining the Association, first at the meeting at Denver, and again at Boston, and at the latter place were successful in presenting their claim. As soon as the choice of a convention city had definitely been made, a group of enthusiastic workers issued an invitation which is so expressive of the cordiality of our people in bidding the teachers of America to come, that it is herewith quoted in full:

THE INVITATION.

San Francisco, California, Dec. 15, 1910.

TO THE TEACHERS OF AMERICA:

All California invites you to the **New San Francisco** in July, 1911, to attend the National Education Association Convention. The hotel facilities in the rebuilt city will accommodate 60,000 people, and every hotel is pledged not to advance rates. After seeing the marvelous work of a great city rebuilt in four short years, you can make San Francisco the center for "Seeing California." Why not plan to attend the Convention—then visit the Yosemite, the various groves of the Big Trees, the Redwood country, the Tahoe or Shasta resorts, Southern California, the great Canyons of the Sierras or some of the many beach or mountain resorts scattered throughout our Wonderland? If you are interested in Industrial California, we shall be glad to show you our orange groves, our orchards, our vineyards, our great wheat ranches, our gold mines and our forests. Why not make definite plans now for a real vacation in California? It will never be more enjoyable; it will never cost so little. The latch string will

be out when you cross the California line. We shall hope to see you in the New San Francisco next July. Remember, the latch string will be out.

YOURS FOR SAN FRANCISCO AND CALIFORNIA

Edward Hyatt, Superintendent of Public Instruction, Sacramento.
 P. H. McCarthy, Mayor of the City and County of San Francisco.
 Duncan MacKinnon, Director N. E. A. for California, San Diego.
 Benjamin Ide Wheeler, President University of California, Berkeley.
 Alfred Roncovieri, City Superintendent of Schools, San Francisco.
 David Starr Jordan, President Stanford University.
 Mark Keppel, County Superintendent of Schools, Los Angeles.
 James A. Barr, City Superintendent of Schools, Stockton.
 M. E. Dailey, President State Normal School, San Jose.
 Alexis F. Lange, Dean of Faculties University of California, Berkeley.
 John Swett, Martinez.
 J. W. McClymonds, City Superintendent of Schools, Oakland.
 J. H. Francis, City Superintendent of Schools, Los Angeles.
 Kirk Harris, President San Francisco Convention League.
 William L. Gerstle, President San Francisco Chamber of Commerce.

The California organization for the convention was effected by co-operation between school people and the officials of the San Francisco Convention League. The membership of the General Committee, to whose able management was due much of the success of the convention, was:

GENERAL COMMITTEE.

William B. Pringle, Chairman, 378 Russ Building, San Francisco.
 Felton Taylor, Secretary, Merchants' Exchange Bldg., San Francisco.

MEMBERS AT LARGE.

Hon. Hiram W. Johnson, Governor of California, Sacramento.
 Hon. P. H. McCarthy, Mayor of City and County of San Francisco.
 Duncan MacKinnon, State Director N. E. A. for California, San Diego.
 Benjamin Ide Wheeler, Pres., University of California, Berkeley.
 David Starr Jordan, President, Leland Stanford Junior University.
 Miss Agnes E. Howe, Pres. California Teachers' Association, San Jose.
 Miss Jessica Peixotto, Assistant Prof., University of California.
 Morris E. Dailey, Pres., State Normal School, San Jose.
 Alexis F. Lange, Dean of Faculties, University of California.
 J. W. Linscott, Sup't. of Schools, Santa Cruz.
 Arthur H. Chamberlain, University of California, Berkeley.
 Kirk Harris, Pres., San Francisco Convention League.

EXECUTIVE COMMITTEE.

William B. Pringle, Chairman, 378 Russ Building, San Francisco.
 Felton Taylor, Secretary, Merchants' Exc. Bldg., San Francisco.
 Alexis F. Lange, Dean of Faculties, University of California.
 James A. Barr, Sup't. of Schools, Stockton.
 Alfred Roncovieri, Sup't. of Schools, San Francisco.
 L. E. Armstrong, Editor "Sierra Educational News," San Francisco
 J. W. McClymonds, Sup't. of Schools, Oakland.
 Kirk Harris, Pres., San Francisco Convention League.
 Arthur H. Chamberlain, University of California, Berkeley.
 Paul T. Carroll, San Francisco.

SUB-COMMITTEES.

- James A. Barr, Sup't. of Schools, Stockton.
Chairman, Committee on Publicity and Attendance.
- Paul T. Carroll, San Francisco.
Chairman, Finance and Auditing Committee.
- Alfred Roncovieri, Sup't. of Schools, San Francisco.
Chairman, Committee on Music.
- Mrs. E. L. Baldwin, San Francisco.
Chairman, Committee on Hospitality.
- Mrs. M. W. Kincaid, Member of Board of Education, San Francisco.
Chairman, Committee on Reception.
- Joseph A. Stulz, San Francisco.
Chairman, Committee on Printing.
- F. H. Meyer, Director School of Arts and Crafts, Berkeley.
Chairman, Committee on Decorations and Badges.
- A. J. Cloud, Deputy Sup't. of Schools, San Francisco.
Chairman, Committee on Hotels and Headquarters.
- Mark Keppel, County Sup't. of Schools, Los Angeles.
Chairman, Advance Membership Com. (South of Tehachapi).
- C. L. McLane, Sup't. of Schools, Fresno.
Chairman, Advance Membership Com. (San Joaquin Valley).
- Miss Lulu E. White, County Sup't. of Schools, Redding.
Chairman, Advance Membership Com. (Sacramento Valley).
- J. W. McClymonds, Sup't. of Schools, Oakland.
Chairman, Advance Membership Com. (Coast and Bay Counties).
- Richard D. Faulkner, Prin., Horace Mann Grammar School, San Francisco
Chairman, Committee on Halls.
- Edward Hyatt, Sup't. of Public Instruction, Sacramento.
Chairman, Committee on California Headquarters.
- Robert Newton Lynch, California Development Board, San Francisco.
Chairman, Committee on Excursions.
- L. E. Armstrong, Editor, "Sierra Educational News," San Francisco.
Chairman, Committee on Press.
- Will C. Wood, Sup't. of Schools, Alameda.
Chairman, Committee on Exhibits.

The Board of Education manifested its interest in the meeting by passing on March 22, 1911 a resolution appointing one of its members, Mrs. Mary W. Kincaid, Chairman of a Reception Committee of members of the department to arrange for the entertainment of delegates to the convention, and by appropriating funds to carry out that object. Principals and teachers loyally responded to the call for service on this committee, and to the invitation to subscribe for membership in the association, approximately 1,200 joining from the San Francisco Department, a very remarkable record. Three hundred principals and teachers gave their time and energy to work on committees, especially those on Reception and Hospitality, where they performed their duties in such a manner as to reflect the greatest credit on our city, as was repeatedly testified to by both the officials and lay-members of the Association.

We should be happy to reprint here a complete digest of the discussions of the Convention, but, as space forbids, we shall confine ourselves to the furnishing of the program of the general sessions only. Yet we shall preface that by saying that the dominant note of the proceedings may be stated as having been the spirit of public welfare as developed by education, carrying with it the conviction that education is the most potent force in civilization that works toward the improvement of the human race.

The program of the General Sessions:

MONDAY AFTERNOON, JULY 10, 3:30 O'CLOCK.

Session in Greek Theatre, State University, Berkeley.

Music—March, "Daughters of the American Revolution".....	Lampe
Selections from Offenbach, arranged by.....	Godfrey
Potpourri "The Sunny South".....	Lampe
March, "Pro Patria".....	Roncovieri
Overture "William Tell".....	Rossini

Presiding—Wm. B. Pringle, Chairman of General Committee.

Invocation—Rev. Wm. K. Guthrie, First Presbyterian Church, San Francisco.

Addresses of Welcome:

Honorable Hiram W. Johnson, Governor of California.

Mr. R. B. Hale, Director of the Panama-Pacific Exposition Company.

Honorable P. H. McCarthy, Mayor of the City and County of San Francisco.

President Benjamin Ide Wheeler, of the University of California.

Introduction of Ella Flag Young, President of the National Education Association, by Josiah Little Pickard, Cupertino, California, ex-President of the N. E. A., for the year 1871.

Response to Addresses of Welcome:

Robert J. Aley, President, University of Maine, Orono, Maine.

Music—Fantaisie on "American Songs,".....Herbert
Appointment of Committee on Resolutions.

"The Relation of Education to Temperance"—David Starr Jordan, President of Leland Stanford Junior University, Stanford University, California.

"The Cause of Education"—Helen Marsh Wixson, State Superintendent of Public Instruction, Denver, Colo.

Meetings of active members by states to elect members of the Committee on Nominations immediately after the close of the session, 5:30 p. m., at places designated by State Signs in the Greek Theatre.

MONDAY EVENING, JULY 10, 8:30 O'CLOCK.

A general reception to President Ella Flag Young and the members of the N. E. A. was held in Pavilion Rink, corner of Sutter and Pierce Streets, on Monday evening, July 10th. The following musical program was rendered:

1. March "Golden State".....	Weldon
2. Overture, "Light Cavalry".....	Suppe
3. "Reminiscences of Verdi".....	Godfrey
4. Selections from the "Chocolate Soldier".....	Strauss
5. Paraphrase on "My Old Kentucky Home".....	Dalby
6. Intermezzo from "Contes de Hoffman".....	Offenbach
7. Pizzicati Polka.....	Strauss
8. Introduction and Soldiers' Chorus from "Carmen".....	Bizet
9. Waltz, "Dolores".....	Waldteufel
10. March, "Under Freedom's Banner".....	von Blon

TUESDAY EVENING, JULY 11, 8 O'CLOCK.

All evening sessions were held in Pavilion Rink Auditorium, Sutter Street, between Steiner and Pierce Streets.

Music—March, "Our National Emblem,".....	Bagley
Selection from "Faust".....	Gounod
March, "La Fiesta".....	Roncovieri

- Overture, "Poet and Peasant".....Suppe
 Invocation—Rev. E. R. Dille, Central M. E. Church, San Francisco.
 President's Address—Ella Flagg Young, Superintendent of Schools, Chicago, Ill.,
 President of the National Education Association.
 "An Appreciation"—Alfred Roncovieri, Superintendent of Schools, San Francisco,
 California.
 Music—National Songs, "The American Patrol".....Meacham
 "Reorganization of American Education"—James H. Baker, President, University
 of Colorado, Boulder, Colo.

WEDNESDAY EVENING, JULY 12, 8 O'CLOCK.

- Music—Selections from "Woodland".....Lueders
 Intermezzo, "Love in Idleness".....Macbeth
 Selection from "The Serenade".....Herbert
 March from the "Ring of the Niebelungen".....Wagner
 Invocation—Rev. Charles M. Lathrop, Church of Advent, San Francisco.
 "The Opportunity of the Teacher"—Mrs. Emmons Blainé, Chicago, Ill.
 "The Development of Personality Through Education"—Margaret E. Schallenberger,
 Principal of Training Department, State Normal School, San Jose, Cal.
 Music—"Victorious America".....Tobani
 "The Compensation of the Teacher"—Joseph Scott, President, Board of Education,
 Los Angeles, Calif.
 "The Life of the Teacher"—Charles Zueblin, Lecturer, Boston, Mass.
 Appointment of Committee on Nominations.

THURSDAY EVENING, JULY 13, 8 O'CLOCK.

- Music—March, "Centennial Evacuation".....Conterno
 Selection, "Echoes of the Metropolitan Opera".....Tobani
 Medley of Songs, "Gems from Erin".....Beyer
 Waltz, "Blue Danube".....Strauss
 March from "Tannhauser".....Wagner
 Invocation—Rev. George E. Burlingame, First Baptist Church, San Francisco.
 "Can We Shorten the Term of Years Without Decreasing the Efficiency of Education
 in American Schools"—Samuel Avery, Chancellor, University of
 Nebraska, Lincoln, Nebraska.
 Music—Piano Solo by George Kruger.
 (a) "Rhapsodie Hongroise".....Liszt
 (b) "Faust Fantaisie".....Liszt
 "Present Problems in English Education"—Kate Stevens, North Islington Central
 School, Tollington Park, London, England.

FRIDAY EVENING, JULY 14, 8 O'CLOCK.

- Music—March, "Stars and Stripes Forever".....Sousa
 Selection, "Recollections of the War".....Beyer
 "Melody in F".....Rubinstein
 Medley of National Songs "America".....Moses
 Overture, "Orpheus".....Offenbach
 Invocation—Rev. Charles A. Ramm, Secretary to His Grace, the Archbishop
 Riordan.
 "Peace in the School"—Katherine Devereux Blake, Principal, Public Schools,
 City of New York.
 "Progress in Public Education"—Francis G. Blair, State Superintendent of
 Public Instruction, Springfield, Ill.
 Music—March, "The American Republic".....Thiele
 Closing exercises.
 Music—"America."

In accordance with an established custom of the Association, Sunday, July 9th, was observed as Educational Sunday by a large number of the churches of San Francisco. The themes of several of these sermons are here given:

- "Honey and Enlightenment: A Study of Happiness as a Social Asset" (morning).—"The Earth and The Woman: In the First Century and the Twentieth" (evening).—Rev. Charles S. Aked, First Congregational Church.
- "The Purpose of an Education" (morning).—"Religious Doubt, its Cause and Cure" (evening).—Rev. Hugh K. Hamilton, California Street M. E. Church.
- "The Great Teacher" (morning).—"How Knoweth This Man Letters" (evening).—Rev. W. H. Bagley, West Side Christian Church.
- "Real Education Leads Godward" (morning).—"The Incomparable Teacher" (evening).—Rev. Louis J. Sawyer, Hamilton Square Baptist Church.
- "The Teacher and Society"—Rabbi Martin A. Meyer, Temple Emanuel. Services on Saturday, July 8.
- "Ethical Ideals in Modern Educational Theories"—Rev. Bernard Kaplan, Congregation Beth Israel. Services on Saturday, July 8.
- "Christian Training a Necessary Element of True Culture"—Rev. T. W. Clappett, Trinity Episcopal Church.
- "Religion and Education"—Rev. Charles Lathrop, Church of Advent Episcopal.
- "The Teacher's Calling" (morning).—"Education for Character" (evening).—Rev. George E. Burlingame, First Baptist Church.
- "The Bible Supreme as an Educational Force" (evening).—Rev. George W. Rine, Seventh Day Adventist Church.
- "Education a Factor in National Life"—Rev. J. Fuendeling, St. Markus Kirche.
- "The Place and Scope of Education in Religious Life" (Swedish Language).—Rev. Alfred E. Lindberg, First Swedish Baptist Church.
- "Our Master's Model Mind"—Rev. James McElhinney, Holly Park Presbyterian Church.
- "The Place of Knowledge in the Christian System"—Rev. Robert Irwin, University Mound Presbyterian Church.
- "Public School: Its Influence on the Republic"—Rev. Dr. M. S. Levy, Geary Street Temple. Services on Saturday, July 8.
- "The Religious Elements in Education"—Rev. William P. Sullivan, St. Mary's Cathedral, Catholic.
- "The Ideal Woman"—Swami Trigunatita, Hindu Temple, 2963 Webster Street.
- "Religion and Public Education"—Rev. E. R. Dille, Central Methodist Episcopal Church.
- "Present Day Tendencies in Education"—Rev. R. Logan, Lebanon Presbyterian Church.
- "Religious Education in the Public Schools"—Rev. C. S. Tanner, Richmond Presbyterian Church, 31st Avenue and Clement St.
- "Religion Cannot Be Taught But Must Be Cherished" (morning).—"Education Without Religion Dangerous" (evening).—Rev. W. K. Guthrie, First Presbyterian Church.
- "Personal Education"—Rev. F. M. Larkin, Ph. D., of Los Angeles, Grace M. E. Church, 21st and Capp Streets.

The words of Alfred Roncovieri on the subject "An Appreciation," delivered at the general session of July 11th, are thought to be worthy of repetition here, inasmuch as they preserve an interesting bit of San Francisco's educational history.

"AN APPRECIATION."

"Madam President and Teachers who have come from every section of our Republic:

'I deem it a flattering compliment to be called upon to speak on this occasion and to add my small tribute to the gracious words that have been spoken.

I assure you that we feel deeply the honor you have conferred on us by choosing San Francisco as the place of the forty-ninth Annual Convention of the National Education Association.

We rejoice in your coming, the effect of which must be to elevate the character and advance the interest of the profession of teaching and promote the cause of popular education. Your presence will inspire us with fresh enthusiasm for our work, and we will carry into our school rooms renewed energy. Our 50,000 school children will reap the benefit of our contact with you.

In 1906 it was to have been our pleasure and honor to welcome and entertain the National Education Association, but a conflagration unparalleled in ancient or modern times overwhelmed us and laid our beloved city in ruins. Our business was wiped out and our people were without food and shelter. Homeless, we could not entertain you. Fate had decreed that we should become instead the recipients of the bounty of the world.

We experienced the fact, however, that a calamity has its compensations. No sooner had the wires flashed the news of our catastrophe to the world than there followed the greatest outpouring of brotherly love and sympathy recorded in the annals of history. While the embers of the great fire were yet alive and still smouldering amid the ruins that had been wrought, and before our citizens had even partially recovered from the appalling devastation, by land and by sea there flowed to our city streams of relief. The sympathy of the Republic and of the nations beyond the seas was awakened, and magnificent was the generosity that was exhibited toward our people.

Teachers and school children of the United States were animated by this common spirit of brotherhood. Immediately there came substantial aid. Carloads of food and clothing were hurried to us from every village and hamlet of California and neighboring States. Cheered by the sympathy and the generous charity of the nation, aided and sustained by the millions of dollars which were so magnanimously given to us, we resolved that a new San Francisco should arise; that the beautiful one of yesterday should be restored, and that the future city should transcend the old in solidity, elegance, and in all things which make a community great and attractive. In a miraculously short time our people were fed, clothed, and housed, and the new San Francisco was begun.

Among the hundreds and thousands of benefactions bestowed upon us during the dark days of affliction, and in the midst of those distressing times, nothing was more touching than the thought of teacher for fellow teacher, of school child for school child, and none was more grateful than the contributions of the school children of our country for the construction of a school building, and the many gifts of food, clothing and money sent for the special relief of teachers made destitute by the great fire. These spontaneous offerings relieved much actual distress, and developed in its fullest significance the text, "It is more blessed to give than to receive," for many of our teachers had fled from burning buildings with no worldly goods but the scant clothing which they wore.

The funds for the relief of teachers were distributed by a special committee of teachers and citizens and members of the Board of Education, presided over by the then President of the Board, Hon. Aaron Altman. With the contributions of the children, a beautiful school building was in large part erected. It is located in the northern portion of our city, graceful in its architecture, and characteristic of the early Mission fathers of California. It was given the Spanish name of "Yerba Buena," to commemorate the first name of the village of '49 that has since grown to be the metropolis of San Francisco. It stands as an eloquent memorial and a fitting monument to the generosity and loving thoughts of the school children of the Republic towards the school children of San Francisco.

The rehabilitation of the San Francisco School Department was commenced five days after the calamity of April 18, 1906. An inventory of the losses sus-

tained revealed the fact that 32 schools, out of a total of 83, had been destroyed, involving a loss of nearly \$2,000,000. Then came a splendid exhibition of hope, pluck and energy. Our teachers, many of whom were themselves refugees, volunteered their services to those more unfortunate than themselves. They served with the Red Cross society on committees of relief, health and order. They did yeoman service wherever duty called. For our refugee children schools were opened in tents in Golden Gate Park. Although school rehabilitation was carried on under most adverse conditions, yet, three months after the catastrophe, our schools reopened for regular work.

Ever alive to the educational needs of the children, our citizens have authorized school bond issues amounting to nearly \$9,000,000. Many of our new school buildings are now finished. They far exceed in their beauty, strength and equipment those that were destroyed. Behold the Phoenix has risen from the ashes! We point with pardonable pride to our achievements, with the realization that the compensations of calamity are only made apparent after the lapse of time.

Let me say to you that the people of San Francisco glory in the good men and women engaged in the work of our public schools. Without flinching and without retreating, undaunted in the presence of the greatest conflagration of all time, our teachers bravely stood their ground, shoulder to shoulder, and notwithstanding the difficulties and adverse conditions that have confronted them ever since the dire calamity that befell our beloved city, our department has, through the zeal and patient efforts of our teachers, produced the most satisfactory results in education and thus has earned the approbation of our citizens. Our people recognize in the fullest, that teaching is an exalted calling, that the work and influence of the teacher abides in the boys and girls, and that when the men and women of a profession are brought together through sympathy and become associated on the plane of mutual aid and common labor, they become united by the gentle bond of fraternal love.

We acknowledge your gifts with deep gratitude. We appreciate the generous impulse which prompted you to help us in our hour of need. We abundantly value your kindly thoughts and your friendship, your cordial good-will and the closer expression of the great brotherhood of the teachers of the United States, far more than the material things you sent to us. To withdraw something from oneself and give to another is a point of common humanity. It exemplifies altruism and the brotherhood of man in the highest. To carry with us the consciousness of your generous deeds and the thankful remembrance of the love and benevolence of which we have been the object, brings joyful pleasure and everlasting gratitude to our hearts. Like brethren, whether you had little or much, you divided with us in time of need. For all this loving thought, the children and the teachers of the old and the new San Francisco extend to you, and to those whom you represent from every corner of our great country, their sincere thanks and deep appreciation.

You shared our sorrows of 1906, and now do we welcome you and bid you share and pass the cup overflowing with the joys of 1911. We "open our hearts to you wider than our gates," and welcome you to our homes and firesides. And now, with devout thanksgiving to the "Lord of Hosts," through whose love, power, and blessings we have been enabled to right ourselves, we pray that your deliberations may be crowned with success, and that you may enjoy your sojourn with us as your labors deserve; and when you have gone hence we shall remember with grateful hearts the welcome guests that gave much more than they received."

Several special features of the convention deserve recognition by reason of the active participation in them, or immediate direction of them, by our own people; and to such events we now refer.

On Friday evening, July 8th, Mrs. Ella Flagg Young, President of the National Education Association, was the honored guest at a banquet tendered by the reception sub-committee of the Hospitality Committee of the California organization, under the immediate charge of Mrs. Henry Payot. Six hundred school people and their guests were seated at the tables, all of whom voted the entertainment to have been thoroughly enjoyable. Toasts were responded to by Mrs. Young, President Benjamin Ide Wheeler, President David Starr Jordan, Mrs. O. S. Barnum of Los Angeles, Professor E. C. Moore of Yale University, and Dean W. T. Sumner of Chicago, while Mr. Thomas E. Hayden officiated as toastmaster.

The San Francisco Board of Education maintained head-quarters, during the week, in the Girls' High School building. The hospitality there bestowed on our guests, and the beauty and restful atmosphere of the surroundings, were unsurpassed in the history of our city. Great credit for this achievement is the due of Mrs. M. W. Kincaid, Chairman of the Committee in charge, who devoted her exceptional executive talents unsparingly to this labor. Exhibits of the "busy-work," such as woven baskets and small blankets, of children of the primary grades, trained by Miss Lew Ball, Supervisor of primary reading; and of wood and metal-work by pupils of the upper grammar grades, under the direction of Mr. F. K. Barthel, Supervisor of manual training; gave rise to most commendatory criticism by hundreds of Eastern and Californian educators. A distinct novelty was a Chinese room, fashioned to represent a pagoda, furnished and decorated in gorgeous Oriental style. In this temple tea was served daily by pupils of the Chinese public school, arrayed in native costume. These head-quarters served as a resting-place for many hundreds during the Convention. Trained nurses and a physician were in constant attendance. Mrs. Kincaid as Chairman was assisted by Mrs. Henry Payot, Mrs. James E. Power, Mrs. H. G. Vaughan, and by leading principals and teachers of the Department.

An exhibition of drawing and design, the work of the children of the primary and grammar public schools of San Francisco, trained by Miss Katherine Ball, Supervisor of drawing, that attracted most favorable comment among the many visitors who attended it, was held at the S. F. Institute of Art.

Through the courtesy of Colonel John P. Wisser, Commander of the Troops, the Presidio and Fort Winfield Scott were opened to members of the N. E. A. during the sessions of the Convention. Mrs. Alfred Roncovieri originated the idea and laid the plans. On Wednesday afternoon fully ten thousand people were given free access to the reservation that they might inspect the fortifications, see the great disappearing guns and visit the quarters, being guided by officers of the post. Afterward a vast throng remained to witness the parade and drill under command of Colonel Wisser, and to enjoy the strains of martial music as furnished by the fine regimental band.

Among the most delightful affairs of Convention Week were the informal receptions given at Golden Gate Hall, on Wednesday and Thursday evenings, by the San Francisco Association of Teachers' Councils, with Mrs. M. L. O'Neal as Chairman of the Committee having direction of the entertainment.

That San Francisco is to hold a great exposition for the whole world in 1915 was given wide publicity during the meeting of the N. E. A. Especially, Thursday, July 13th, was set aside as "Exposition Day," and special receptions were held at the Palace and St. Francis Hotels, to which invitations were accepted by large numbers of delegates, and at which addresses were delivered by prominent citizens.

The Newman Club of San Francisco, Miss Agnes Regan, President, gave an elaborate reception on Wednesday afternoon, July 12th, which was well attended by delegates to the Convention.

Due to the indefatigable energy of Miss Estelle Carpenter, Superintendent of Music in the S. F. School Department, who arranged the program, a recital of California Composers presenting their own compositions was given on Friday

afternoon, July 14th. This event proved to be such a rare musical feast that by almost unanimous request it was given again on the following day. The program follows:

FRIDAY AFTERNOON, JULY 14, 2:00 O'CLOCK.

Recital of California Composers in Scottish Rite Hall, corner of Van Ness Avenue and Sutter Street.

Arthur Fickenscher—

- Songs: (a) "Where go the Boats." Words by Robert Louis Stevenson.
 (b) "The First Kiss." Words by Goebel.
 (c) "The Winds." Words by Robert Louis Stevenson.
 (d) "The Brass Band." Words by Charles Keeler.
 Sung by Mrs. Arthur Fickenscher.
 Accompanied by Mr. Arthur Fickenscher.

H. B. Pasmore—

- Songs: (a) "The Message."
 Sung by Mrs. Joseph Mora.
 Accompanied by the Misses Pasmore.
 (b) "Love's Annals."
 Sung by Miss Sophye Rottanzi.
 Accompanied by the Misses Pasmore.

Albert Elkus—

- Piano Solo: "Four Pieces in Folk Tone."
 Rendered by Miss Stella Elkus.

William H. McCoy—

- Songs: "Prayer and Duett," from Opera "Cleopatra."
 Sung by Miss Catharine McCoy and Mr. Ernest McCandish.
 Accompanied by Mr. William H. McCoy.

Edward Schneider—

- Violin Solo: "The Romanza."
 Rendered by Miss Elsie Sherman.
 Accompanied by Mr. Edward Schneider.

Edith Simonds—

- Songs: (a) "In the Glow of the Morning."
 (b) "Resurgam."
 (c) "Anthem of the Sea."
 Words by Charles Keeler.
 Sung by Miss Fernando Pratt.
 Accompanied by Mrs. Edith Simonds.

Theodore Vogt—

- Songs: (a) "Ich Liebe Dich."
 (b) "A Canadian Lullaby."
 Sung by Mrs. Anna Covert.
 Accompanied by Theodore Vogt.

H. B. Pasmore—

- Cello Solo: "Barcarolle."
 Rendered by Miss Dorothy Pasmore.
 Accompanied by Miss Suzanne Pasmore.

Samuel Savannah—

- Songs: (a) "The Four Seasons."
 (b) "Ocean Lullaby."
 (c) "The Crested Jay." Words by Kieler.
 Sung by Mrs. Arthur Fickenscher.
 Accompanied by Mr. Arthur Fickenscher.

H. B. Pasmore—

Arrangement of Violin Solo: "Baby Bunting."
 Rendered by Miss Mary Pasmore.
 Accompanied by Miss Suzanne Pasmore.

Kathleen De Young—

Songs: (a) "Castles in the Air."
 (b) "Morning o' March."
 (c) "Sylvia's Lips."
 Sung by Mrs. B. M. Stitch.
 Accompanied by Dr. H. J. Stewart.

Dr. H. J. Stewart—

Songs: "Legends of Yosemite." Words by Allan Dunn.
 Sung by Mrs. Lillian Birmingham.
 Accompanied by Dr. H. J. Stewart.

John Haradeen Pratt—

Trio in G Major, for Piano, Violin and Violoncello.
 Moderato con Moto.
 Ben Sustainuto.
 Allegro Vivace.
 Rendered by the Misses Suzanne, Mary, and Dorothy Pasmore.

John Metcalf—

Songs: (a) "O Sing, Ye Birds."
 (b) "Hark as the Twilight Pale."
 (c) "Little House o' Dreams."
 (d) "Love and Springtime."
 Sung by Miss Mabel Riegelman.
 Accompanied by John Metcalf.

Wallace Sabin—

Selections from "St. Patrick of Tara," composed for Bohemian Club Jinks.
 Words by Henry Morse Stephens.
 Sung by Mr. Wilfred Glenn.
 Accompanied by Mr. W. F. Husband.

Our teachers must indeed have been inspired for renewed work of still greater usefulness in our profession as they listened to the stirring messages brought from other parts of our land. It is with very deep gratification that we are able to record that the Convention was in every way a pronounced success, and that the leaders of educational thought, who attended, went away with a multitude of words on their lips of highest praise for the kindness and attention lavished upon them during their stay.

COMPULSORY EDUCATION.

One of the functions of the Superintendent of Schools has become that of issuing certificates under the provisions of the so-called Child Labor Law. We transcribe here a digest of that act as prepared by the State Labor Bureau:

DIGEST OF CHILD LABOR LAW.

(As amended Stats. 1911, Chap. 456.)

PLACES AFFECTED—

Any mercantile institution, office, laundry, manufacturing establishment, workshop, place of amusement, restaurant, hotel, apartment house, or in the distribution or transmission of merchandise or messages.

CHILDREN WHO SHALL NOT BE EMPLOYED—

No child under 15 years of age shall be employed except those between 12 and 15 years of age who are provided with a Juvenile Court Permit. This permit is issued by the Judge of the Juvenile Court only when the parents or parent of the child are incapacitated for labor, through illness, and is good only for the period of time and at the kind of work specified therein, provided, that during the Regular Vacations of the public schools, children over 12 years of age may be employed if provided with a Vacation Permit. This permit is issued by the principal or vice-principal of a school or by the secretary of school trustees or board of education, and is good only for the time of the vacation specified therein.

No child between 15 and 16 years of age shall be employed unless provided with an Age and Schooling Certificate. This certificate is issued by the city superintendent of schools or a person designated by him, or by a person authorized by the local school trustees or by a superintendent of a school of recognized standing; provided, that if the certificate states that the child cannot read and write simple English sentences there must also be obtained a Certificate of Attendance at Night School. This certificate is issued by the principal of the school attended.

Exceptions: Nothing in this Act shall be construed to prohibit the employment of minors at agricultural, horticultural or viticultural, or domestic labor during the time the public schools are not in session, or during other than school hours.

CHILDREN WHO MUST BE AT WORK OR IN SCHOOL—

No child under 16 years of age shall, while the public schools are in session, be and remain idle or unemployed for a period longer than two weeks, but must enroll and attend school.

Within one week after a child shall have ceased to be employed by any employer, such employer shall, in writing, giving the latest correct address of such child known to such employer, notify, in the case of a child having a Juvenile Court Permit, the judge of the juvenile court, in the county of said child's residence, or the probation officer of such juvenile court, or in case of a child having an Age and Schooling certificate, the county superintendent of schools of such county, that the child is no longer employed by such employer; and such judge of the juvenile court, or such probation officer or such county superin-

tendent of schools, shall thereupon immediately notify the attendance officer in the place of such child's residence, giving the said latest correct address of such child, that such child is neither at work or in school; and provided, further, that no such child shall be permitted to cease school attendance without securing a Juvenile Court Permit, or an Age and Schooling certificate.

FILING OF CERTIFICATES AND POSTING OF NOTICES—

All the certificates mentioned above must be kept on file by the employer while the child is in his employ.

Every person, firm or corporation employing minors under 18 years of age, in any manufacturing establishment, shall post, and keep posted, in a conspicuous place in every room where such help is employed, a written or printed notice stating the number of hours per day for each day of the week required of such persons.

HOURS OF LABOR OF CHILDREN—

No minor under the age of 18 years shall be employed more than nine hours in one day, except when it is necessary to make repairs to prevent the interruption of the ordinary running of the machinery, or when a different apportionment of the hours of labor is made for the sole purpose of making a shorter day's work for one day of the week, and in no case shall the hours of labor exceed fifty-four hours in a week.

No minor under the age of 18 years shall be employed or permitted to work between the hours of ten o'clock in the evening and five o'clock in the morning.

PENALTIES FOR VIOLATIONS—

Any person, firm, corporation, agent, or officer of a firm or corporation that violates or omits to comply with any of the foregoing provisions of this act, or that employs or suffers or permits any minor to be employed in violation thereof is guilty of a misdemeanor, and shall, upon conviction thereof, be punished by a fine of not less than \$50.00 or more than \$200.00, or by imprisonment for not more than sixty days, or by both such fine and imprisonment for each and every offense.

ENFORCEMENT—

It shall be the duty of the Bureau of Labor Statistics to enforce the provisions of this act. The commissioner, his deputies, and agents, shall have all powers and authority of sheriffs to make arrests for violations of the provisions of this act.

NUMBER ISSUED IN SAN FRANCISCO—

The number of "Age and Schooling Certificates" issued by the City and County for the year ending June 30, 1911, was Boys 417, Girls 211, Total 628. It is to be observed that the age now required before such certificates can be issued by the Superintendent is 15 years, whereas heretofore the age fixed was 14.

TECHNICAL EDUCATION

Our city has made and is making liberal provision for various forms of handiwork in the elementary schools, the aim having been almost purely cultural.

We hope for a still farther extension of these studies with a greater bent toward the applied arts. In the Polytechnic High School the latter lines have been more closely followed, the aim there having been more technical through the introduction of trade processes and the recognition of industrial conditions. Our laboring people have consistently supported this institution.

The trend of modern educational thought indicates that there is necessity for further development of the trade and industrial idea if the public school system of our city is properly to prepare our young men and women for the stations that they will assume as they undertake their vocational duties in the world of affairs.

With the desire of indicating as fully and completely as possible this situation by reason of its vast significance to our community, I append here an address entitled "The Relations of Organized Labor and Technical Education," delivered originally at the University of California, and afterwards read before the Ninth Annual Convention of the State Building Trades Council:

THE RELATIONS OF ORGANIZED LABOR AND TECHNICAL EDUCATION.

By Alfred Roncovieri.

I have been honored by an invitation to address you on the subject of Technical and Industrial Education and its relation to the Labor Union movement. Technical education and labor unionism have been subjects in which I have always taken a deep and sympathetic interest. I propose to address you on my observations on technical education made during a recent trip to Europe.

It must be admitted by all thinking persons that the nation having the greatest average industrial efficiency is likely to take its place in the front rank in the world of trade; realizing this, the governments of Germany, England, and France are putting forth every effort in support of their technical schools. England and France look upon the growing commercial and industrial influence of Germany with much concern; and this influence is admittedly due to Germany's splendid system of industrial training.

The battle in the field of commerce and industries is actually on. The field of battle is the manufactory and the counting house. The battle is bloodless, but none the less intense, and those nations will win whose industrial army is best equipped with technical knowledge. Confronted, as we are, by the great advances being made in technical and industrial education in the leading countries of Europe, the question naturally arises, where will the United States stand when our immense natural resources shall begin to wane, unless we teach the sciences of agriculture and industrialism?

The English and French technical and industrial schools do not pretend to teach the trade of the carpenter, the mason, the plumber, or any other particular business. It must be conceded by all that there is no trade that does not depend more or less upon scientific principles: to teach what these principles are, and to point out their practical application, is the essence of technical and industrial education in the schools of these countries. For he who unites a thorough knowledge of the scientific principles underlying his art with that dexterity which only actual practice in the workshop can give, will, of necessity, be the most completely skilled and probably the most successful artisan.

I was agreeably surprised, both in England and France, by the fact that objects and purposes of a technical education are not in conflict there with labor union principles. A technical education in all the European schools that I visited does not mean the making of apprentices who shall enter the competitive ranks of labor. It means the teaching of the various branches of science which under-

lie the majority of trades, and which are of practical application, to mechanics in the several trades, so that they may the better comprehend the reason for each individual operation that passes through their hands, and have more certain rules to follow than the mere imitation of what they may have seen done by another.

The Labor Unions of Great Britain and France recognize the beneficent influence of the technical schools, and are giving them hearty support by naming representative labor leaders as advisory members of the Boards of Control of these schools and by giving cash prizes to be competed for by the students in the various trades. In Scotland especially I found that the advisory members from the Labor Unions give to these schools their hearty support, spending much time in consultation with the governing boards, in examining candidates for instructorships, in visiting schools, and in rendering the students much valuable assistance on graduation. A true spirit of fellowship and good feeling is thus developed, which brings about the most cordial relations between the schools and the Labor Unions.

It is clearly understood in England and France that the expensive equipment of tools and appliances of technical schools shall not be used for anything approaching the apprenticeship system, nor to give the young students who want to learn a trade the chance of acquiring the practice of the trade, which is best acquired in the factory and shop, where work is done on commercial lines. The instruction given in the technical schools is intended to be supplementary to the dexterity and proficiency which only shop experience can give. In England and France the expensive equipment of the technical school is used only to show the student how certain processes are performed and to enable him to perform those processes himself, with the special object in view of giving him the why and the wherefore of the sciences underlying his trade rather than the shop experience. The students are taught how the tool is used, the principles and theories underlying its construction, the errors to avoid and the means of rectifying them when they occur, the nature of the materials to be wrought, and the means of distinguishing different qualities of such material; and having learned all this, and having acquired a certain degree of manipulative skill, the school does not require the student constantly to repeat the same process in order to obtain the rapidity of execution that is expected of a professional workman, but instead proceeds to the explanation of the use of some other machine and to the learning of some other process and the sciences and theories underlying it.

The individual who is content to do things by rule of thumb can never lift himself above the common level. "There is always room on top" is an old saying, but its truth was never better exemplified than in the crafts. The worker who increases his technical knowledge is on the road to promotion and the higher pay which promotion brings. The experts in crafts owe their success to technical instruction. The advance of the foreign worker in the industries is to be traced to a great extent to technical training. He has recognized its need and taken full advantage of it. It will be seen, therefore, that for these reasons the trades unions of England and France are friendly to the development of technical schools and that no conflict can possibly exist when it is clearly understood that although a technical school may be equipped almost as completely as a trade shop, the equipment serves a very different purpose. The trades unions of these countries thoroughly understand the object of the technical school to be the production of intelligent working people capable of holding the highest positions in the industrial world,—not simply to produce competitive cheap labor that will later enter into a fierce rivalry with the Unions. The Unions understand that the machinery and tools employed in an English and French technical school are used with different objects, and with a different intention from

those of the factory or commercial workshop. The good will of the trades unions and their support means much to the technical schools of Great Britain and France, and accounts in a large measure for the impetus given to industrial education and its present efficient standards.

Nor is it only the trades unions that approve of this great work, and collaborate with the school authorities in favor of technical instruction; but also the manufacturers, chambers of commerce, philanthropic and economic associations. Each of these gives to the cause the fullest measure of its strength and influence, and assists in the creation of the new education that is to develop and solve the great economic and social problems of these nations.

I want the youth of the United States to rebel at the modern tendency to make him a small, insignificant cog in the wheel of industry, a piece of human machinery. The great captains of industry, through the complex machinery which American genius has for the most part invented, use our boys as mere tools to feed this machinery. They are not expected to develop skill; their lives are consecrated to dull routine and the endless spinning, grinding, and hammering of the modern workshop. Their days and years are regulated by the factory whistle and the time clock; slaves of the wheel, they have no opportunity of mastering a trade or handicraft. The machinery does the work and the man seldom understands the wherefore of its movements. Few men there are today engaged, for example, in the shoe-maker's trade, who can make a pair of shoes complete in all its parts, for the reason that this trade, and many others, are divided into many different parts, and men work a life-time at one part, not knowing or understanding anything about the trade as a whole. I have been informed that the shoe trade is divided into forty or fifty different parts, and that few men working at these separate parts are able to make a complete shoe. Such men are hopelessly handicapped in the struggle for better wages and conditions, because the plutocrats hold them as slave-workers to one part of the trade. The spirit and independence of such workmen are crushed and they are doomed never to rise above their present level,—a condition repugnant to every liberty loving American who has a hope in his future uplift and in the rise and individual initiative of his sons and daughters. It is only too true that if the apprentice is only capable of doing one thing and cannot readily turn to other branches of the same trade, he is practically unskilled and a prey to those who would lower his wages. The man who does not understand the science of the trade and who feeds the machine without the fundamental knowledge of its functions, is the modern "Man with the Hoe," hopelessly bound to it,—the weak object of attack in the constant war to lower his wages, and the one most apt to be thrown out of employment in times of depression.

The technical and scientific training received by the student in a particular trade tends to discourage others from being content with a simple knowledge of only one or perhaps two branches of a trade. They are all stimulated to become all-round, efficient men, able to cope with the ever varying conditions of the industry in which they are engaged, demanding and receiving the maximum rate of wages, and certain of steady employment. Such an education gives broad views of life, and develops men of natural power with the highest ideals of work and citizenship, just as certainly as does a clerical and professional education. Education can have no higher objects.

In England I was impressed with the general feeling of unrest in some of the large manufacturing centers, such as Manchester and Birmingham. While I was in Manchester there were bread riots, due to the great problem of the unemployed which for some years back has been growing more acute. In my opinion the problem of the unemployed is to a very large extent the problem of the unskilled. The men who marched in the streets, and whom I saw charged upon by the mounted police, were not skilled artisans; they were the unskilled

men who fed the machines in the cotton mills, and who had become so much a part of those machines that when the large manufacturers declared a lockout in order to reduce their wages these men were confronted with the alternative of either accepting the wages offered or of finding employment in some other industry.

The problem is clearly understood by the educational authorities of England, and day and evening technical and industrial trade schools are being fostered to meet it. Among the schools which I visited was the Belfast Municipal Technical Institute. This school and its equipment cost \$1,000,000. About 5000 students attend it, of whom about 500 attend in the day and 4500 in the evening. The trade subjects are taught only to those who work at the trade in the daytime. Organized labor has absolute control of this school. A boy must be not less than twelve years of age and must have passed the sixth standard of the national schools before being admitted to the school. The principal object of the trade classes of this school is to provide a specialized training for boys who are intended for industrial occupations. While due regard is paid to the subjects of a general education, special attention is devoted to imparting a sound training in the elements of science, and in science as applied to local arts and manufactures, such as mechanical engineering, naval architecture, the building trades, and the textile industries. The complete course covers three years, and includes, besides theoretical instruction, practical work in the laboratories and the drawing school.

The classes are intended chiefly for apprentices who wish to obtain a thorough grasp of all the fundamentals of their own and allied trades. It is not an object of these classes to teach a trade, but the aim is to make the progress of the apprentice more rapid, and to give him a broader view of the trade with which he is associated, and to enable him to acquire a familiarity with trades closely allied to his own. Boys who take the complete course are in a position to enter on their life work in the mill, factory, or workshop; they soon outstrip the lads who have not had these advantages.

I visited classes in pattern maker's work, moulder's work, boiler-maker's work, machine shop practice, marine engineering for sea-going engineers, motor-car construction, naval architecture, electric engineering, telephone, telegraphy, electric wiring and fitting, building trades classes—such as sanitary engineering and practical plumbers' classes, cabinet making, building construction, practical painting and decoration classes—the practical classes in linen weaving and the textile industries, cotton and linen bleaching and dyeing, and many others. There is also a technical course for older students. It provides a sound training in the science and technology of mechanical engineering, electrical engineering, the textile industries, and pure and applied chemistry. The students in this course aim at filling positions of responsibility, such as mechanical engineers, electrical engineers, naval architects, manufacturing chemists, or other industrial occupations.

All classes of Irish society attend this school. Young men and young women who come in automobiles are seated beside poor girls who come with shawls on their heads. This great school has a distinct social-leveling tendency. The magnet that draws all these people together is the knowledge that a practical education that will train the hand and eye as well as the brain can be obtained at reasonable cost.

In the evening school I visited the classes in housewifery. There were present in the class I visited about thirty young women ranging from eighteen to thirty years of age. It was a most interesting sight. Some were cooking on coal and gas ranges, making soups, bread, and roasting meat. Others were washing and ironing; others were learning to sew, darn, and mend. Some were engaged in dressmaking; others were learning the chemistry of the kitchen, the

use of caustics, the making of soap, the dyeing of fabrics. The students are permitted to purchase the excellent roasts which are cooked in the class. I was informed that many of these students were young married women whose education in the homely house duties had been neglected.

The demand for a bread-and-butter education would be just as great in California if we would only establish a school like the Belfast school. The proof is shown by the way the correspondence schools of the East are thriving. In San Francisco many students are paying for such a correspondence education simply because San Francisco has not established anything of the kind. If California can only awake to the necessity for action, and compare her supineness in this matter to the progressiveness of Belfast, Ireland, we shall be doing something that will forever benefit our children, and our children's children. The splendid Belfast school which I have just described cost £150,000 and the equipment has cost £50,000 in addition: a total of a million dollars for Belfast, a city of 350,000 people.

In Glasgow, Scotland, I visited several interesting technical schools, notably the Glasgow and West of Scotland Technical College. I found a school of even great importance than the Belfast school. This great school was built and equipped at a cost of £300,000. The equipment of the school cost over £60,000. I saw everywhere at work earnest, busy students who were learning the why and wherefore, and delving into the science underlying their trades. Most of the students were either apprentices or full fledged union workers in the various trades. I visited the shoemakers, the tailors, the plumbers, the machinists, the bakers and confectioners, the sheet metal classes, the weaving, dyeing, and bleaching classes, and those in motor car engineering, naval architecture, and electric engineering.

As an illustration of the spirit of the people of Glasgow and their interest in technical education, I was informed that the Master Bakers and the Bakers' Union had recently, in cooperation, presented to the school a complete outfit of tools, ovens, and other equipment which cost four thousand pounds. One of the donors to the fund was a large manufacturer of bakery machinery. Instruction was being given in all branches of the trade from the kneading of dough to the most complex cake ornamentation. This cooperation between employers and employees extends to all the trades. The unions of the various crafts assist the school and recognize it as a friend. On my way to the school I saw in the windows of a union paint shop signs advertising and illustrating the work done by the classes for painters and decorators and inviting all apprentices to join them. The impression which one receives after visiting this school is that through unity of action and a sensible understanding of the purposes of the school on the part of manufacturers and workmen, captains of industry and leaders in the labor union movement, perfect harmony prevails in the management of the school. The school is managed by a board of governors composed of leading men of the city, labor leaders, and employers, and the general public and the municipality give to this school all the support both moral and financial to which its excellent work entitles it.

It would be mere repetition to describe similar institutions in Edinburgh, Manchester, Birmingham, London, and Paris. In all of these cities every effort is being put forth in support of technical and industrial education. The buildings and equipment far surpass anything of the kind in California. We must make the humiliating confession that practically nothing is being done in the public schools of California that compares with the splendid schools and liberal provisions made for technical instruction abroad. We have been drifting helplessly along old lines and traveling in old ruts, falling behind in the great technical education race. Every city of importance in the United States is ahead of us. European countries are awake to the situation and the incalculable prize is the control of the markets of the world.

I hope California will soon awake to this most vital educational need by making provision for great technical and industrial schools on the lines of the Belfast, Glasgow, Manchester, and Birmingham schools, and of the Paris school of arts and crafts. To do this successfully we must awaken the interest of all our citizens, and as far as the teaching of skill in the trades is concerned, we must secure the intelligent cooperation of capital and labor in these schools, or they cannot succeed.

The usual objection made to technical and trade schools by labor unions in this country have been entirely overcome in Great Britain, Ireland, and France. The unions in these countries have the same industrial problems to contend with as the unions in this country; but they have learned to encourage and protect these schools as their best friends. Labor leaders of known ability and probity are elected by the unions as advisory committees to the Boards of Education in all matters that concern these schools. This brings the labor unions into close and friendly relation to the industrial schools, and nothing is done without first seeking the advice and opinion of the labor union committee. On the other hand, many of the largest employers of labor are invited by the Board of Education to sit at the conferences between the Board of Education and the union labor advisors, and a genuine feeling of fraternity is developed which tends to cooperation and is of the greatest advantage in tightening the friendly relations between labor and capital.

I plead for the support of organized labor for more technical schools, believing that we need them to develop the men who do things, the men who move forward and revolutionize things, and work the wonders of modern civilization. Men skilled in the trades and possessing a knowledge of the sciences underlying their particular art or craft, possess independence of thought, and an initiative which directs them toward the development of new creations and new inventions, thereby preventing and controlling over-production in the existing fields.

The achievements of science during the last century have been marvelous. The possibilities of electricity no imagination can compass. Almost every daily paper tells of discoveries of the X-ray, liquid air, wireless telegraph, aerial navigation, and other valuable discoveries and inventions. Each new discovery opens the door for yet more wonderful disclosures, all demanding a new activity of mind, increasing the necessity for a thorough scientific education in connection with industrial enterprises. Nearly every advance in theoretic science has in late years been followed by the growth of some industry dependent on that science. The discoveries of Fulton, Howe, Whitney, Pasteur, Bell, Edison, Marconi, Goodyear, and others have found immediate echo of practical advantage to the industrial world; such too was the result in the last century of the triumphs of astronomical science in the perfection of the telescope, the spectroscope, and of sidereal photography. Consider microscopic science and its present perfection and utility; the advance in medicine and surgery, especially in the case of anaesthetics; consider the science of mining and the invention of giant explosives, such as nitroglycerine, dynamite, giant powder; consider the perfection of photography and kindred methods of producing pictures by the aid of sunlight; consider electricity as a motor, messenger, illuminator, and heater, unknown one hundred years ago; consider aniline colors, the telegraph, the telephone, the "wireless," the phonograph, the steam engine, the steam printing press, the sewing machine, the typewriter; consider the glorious achievements of science, and remember that it is in a modern technical and industrial school that such studies are emphasized as helping the student to comprehend the labor of the past and to obtain glimpses of the possibilities of the future.

We cannot close our eyes to the fact that our Spanish-American trade is slowly but surely slipping away from us; that German, English, and French commerce and manufactures are acquiring a foothold in neighboring Spanish

America, and supplanting American trade to such an extent that unless we do something, and do it now, we shall lose the rich trade of our neighbors. We must act. We must employ all the means at our disposal while there is yet time. We must educate our rising generation in the commercial and technical arts and crafts. Power and superiority will beyond doubt belong to the most energetic, intelligent, and highly skilled people; and it is only through technical and vocational schools that we can develop the skill to defend our threatened industries in the markets of the world, to keep our country in the first rank of the great nations. While we must train our youth in the power to know, we must, to meet the demands of modern life, also train them in the power to do. The successful German invasion of the world's markets, which bids fair to displace completely the influence of other nations, is the logical outcome of the greater average efficiency of her workmen. Their energy, patience, activity, and spirit of enterprise are remarkable. At the pace they are going they will soon succeed in obtaining the commercial supremacy of the chief markets of the world.

We in California are facing the grandest future of any state in the Union. With no traditions to hinder us or wed us to conservatism, we should take advantage of our patrimony by enlarging the scope of our education, and making it include the technical and utilitarian subjects.

TYPEWRITING IN THE UPPER GRAMMAR GRADES.

In order also to promote those features of vocational training that had been found suitable for boys and girls in the upper grades of the grammar school, in January, 1910, I respectfully recommended the introduction of typewriting into the Hamilton Grammar School to be taken up by the A and B Eighth Grades. I then stated to the Board that "In time I hope to see industrial subjects placed nearer than they now are to the boys and girls who require them. Too many of them drop out of school before they reach the subjects that could be of greatest economic value to them. This recommendation is a step in the direction of a policy of revision and expansion which I hope to see brought about in our schools."

The Hamilton School was selected for the purpose both because there was available there the typewriting equipment used by the evening school which occupies the same building, and because Mr. A. E. Kellogg, the Principal, was in hearty sympathy with the plan.

The Board of Education followed the recommendation as above made, and now that the system has been in practical operation for a year and a half, deductions may easily be drawn as to its effectiveness in reaching the object sought. That it has been a striking success is the united testimony of Principal and teachers, and all other educational observers who have watched it in working. One of the chief advantages of the course is that the typewriting proves to be of great assistance to the pupil in his other school studies, particularly English. Many of the mechanical difficulties met in the study of composition, such as arise in spelling, punctuation, etc., are much more quickly overcome by continued practice on the typewriting machine than in the regular classroom drill. The teachers of the English branches and the teacher of typewriting at the Hamilton, under direction of the Principal, have co-operated zealously in correlating the technical with the academic studies in the school. One of the best indications of the success of this school-subject is that, although it is optional, all of the members of the Eighth Grade, both boys and girls, have without exception chosen to enter the course in typewriting. That in itself proves conclusively not only that the pupil sees some immediate benefit

from the work, but that he must find in it also such other elements of interest as attract the mind of the boy or girl.

Since this idea has now proceeded beyond the speculative and even beyond the experimental stage, and has established its own worth, I desire at this time respectfully to submit that courses in typewriting be established in others of our large grammar schools, with this object, that our school children may acquire to a greater degree an efficiency that will be of direct practical service to them, but from the acquiring of which the major part are now excluded.

DEPARTMENTAL TEACHING.

On this subject permit me to quote a few sentences, not originally grouped together, from my report of 1908-09: (Page 32.)

"The chasm between the grammar and the high school must be bridged from both sides. High school teachers must know better what pupils have done in the grammar school, and build upon it. The grammar school must prepare for the change. Departmental work in the Seventh and Eighth grades will accustom the pupils to instruction from more than one teacher. Pupils who have studied under our modified departmental system are ready for the transition to high schools. Success of departmental work rests very largely with the principal. I advise that the plan be extended to several more of our large grammar schools. We have principals in the department who are able to direct this work, and carry it through to success."

This system of departmental teaching has now been tried for several years in two of our largest grammar schools, the Hamilton and the Horace Mann, and a beginning has been made in the last year at the Bernal and Roosevelt. The principals of the two former schools have kindly submitted reports on this subject and I take pleasure in presenting here their views as to the results.

San Francisco, June 2, 1911.

Mr. Alfred Roncovieri,
Superintendent of Common Schools.

Dear Sir: In the Seventh and Eighth Grades a plan of organization which may be called a modified departmental system, has been in operation in several of our Grammar Schools. Four branches of instruction—arithmetic, history, geography, language, the last comprising grammar and literature with reading, have been included in the scheme. A teacher is assigned to each of these subjects, and the group of four teachers forms a working unit, or team.

All other subjects of instruction are outside the departmental program, and each teacher is responsible for their conduct in her own class. Between a third and a half of a teacher's time is thus spent with her own class, and the program is so arranged that the teacher is with her class at all entrance or dismissal movements.

The class teacher is, under this plan, with her assigned class a sufficient time and at such times as to make it truly her own and to establish nearness of personal relation. Her absence at the other periods gives a restful variety to her own experience and to that of the class as well.

To the teacher it means the enrichment of her equipment along the line of some special aptitude, and an escape from the narrowing tendencies of teaching a single grade, perhaps for years.

Altogether the departmental system arranged as described has proved, so far as tried, a distinct advance upon the single-teacher plan.

In practical administration of the school, it assists in making any grade in the scheme of equal dignity, since each teacher deals with several grades and carries her class finally to the highest grade in the team, it may be to graduation.

It means that a conference of two teachers and a principal carries instant application of some better method or finer continuity in the work to eight classes.

It altogether demands and brings about more conference and co-operation between the principal and the teachers engaged.

The child enjoys the advantage of having four persons instead of one to awaken his possibilities and to modify all judgments that touch his interests.

This larger contact makes for the pupil easier transition to High School experience, and, more essential still, it prepares better for the many-sided contacts of life outside the school room. Respectfully,

A. E. KELLOGG,
Principal Hamilton Grammar School.

San Francisco, June 2, 1911.

Mr. Alfred Roncovieri,
Superintendent of Common Schools.

Dear Sir: In June 1909 I submitted you a report of my work in connection with the introduction of departmental teaching in the Horace Mann Grammar School which, I understand, was omitted inadvertently from your report of 1908-09.

I have nothing to add to my report of 1909 other than to say that with your hearty approval and cooperation, the Board of Education in December of last year passed two resolutions which enabled me to put my two year plan into operation. The Board also passed a resolution relative to the salary of the class teacher of a sixth grade, when such a grade is included in a departmental group. These several resolutions have been incorporated in the Rules of the Board.

REPORT OF 1909.

In the fall term I organized three groups of departmental work. I put three teachers in each group. The subjects specialized were geography, history and arithmetic. The A Seventh, B Seventh and A Eighth grades were represented in each group. I omitted the B Eighths, as the term was not only short, but, owing to other causes, it was impossible to organize the departmental work at once. At the beginning of the spring term the grades that had been doing departmental work became, of course, B Sevenths, A Eighths and B Eighths. I then added an A Seventh to each group and English as the fourth special subject. It will be observed that a division of each grade is represented in each group. Under this plan continuity is given to the instruction. Further, it gives interest and breadth of view to the teacher.

In order to make a working programme I found it necessary to modify the "Suggested Time Schedule" contained in the course of study, but as the modifications were so slight, I will not particularize them. No changes have been made in the programme since the beginning of this term, when the fourth teacher was added to each group.

The only vital problem in connection with departmental teaching in the Seventh and Eighth grades is whether the children will suffer in the formation of their character by coming in contact with several personalities during a year rather than with a single one. It has therefore been my aim to minimize, if not overcome, this one alleged weakness. I have attempted to minimize it by not putting too many teachers in a group and by not specializing too many subjects. In other words, each teacher is not only a subject teacher, but a class teacher as well. As a subject teacher she teaches a single subject to four classes, to one of which she also teaches the subjects of the course of study other than the major ones. As a class teacher she begins and ends her day with her class, besides being with them a short period after recess. In a word, while giving to a class the superior instruction which come with the specialization of the teacher, I attempt to give each teacher an opportunity to impress her personality upon a class.

The school is stronger for the introduction of departmental teaching. It has given the teachers a new point of view. It has forced instruction in accordance with the "suggested time schedule," thus preventing special subjects in which special teachers are interested, as well as favorite subjects of regular teachers, being taught at the expense of other subjects. It prevents cramming for examinations either from the principal or the superintendent. It fixes responsibility. It gives the opportunity for closer supervision. Finally, it cannot fail to produce pupils who will be able, on their entrance to the high school, to adapt themselves to secondary methods without loss of time.

Of the twelve teachers who are doing departmental work, eleven are in favor of its continuance. One teacher was not in favor of it in the beginning, nor is she now, but she has not permitted her fixed opinion to interfere with the carrying out of the plan. In only one particular have the teachers failed to follow every suggestion I have made in connection with the plan.

I wish the teacher who becomes the class teacher of the A Seventh grade to continue with the class until its graduation. Or to put it another way, I wished the B Eighth grade teachers at the close of the fall term to take the newly promoted A Seventh grade at the beginning of the spring term, just as I now wish the B Eighth grade teachers to take the newly promoted A Seventh grade at the opening of the fall term. The teachers have not seen their way clear to follow me in this request. The Eighth grade teachers fear if they accept assignment by subject rather than by grade, that they may be stranded with a Seventh grade in case departmental teaching should be discontinued. But it is senseless to organize departmental teaching, not only in relation to subjects, but also in relation to the rank of teachers according to grade and to seniority within the grade. It is absurd deliberately to weaken the plan when it could be strengthened at the point of its single possible weakness.

The keeping of the register of Eighth grade children should not be permitted to stand in the way of the two year plan, since there is no difference of salary between the Seventh and Eighth grades, and since each teacher teaches her major subject equally to each grade. If departmental teaching succeeds in schools where Seventh and Eighth grades exist, the teachers must be assigned as subject teachers rather than as grade teachers. I am satisfied that nothing so much prevents the introduction of departmental teaching or makes its failure so frequent, as the inability of grade teachers to come to regard themselves as subject teachers. If departmental teaching fails for this reason, or if it be not introduced where it should be, it will force the organization and centralization of Seventh and Eighth grades into separate schools—"pre-academic schools"—or their absorption into the high school, for the belief is general that these grades must be made to afford not only a better preparation for entrance to high school, but for life. If such preparation cannot be given through depart-

mental teaching in schools as now organized—it will be given in the ‘pre-academic school’ or in the high school.

I trust that the Board of Education will make such regulations as will enable me to put the two year plan into operation without teachers feeling that in accepting assignment by subject they have given up their rank by grade, for I believe a teacher who instructs a class two years in a major subject as well as in the minor ones, will impress her personality upon it stronger than she would if teaching the same class a single year under the ordinary plan. In two years she would know not only the child, but its home, and during all that time she would have the consciousness of feeling that children were being taught in the major subjects other than her own with the same preparation and enthusiasm she was giving to hers. Further, it would give continuity and fix responsibility in the minor subjects as well as the major ones.

RESOLUTIONS OF THE BOARD OF EDUCATION.

December, 1910.

Resolved, That the rank of departmental teachers shall be in accordance with their seniority, regardless of the grade they instruct as class teachers.

Resolved, That whenever departmental teaching shall be discontinued in any school, the departmental teachers shall be assigned to grades within the school in accordance with the seniority of their appointment to said school.

Resolved, That whenever a sixth grade is included with seventh and eighth grades in a departmental group, the class teacher of the sixth grade shall receive the salary of the other teachers of the group.

Very Sincerely,

RICHARD D. FAULKNER,
Principal Horace Mann Grammar School.

REPORT ON MEDICAL INSPECTION IN THE S. F. SCHOOL DEPARTMENT.

San Francisco, Cal., August 25, 1911.

Mr. Alfred Roncovieri,
Sup't. Public Schools, San Francisco, Cal.

Dear Sir:

As per your request I beg leave to submit a tabulated list of work performed in this Department during the fiscal year July, 1910 to June, 1911 inclusive. I trust that the figures will give you an idea of the volume of work accomplished among the schools under inspection.

The figures on the extreme right show that the nurse has examined over 30,000 children in the schools and has made over 3,000 visits to homes. During the year the Inspector has physically examined over 3,000 children.

Under the heading, "exclusions from schools under inspection" the figures indicate the actual number of contagious diseases discovered by the nurse and the inspector, both in the school and in the home.

Under the heading, "vaccination" these figures mean that the nurse has actually made this number of vaccination examinations.

Under the heading, "disposition of special cases" it will be seen that a large amount of medical treatment has been accomplished. Each one of these cases has come under the direct supervision of the nurse and has been closely followed up until necessary treatment or operation has been furnished. Those cases referred to clinic are those children whose parents are unable to pay for medical treatment. In every case it is the aim of this Department to refer pupils to their family physician for treatment. They are not permitted to receive the benefit of a clinic unless they are actually deserving. Those cases referred to societies are ones of either neglect or cruelty on the part of the parent and ones needing the benefit of a charitable society.

A glance at the totals of the columns of figures will show the amount of work the nurse has had to do during the fiscal year.

During the present year we are pursuing the same course, and am pleased to say that we are establishing, through the principals of the schools, a much better system than heretofore.

On September 1st, 1911 we will add four nurses to our working staff, thereby enabling us to medically inspect all of the public schools in the City.

Yours respectfully,

E. L. WEMPLE,
Chief Medical Inspector of Schools.

DIVISION OF SCHOOL MEDICAL INSPECTION

Dr. E. E. Wemple—Medical Inspector.

APPORTIONMENT OF STATE SCHOOL FUNDS.

As the law relating to the taking of the school census was repealed by the last Legislature, (see Chapter 333, page 529 of the Statutes for 1911), the State school money is now apportioned in accordance with Section 1858 of the Political Code, (as amended March 31, 1911), of which the salient features are here re-produced: (See pages 527, and 528 of the Statutes for 1911).

"The school superintendent of every county and city and county must apportion all State and county school moneys for the elementary grades of his county or city and county as follows:

"1. He must ascertain the number of teachers each school district is entitled to by calculating one teacher for every district having 35 or less number of units of average daily attendance and one additional teacher for each additional 35 units of average daily attendance, or fraction of 35 not less than ten units of average daily attendance as shown by the annual school report of the school district for the next preceding school year; and two additional teachers shall be allowed to each district for every 700 units of average daily attendance.

"3. \$550 shall be apportioned to every school district for every teacher so allowed to it; provided, that to districts having over 35 or multiple of 35 units of average daily attendance and a fraction of less than ten units of average daily attendance, \$40 shall be apportioned for each unit of average daily attendance in said fraction.

"5. Units of average daily attendance wherever used in this section shall be construed to be the quotient arising from dividing the total number of days of pupils' attendance in the schools of the district by the number of days school was actually taught in the district. A school day is hereby construed and declared to be that portion of the calendar day or night in which school is maintained and in which one-twentieth of the work of a school month may be performed. The attendance of pupils present less than one-fourth of any day shall not be counted for that school day and pupils present for one-fourth of a day or for more than one-fourth of a day shall be counted as present for one-fourth of a day, one-half of a day, three-fourths of a day, or for a whole day, as the case may be."

Under the terms of the bill as at first proposed, every district in the State having a remainder of fifteen or more pupils in average daily attendance after dividing the whole number by the unit 35, was to be entitled to a teacher and, consequently to \$250 for that teacher. I found that several counties had many more than 100 districts and that if each district could, under the proposed system, receive an appropriation of \$250 for the remainder of 15 or more, this would give an unfair advantage to all counties having many districts, and that a city and county like San Francisco having but one school district would be at a distinct disadvantage for the simple reason that it could have but one remainder. I at once planned to remedy this defect in the proposed law, and accomplished my purpose by prevailing upon Assemblyman Benedict to offer an amendment to section 1858 providing that two additional teachers should be allowed for every seven hundred pupils and receive the State appropriation therefor. This he did, the amendment carried, and became a part of the law as finally enacted. This gives San Francisco at present 98 more teachers at \$250 per teacher, and thus \$24,500 have been saved to us annually.

SCHOOL HOLIDAYS

The Legislature of 1911 amended Section 10 of the Political Code relating to legal holidays. The provisions of the present law that affect the schools are:

"The public schools of this State shall close on Saturday, Sunday, the first day of January, the 30th day of May, the Fourth Day of July, the 25th day of December and on every day appointed by the President of the United States or the Governor of this State for a public fast, thanksgiving or holiday. Said public schools shall continue in session on all other legal holidays and shall hold proper exercises commemorating the day. Boards of School Trustees and City Boards of Education shall have power to declare a holiday in the public schools under their jurisdiction when good reason exists therefor."

The other legal holidays to which reference is made in the second sentence of the part of the act just quoted are:

The 12th day of February, to be known as "Lincoln Day;" the 22nd day of February, or Washington's Birthday; the 9th day of September, or Admission Day; the first Monday in September, or Labor Day; the 12th day of October, to be known as "Columbus Day;" and every day on which an election is held throughout the State.

THE SCHOOL LIBRARY FUND

Ever since the disaster of 1906 the San Francisco schools have suffered from a paucity of supplementary books. Our schools have not been re-supplied with volumes sufficient adequately to meet their needs. This was in part due to the interpretation placed on section 1714 of the Political Code relating to the library fund in cities, which originally read:

"In cities not divided into school districts the library fund shall consist of a sum not to exceed fifty dollars, for every one thousand children or fraction thereof of five hundred or more, between the ages of 5 and 17 years, annually taken from the City or County school fund apportioned to the city. The Superintendent shall apportion the Library Fund in cities not divided into districts among the several schools in proportion to the average number of children belonging to each school."

In the past the words "not to exceed" in line 2 of the section above have been taken advantage of, with the result that comparatively insignificant amounts of money have been devoted to this laudable purpose.

With these ideas in mind, at the last session of the Legislature I prepared an amendment to the section just above quoted attaching to its final words the following proviso:

"Provided, that in each city and county the Library Fund shall consist of a sum equal to at least ten dollars for each teacher employed in such city and county." This amendment was introduced by Assemblyman James Ryan and was enacted into law. Under this act the Board of Education of San Francisco will be required to appropriate approximately \$12,000 a year at the present time for the purpose of placing supplementary books in the schools, an increase of about \$8,000 per year.

THE TEACHERS' PENSION BILL.

At the session of the Legislature in 1911 the teachers of this Department strove earnestly, in company with the educational forces of the entire State, to secure the enactment of effective pension legislation, believing that such a law would prove to be of the greatest value to school-workers and the children alike. A measure known as the "Williams' Bill" was passed by the Assembly on March 16th and by the Senate on March 24th, but failed to receive the signature of the Governor. We reprint here the terms of this act as finally presented to His Excellency, Governor Johnson.

An act to provide for retirement salaries for public school teachers of this State, and to provide for the revenue therefor.

The people of the State of California, represented in Senate and Assembly, do enact as follows:

Section 1. A fund is hereby created, to be known as the "public school teachers' retirement salary fund of California." So much of the taxes collected under the succession and inheritance tax laws of this state and not specifically appropriated to the uses of the state school fund and for other educational purposes as may be necessary to provide for the retirement salaries, specified in sections three and four of this act shall constitute this fund.

Sec. 2. The superintendent of public instruction shall each year determine, from reports made to him by city, county, and city and county superintendents, the amount that will be needed for the following fiscal year to pay the said retirement salaries, and shall report the same to the state controller, annually, between the tenth day of August and the first day of September. This amount the state controller shall certify to the state treasurer, who shall pay such retirement salaries upon warrants properly drawn by the state controller.

Sec. 3. Any public school teacher who shall have served on a teacher's legal certificate, as teacher or partly as teacher and partly as superintendent or supervising executive, or educational administrator, for at least thirty school years in the public schools of this state, including the last ten years preceding retirement, shall be entitled to receive upon retirement after such service an annual retirement salary payable quarterly, which salary shall be equal to one and one-half per cent of the average salary of the last ten years of service multiplied by the total number of years of service; provided that the term "ten years" as used in this act shall not be construed as meaning ten consecutive years, and that, on the other hand, the interruptions of service during this period, however caused, shall not exceed a total of three years; and provided further, that the term "public schools" shall be construed, for the purposes of this act, as meaning all schools supported by public funds and subject to city, county, or city and county, or state control; and provided further, that the above requirement of a teacher's legal certificate for the full thirty years shall not apply to those who entered the public school service of this state, prior to the passage of this act, except that no person shall be entitled to receive said retirement salary who is not the holder of such a teacher's legal certificate at the time of retirement.

Sec. 4. Any public school teacher, as described in section three, who shall have served, on a teacher's legal certificate, for at least twenty years, in the public schools of this state, and who shall, by reason of bodily or mental infirmity, have become totally incapacitated for further school service, shall be entitled to receive, during the period of such disability, an annual retirement salary, payable quarterly, equal to one and one-half per cent of the average annual salary of the last ten years immediately preceding retirement, multiplied by the total number of years of service, provided application for such retirement salary is made within two years after the last month of service; provided, however, that the above requirement of a teacher's legal certificate for the full twenty years shall not apply to those who entered the public school service of California before the passage of this act, except that no person shall be entitled to receive a retirement salary who is not the holder of such a teacher's legal certificate at the time of becoming so incapacitated.

Sec. 5. If any teacher retired under the provisions of section four of this act shall be re-employed in any public or private school of this, or any other state, his or her retirement salary shall cease, and in case such teacher qualifies

for a retirement salary already received by such teacher under section four shall be deducted year by year in the amounts originally received.

If any teacher retired, under section three of this act, shall be re-employed in any public or private school of this or any other state, his or her retirement salary shall cease.

Sec. 6. No one shall be permitted to draw from the state, directly or indirectly, more than one retirement salary. This act shall not be so construed, however, as to prevent local communities or bodies of teachers from increasing the retirement salary received from the state.

Sec. 7. The state board of education shall determine and prescribe what shall constitute a "school year," under section three and the other provisions of this act, and shall define in detail the periods of service specified in this act, and shall make all needful regulations for the method or methods of applying for and drawing said retirement salaries, and for the method or methods of determining the eligibility of each applicant, and the amount of the retirement salary, under the provisions of this act.

Sec. 8. The minimum retirement salary for teachers retiring under section three of this act shall not be less than three hundred and sixty dollars per annum; nor shall the maximum for teachers retiring under section three or section four of this act be more than nine hundred dollars per annum.

Sec. 9. All teachers already retired, are eligible to be retired, under the act to amend an act approved March 26, 1895, entitled "An act to create and administer a public school teachers' annuity and retirement fund in the several counties, and cities and counties in the state" (approved March 29, 1897, amended March 20, 1903,) shall be entitled to receive annual retirement salaries under the provisions of this act.

Sec. 10. This act shall take effect July 1, 1911.

CONCLUSION

I take this means of commending the spirit shown by the people of this city toward their schools since the calamity of April 18, 1906. The people at large have manifested a deep interest in public education and have never hesitated to take up any project which has had for its object the improvement of the schools. Bond issues for school purposes whenever submitted to popular vote have invariably been carried by overwhelming majorities. The people are coming into closer contact with our work. Parents' Clubs have been organized in several schools. Improvement Clubs take an active interest in all that pertains to the welfare of the children. This spirit is reflected in our teaching force. The esprit de corps which exists among our teachers has resulted in honest, conscientious work and the establishment of the highest standards in education. I shall continue to exert every influence at my command to develop this community interest in our schools and thus make them more useful, not only to the children, but as real social centers in which our citizens may gather to discuss ways and means for the benefit of our city.

REPORT OF THE SUPERVISOR OF LECTURES FOR THE SCHOOL YEAR
1910-1911.

San Francisco, July 1, 1911.

To the Board of Education of the City of San Francisco.

Madam and Gentlemen:

Herewith I respectfully submit my first annual report on public lectures, for the school year ending June 30, 1911.

This, the first year of the existence of the Bureau of Lectures, has seen the equipment and opening of fifteen school auditoriums as lecture centers, in which sixty-four free evening lectures for adults have been given, besides several afternoon lectures to children, pupils of the schools. The subjects of the lectures have been varied, representing the fields of Geography and Travel, History and Biography, Science, Health, and Social Topics, Literature and Music. Most of the lectures have been illustrated with the stereopticon, several with moving pictures or concrete scientific experiments; while literary and musical topics have been enlivened with selections of a high order, in every instance (I believe) rendered with superior artistic taste and skill. Yet such has been the generosity and public spirit of the friends of the public lecture system (including men from the faculties of Stanford and California universities, as well as citizens of San Francisco), that all this service has cost the city of San Francisco not one dollar. The speakers and artists have understood that the Bureau of Lectures was without funds with which to repay their services, and in no instance has that fact made any difference: the service was rendered for love and the public welfare. Even expensive appliances, views and musical instruments have been loaned to the Bureau for its use, without charge. Of this, more specific acknowledgment is elsewhere made.

The response on the part of the people to this plan for their instruction and entertainment has been very gratifying, in point of attendance, attention, and after-comment. The total attendance at seventy lectures has been 25,236, an average of 360 to each lecture, or nearly double the average last year in New York City. The attention paid at the lectures has been generally all that could be desired, and the comments made at the close of many evenings have been most appreciative, while some of the auditors have taken pains to write their enthusiastic approval. Especially gratifying has it been to the workers in the Bureau to have men and women, entire strangers, speak to them at the close of lectures, or even accost them later, on the streets of the city, and declare our lectures quite equal to those of New York, which, with its elaborate system, may be regarded as a standard.

Principals of schools used as lecture centers have not only attended the lectures given in their schools, but have without exception expressed approval of the system as a wise use of public property, leading to a closer and better relation between school and neighborhood. From others, not connected with our schools, kindly suggestions have come, and offers of help, even beyond our immediate power to use.

The lecture idea is simple. It rests on the fundamental fact that language is the keenest tool of intellect and speech the most facile medium of man's intercourse with man. Given a log with Mark Hopkins seated on one end and a student on the other, and you have a university, said Emerson. In such a university one may be sure the instruction would be oral and not printed—winged words flying from the lips of the wise teacher to the listening ear of the eager learner. Though the printed page has its uses, it can never replace the speaker in liveliness, in facility, in appeal to an assembly. It is agreed by all that the

success of a lecture turns on the personality of the lecturer. Given a magnetic speaker, fortified in his knowledge of his subject, and facing a receptive audience, —then the conditions for instruction are ideal.

And all the people, even the most fortunate of us, need enlightenment on many subjects, our life long; a ready means for which is the public lecture, given in the halls of the public schoolhouse built with public money.

Prof. Edmund J. James, President of the University of Illinois, says:—

“We must reach out and provide systematic means of educating and training the adult population of the country. The church, the theatre, the book, the library, the newspaper, valuable as they are, are still far from accomplishing the necessary result. We must adopt a more comprehensive, a more scientific, a more systematic method of work.

“It is fortunate for us that the means for this work are so close at hand. The public school buildings in this country represent an enormous investment of capital, most of which, from an industrial point of view, is lying idle most of the time. A schoolroom is used for perhaps six hours a day, not to exceed ten months in the year. The plant is, in a word, very much underworked. We must make a new departure. Every schoolhouse should be the center of a system of adult education, as well as of infantile and youthful education. Every city schoolhouse ought to contain a large, well-equipped auditorium, able to take in of an evening, for purposes of further study and instruction, the parents of the children who attend it in the day time.

Prof. Charles Zueblin, of the University of Chicago, writes to Dr. Leipziger:—

“New York is doing a great work for the world, as for itself, in indorsing and supporting the ideas that education is the process of a lifetime and that the millions we have invested in our public school buildings belong to the people and should be used for their benefit. I meet no more responsive audiences than those in the New York public schools, and I find no feature of our public school system which seems worthier of support or brings more immediate returns in good citizenship. I hope the authorities will continue to subsidize you as in the past, and enable you to respond to the growing demands of your intelligent citizens.”

But will the people come, and will they continue receptive to lectures that aim to be something more than merely entertaining?

To quote an eminent Harvard professor:

“With the multitude of other opportunities for education that American life affords, will any large body of men and women attend public lectures; will they attend when the novelty has worn off, say, during the third year; will they do nothing more than attend; will they follow courses of study, write essays and pass examinations; will the extension system (and the free public lecture is a form of educational extension) —no better than its decayed predecessor, the old Lyceum System—resist the demands of popular audiences and keep itself from slipping out of serious instruction into lively and eloquent entertainment?

We are informed by Dr. Henry M. Leipziger, Supervisor of Lectures in New York City, that the twenty years' experience of his city gives a satisfactory reply to every item in the above question. Will San Francisco,—like New York City in the cosmopolitan character of her people; its counterpart in geographic and economic position, but a century and a half younger, three thousand miles farther removed from their common parentage in the riper civilization of Europe; with fresher, cruder traditions of transcontinental travel, toiling miners, Mexican and Indian life, and with a milder sky encouraging improvidence, putting a premium on picnics, play and outdoor display—will dear, distressing, patient, human San Francisco keep step with the metropolis in the matter of public educational lectures? Time alone can tell, but the experience of the past six months makes us believe that she will.

HISTORICAL. The Bureau of Lectures, as it now exists, is a child of the enthusiasm of Director Henry Payot. San Francisco had seen scattering lectures, even systematic courses of lectures, given to limited audiences, in hired halls, for an admission fee; in isolated schools, notably the Laguna Honda, free lectures have been provided; but not before 1910 were free lectures offered to the public on a large and systematic plan, in our school buildings. In that year a volunteer committee of ladies and gentlemen, among whom Dr. Caroline Rosenberg was perhaps the most active, under permission from the Board of Education, arranged for a series of public lectures; eight such lectures were given in 1910. In December last, Director Henry Payot (who for many years had found pleasure in lecturing on topics suggested by his travels, before audiences in San Francisco and other cities, and had himself heard many of the public lectures in New York City), believing that the time was ripe, introduced the resolution creating a Bureau of Lectures, a copy of which is appended to this report.

This resolution being unanimously adopted by the Board of Education, and warmly supported by Superintendent of Schools Alfred Roncovieri, meetings of the Advisory Commission on Lectures were held early in January, a schedule of lectures approved, and lanterns and screens having already at the instance of Mr. Henry Payot been installed in a number of schools, lectures were commenced. Beginning thus in January, 1911, at first twice a week, they were continued as frequently as five or even seven lectures weekly until the end of May, with the excellent attendance stated above.

NEEDS OF THE BUREAU. A good beginning has been made, but only a beginning. Many auditoriums are still without equipment, and few of the halls fitted as centers are in use oftener than once a month. This raises the item of expense. New York City, where free lectures for adults have been systematically provided for over twenty years, and which may well be regarded as the standard for the country, spent in 1909-10 the sum of \$125,000 for this purpose. With one-tenth the population, San Francisco might eventually, at a like rate, expect to expend some \$12,000 for lectures. In May, last, the Board of Education named \$6,000 as desirable for the fiscal year 1911-12, and was allowed \$2,500—perhaps a reasonable grant, considering the youth of the experiment here. Half a loaf, indeed a quarter loaf, is far better than no bread; and with this small fund, carefully husbanded, the Bureau expects to continue the lectures about as frequently as heretofore, to open several more lecture centers, to equip a number of auditoriums for moving pictures, and—not least in importance—to allow a small fee to a few, a very few, of its lecturers and assistants. These men and women have thus far tendered their services to the city, gratis. But an adequate free lecture system cannot be indefinitely continued on a charity basis. Assuming a complete material equipment of school auditoriums, seats, lights, lanterns, slides, electrical fittings, screens, and the rest,—and ours is far from being complete,—there is a constant expense for lighting, printing, operation, and supervision; and above all, the lectures and music, which so far have cost nothing,

will properly require an increasing appropriation if the service is to be extended to meet the present demand.

But more than this, the scope and the quality of the lectures should be improved. In order to do this, we must be able to call on the scholars and specialists of our universities. Several of these men, both from Stanford and the University of California, have already generously rendered volunteer service, but we need many more if we are to raise the standard of our lectures. A university is not merely a company of scholars; it is a nursery of knowledge, a place—it might almost be said the place—where truth is brooded over, and hatched into the world. It is difficult, almost impossible, for the man of affairs to look at scientific truth so steadily or to utter it so truly, as can the professional scholar who dwells amid academic shades in the traditional atmosphere of study. And truth is what the people desire; to offer them aught else were to insult their intelligence. The Bureau of Lectures should therefore be enabled to secure, preeminently, the assistance of a number of university lecturers for systematic courses as well as for single lectures. Nor does it seem right any longer to permit these men, some of them on lamentably small salaries, to give their evenings, and sometimes their afternoons, also, without compensation, in service and in travel to and from our city, meeting their own traveling expenses into the bargain. The city's departments of police, fire, libraries, and public health have each a fund whereby they serve the adult population. Why should education, the diffusion of knowledge that makes for better citizenship and in some degree tends increasingly to render other expenditures less necessary, why should education be confined to children? Goethe said: "The best is good enough for children." Let us say, The best is none too good for all.

ACKNOWLEDGMENT. It is with great pleasure that, on behalf of the Board of Education, I here record the names of the following ladies and gentlemen who have given lectures, addresses, or musical assistance without fee:—Mr. V. Arrillaga, Mr. B. R. Baumgardt, Lieut. P. W. Beck, U. S. A., Mr. Edward Berwick, Mrs. M. E. Blanchard, Dr. R. G. Brodrick, Mr. G. A. Clark, Mr. Herbert L. Coggins, Rev. D. O. Crowley, Mrs. Mary Dickson, Mr. Edw. J. Dupuy, Mr. Albert I. Elkus, Hon. Albert H. Elliot, Dr. W. C. Evans, Miss Lucy D. Hannibal, Mr. Wm. Greer Harrison, Hon. J. Emmet Hayden, Mr. Elias M. Hecht, Dr. Ernest B. Hoag, Prof. R. S. Holway, Mr. Francis Hope, Mr. M. Hrubanik, Mr. A. L. Jordan, Dr. David Starr Jordan, Hon. Wm. H. Jordan, Mrs. Edw. H. Kemp, Prof. A. L. Kroeber, Mlle. Blanche Leviele, Mr. Fred Maurer, Jr., Mr. Wm. J. McCoy, Mr. Matthew McCurrie, Rabbi Martin A. Meyer, Hon. Henry Payot, Mrs. C. W. Platt, Mr. Frank H. Powers, Hon. C. Wesley Reed, Mrs. Richard Rees, Mrs. Florenz Richmond, Mr. Riley R. Ross, Mr. Almon E. Roth, Mr. Alexander Russell, Mr. Ford E. Samuel, Mr. Maynard Shipley, Mr. Arturo Spozio, Mr. Roger Sprague, Prof. H. Morse Stephens, Mr. Robert P. Troy, Dr. Wm. C. Voorsanger, Mr. L. H. Weir, Col. Harris Weinstock, Mr. Roswell S. Wheeler, Mr. Hother Wismer, Supt. Will C. Wood, Mr. John P. Young.

In conclusion, I desire to thank the Board of Education, for support and assistance; the daily papers for numerous notices and articles; the members of the Advisory Commission on Lectures for their support and advice; the lecturers and musical artists for generous services; Messrs. Sherman, Clay & Co. for the loan of Steinway pianos on several occasions; Mr. George Kanze for the use of his fine collection of lantern slides as well as for services; Mr. Edw. H. Kemp for services and the use of valuable appliances; Mr. G. O. Mitchell for constant support and skillful projection; and, in particular, Director Henry Payot, to whose devoted zeal, business acumen, and experience in lecturing the cause of Free Public Lectures in San Francisco owes a debt that can never be paid.

MILTON E. BLANCHARD,
Supervisor of Lectures.

APPENDIX A. Resolution creating a Lecture Bureau, introduced December 21, 1910, by Director Henry Payot:

Whereas, The Board of Education believes that a system of free public lectures for adults is desirable, said lectures giving the results of the latest developments in science, history, hygiene, art, music, travel, and political science, etc., thereby encouraging reading and study to definite ends, and developing a wider and deeper interest in the schools on the part of the people, by making said schools and their equipment more effective social and community centers: Therefore, be it

Resolved, That such a system, to be known as the Lecture Bureau, be and is hereby ordered instituted under the control of the Board of Education in the City of San Francisco, the lectures to be at once arranged for, and lecture centers established for the present at the following school buildings: Lincoln, Girls' High, Sheridan, Yerba Buena, Frank McCoppin, Burnett, Hancock, Mission Grammar, Monroe, Adams, Spring Valley, Sutro, Laguna Honda, Junipero Serra, Mission High, Glen Park.

Also Resolved, That the following named persons interested in all that makes for the betterment of conditions in this City, be invited to act as Advisory Commission to this Board of Education in carrying out the purposes above mentioned, namely:

COMMITTEE ON LECTURES.

H. G. Vaughan.....	President of the Board of Education
Mary W. Kincaid.....	Member Board of Education
Henry Payot	Member Board of Education
Jas. E. Power.....	Member Board of Education
Alfred Roncovieri	Superintendent of Schools
Milton E. Blanchard, Ph. D.....	Supervisor of Lectures
G. O. Mitchell, A. B.	Director of Lectures

ADVISORY COMMISSION ON LECTURES.

Raphael Weill	Willis Polk
Harris Weinstock	Dr. Caroline Rosenberg
John P. Young	Paul Steindorff
Ernest S. Simpson	Dr. Langley Porter
C. S. Stanton	Dr. R. G. Brodrick
James Rolph, Jr.	James Ferguson
Walter Macarthur	A. J. Cloud
Thos. E. Hayden	

APPENDIX B. Classification of lectures given since the establishment of the bureau, in January to May, 1911:

Geography and Travel, 35; History and Biography, 3; Science, 14; Health, 6; Social Topics, 5; Literature, 2; Music, 5: Total, 70 lectures. Total attendance, 25,236, being an average attendance per lecture of 360.

BOARD OF EDUCATION

REPORT OF THE BOARD OF EXAMINATION.

The Board of Examination is composed of:

Superintendent Alfred Roncovieri, Chairman;
 Deputy Superintendent W. B. Howard, Secretary;
 Deputy Superintendent T. L. Heaton;
 Deputy Superintendent A. J. Cloud;
 Deputy Superintendent R. H. Webster.

The Board of Examination has conducted two examinations (October 1910 and April, 1911, according to law, of persons desirous of securing certificates. It has met monthly and forwarded its recommendation to the Board of Education. Herewith is a resume of its work:

REPORT OF THE PUBLIC SCHOOL TEACHERS' ANNUITY AND RETIREMENT FUND COMMISSIONERS.

San Francisco, July 30, 1911.

To the Honorable Board of Supervisors
in and for the City and County of San Francisco.

Gentlemen:

I have the honor to submit herewith the report on the Public School Teachers' Annuity and Retirement Fund for the fiscal year terminating June 30, 1911.

ALFRED RONCOVIERI,

Superintendent of Schools and Secretary Public School Teachers' Retirement Fund Commissioners.

RECEIPTS.

Balance in fund June 30, 1910, including \$50,000— permanent fund—invested in 44 \$1,000 San Francisco Fire Protection System 5% bonds.....	\$55,154.64
Contributions by teachers under provisions of Annuity law	12,848.50
Absence money granted by Board of Education.....	3,000.00

The salary of the second assistant in Oral-Deaf is hereby fixed at	1,164.00	97.00

SUBSTITUTES.

Day Substitutes and Teachers on the Day Unassigned List in Primary and Grammar Schools, when actually engaged in teaching, per day.....	\$3.00
High School Substitutes, per day	5.00
Evening School Substitutes, per evening.....	2.50
Substitutes in San Francisco Commercial School, per day	4.00

Principals not teaching classes shall not call for a substitute for the first day's absence of any teacher, but shall notify the Secretary of such absence at once.

NORMAL SCHOOL GRADUATES.

Since Section 1687 of the School Law provides that "Beginners shall be taught by teachers who have had at least two years' experience or by Normal School graduates," Normal School graduates who have successfully completed their probationary term as teachers of first grade classes, shall be allowed two years' experience as the equivalent of their Normal School training.

YARD ASSISTANTS.

In primary schools having an average daily attendance of 500 or over, the principal may recommend for the approval of the Board, an assistant to perform yard duty, who shall be paid therefor, ten (\$10.00) Dollars per month in addition to the regular salary.

TEACHERS OF SINGING.

Five (\$5.00) Dollars additional, per month, shall be paid to regular teachers in primary and grammar schools, holding special certificates in Music, and teaching singing; provided, however, that said teachers shall be required to teach, as far as practicable, every class in the school, in this subject.

TEACHERS OF LANGUAGES.

Five (\$5.00) Dollars additional, per month, shall be paid to regular teachers in primary and grammar schools, holding special certificates and teaching English and French or English and German.

VACATION SALARY.

No teacher shall be paid any salary for the Christmas or Spring vacation, unless such teacher shall have been present for at least twenty (20) school days of the period immediately preceding the vacation.

Teachers shall be paid one-tenth of the salary of the Summer vacation, for each school month of the preceding fiscal year during which they shall have been present.

All rules in conflict with this schedule are hereby rescinded and annulled.

JANITORS.

Janitors shall be paid five (\$5.00) dollars per room up to and including ten rooms, and \$4.50 per room thereafter.

This shall not apply to the janitorial service in buildings where more than one janitor is employed, or in schools of less than 4 rooms.

BOARD OF EDUCATION

FINES AND DEDUCTIONS.

See Rules of the Board of Education.

GENERAL INSTRUCTIONS.

A probationary term of two years must be served by every teacher elected into this department, and by every teacher elected or promoted to the position of principal, vice-principal, head of department, or high school assistant.

No increase in salary under this schedule shall be allowed until after a recommendation by the Superintendent and confirmation by the Board of Education in the case of each teacher serving a probationary term.

Experience outside of this department shall not be counted in fixing the salary of any teacher during the fiscal year 1911-1912 as this schedule permits the maximum salary to be reached after seven years of teaching.

No person shall be appointed Head of a High School Department, nor after the fiscal year 1910-1911, continued in that position, unless such person shall have at least one assistant under his or her supervision.

A Vice-Principal when acting in the capacity of Principal for more than one day in any calendar month, shall receive the salary of the Principal whose place he or she is temporarily filling.

Teachers' annual salaries shall be paid in twelve equal installments, one installment for each month in the calendar year.

Salary shall be computed from the time a teacher is appointed to a probationary class.

In classes consisting of two grades, the salary of the higher grade shall be paid when the average attendance in the higher grade equals or exceeds two-fifths of the average attendance for the class; provided, that when the average attendance of the entire class is less than forty, the salary of the lower grade shall be paid.

When there are more than two grades in a class, the Board will determine the salary of the teacher—A AND B DIVISIONS OF ANY GRADE SHALL CONSTITUTE ONE GRADE.

In all schools consisting of more than 4 classes, the minimum average daily attendance per primary class, exclusive of first grades and classes of more than 2 grades, shall be 40; and the minimum average daily attendance per grammar class, shall be forty-five.

AVERAGE ANNUAL SALARIES.

	Male.	Female.
Superintendent of Schools (1).....	\$4,000.00

Block 391; southwest corner Kentucky and Twentieth street; 150x200 feet.

Potrero block 254, O. L. R., also Potrero block 265, O. L. R., condemned and acquired by Western Pacific Railroad Company for \$14,000.

OTHER OUTSIDE LOTS.

Precita Valley lands; Eve street, between Army and Adam streets; 150x32 feet.

Paul Tract Homestead; Berlin street, between Ordway and Ward streets; 85 feet and 2 inches by 120 feet.

December 21, 1908, from Joseph B. and Carlotta L. Keenan, all of block No. 132 of University Mound Homestead Association, excepting one lot 25 feet by 100 feet on Pioche street, and one on Cambridge street, 25x120 feet, \$8,250.

WITHIN THE PRESIDIO WALL.

Block 553, W. A. Commencing on the north line of Lombard street, 137½ feet west from Broderick street; thence west on Lombard street, 137½ feet by 137½ feet in depth. Lot 2. Outside Land Reservation.

Block 810, W. A. Commencing on the north line of Broadway, 137½ feet west from Walnut street; thence west on Broadway, 137½ feet by 137½ feet in depth. Lot 2. Outside Land Reservation.

Block 841, W. A. Commencing on the north line of Pacific avenue, 137½ feet west from Maple street; thence west on Pacific avenue, 137½ feet by 137½ feet in depth. Lot 2. Outside Land Reservation.

REPORT OF MISS KATHERINE M. BALL, SUPERVISOR OF DRAWING

San Francisco, June 3, 1911.

Mr. Alfred Roncovieri,
Superintendent of Schools.

My Dear Sir:

In reply to your request for a report concerning the Drawing and Art in our city schools, I submit the following:

I am happy to inform you, that we are progressing in our work. Not only is there a marked growth in power, on the part of our children, but the aesthetic quality of their work is much improved.

Considering that the subject of Drawing and Art is given the minimum quantity of time, our results seem quite remarkable. An hour a week is a very short time, when so much is expected, notwithstanding that the subject continues consecutively for eight years. No matter how well graded a course of study may be, the instruction lacks continuity on account of the prevailing custom of transferring teachers from grade to grade, and from school to school.

That the percentage of results in the city doing creditable work is much larger this year than ever before, is a source of great encouragement, and if it were possible to demand of incoming teachers the same knowledge of subject matter in Drawing as is required in other subjects they are obliged to teach, a greater uniformity of results would be possible in all the schools.

Public School Drawing and Art is elementary in character. That all certificated teachers can learn its principles and teach them successfully is proven by the work done by a large number of our present corps. A supervisor can plan the work, but to the body of teachers belongs the credit of successfully carrying out the given directions.

The drawing of the elementary schools is sometimes criticised by the upper schools. If our pupils cannot draw with the same degree of skill that they read and write, we should remember that the technique of any subject requires more than an hour a week. The results of art schools are acquired only after years of hard work—not on a basis of one hour a week, but of all the working hours of every day, while the student is at work.

Public School Drawing and Art is intended to be educational, not technical. It does not aim to produce draftsmen or artists. It really does not intend to teach drawing for the purpose of learning to draw. The latter is merely the result, the effect or consequence of the effort of thought expression, through graphic channels.

The real aim of this subject is to teach the pupil to see size, proportion and shapes in relation to space; to acquire a knowledge of structure and the geometrical principles involved; to discern beauty of form and color in nature and in art—developing intelligent discrimination; to calculate and plan so that the product will be true and useful; to work methodically and accurately, acquiring habits of order, patience, perseverance and conscientious effort, and to stay by a piece of work until it is finished.

Every drawing a pupil makes,—whether it is a representation of a plant, model, or a design for an applied purpose—is a construction, which first has to be planned and then executed, according to method. This requires serious thought and not only gives as fine mental training as any other subject in the curriculum, but it creates habits of thinking and working, which become a most valuable asset in life, whatever the vocation exacts.

Under the present conditions, we are able to do much for the child, but with increased facilities it might be possible to do more in accomplishing greater skill in technique.

One of the most important functions of the teaching of drawing is the discovery of the talented child, but as yet popular appreciation of the value of talent is very limited. The time will come when the nation will see the wisdom of fostering its genius and conserving for its own special benefit all kinds of native ability.

Ample provision should be made for the careful training—in a specially equipped school and under carefully prepared teachers—of all talented children.

Manual training high schools and polytechnic schools for older children abound, but the technical school for the younger children is yet to be established.

The development of the creative faculty should begin in the kindergarten and continued all through the school life. If it is neglected until the time of the high school it may be too late.

The industrial supremacy of a nation is dependent upon its trained and skilled workmen, and in the preparation of these workmen the public school should take an important place by giving a proper fundamental training.

California is frequently spoken of as the "Nursery of Genius." Why should not the city of San Francisco become this in reality, by making more favorable conditions for teaching the industries and their allied arts?

At the exposition of St. Louis we received the first award, and at Seattle the gold medal. Increase our time and equipment and we will promise you still greater results.

Respectfully submitted,

KATHERINE M. BALL,
Supervisor of Drawing.

REPORT OF THE DOMESTIC SCIENCE DEPARTMENT.

San Francisco, California, June 2, 1911.

Mr. Alfred Roncovieri,
Superintendent of Schools,
San Francisco.

My Dear Mr. Roncovieri:

I beg to submit the following report of the Domestic Science Department for the fiscal year 1910-1911.

The following table shows the location of the Cookery Centers, the names of the teachers in charge, the number of pupils enrolled, the cost of supplies and laundry, and the cost of supplies per pupil; also the number of visitors.

Center.	Teacher.	Average Monthly Enrollment.	Cost of Food Supplies and Laundry.	Cost of Supplies per Pupil.	Visitors,	
					Others.	Officials. School
Bay View.....	Miss Taber.....	71.5	\$35.45	\$0.487	1	90
Crocker.....	Miss Ballinger	317.1	130.95	.411	2	162
Glen Park.....	Mrs. Fenton	255.5	107.54	.457	0	161
Hamilton.....	Miss Martin	300.7	142.85	.467	2	62
Hearst.....	Miss Gray	271.8	100.95	.374	6	117
Horace Mann.....	Miss Tobiner	347.6	123.63	.342	7	100
Irving M. Scott.....	Miss Tabor	47.6	31.76	.661	0	85
Laguna Honda.....	Miss Tomlin	104.3	50.05	.561	2	73
Mission.....	Miss Congdon	308.3	127.10	.41	8	86
Monroe.....	Miss Tabor	184.7	47.85	.537	1	60
Sheridan (1 term).....	Mrs. Fenton	53.5	19.65	.369	0	35
Sutro.....	Miss Tomlin	199.5	54.60	.269	3	154
Washington.....	Miss Woodward	311.	136.50	.50	0	69
Average monthly enrollment						2,773.1
Cost of supplies						\$1,108.88
Average cost of supplies per pupil431
Number visits from school officials						32
Number visits from others						1,254
						<u>1,286</u>

PARENTAL SCHOOL LUNCH ROOM

Mrs. Mathilde Gerhardt in Charge.

Average number of meals served daily	48
Average cost per meal (supplies)	\$ 0.024
Cost of supplies to School Department.....	129.017
Cost of supplies to Parental School.....	91.65
	<u>\$220.67</u>

Average daily attendance in cooking classes.....	17
Average number of baths supervised (daily)	17
Cost of supplies for Domestic Science Department.....	\$1,108.88
Cost of supplies for Parental School	220.67
	\$1,329.55

NEW COOKERY CENTERS.

Cooking Centers were equipped this year in the recently completed Mission, Sutro, and Sheridan Grammar Schools. The equipment is good and the rooms are attractive.

The Hancock Grammar School is now completed, and the cooking laboratory should be made ready for the Fall Term.

I would suggest that the use of the cooking laboratory at the Washington School be discontinued, and that the equipment be transferred to the Hancock School. The Washington School, being a boys' school, does not need a cooking laboratory.

The new Denman and Franklin Schools are nearing completion and will be equipped for domestic science.

Plans have also been drawn for special buildings to house the Domestic Science and Manual Training departments at the Roosevelt, James Lick, and Pacific Heights schools. When these six proposed centers are ready, as they should be, at the beginning of the fall term, most of the girls of the seventh and eighth grades will have their cooking lessons in their own schools, and few will have to travel far to cooking centers.

SEWING.

During the past year there has been a demand from some of the grammar school principals for the establishment of sewing classes for the girls of the fifth and sixth grades. With the permission of the School Board, several domestic science teachers have taught sewing during the past year. There were twelve sewing classes during part of the fall term and nine during the spring term, at practically no expense to the Board. The pupils and teachers have furnished almost all the materials, and the time taken was some that was not available for cooking lessons.

Mrs. Fenton, at the earnest request of the parents and pupils of the Fairmount School, taught after school hours, giving her time for several months. At the Horace Mann, the supervisor relieved Miss Tobriner of three cooking classes a week so that she might teach sewing. The experiment has demonstrated that sewing classes in the public schools would be useful, and that their usefulness would be appreciated.

Domestic Art is very generally taught in the public schools of this country, and I would suggest that it be included in our next course of study, and provided for in the budget.

GIFTS TO THE DOMESTIC SCIENCE DEPARTMENT.

The following is a report of the gifts made to the Domestic Science Department this year. The gifts have very materially lessened the cost of our cooking lessons.

Received from the—

- Globe Mills, about 2,000 lbs. flour;
- Golden Gate Yeast Co., 800 yeast tickets;
- Johnson-Locke Mercantile Co., 6 cases Royal Baking Powder;

Johnson-Locke Mercantile Co., 1 case Kingsford Corn Starch;
 Johnson-Locke Mercantile Co., 1 case Karo Corn Syrup;
 N. K. Fairbanks Co., 8 cases Cottolene;
 Sperry Mills, 50 lbs. flour.

During the past term, manufacturers belonging to the Home Industry League have presented several collections of specimens illustrating food productions and manufacture. They have also invited the Domestic Science teachers to visit their factories. Parties of teachers have visited the Carlson Currier Silk Mills and the Nolan Shoe factory in Petaluma, also the A. C. Boldemann chocolate factory in San Francisco. Our pupils take great interest in these collections of food products and textiles, and we hope to get more. At present the best display of collections is at the Mission Grammar School.

SUGGESTIONS.

CERTIFICATIONS OF DOMESTIC SCIENCE TEACHERS.—I would like to suggest that your office draw up a list of schools giving a normal school course in Domestic Science, and that only graduates from such schools be given certificates for teaching domestic science. This plan has been adopted, as you know, in most school departments. The field of Domestic Science has so broadened in the past few years that only regularly trained people can do the work required efficiently. A rule requiring applicants for certificates and positions in the Domestic Science department to have this special training would not only raise the standing of the department, but would also relieve your office, and the Board of Education, of the importunities of uninformed, though estimable people, who consider themselves fit to teach cookery because they can cook.

PURCHASING COOKING SUPPLIES.—I would also like to make a suggestion about the ordering of groceries, etc., for my department. Instead of getting the small amounts needed at one time on requisition, I would suggest that each teacher be given a triplicating order book, such as salesmen use, for her weekly grocery supply. One copy to be given to the grocer, another to remain in her book for reference, and the third to be O. K.'d at the end of the month by the supervisor and sent to the store-room of the School Board. The grocer attaches the order that he receives to the bill for comparison. The method of getting supplies, although a hundred per cent better than that in vogue before Mrs. Kincaid became School Director, is still cumbersome and expensive. I have calculated that the cost of buying supplies is sometimes five times that of the supplies themselves.

A cooking teacher's requisition, which may be for no more than for one-half pound of butter and one-half dozen eggs, passes through the hands of one supervisor, one storekeeper, two school directors, and one recording secretary. This course is expensive and offers no compensating advantage.

I have studied the question of getting supplies for cooking classes, and find that the best service is obtained when each teacher orders from a local grocer. It is noted that the tradesman who is apt to regard a school board as a remote abstraction, unacquainted with the price of eggs, will give excellent service to his little girl's cooking teacher.

In a school department where several centers are maintained, it is found best to deal with several grocers, conveniently located near the schools, rather than with one firm only. The remoteness of some of the centers, and the smallness of some orders, make delivery expensive for the firm, and the groceries cost more in consequence to the School Board. It also deprives the teacher of the opportunity of selecting what she needs, and of returning unused goods, should rainy-day sessions, unexpected class examinations or singing rehearsals interrupt the sequence of cooking lessons.

COOKING CENTER AT LONGFELLOW SCHOOL.—Last December the Board of Education passed a resolution to devote the old Longfellow School building and yard to the use of Domestic Science and school gardening. Nothing has been done as yet to prepare the building and grounds to such purposes.

I would suggest that part of the building be demolished, leaving only three rooms, and that these be fitted up very simply as a cottage home. A good deal of the furnishings might be made by the pupils in class, as sewing and manual training work, and would afford useful lessons in economical house fitting. Many of the people of that neighborhood live in shacks that date from earthquake times, and such a lesson would be useful.

CONCLUSION.

In conclusion I would like to state that the work of this department has progressed successfully this year. My assistants have enjoyed the co-operation and appreciation of the principals and teachers in whose schools they have been placed. At the end of each term the pupils of the B 8th grades have kept open house for their parents and friends, and these affairs have been very pleasant. The class-rooms have been open to inspection and garnished with flowers, and the pupils have taken pleasure in explaining the equipment and work of the department to their visitors. They also have served refreshments of their own making.

I have attended most of these "teas," and have been very much gratified by the expressions of appreciation that I have heard from the mothers of our pupils. Both the value of the Domestic Science work and the efficiency of the Domestic Science teachers have been pleasantly commented upon.

NEW TEACHERS.

At the beginning of the fall term the supervisor was absent on leave for five weeks, attending the summer session of Teachers' College, Columbia University. During her absence, Miss Florence M. Woodward was acting supervisor, and superintended the installation of equipment at the new Mission Grammar and Sutro Centers.

The completion of new centers and the resignation of one of our Domestic Science teachers, who was married last fall, made necessary the appointment of three teachers. The School Board made very happy selections, and the department has profited by new blood.

With many thanks for the courtesies that I have received from you and your deputies, I am,

Respectfully,

ELLEN M. BARTLETT,
Supervisor of Domestic Science

REPORT OF MANUAL TRAINING DEPARTMENT.

San Francisco, Cal., June 30, 1911.

Superintendent Alfred Roncovieri.

Dear Sir:

I herewith submit annual report of the work under my supervision for the school year ending June 30, 1911.

The enrollment by grades for the term just concluded is as follows:

A Sixth, 72; B Sixth, 134; A Seventh, 710; B Seventh, 629; A Eighth, 601; B Eighth, 445: Ungraded—Parental School, 27. Total 2,616.

These pupils have been under the instruction of the following men: H. C. Bagot, R. J. Brower (three-fifths time); M. J. Doyle, D. E. Dowling, P. F. Dailey, L. E. Davidson, M. A. Felton, A. M. Sylvia and G. J. Telfer.

During the year a laboratory at the Sheridan School was equipped and instruction begun; the Hancock laboratory was partially equipped and will be ready for use this fall; at the Horace Mann School a large laboratory was fully equipped for both wood and metal work, thus accommodating the Sixth grade and also affording an additional lesson per week for some of the Eighth grades.

Detached manual training laboratories are now in course of erection at the James Lick, Pacific Heights and Roosevelt Schools. The early completion of several of the new-bond school buildings will give us a total of more than twenty laboratories; three years ago we had but eight.

While this increase in laboratory facilities is very gratifying, there is immediate need for an increase in our teaching force, to permit of the extension of the work through the Sixth grades, at least.

With the teaching force now employed, our laboratories in the aggregate are idle more than two-fifths of the time. There is perhaps no one other thing which would do more to keep the Sixth-grade boy from leaving school than this kind of work.

It has been extremely gratifying to note the increasing numbers of large projects undertaken by the Eighth-grade pupils, the materials for which are furnished by the pupils themselves.

When a parent will readily supply his boy with several dollars' worth of lumber to be used in the manual training class, it is certainly good evidence of his high regard and faith in our system of manual training.

The introduction of metal work at the Horace Mann School has proven a great success. Work in metal supplements work in wood, and affords opportunity to present various tools and processes of great educational value and interest.

Since design and decoration enter so largely into this type of work, there is great need for either additional work in drawing or else greater correlation with the present drawing course.

The designing and preparation of plans and patterns should be done before coming to the laboratory, in order to leave the full lesson period for actual tool-practice.

At the close of the term the customary semi-annual exhibits of the term's work were held in the several laboratories, and were viewed by large numbers of parents and citizens. From these exhibits we have selected a limited but representative amount of work to show during the meeting of the National Education Association.

In conclusion, I wish to express my appreciation of the cordial co-operation of my assistants and of the many teachers and principals of the department. The good work done was only possible through this co-operation, together with the liberal support of the Board of Education and your own well-known favorable attitude toward this kind of school work.

Respectfully submitted,

F. K. BARTHEL,
Supervisor of Manual Training.

REPORT OF MISS ESTELLE CARPENTER, SUPERVISOR OF MUSIC.

June 2, 1911.

Hon. Alfred Roncovieri,
Superintendent Schools,
San Francisco, Cal.

My Dear Sir:

In reply to your request for report from the Music Department of the City Schools, I submit the following:

From the inspection of the work made during the past year, the results have been more satisfactory than those of preceding years since the fire. The regular class-room work was much disturbed by the great disaster of 1906. Since then the work has been gradually improving, and this year finds the music most systematically given.

The best evidence of the work is found in the results obtained by the individual child and the results obtained in the systematic class work.

Variety of songs, expression in singing, and development of sweet and fervent tones have all been admirably exemplified in the singing at dedications, graduations and concerts. There have been a great many dedications in the schools since the fire, and with each dedication, singing has been a prominent feature. This is as it should be, as such an occasion proves the value of the children's singing to the community. The school joined hands with the parents on these occasions and the music of the schools extended to the homes, carried there by the memories of the songs of the little ones. On the other hand, the children's singing was a part of the great life of the city, and thus singing by the children in the community became a factor in the building of the city.

As to graduations, in each and every graduation class, twice a year, there have been given in three parts, beautiful songs from the Masters, such as the "Intermezzo" from Cavalleria Rusticana, "Sextette" from Lucia, selections from "Stabat Mater," "Pilgrims' Chorus," "Miserere" from *Il Trovatore*, "Blue Danube," "Arditi's Waltz," Handel's "Largo," etc. Aside from these, we have had some songs from the Romance Composers of Germany and France, and well-known Folk Songs. In the Cosmopolitan Schools, songs are sung in French, German, Spanish and Italian.

Nature inspires true Folk Melody which is born in a moment, and contains truth and beauty. A Folk Melody reflects the spirit of the race which gave it birth. It is our duty to preserve these priceless values which have come down to us from the various nations.

Aside from the Graduations, the past year has been noted in our school music for a monster chorus which was conducted at Union Square for the benefit of the Native Sons in honor of the Admission Day Festival. This chorus comprised five thousand eight hundred voices, composed of children from all the schools of the city. It was given in the open air, and the greatest enthusiasm was manifested by the people at the singing. The songs rendered were "Sextette" from Lucia, "Carmen" in three parts, and the patriotic songs were sung amidst the flying of the Red, White and Blue colors. One cannot dream of the beauty and grandeur of the "Pilgrims' Chorus" from Tannhauser, sung by six thousand sweet, fresh children's voices, unless one has actually experienced the sensation of hearing such a thing. It took five weeks of work to prepare this chorus, while the Portola took twelve weeks to accomplish the same results.

Another notable event in the music world of children's singing was the chorus which had the honor of singing before Madam Tetrzzini in Dreamland Rink. The children from the Garfield, Hancock and Jean Parker Schools, with

nine days' preparation, sang "Anvil Chorus," and "Intermezzo" from Cavalleria Rusticana, and the patriotic songs, besides some songs in Italian. The artistic interpretation given by these children and their beautiful tone production, were the wonder of all who heard this performance. The memory of that performance is a perpetual delight.

The Admission Day Chorus, and the Tetrizzini Chorus, were directed by myself, and also a chorus for the benefit of the Hayes Valley Carnival. This chorus was unique in that the children actually sang on the street. Though it was a day in February, still the weather was mild and balmy; a day peculiar to California climate. The children were most responsive, and carried off the honors of the day.

During the year a number of dedications have occurred on Sundays, and the supervisor and assistant have conducted the songs on these occasions. On a number of occasions the children have sung at the Mothers' Club meetings, which are held in the school buildings. In a series of eight meetings given for the one thousand teachers of San Francisco, the supervisor outlined the work of the year and sang seventy-five various songs to be given the children of different grades.

The child has, during the last term, been held responsible for his individual effort and interest along the line of development in tone quality, ear training, sight singing, formal work and song singing. The effort of the child to give and hear beautiful tones, and to read at sight, results in a quickened interest in tone appreciation, and ultimately brings the mind of the child into responsive attitude toward the music world. This tone appreciation is the foundation of musicianship, and gives results, so that the child deals in tonality as easily as he deals in words and figures and makes him a quickened, mental and spiritual being.

During the past year systematic work has been emphasized in oral and written dictation. The motive or impulse in artistic education, lies in the desire of the individual to express himself. Unfortunately our curriculum allows us only one hour per week in which to give music, and this has been too short a time to go deeply into the expression of one's self in written music. So far we have expressed ourselves through beautiful tone and beautiful compositions, through the grasping of new situations in the tone world; but there is still another side which we hope to initiate soon, which will be the actual expression of thought by means of creative work. We are told that melody started in language, inflection and rhythm, in the savage ages; so in instructing the child, we aim to develop the melody instinct with the rhythmical. Much stress in the lower grades is put upon the rhythmical steps so that the child's body is thoroughly in accord with accent and impulse. The expression of time is but a reflex action, and comes where the child is taught to move in rhythm and to enjoy each movement. As the child progresses, this movement is transferred to the printed page, and helps on toward rapid mental conception of the rhythm of the printed page.

In every way the knowledge of the subject of music is encouraged. All children are encouraged to listen to the best music, to go to concerts, study the piano and other instruments, to cultivate their voices and put their lives into the general musical life of the city. Talks are given on the care of the vocal organs and how much the voice depends on the simple healthy life which conserves energy for usefulness.

In a large department, some of the schools are more advanced than others, and consequently some schools have been visited frequently and others not so often, in order that the whole department would attain an even degree of efficiency in the work. On some of the occasions, some of the schools were visited twice and some were visited more, according to the need. Where each regular teacher does the work thoroughly and artistically, there the work becomes

more proficient. The strength of the department lies in the ability of the individual teacher, and it becomes necessary to strengthen the weak places. Consequently, where a teacher is not capable, endeavor is made to increase her knowledge and give her methods to make her a stronger teacher. In some cases it is impossible to get desired results from the teachers. In such cases the Supervisor or Assistant Supervisor arranges for the exchange of work. In classes where there are a number of incapable teachers, the work is put into the hands of one particular teacher who assumes the responsibility of the work of these classes. These teachers possess special certificates in music, and are given a slight extra compensation for their work. There are about thirty such teachers in the San Francisco School Department, and here I take occasion to thank them for the work they have so ably done during the past year. These teachers have particularly been helpful not only for the regular work, but for all extra work such as the tremendous choruses given for the "Fleet," for "Portola," and for "Admission Day Festival." I am glad to say that the Board of Education appointed about five such teachers during the past year.

As I was appointed Secretary of the Music Section of the N. E. A., I organized these special teachers and others into a reception committee, and everything will be done to welcome the N. E. A. visitors.

During the last year a number of new pianos have been installed in the various schools by the Board of Education, for which I am most grateful. Each new school dedicated has been given a new piano.

I wish to recommend to the Honorable Superintendent and to the Board of Education, that more time be given to music in the public schools of this city. One hour a week is very little. I recommend that in the transfer of teachers, the Board of Education make it a rule to see that musical teachers are put in classes where musical teachers are needed. I wish to make mention of the fact that a piano be bought for the office of the Supervisor of Music, as it is very hard to carry on the work without a piano.

The Board of Education has for the past year supplied the teachers with mimeographed songs and printed music sheets, which is most satisfactory. I recommend that when supplementary books are sent to the school libraries by the Superintendent or Board of Education, that some of the books be music books. I specially recommend that each school possess a copy of "Favorite Songs and Hymns" by McCasky, and "Songs of All Lands" by Matthews, "The Rote Song Book" and "No. 1 of the Shorter Chorus" by Ripley & Tapper. These books were in each school before the fire, and should be sent to the schools that lost them during that catastrophe.

I wish to make mention of the good work done by our faithful regular teachers; of the support given to me and my department by the principals; of the excellent work done by the first assistant, and the special teachers of the various schools.

Thanking you, the Deputy Superintendents, and the Board of Education for your co-operation and kindness, I am,

Sincerely yours,

ESTELLE CARPENTER,
Supervisor of Music, San Francisco School Department.

REPORT OF PARENTAL SCHOOL GARDEN.

In August, 1909, we moved from our old school building on Harrison street, near Tenth, to the present location on Bryant and Seventh streets.

Adjacent to the school building was an immense sand lot covered with debris left by the fire of 1906. The boys of the school, fifty in number, were organized into squads to clear this debris. The time for this was found in the early morning before the 9 o'clock session, and also at the first recess at 10:30. Little by little the work of this debris commission began to show, the bricks were removed, and after several months of good hard work the ground was comparatively clear.

At this juncture, through the kind interest of Mr. J. C. Astredo, of the Playground Commission, the ground was plowed, then through the additional assistance of several loads of street sweepings as a fertilizer, the former barren, unattractive sand lot was transformed into good material for a garden.

The ground was then staked off, each class was given a certain portion, with a superintendent. Seeds were distributed, viz.: lettuce, beets, peas, onions, etc. This was in the spring of 1910. Many boys became so interested that they would prefer to work at the noon hour instead of playing.

This first venture in gardening was an experiment, not only with the boys but also with the teachers and myself. None of us was over-burdened with exact knowledge about the cultivation and care of a vegetable garden. However, the results were of an encouraging nature, the boys' interest was awakened, good-natured rivalry existed among the young gardeners; then came the closer association between the teachers and pupils, especially valuable with this type of boy, and, lastly, the practical results, the use of the product at the noon-day meal.

As the result of this pioneering in gardening, we were encouraged by the kindly and timely advice of Professor T. Heaton.

In the fall the ground was cleared again, old stalks taken up, a more ambitious garden staked out. The school, numbering about fifty boys, worked daily through the fall and winter months, and in the spring of 1911 the ground was again ready. Carefully selected seeds were sent to us by the Board of Education, through Professor T. Heaton, and this time we went to work more intelligently, with the knowledge gained by former experience, backed up by the unremitting interest of Professor Heaton, who sent us two agricultural students from the University of California at Berkeley, who gave us valuable assistance.

We planted radishes, lettuce, potatoes, cabbages, Swiss chards, etc.

The first practical results have been as follows:

Enough radishes to supply fifty boys for several meals, Swiss chard, lettuce salad, new potatoes used daily. The strawberry plants have yielded only fairly. They are fine, healthy plants, and are of great interest. We think next year the yield will be greater.

With proper care through the summer months, there are enough vegetables to supply the table throughout the season.

The garden has been a great factor in helping to upbuild the character of the boys. It aids them to form habits of industry, developing thought and concentration, awakening a living interest in things about them, bringing them close to Nature, who restores and invigorates, displacing the bad habits engendered by years of living in the streets, at the best displacing the artificial with the real, teaching the boys to do things which will make them useful members of the community.

RAE ALEXANDER,
Principal Parental School.

REPORT OF MRS. AMY W. DEANE, DIRECTOR OF MUSIC IN HIGH SCHOOLS.

To Hon. Alfred Roncovieri,
Superintendent of Common Schools.

Music has long been embodied in the course of study of the grammar grades in our public schools, and also for some time in the curriculum of the University of California. During this time there has existed an illogical hiatus in the high schools. There were, of course, glee clubs and orchestras under the direction of music-loving teachers, but no regularly authorized course. This matter had for some time attracted the attention of the Board of Education, there being no more loyal supporter of the cause than the Superintendent, Mr. Alfred Roncovieri. After due consideration, at a meeting of the Board held October 26, 1910, the Chair of Music in the High Schools was established. To me fell the great honor of being the first incumbent.

As in the case with all new departures, more or less uncertainty attached to the undertaking. I visited the Oakland high schools, where music, under the most capable direction of Mrs. Wood, had for some two years formed part of the regular course. This visit was followed by a conference with Dr. Wolle, Professor of Music in the State University. I was further greatly aided by valuable suggestions from Mr. W. J. McCoy. Data were also obtained through correspondence with many schools in the United States where music had long been established. Thus equipped, I began instruction Tuesday, November 1, 1910, the experimental school, so to speak, being the Girls' High, presumably because girls are supposed to be more musically inclined than boys. By way of parenthesis, I will here say that I have since had reason to alter considerably this opinion, the boys of the Mission, Commercial and Polytechnic High Schools being quite as enthusiastic and studious as the girls.

Dr. Scott, principal of the Girls' High, being a most ardent advocate of music, rendered me all possible assistance in my new work. The class which was to graduate in December was the first body of pupils to receive instruction. The singing of this class at the graduating exercises reflected the utmost credit on the interest and intelligence of the pupils.

At the beginning of the new year in January, my work was greatly extended, covering the entire field of five high schools. Dr. Scott, Mr. Ferguson, Mr. O'Connor, and Colonel Murphy, principals, respectively, of Girls', Polytechnic, Mission and Commercial, entered with great interest and willingness upon the task of so arranging my classes that at some time during one of the study periods I might have all pupils desiring to take up the new study. Being purely elective and voluntary, it was most gratifying to see the very large classes that greeted me. I was particularly surprised at the Commercial, with which we usually associated a strictly business course. The enrollment of 231 pupils was highly encouraging. The classes manifesting great interest, and the equipment in the splendid new buildings affording splendid aid, it is not surprising that the chorals on Class Day made a remarkably fine showing.

The enrollment at Mission and Polytechnic taught me that the boys are not behind the girls in interest. In fact, at Polytechnic the boys were, if possible, more enthusiastic than the girls. At the closing exercises of this school, music was a prominent feature—proof that trades and art may go hand in hand and tend to mutual development.

At Mission High, the singing of the chorals on Class Day was one of the marked successes on a program of unusual interest. The Faculty, which had not before heard the united strength of the different chorals, expressed surprise and pleasure at the proficiency attained in so short a time. The total enrollment in

music in this school is very large, rendering the chorals of fine volume and excellent effect.

The musical program for the graduating exercises at Girls' High was quite ambitious, but excellently rendered, phrasing and shading being most intelligently observed. The school orchestra played the march. One of the red-letter days (or evenings, to be exact) of this school in the term just ended, was May 29, when the Glee Club gave its concert. It will long be remembered for its really artistic merit, the girls entering into the spirit of the numbers given, not only musically, but dramatically. A charming addition to the program was the rendering by the school orchestra, under the leadership of Dr. Scott, of several difficult and classical numbers.

Mr. Morton, of Lowell High, regretted that the work could not, for the time, be taken up in his school, there being not an unoccupied nook or corner in the building. I was, however, not deprived of the pleasure of having at least a foothold in the school, for, at the beginning of the term, the Girls' Glee Club requested me to assume the position of Director. The work was, of course, accomplished after school hours. The girls proved musical, intelligent, and apt. The result of the term's work was a concert, because of the excellence of which the Club was requested to repeat it at Yerba Buena Island for the benefit of officers and men stationed there. There are also in this school a Boys' Glee Club and an orchestra. Certainly, so musical an aggregation should be given the possibility of the more serious musical study afforded by a regular course. Space is the only requirement.

I have written this lengthy report and have gone into these minute details for a reason. The work was, in a measure, experimental. We believed that there must exist in the high schools good voices and musical ability. I, for one, now know it, and I trust this report may lead your Honorable Body to the same conviction. That there should be found good voices is not surprising. It is the musical intelligence and the keen appreciation of the dramatic side of music, possessed by the California boy and girl, that impresses the musician. With comparatively few explanations, some of my chorals have grasped the dramatic as well as the vocal values of an operatic selection, and, considering their inexperience, have given an astonishingly good interpretation.

I would not have you glean from all this that I desire your aid in making this a town of professional musicians. The study of literature is given a prominent place in the high school curriculum. This does not argue that every graduate is to become an author or a writer, and there is no more reason why the artisan, the merchant, or the professional, should not have an equally correct knowledge of music. Simply as a relaxation after a day of toil, the pleasure of listening to music is increased tenfold if the listener has an analytical understanding of the music he hears. It is a pleasure when it appeals to the senses alone; it is a delight when added to this is the intellectual enjoyment that only knowledge and understanding can bring. There seems, therefore, to exist no more logical reason that the study of music should be barred from the high school course than that literature should be discontinued on similar grounds.

Respectfully submitted,

AMY WATERS DEANE.

June, 1911.

REPORT OF PEDRO A. ESPINA, SUPERVISOR OF PENMANSHIP.

San Francisco, June 5, 1911.

Hon. Alfred Roncovieri,
Superintendent of Schools.

Dear Sir:

I most respectfully submit my report for the year's work in penmanship.

The progress made in the entire department is most satisfactory. The blackboard work is excellent.

In the primary grades, where the greatest progress has been made, I find that by beginning the forms of letters in the last ten weeks of the first term of the A Division of First Grade, much better results can be obtained.

I herewith submit the few changes that I desire in my department.

Thanking you for your generous support, and the teachers for their faithful work, I remain,

Yours very respectfully,

P. A. ESPINA,
Supervisor of Writing

NEW COURSE OF STUDY FOR PENMANSHIP.

A FIRST GRADE.—Blackboard work with movement exercise. Teachers may begin to teach letters the last ten weeks of the term.

B FIRST GRADE.—Movement on blackboard, teach form of letters. Teachers may begin to teach pupils how to write their names and may begin the use of pencil the last ten weeks of the term; pencil should be held the same as the pen.

A SECOND GRADE.—Continue to use pencil, and use much care in the position of the hand.

B SECOND GRADE.—Continue with pencils and with movement exercises, and promote pupils to a pen and ink division if the hand is held correctly.
Use No. 1 Copy Book.

A AND B THIRD GRADE.—Use No. 2 Copy Book, give movement exercises, and drill on position.

A AND B FOURTH AND A AND B FIFTH GRADES.—Use No. 3 Copy Book, follow movement exercises, and position of the pen.

A AND B SIXTH AND A AND B SEVENTH GRADES.—Use No. 4 Copy Book. Great care must be used in teaching position of hand and pen.

A AND B EIGHTH GRADES.—Use No. 5 Copy Book; take twenty minutes once a week for movement and forms of letters. Must insist on correct position of hand and pen.

P. A. ESPINA.

REPORT OF GEO. S. MIEHLING, SUPERVISOR OF PHYSICAL
CULTURE.

The results of the Physical Culture and Drills given in the public schools during the year ending June, 1911, were demonstrated to the public during the Native Sons' Celebration, September 10, 1910, at the Golden Gate Park Stadium, where one thousand school children under the direction of Professor Geo. S. Miehlung of P. S. of S. F., marched and engaged in their calisthenic exercises.

The scene was an inspiring one as they marched in review in military order and evolutions. The excellent drill shown was the result of the good behavior and attention insisted upon while learning in the past year. The class work of the graduating boys and girls of the Fremont School was given at the Girls' High School in the presence of the Superintendent of Schools, Alfred Roncovieri, and the Board of Education. Dumb-bell drill by the graduating boys and girls of the Monroe School was also shown.

Calisthenics, yard drill and saluting the flag were witnessed by the Chinese Educator, who had just finished his tour around the world, the Chinese Consul, and Superintendent Alfred Roncovieri, at the Madison School. All the school children of San Francisco are taught the same exercises.

SUMMARY OF WORK ACCOMPLISHED.

Schools visited	81
Classes	862
Children enrolled	37,047
Days at school	160 ½
Visits	218
Grand total of children taught	101,629
Cases of special duty and assistance (days)	27
Average daily (children taught)	633
Holidays	14
Absence	2

Yours respectfully,

GEO. S. MIEHLING,
Physical Culture Department.

PRINCIPALS' MONTHLY MEETINGS.

San Francisco, June 22, 1911.

Hon. Alfred Roncovieri,
Superintendent of Schools,
San Francisco, Cal.

Dear Sir:

As Secretary of the Monthly Meetings of Principals, and in compliance with the request from your office, I have the honor to submit the following report of those meetings, beginning with the one held October 20, 1910, at which I was appointed Secretary pro tem.

At a meeting of principals held at the Mission Grammar School in May, 1911, a motion prevailed that a monthly meeting of principals be held during the school year 1910-1911, to consider the problems that relate especially to the work of the principal, and it was in pursuance of this motion that the various meetings of the year were held. Other matters, however, of broader import than the problems of the principal were discussed. It is not proposed to embody in this report anything like a detailed report of the topics discussed, the reports submitted, and the papers read, but only a mere outline of these things from which may be derived something approaching an adequate conception of their scope and interest. It may be remarked here that the meetings were held at 2 p. m. on school days, the principals being allowed and expected to leave their schools at that time in order to attend the meetings. Hence they were well attended, and deep interest was evinced in all the discussions and proceedings. The discussions sometimes waxed warm and demonstrated the fact that school principals may differ as widely in their opinions and maintain their views as stubbornly and eloquently as other folks. The early part of each meeting was usually occupied by the chairman, Deputy Superintendent T. L. Heaton, in short talks on various topics of interest, which always elicited the closest attention of the principals, as they were terse, pointed, and derived from a close observation and wide experience.

Among the topics discussed by him may be mentioned the following:

"How to make the visiting days of teachers and principals more profitable," "Outside Geography," "Art of Questioning," "Teachers' Libraries," "Medical Inspection," "Changes in the Course of Study," "Cumulative Reviews," "Honorary Promotion," "School Gardens," "Composition," etc.

Among the topics discussed by the principals were such as "Outside Interruptions," "Health and Sanitation," "Course of Study," "Retardation," "Dropping out of Pupils from Grammar and High Schools," "Compulsory Education," "Graduation Exercises," "Manual Training," "Conservation of the Principal's Time," etc.

A part of the time of each of several meetings was also devoted to five-minute talks by principals previously appointed by Deputy Heaton, on McMurry's book, "How to Study."

Under "Good of the Order," which was a feature of the meetings, many of the principals made very suggestive and helpful talks varying in length from three to five minutes.

Committees were appointed to consider the subjects of "Retardation," "Graduation Exercises," "Medals," "Professional Library," and "Admission to the High Schools." These committees submitted carefully prepared reports, some of which evoked considerable discussion, but were generally adopted, either with or without modification. The recommendations embodied in these recommendations have in some instances received favorable consideration by the Board of Education, but not always.

BOARD OF EDUCATION

Among the excellent prepared papers read at these meetings should be mentioned those on (1) "The Public School Athletic League," by Principal Frank Morton of the Lowell High School; (2) "Retardation," by Principal A. E. Kellogg, of the Hamilton Grammar School; (3) "Arithmetic," by Deputy Superintendent R. H. Webster; and (4) "Courtesy to One Another and Respect for Older Persons," by Principal Miss M. A. Deane, of the Redding School.

Finally it would be discourteous to omit to mention the fact that many of these meetings were attended by our Superintendent, who greatly encouraged us by his kindly sympathy and readiness to approve of any good action that was taken. He also assisted by participating in discussions, and, at the last meeting gave a talk on some of the more important educational enactments of the late Legislature.

Respectfully submitted,

S. STURGES,
Secretary

READ AT PRINCIPALS' MEETING.
FOR THE GOOD OF THE DEPARTMENT.

By Miss M. A. Deane, Principal Redding Grammar School.

When I was asked to say something, or suggest some idea for the good of the Department, I at once thought of a talk on Word Analysis—its value in helping our young people to grasp the meaning of ordinary words, and thereby gain facility of expression. Then suddenly I changed my mind, for I realized that I was not consigned to McMurry or any other Mc., but that I was asked simply for a thought on "The Good of the Department,"—my own thought, to be expounded in three minutes. So I concluded to drop for a time my offshoot of "The Three R's," and take up a subject that to me is of equal importance to the Department, since it is equally helpful to our pupils, i. e.: Courtesy to Each Other and Respect for the Elderly.

Is not the lack of courtesy at present truly deplorable? How many of the young give up their place in cars to old people, stand when spoken to, assist with a bundle, enter or leave a room properly, remember the prefatory "Please," acknowledge a favor with "I thank you"? Is it a wonder that some are tempted to speak of courtesy as a lost art? But being optimistic, I believe it is not dead but sleepeth, and that we of the Department might do much to wake it up.

Courtesy could be considered under different heads, as, Home, Street, School (and Professional etiquette too, which is very important though sometimes forgotten)—and could be part of our day's work. Ten minutes spent on rules of politeness is time well invested, the income of which our young people can enjoy all their lives.

Many of you will say, that belongs to the Home Training. But do we not have these little ones half of their waking time, and are not many of the thoughts that help and guide them given by us? And can we exclude the little conventionalities that make life so much sweeter, and sacrifice for home so much easier? Our training should not be apart from home training, but correlated with it.

You may not agree with me as to the vital importance of my subject; each may think his hobby a better mount: as our worthy Superintendent might favor music; one of his deputies, arithmetic; another, farming; another, reading; and still another, language and composition—all good and very good indeed in their proper places. But let us not fill our Course of Study so full that there is not a little space left for the small amenities of life. No matter what path our pupils take, let them find time to stop by the roadside and extend a common courtesy. How much better all feel when politely treated, and how aggressive when rudely treated?

I plead, then, for a few rules each month that would help ennoble the young of our Department.

CHRONOLOGY OF SUPERINTENDENTS OF SCHOOLS OF THE
CITY AND COUNTY OF SAN FRANCISCO

APPOINTED BY BOARD OF EDUCATION.

Thomas J. Nevins.....	Nov. 17, 1851, to Dec., 1853
William H. O'Grady.....	1854 and 1855
E. A. Theller.....	1856

COUNTY SUPERINTENDENT (ELECTED BY THE PEOPLE).

John C. Pelton.....	1856

Alfred Roncovieri.....	Jan. 8, 1906, to date

THE SAN FRANCISCO TEACHERS' INSTITUTE OF 1910

The annual institute of the teachers of the San Francisco Department was called at the Alcazar Theatre for the mornings of Tuesday, Wednesday and Thursday, December 27, 28 and 29, 1910, with an evening concert in Dreamland Pavilion Wednesday, December 28. Superintendent Alfred Roncovieri presided.

The meetings of the Institute were so arranged that teachers could also attend the sessions of the California Teachers' Association at Berkeley.

Superintendent Roncovieri, in opening the Institute on Tuesday morning, declared himself strongly in favor of a readjustment of the school system in such wise that it should meet the needs of industrial advancement. "In a city like San Francisco," he said, "where the industrial development during the next generation will, I believe, astonish the world, technical education must lead the way. Our Course of Study must be adjusted to meet the situation."

Dean George F. James, of the University of Minnesota, in his address entitled "A Pedagogical Relic," maintained that our traditional grouping of school classes into four primary, four grammar, four high school, four college, and four professional years, should be replaced by groups of three. He advocated a combination six-year course, of which three should be chiefly liberal and the other three distinctly technical, or professional. The speaker suggested separate instruction for the two sexes in many subjects, but not in all.

Professor Lee Emerson Bassett, of Stanford University, developed his conception of the true teaching of poetry. He opposed that method of studying poetry by which the appeal was made to the intellectual faculties rather than to the imaginative and emotional. He advised frequent reading of poetry aloud and repetition of memorized poems. Enjoyment, or aesthetic pleasure, should be the chief gain from the reading of poetry, he declared.

On the first morning the Institute adjourned out of respect to the memory of Mrs. Margaret Deane, who had been a pioneer teacher in the department. Resolutions presented by Mrs. Mary Prag, of the Girls' High School, in recognition of the distinguished services of Mrs. Deane, and as a tribute to her memory, were unanimously adopted by the Institute.

On Wednesday, the first lecture was delivered by Dr. M. L. Gardner, of the Los Angeles Polytechnic High School, on the subject "Agriculture in Our Schools." He advocated the establishment of agricultural courses in the public school and, wherever possible, the founding of school farms near the cities as practical adjuncts to the work.

In her address on "The Ideals of Amateur Singing," Mrs. Mary Roberts Coolidge favored the confining of class teaching of music to such simple melodies as would fall within the range of the voices of all. She sang a number of lullabies and old-time songs to exemplify her ideas.

Superintendent James M. Greenwood, of Kansas City, spoke on "The Automatic Element in Education." He divided children into four classes—the idea-nervous, the muscular-motor, the idea-motor, and the muscular-corpulent. He divided teachers into three classes—those of genuine skill who can develop all children, even the stupid; of little proficiency, who can scarcely educate the average pupil; and of no qualification, whose effect is to discourage the brightest pupil. The great teacher, he said, is the one who in each subject picks out universal truths and teaches them.

The musical features of the program of each day's session were very popular and enjoyable. On Wednesday evening over three thousand people attended the grand concert which marked the initial appearance in San Francisco of Madame Gerville-Reache, the great contralto singer from New York. The welcome given her was remarkable for the sincerity of its warmth. A leading musical critic said of the concert: "Mr. Roncovieri will do well for the future of the town's culture if he is able to repeat the program which was given last night at Dreamland Rink when Madame Gerville-Reache sang for the pedagogues."

On Thursday morning the session was opened by a lecture by Dr. James A. Blaisdell, President of Pomona College, whose subject was "The Vocational Problem in Education." He advised the study of the fit vocation for each child from the time that it is ten years of age. "It is by the training of every man for his proper sphere of work," said the lecturer, "that the peril of the land in the problem of the unemployed is to be solved."

An illustrated discourse by Dr. Charles U. Clark, of Yale University, on "The Romance and Grandeur of Spain," was then delivered. In his introduction to his lecture, Professor Clarke dwelt on the value of cultural studies before the life vocation is taken up. He declared that in America we lack the culture influence in the home, and that this must be supplied in the school.

At the end of the Thursday's session, Mr. Selden Sturges, Principal of the Everett Grammar School, paid a tribute to the work of Superintendent Roncovieri in conducting the Institute, and a set of resolutions, as follows, introduced by him, was unanimously adopted:

"Resolved, That we tender to Superintendent Roncovieri our very high appreciation of the thoughtful care evidenced in the preparation of the program of this most delightful session of our teachers' institute, and our hearty thanks for the great pleasure we have experienced in attendance upon its various exercises."

The program is herewith reproduced in full:

TUESDAY MORNING, DECEMBER 27th—

- 9:15 Opening Address
 ALFRED RONCOVIERI
 Superintendent of Schools
- 9:30 Lecture.....“The Teaching of Poetry”
 PROFESSOR LEE EMERSON BASSETT
 Professor of English, Stanford University
- 10:30 Intermission
- 10:40 Address
 HON. P. H. MCCARTHY
 Mayor of the City and County of San Francisco
- 10:55 Songs (a) Mignon's Lied—Liszt.
 (b) Der Nussbaum—Schumann
 (c) Sous les Branches—Massenet
 (d) Le Chevalier Belle—Etoile, Augusta Holmes
 MRS. LILLIAN BIRMINGHAM
 (Miss Alma Birmingham, Accompanist)
- 11:15 Lecture.....“A Pedagogical Relic”
 Dr. GEORGE F. JAMES
 Dean of the College of Education, University of Minnesota
- 12:15 Adjournment

WEDNESDAY MORNING, DECEMBER 28th—

- 9:15 Lecture.....“Agriculture in Our City Schools”
 DR. N. L. GARDNER
 Head of the Department of Biology, Los Angeles Polytechnic High School
- 10:00 Lecture on the Ideals of Amateur Singing, “Classic Lullabies and
 Old-Time Songs,” with illustrations in several languages.
 MARY ROBERTS COOLIDGE, Ph. D.
 Author, Lecturer and Ballad-Singer
 Formerly Associate Professor of Sociology, Stanford University
- 11:00 Intermission
- 11:15 Lecture.....“The Automatic Element in Education”
 SUPERINTENDENT JAMES M. GREENWOOD
 Of Kansas City, Mo.
- 12:15 Adjournment

WEDNESDAY EVENING, DECEMBER 28th—

Grand Concert at Dreamland Pavilion, Steiner Street, near Sutter Street. The following special musical program of unusual educational value and entertainment was rendered by Mme. Gerville-Reache, one of the world's greatest contraltos. Mme. Gerville-Reache was accompanied by Miss Ina Grange, pianist, and by a full symphony orchestra under the direction of Mr. Paul Steindorff.

1. Overture, "William Tell"Rossini

ORCHESTRA

Alfred Roncovieri, Director

2. Arioso, "Ah Mon Fils" (Le Prophete).....Meyerbeer

MME. GERVILLE-REACHE AND ORCHESTRA

3. Songs in English—

(a) Hindu Slumber Song.....Harriet Ware

(b) Kathleen MavourneenCrouch

MME. GERVILLE-REACHE

4. Grand Fantasia from "La Boheme".....Puccini

ORCHESTRA

5. Songs in German—

(a) Ich grolle nicht.....Schumann

(b) Der ErlkonigSchubert

MME. GERVILLE-REACHE

6. Songs in French—

(a) "Plaisir d'Amour"Martini

(b) "L'Air du Tigre," from Paul et Virginie.....Victor Masse

MME. GERVILLE-REACHE

7. Ballet Music from "Coppelia".....Delibes

(a) Mazourka

(b) Czardas

ORCHESTRA

8. Aria, "Mon coeur s'ouvre a ta voix" (Samson et Dalila).....Saint-Saens

MME. GERVILLE-REACHE AND ORCHESTRA

9. Marche Triumphale "Coronation" (Le Prophete).....Meyerbeer

ORCHESTRA

MISS INA GRANGE, Accompanist

MR. PAUL STEINDORFF, Director of Orchestra

THURSDAY MORNING, DECEMBER 29th—

- 9:30 Lecture.....“The Vocational Problem in Education”
 DR. JAMES A. BLAISDELL
 President Ponom College
- 10:15 Violin Solos—
 (a) Nocturne Chopin-Wilhelmj
 (b) Spanish Dance Rehfeld
 MR. NATHAN LANDSBERGER
 Mrs. Nathan Landsberger, Accompanist
- 10:40 Intermission
- 11:00 Illustrated Lecture.....“Romance and Grandeur of Spain”
 DR. CHARLES UPSON CLARK
 Assistant Professor of Latin in Yale University
- 12:00 Adjournment

Department of Elections Report

San Francisco, July 8, 1911.

Hon. P. H. McCarthy, Mayor.

Sir:—In accordance with Article XVI, Section 9, of the Charter of the City and County of San Francisco, The Board of Election Commissioners herewith present their annual report for the fiscal year ending June 30, 1911.

Three elections were held during the past fiscal year; Primary Election, August 16, 1910, Gubernatorial Election, November 8, 1910, and Special (Charter Amendment) Election, November 15, 1910.

The report includes the financial statement of this Department, together with a table showing date of Elections, number of precincts, registration, and the number of votes polled since the adoption of the "Act to Regulate the Registration of Voters and Secure the Purity of Elections," Approved March 18, 1878; also a summary of the votes cast at the Primary Election held August 16, 1910, at the General Election held November 8, 1910, and the Special Election held November 15, 1910.

Respectfully,

THOMAS V. CATOR, President.

GEORGE UHL,

NICHOLAS C. WEINHOLZ,

HERBERT H. ORDWAY,

JOHN P. HARE,

Board of Election Commissioners.

EDW. C. HARRINGTON,

Registrar of Voters and Secretary of the
Board of Election Commissioners.

Report of Chief of Police

REPORT OF D. A. WHITE, CHIEF OF POLICE OF THE CITY AND COUNTY
OF SAN FRANCISCO, FOR THE FISCAL YEAR ENDING JUNE
30TH, 1911.

To the Honorable P. H. McCarthy, Mayor of the City
and County of San Francisco, State of California.

Sir:—In compliance with Section 9, Article XVI of the Charter, I submit
herewith the Annual Report of the Police Department for the fiscal year ending
June 30th, 1911.

Very respectfully,

D. A. WHITE, Chief of Police.

Fire Commissioners' Report

San Francisco, Cal., July 31, 1911.

Hon. P. H. McCarthy,
Mayor of the City and County of San Francisco.

Dear Sir:—In accordance with the provisions of Section 9, Article XVI of the Charter of the City and County of San Francisco, this Board herewith respectfully submits its annual report for the fiscal year ending June 30, 1911.

Very truly yours,

BOARD OF FIRE COMMISSIONERS.
By Wm. H. McConnell, Sec'y.

Headquarters Fire Department.
Office Board of Fire Commissioners, 64 Eddy Street.

San Francisco, Cal., July 1, 1911.

To the Hon. P. H. McCarthy,
Mayor of the City and County of San Francisco.

Dear Sir:—In compliance with the provisions of Section 9, Article XVI of the Charter of the City and County of San Francisco, the Board of Fire Commissioners of the said City and County do hereby submit and present its annual report for the fiscal year ending June 30, 1911, containing a statement of the expenditures of the Fire Department and a report of the Chief Engineer showing the condition of the department.

ORGANIZATION.

The department as is now constituted consists of a Board of Fire Commissioners of four members, a secretary, a chief engineer, one first assistant chief engineer, one second assistant chief engineer, fifteen battalion chiefs, forty-one engine companies, eleven hook-and-ladder companies, twelve chemical companies, one water tower company, three monitor batteries, two fire boat companies, and three relief engine companies, and employees of the corporation yard repair shops and department stables, numbering in all 826 men, of which number 739 constitute the present uniform force of the department.

BOARD OF FIRE COMMISSIONERS.

JAMES E. DILLON, President	Term Expires January 8, 1915
EUGENE E. PFAEFFLE	Term Expires January 8, 1914
JOHN DONOHOE	Term Expires January 8, 1913
L. D. BATCHELOR	Term Expires January 8, 1912
WILLIAM H. McDONNELL	Secretary.

FIRE COMMISSIONERS

DETAILS OF ORGANIZATION.

No.		Salary Per Annum.
4	Commissioners, each	\$1,200
1	Secretary	2,400
1	Chief Engineer	5,000
1	First Assistant Chief Engineer	3,600
1	Second Assistant Chief Engineer	3,000
15	Battalion Chiefs, each	2,700

Chief Engineers' Report

Headquarters Fire Department,
San Francisco, July 1, 1911.

To the Honorable, the Board of Fire Commissioners.

Gentlemen:—I respectfully beg leave to submit my annual report for the fiscal year ending June 30, 1911, together with such recommendations, etc., as in my judgment I deem necessary and proper to promote the efficiency of the Department.

FIRES.

During the year the department responded to 911 alarms of fire received from street and automatic fire alarm boxes, of which number 844 were single alarms, 49 second alarms, 19 third alarms and one fourth alarm. The department also responded to 790 still alarms during the year, received verbally and by telephone, making in all a total of 1,701 alarms of fire responded to.

LOSSES BY FIRE, INSURANCE AND AMOUNT PAID

June	24,475.90	582,562.50	20,724.61
Totals	\$1,077,682.41	\$6,100,157.04	\$781,444.82

APPARATUS

The following apparatus is in good condition and in regular service in the department: Forty-two steam fire engines (one in service with Chemical Co. 12), forty-four hose wagons, eleven hook-and-ladder trucks, nine straight chemical engines, four combination hose and chemical wagons, one water tower, three monitor batteries, two fire boats, sixteen officers' buggies, two automobiles and one portable fire extinguisher; also 108,600 feet of fire hose.

In addition to the above there is also the following apparatus and vehicles for relief and other purposes: twelve steam fire engines, eleven hose wagons, four hook-and-ladder trucks, one straight chemical engine, two combination hose and chemical wagons, one water tower, sixteen buggies, five supply wagons,

ten delivery wagons, one delivery truck, one hay wagon, one oil wagon, seven hydrant carts, six breaking carts, one hose carriage, two hose reels, one wrecking wagon, 18,825 feet of new cotton hose of different sizes, 17,100 feet of cotton watchline hose of different sizes and 4,100 feet of new rubber chemical hose.

HOSE PURCHASED

The following amount of new fire hose was purchased during the past year:

10,000 feet of 2 $\frac{3}{4}$ -inch cotton hose.
 5,000 feet of 1 $\frac{1}{2}$ -inch cotton hose.
 4,000 feet of 1 -inch rubber chemical hose.

NEW HOUSES

During the year a new house was constructed for Chemical Co. 12 on Forty-fifth avenue, between Irving and Judah streets. This structure is a two-story brick building of a special Class "C" construction and cost approximately \$28,500.

The following new houses are also in course of construction, but not yet completed:

Two-story Class "A" building on Seventh street, between Folsom and Harrison streets, for Engine Co. 6 and a new Hook and Ladder company..

Two-story frame building on San Bruno Avenue near Silliman street, for Engine Co. 42.

Two-story frame buildings on Brazil Avenue near Athens street for Engine Co. 43.

HYDRANTS

During the year twenty new hydrants were set and nineteen reset, making a total of 4,363 fresh water and twenty-eight salt water hydrants that are in service at the present time.

DEPARTMENT STABLES

There are at present 379 horses in the department, including those that are kept for relief and emergency purposes, and with the exception of fourteen that are at present under treatment at the department stables, they are all in fairly good condition.

During the year fifty-one horses were purchased, twenty were condemned as being unfit for active service, seven of which were transferred to the Sheriff's office, nine to the Park Commission, and four were sold at public auction. Five horses were lost by death during the year, one of which was killed by a car of the United Railroads and was replaced by another horse by the company, thus making an actual loss of but four horses to the department, of which one was shot on account of fractured leg, one dropped dead while responding to an alarm of fire, one was shot on account of weakness to back occasioned by an old injury, and one died from a ruptured stomach at the department stables. Seven hundred and forty-two cases of sickness and injury were treated during the year by the veterinary surgeon, and with the exception of the one horse above mentioned as having a ruptured stomach, none of these that were treated for sickness or injury died while under treatment.

FIRE BOATS

During the year a new station was built for Fire Boat Co. 2 at Pier No. 27 of the seawall, and that company has been moved to this new station. By this

action better protection is afforded the water front, as we have now one boat at the northern and the other at the southern part of the water front instead of having both boats located at the same station, as heretofore.

RETIRED ON PENSION

The following members of the department have been retired from active service on pension during the past year:

John Mitchell, Hoseman Engine Co. 39, retired on account of physical disability.

Alfred Florence, Hoseman Engine Co. 24, retired on account of full time of service.

August Banker, Hoseman Engine Co. 28, retired on account of physical disability.

Henry F. Horn, Battalion Chief, retired on account of full time of service.

John Reimers, Hoseman Engine Co. 18, retired on account of full time of service.

Edward McConigle, Hoseman Engine Co. 32, retired on account of physical disability.

Charles F. Smith, Hoseman Engine Co. 30, retired on account of full time of service.

John J. Quinn, Hoseman Engine Co. 9, retired on account of physical disability.

Lemuel Rudolph, Hoseman Engine Co. 22, retired on account of physical disability.

Louis Keihl, Engineer Engine Co. 34, retired on account of full time of service.

Henry H. Gorter, Battalion Chief, retired on account of full time of service.

James Cavanaugh, Hoseman Fire Boat Co. 1, retired on account of physical disability.

James J. O'Connor, who has been retired on pension on account of physical disability, was restored to active service on April 27, 1911.

DEATHS

The following named members of the department died during the year:

F. S. Hall, Engineer Engine Co. 22, August 27, 1910, of heart disease.

F. J. Baker, Hoseman Engine Co. 41, September 3, 1910, of suicide.

Michael Wright, Truckman Truck Co. 9, November 30, 1910, of intestinal trouble.

Peter Burke, Hoseman Engine Co. 33, December 6, 1910, of Bright's disease.

Jeremiah Sullivan, Captain Engine Co. 27, January 9, 1911, of Bright's disease.

James C. Crowley, Hoseman Engine Co. 38, January 26, 1911, of injuries received in street-car accident.

Leslie Windrown, Hoseman Engine Co. 15, February 19, 1911, of tuberculosis.

Timothy J. Collins, Hoseman Engine Co. 4, June 10, 1911, of endocarditis.

Walter Creber, Lieutenant Truck Co. 10, June 18, 1911, accidental drowning.

James B. Tyson, Hoseman Engine Co. 35, June 29, 1911, of tuberculosis.

William J. O'Connor, Truckman Truck Co. 7, June 29, 1911, of endocarditis.

APPOINTMENTS, RESIGNATIONS AND DISMISSALS

During the year forty-two appointments of hosemen and truckmen were made in the department from the civil service eligible lists, eleven members resigned and two regular members of the department were dismissed from the service for violations of the rules and regulations.

RECOMMENDATIONS

I would respectfully recommend that new building sites be procured for the department at the following locations:

Three lots on the south line of Commercial street, commencing at the west line of Drumm street, each 25x59.9 feet. These lots to be used as a site for a high pressure water system hose wagon and engine company and hook-and-ladder company.

Lot in the immediate vicinity of Twenty-second and Wisconsin streets 50x100 feet, as a site for an engine company to take the place of Chemical Co. 7, now located on Twentieth street, near Connecticut.

Lot in the vicinity of Plymouth avenue and Lake View avenue, 50x100 feet, for an engine company.

Lot in the vicinity of Jones and Clay streets, 30x100 feet, for a new hook-and-ladder company and automobile apparatus.

Lot on the south line of Silver street, in the rear of old site of Engine Co. 10 on Bryant street.

Lot in the vicinity of Eighteenth and Eureka streets, 50x100 feet, for a hook-and-ladder company and a high pressure water system hose wagon.

Lot in the immediate vicinity of Engine Co. 30, on Waller street, near Stanyan, for a new hook-and-ladder company.

I would also recommend the erection of buildings on sites already in the possession of the department and on sites recommended to be purchased, as follows:

Two-story frame building for an engine company on a site to be secured in the Visitation Valley District.

Two-story reinforced concrete building at Drumm and Commercial streets for an engine company, a hook-and-ladder company and a high pressure water system hose wagon.

Two-story class "C" building on San Bruno avenue, near Twenty-fifth street, for Engine Co. 37 and Truck Co. 9.

Two-story class "C" building on the north line of Bryant street, west of Third, as a headquarters for a Battalion Chief and quarters for Engine Co. 35, Truck Co. 8 and Monitor Battery 2. These companies to be moved from their present quarters on Bluxome street, which are very unsuitable.

Two-story class "C" building in the vicinity of Eighteenth and Eureka streets for a new truck company and a high pressure water system hose wagon.

Two-story class "C" building on the east line of Stockton street as quarters for a Battalion Chief and Engine Co. 28 and a fuel wagon.

Two-story frame building to be erected in rear of Truck House No. 7 for use as a carpenter shop and plumbing shop for the department.

I would also recommend the erection of new buildings for existing companies of the department as follows:

Engine Co. 3 and Chemical Co. 6 and Monitor Battery 3, Post street, near Polk, two-story class "C" building.

Engine Co. 4, Water Tower Co. 1 and Chemical Co. 1, 676 Howard street, two-story class "C" building.

Engine Co. 5, 1219 Stockton street, two-story class "C" building.

Engine Co. 8 and Hook-and-Ladder Co. 4, 1648 Pacific avenue, two-story class "C" building. This house to be also used as a fuel wagon station.

Engine Co. 9, and high pressure water system hose wagon, 320 Main street, two-story class "C" building.

Engine Co. 19 and Water Tower Co. 2, Market street, between Tenth and Eleventh, two-story class "C" building.

Hook-and-Ladder Co. 2 and Chemical Co. 5, 643 Broadway, two-story class "C" building.

Truck Co. 5 and Chemical Co. 2 and fuel wagon station, 1819 Post street, two-story class "C" building.

Battalion Chief headquarters and Monitor Battery No. 3, two-story reinforced concrete building, 128 Jackson street.

Truck Co. 3 and Chemical Co. 4, with Battalion Chief's headquarters, 451 McAllister street, two-story class "C" building.

I would further recommend the erection of buildings for new companies on the following fire department sites:

Two-story class "C" building for a new engine and hook-and-ladder company on the lot on the north side of Bush street, east of Taylor, formerly occupied by Engine Co. 38.

Two-story frame building for a hook-and-ladder company and an automobile hose tender for fire boats on the site at Kentucky and Twentieth streets.

I would also recommend that the quarters of Engine Co. 14, on McAllister street, be overhauled and repaired. That a concrete wall be erected in the rear of Engine Co. 26 and a shed be built for a fuel wagon and the storage of relief apparatus there. Also that the following alteration be made to the department stables. That the building be painted and whitewashed, a hospital be built in the rear of stables for sick horses, a cement watering trough be built there, and that a shed be built on the lot adjoining the quarters of Engine Co. 29 for the storage of wagons and hydrant carts which are now kept in the open space in front of the department stables. Also that a concrete wall be built around the yard of quarters of Engine Co. 38, with a six-foot fence and a new sidewalk around quarters.

I would also recommend the installation of at least fifty additional street water cisterns for fire protection purposes, to be located in sections of the city that are not covered by the mains of the Spring Valley Water Company or provided for by the high pressure water system.

In this connection I would further recommend that the excavation in Howard street at its intersection with Tenth street, which was formerly used by the United Railroads and which could readily be converted into a water cistern of from 800,000 to 900,000 gallons capacity, at a comparatively small expense, be utilized for that purpose.

In order to afford sufficient water facilities for fire protection purposes for that rapidly growing section in the vicinity of the Oceanside District south of the Golden Gate Park, which at the present time is without any protection in this respect whatsoever, I would recommend that connection be made with the pipe system from the pumps supplying Metson Lake in the Golden Gate Park, by running a 12-inch pipe from the same through the Park to connect to the new cistern installed at Forty-seventh avenue and Judah street and thence running through intersection streets to Forty-ninth avenue and Pecheco street. By this means the said cistern could be readily filled whenever required, which at the present time involves considerable time and labor, owing to the remoteness of hydrants. Hydrants could also be connected to this main at suitable points, which after their installation could be maintained without any additional cost to the municipality. To complete this work would require the laying of about 6,500 feet of pipe and would afford that district an ample supply of water for fire protection purposes.

I would also recommend that a 12-inch pipe connection be made with the reservoir in Golden Gate Park at Grove and Stanyan streets and that hydrants be connected thereto on Stanyan and Fulton streets, as the Spring Valley water pressure is very low in this district.

I would recommend that Chemical Co. 8 be changed from its present location on Cliff avenue to some desirable point in the Sunset District.

I desire to again call attention to the great progress that has been made during the past few years in the development of motor propelling fire apparatus

of various kinds in this country. This class of apparatus has now passed the experimental stage and is being acquired by most of the cities of the Pacific slope. The prime factor in this apparatus is the economy in operation and maintenance, and I deem it a wise measure that this department acquire as much of this class of fire apparatus as possible, and in this connection I would recommend the immediate purchase of at least three motor driven chemical engines and a motor driven and operated pumping engine of not less than 700 gallons per minute, this being the standard capacity of a second size steam fire engine of the present day, and three motor driven hose wagons or tenders.

I would also recommend the purchase of the following additional fire apparatus: Four third size steam fire engines, three city service hook-and-ladder trucks, one straight chemical engine double 60-gallon, six regulation hose wagons, six automobiles for Battalion Chiefs, three automobile trucks for delivery purposes, 20,000 feet of 2¾-inch cotton rubber lined hose, 10,000 feet of 3½-inch hose, 10,000 feet 1½-inch hose, 5,000 feet of 2½-inch hose, 5,000 feet of 3-inch hose, 1,000 feet of 1-inch and 2,500 feet of 1-inch chemical rubber hose.

Work on the auxiliary high pressure water system is progressing under the direction of the Board of Public Works and the plans for the district north of Market and east of Powell streets have been completed. In this connection I would recommend that the system in this district be extended along Green street in an easterly direction from Stockton to Kearny street, thence along Kearny street northerly to Union street, and also along Kearny street southerly to Vallejo street. This would cover the western slope of Telegraph Hill section, which is built up of frame buildings and large tenement houses and which the present plans do not embrace, but which should be covered by this system.

The event of the opening of the Panama canal in a few years will result in an enormous increase in the shipping interests of this city, and will bring to this port many vessels of a greater carrying capacity than those now operating here. I would therefore renew my recommendation that the two fire boats be equipped with machines for generating gas for the purpose of combatting fires occurring in the cargo in the holds of vessels, as this is the only effective manner in which such fires can be successfully handled without almost totally destroying or damaging the cargoes.

In conclusion I desire to extend my sincere thanks to your Honorable Board for the active and untiring interest manifested by you in all matters pertaining to the efficiency and advancement of the department. I also desire to express my thanks to the officers and members of the department for the commendable manner in which they have performed their required duties during the fiscal year just ended.

To the Chief of Police and the members of his force, to Fire Marshal Towe and Superintendent Comstock of the Underwriters' Fire Patrol, to Chief Army of the Department of Electricity, to City Engineer Manson and his assistants and to City Architect Coffey, I also desire to extend my thanks in appreciation of the valuable assistance they have given the department whenever required.

Respectfully submitted,

THOS. R. MURPHY,
Chief Engineer, S. F. F. D.

RULES AND REGULATIONS GOVERNING THE SAN FRANCISCO FIRE DEPARTMENT.

RULE 1.

Section 1. The office of the Board of Fire Commissioners shall be the headquarters of the San Francisco Fire Department. Office hours for the transaction of business shall be from 8:30 o'clock a. m. to 5 o'clock p. m. (Sundays and legal holidays excepted.)

Sec. 2. The Secretary of the Board of Fire Commissioners shall be in attendance at said office of the Board during office hours when not elsewhere engaged in the business of the department. He shall keep a true record of all official actions of the Board, and shall also keep and be held responsible for the accuracy of the book accounts of the department. He shall devise, with the approval of the Board, such methods for checking the receipts of material, supplies, etc., as will insure absolute accuracy in the compliance with contracts or agreements of purchase. He shall have the custody of and preserve all records, books, documents and papers belonging to the department, and shall do and perform such other duties as may be required of him by the Board of Fire Commissioners.

Sec. 3. The office of the Chief Engineer shall be at the headquarters of the department, where he shall be in attendance during office hours when not otherwise engaged in the business of the department.

RULE 2.

Section 1. The department shall be divided into Battalions, each of which shall be under the immediate supervision of an Assistant or a Battalion Chief, with headquarters in their respective districts.

Sec. 2. There shall be two general divisions of the department, comprising the Battalions. One of which said divisions shall be under the immediate supervision of the First Assistant Chief Engineer, and the other under the Second Assistant Chief Engineer, and shall be designated as General Division Nos. 1 and 2, respectively.

Sec. 3. The assignment of the First and Second Assistant Chief Engineers to Divisions, and of Battalion Chiefs to Battalions shall be made by the Board of Fire Commissioners upon the recommendation of the Chief Engineer, and such assignments may be changed from time to time.

RULE 3—THE CHIEF ENGINEER.

Section 1. The Chief Engineer shall be the Chief Executive Officer of the Fire Department, and shall have general supervision over all officers, members and employees thereof. He shall also have and exercise supreme command at all fires over the officers, members and employees, and over all the apparatus and appurtenances belonging to the Department.

Sec. 2. He shall take all measures which he may deem expedient for the extinguishment of fires and the protection of property and saving of life, and shall see that all laws and ordinances of the City and County and all orders and rules and regulations concerning the Fire Department are enforced.

Sec. 3. He shall cause to be kept in the office of Board of Fire Commissioners a complete record or file of all complaints against members, employees,

etc., and may suspend any subordinate officer, member or employee of the department for incompetency or for any violation of the rules and regulations of the department, and shall report in writing to the Board, at its next regular meeting, such suspension and the reason therefor.

Sec. 4. He shall diligently observe the condition of the men and apparatus and general condition of the department, and report in writing thereon at least once a month, or whenever required to do so, to the Board, and make such recommendations and suggestions respecting the same as he may deem proper.

Sec. 5. He shall see that proper discipline is maintained by the officers and men, and shall report to the Commissioners, any officer, member or employee of the Department who, by reason of age, disease, accident, incompetency, insubordination or other cause, cannot or does not fully, energetically, promptly and properly perform his duties in the Department.

Sec. 6. He shall make, subject to approval of the Board of Fire Commissioners, such assignments or details of the officers, members and employees of the department as he may deem necessary and proper.

Sec. 7. He shall also perform such other duties as the Commissioners may direct.

RULE 4—FIRST ASSISTANT CHIEF ENGINEER.

Section 1. The First Assistant Chief Engineer shall rank next to the Chief Engineer, and shall attend all fires to which he is assigned, and such other fires as he may be assigned or summoned to by the Chief, and, in the absence or inability to act of the Chief Engineer, shall have and exercise the duties and powers of that officer.

Sec. 2. He shall see that good order and proper discipline is maintained among the members of the Department, and that all laws and ordinances of the City and County, pertaining to and all orders, rules and regulations of the Department, are enforced.

Sec. 3. He shall inspect the uniforms of all officers, and require strict compliance with the specifications therefor hereinafter given.

Sec. 4. He shall also perform such other duties as the Commissioners or Chief Engineer may direct.

RULE 5—SECOND ASSISTANT CHIEF ENGINEER.

Section 1. The Second Assistant Chief Engineer shall rank next to the First Assistant Chief Engineer, and shall attend all fires to which he is assigned, and such other fires as he may be assigned or summoned to by the Chief or First Assistant Chief Engineer, and in the absence or inability to act of the Chief or First Assistant Chief Engineer, shall have and exercise the duties and powers of the First Assistant Chief Engineer.

Sec. 2. He shall see that good order and discipline is maintained by the members of the Department in his Division; that all laws and ordinances of the City and County, pertaining to and all orders, rules and regulations of the Department, are enforced.

Sec. 3. He shall examine all buildings in the District to which he is assigned and report to the Chief Engineer concerning the same.

Sec. 4. He shall forthwith report in writing to the Board of Fire Wardens all buildings or structures that are found to be in a dangerous, defective or unsafe condition, and said Board shall, through its Secretary, report the same to the Board of Public Works and keep a record thereof in a book used for that purpose.

Sec. 5. He shall also perform such other duties as the Commissioners or Chief Engineer may direct.

RULE 6—CHIEFS OF BATTALIONS.

Section 1. The Chiefs of Battalions shall respond to all alarms of fire to which they are assigned, and on arriving thereat shall immediately report to the commanding officer in charge of the fire.

Sec. 2. In the absence of the Chief Engineer or Assistant Chief Engineers at fires, the command of the force will devolve upon the Chief of Battalion who first arrives, and he shall remain in charge until the arrival of a superior officer.

Sec. 3. They shall visit each alternate day each company house under their charge, inspect its condition, and see that the horses, apparatus, hose and equipments are in proper condition for efficient service. They shall obtain a written report concerning the same from the captain of each company, and upon returning to headquarters prepare and forward to the Chief Engineer a written report of the result of such visit and inspection.

Sec. 4. They shall examine all buildings in the district to which they are assigned, and report to the Chief Engineer concerning the same.

Sec. 5. They shall forthwith report in writing to the Board of Fire Wardens all buildings or structures that are found to be in a dangerous, defective or unsafe condition, and said Board shall, through its Secretary, report the same to the Board of Public Works and keep a record thereof in a book used for that purpose.

Sec. 6. They shall be held responsible for the discipline of all companies under their respective commands, and shall enforce all laws and ordinances of the City and County pertaining to the Fire Department, and a strict compliance with all orders, rules and regulations of the Department, and report promptly to the Chief Engineer every infraction thereof.

Sec. 7. They shall report promptly to the Chief Engineer any accident or other circumstance calling for prompt attention.

Sec. 8. They shall inspect the uniforms of the officers and men under their supervision before they are worn, and reject all not in conformity with the specifications hereinafter given.

Sec. 9. They shall be constantly on duty at their respective headquarters, except when necessarily engaged elsewhere on Department business, and shall not leave their districts except in case of fire or by permission of the Chief Engineer.

Sec. 10. They shall also perform such other duties as the Commissioners or Chief Engineer may direct.

RULE 7—THE BOARD OF CHIEFS.

Section 1. The Chief Engineer, the Assistant Chief Engineers and the Battalion Chiefs of the Department shall compose the Board of Chiefs.

Sec. 2. The Chief of the Department shall be ex-officio chairman of the Board, and one of its members shall be elected secretary, whose duty it shall be to make and keep a proper record of all proceedings of the Board.

Sec. 3. The Board shall hold meetings once a month, and at such time and such place as the chairman of the Board may designate.

Sec. 4. The Board of Chiefs shall consider the interests of the Fire Department as to its personnel, discipline, occupation of the men while in their company houses, location of houses and the apparatus to be kept or placed therein, the character of the apparatus, hose, nozzles, etc., noting those giving best use and satisfaction, and all other matters relating to the development and perfecting of the Department, to the end that it may reach the highest efficiency.

Sec. 5. The Board of Chiefs shall transmit to the Board of Fire Commissioners such recommendations as they may agree upon from time to time.

RULE 8—CAPTAINS.

Section 1. Captains shall have and exercise command over their respective companies, and shall be responsible for the discipline and condition thereof, and shall see that the houses under their control, and everything pertaining thereto, horses, harness, apparatus and equipment, are at all times kept in proper order.

Sec. 2. They shall enforce a strict compliance with the rules and regulations of the Department and the orders of the Chief Engineer, and report to their Battalion Chiefs any infraction thereof.

Sec. 3. The Captain of each company shall keep three books, to be designated as follows:

(a) The Property Book, (b) The Supply Book—these two may be combined in one—(c) The Journal.

Sec. 4. In the Property Book shall be entered a complete list of all the property in the company house under his control, furniture, horses, apparatus, hose, tools, etc., as it is received by him from time to time, and such as may become useless or destroyed, or that may be returned to the corporation yards, stables, shops, or the persons or firms from whom purchased. On December 31st of each year the Captain shall report in full in writing to the Commission all the property in his charge belonging to the Department.

Sec. 5. In the Supply Book shall be kept an accurate memorandum of all perishable supplies received, such as forage, fuel, etc., the date of receipt, the name of the party from whom received, and the quality of such supplies. A receipt shall be given in every case for supplies received and a written statement thereof forwarded to the Commissioners monthly.

Sec. 6. In the Journal shall be entered a brief history of each day's happenings.

- (a) Particulars of all alarms responded to.
- (b) Accidents to men, horses or apparatus.
- (c) Special duty performed by officers or men or company.
- (d) Delinquencies and insubordination.
- (e) Orders received, how and from whom received.
- (f) Unusual occurrences.

Sec. 7. They shall also keep a scrap book, in which shall be pasted copies of all amendments to the rules and regulations of the Department, and all general and special orders and instructions issued by the Board of Fire Commissioners and the Chief Engineer.

Sec. 8. They shall, with their companies, respond promptly to alarms of fire according to directions issued from time to time by the Chief Engineer, and upon their arrival at a fire immediately report to the officer in command; or if first to arrive, assume and exercise command until the arrival of a superior officer, and if deemed necessary, shall order a second alarm before the arrival of a superior officer. The apparatus shall, immediately upon arrival at a fire, be placed in position for service.

Sec. 9. They shall justly apportion, among all the members of the different companies under their respective commands, the work required about their company quarters.

Sec. 10. They shall politely receive visitors and answer all proper questions civilly, explaining when requested to do so, the apparatus, alarms, etc., but shall not allow habitual lounging or visiting in or about quarters, nor shall they permit children therein unless accompanied by parents or attendants.

Sec. 11. They shall see that all the required work about their quarters is completed by 10 o'clock a. m. sharp, and that everything is in readiness for the daily inspection at that hour, at which all members of the company will

appear in uniform, except in case of a working fire after 12 o'clock during the previous night.

Sec. 12. After inspection they shall make out, and deliver to the Battalion Chief on each alternate day, a report of the condition of the house, horses, apparatus, hose, and other equipments of their respective companies.

Sec. 13. They shall make such disposition of the men under their command as will enable them to attend their respective places of worship every Sunday, if possible, but at least once on every alternate Sunday, or other day of the week, which the men or women are accustomed to recognize as the day of public worship. Such "offs" will be so arranged as not to impair the service, and members availing themselves of this privilege will be required to attend said places of worship in uniform.

Sec. 14. They shall report to their Battalion Chiefs without delay all accidents resulting in injury, loss of life or damage to property, together with the names and addresses of all available witnesses thereto, whether happening to members of the Department or its apparatus or horses or to the persons of citizens or their property, in connection with the operation of this Department.

Sec. 15. They shall promptly report in writing to their Battalion Chiefs every breach of discipline or violation of the rules and regulations of the Department.

Sec. 16. They shall see that the wheels are taken off the different pieces of apparatus and vehicles that may be under their charge and control at least once in every week, and that the axles and wheel boxes are carefully inspected and the condition thereof noted in the house journal of that day.

Sec. 17. They shall also carefully instruct the members of their companies as to the rules and regulations relating to responding to alarms of fire and the changing of locations, as are set forth in the Assignment Book, and see that the same are strictly observed, and it shall also be their duty to see that the men are thoroughly familiar with the "pegging-up" of companies on the record board.

Sec. 18. Captains or Acting Captains of Companies shall at the end of each day sever the tape connected with the register in their respective houses on which alarms of fire are registered, thoroughly familiarize themselves with each box registered thereon, and then safely keep and store the same away in some convenient place for at least one week. Whenever there is anything wrong with the tapper, gong or register, or anything in connection therewith, they shall immediately report the same to the Fire Alarm Office.

Sec. 19. On returning to quarters from an alarm of fire, before allowing the fire to be pulled from their respective engines, and before entering the house with the apparatus, they shall ascertain from the register if any alarm has been sent in during their absence. Captains of Trucks, Chemicals and Water Tower Companies shall do likewise.

Sec. 19½. They shall devote one-half hour of one day in each alternative week to reading and explaining to the members of their respective companies the rules and regulations of the department pertaining to the duties of the men, etc., as well as to reading all written orders that may be issued by the Board of Fire Commissioners or the Chief Engineer, allowing one-half of said time to the reading of the rules and the remainder to the reading of orders.

Sec. 20. They shall perform such other duties as may be required of them by their superior officers and the rules and regulations of the Department.

RULE 9—LIEUTENANTS.

Section 1. Lieutenants shall respond to all alarms of fire prescribed for their company and promptly and cheerfully obey the orders of the Captain and

assist him in the performance of his duties, and shall also perform the duties required of hosemen or truckmen, as the case may be, and such other duties as may be required of them by their superior officers and by the rules and regulations of the Department.

Sec. 2. Lieutenants shall, in the absence of the Captain, perform his duties and exercise the authority of said officer.

RULE 10—ENGINEERS.

Section 1. Engineers shall, under their commanding officer, have the care and management of their engine, and shall be held responsible for its condition. They shall see that it is kept clean, in good order, and ready for immediate service at all times.

Sec. 2. Engineers who respond to boxes along the water front will each day ascertain from the daily papers the condition of the tide, and note the time of high and low water on the blackboard for immediate reference in event of fire.

Sec. 3. When additional fuel is required at a fire the stoker or driver of the company shall be sent to the nearest engine house for a fresh supply. The Engineer's orders in such cases shall be obeyed by the stoker or driver.

Sec. 4. Where engines have been disconnected from the heaters long enough to allow the water in the boilers to become cool, Engineers shall light the fire under the boiler and keep the water at least at scalding heat.

Sec. 5. All Engineers must have their apparatus in good order before a relief Engineer may take charge. A thorough examination by both Engineers must be made immediately before the relief Engineer reports to the Engineer reporting off. Such receipt must be given at once to the Captain of the company, and by him turned over to the Battalion Chief.

Sec. 6. The fires of engines shall not be dumped upon pavements of bituminous rock or asphaltum.

Sec. 7. On receiving a relief or other engine in place of their own, Engineers shall immediately prepare said engine for fire service by relaying fire, changing tools, filling boiler, and heating same, and shall otherwise see that the said apparatus is in perfect order for fire duty. They shall also retain possession of their own engine, if the same is fit for service, until the relief engine is prepared to roll.

Sec. 8. They shall open and close by hand the snap valves connecting the engine with the heater at least once every twenty-four hours; see that the stems are well lubricated and springs properly adjusted, so as to insure their closing when the engine leaves its position. Slip-joints shall be removed from floor stuffing-boxes and cleansed and oiled daily. They shall also see that the snap-valves are closed every time the engine pulls away from the heater connections.

Sec. 9. They shall test the working qualities of their respective engines twice monthly, under the same pressure allowed at fires. When draughting with pumps is not convenient, Engineers will take the nearest hydrant to quarters, generate the regulation amount of steam; run water pressure up to 120 pounds by partially closing the discharge gate (if by leaving it open and playing a full stream the street and surrounding property would be damaged); leading off sufficient hose to reach the nearest cesspool. Engineers shall report the result of such monthly tests, in writing, to the Superintendent of Engines upon his visit after each said test.

Sec. 10. They shall thoroughly cleanse their boilers once every fourteen days by removing all plugs from around the bottom of the boiler, using bent pipe, which will be furnished upon requisition. Such cleansing must be done immediately after return from exercising horses. After washing out boiler they shall connect the same to heater pipes and fill from that source, making use of

the hot water in the heater and boiler where there is one in use. Heaters shall also be emptied and cleansed every fourteen days, but not upon the same day that boilers are cleansed. When an engine has been working an hour or more, the same precautions shall be observed as on regular boiler cleaning days, and the same noted in daily report, together with such other remarks on the condition of the boiler as may be deemed proper.

Sec. 11. They shall carefully examine their shut-off nozzles after every fire or drill at which said nozzles are used; see that all parts are lubricated, and weekly attach nozzles to nearest hydrant; open and close same, and see that all parts are in working order.

Sec. 12. They shall inform their Captain whenever their engine may need any material or repairs.

Sec. 13. They shall at no time change or alter the position of the locking device on the pop valves or safety valves of their engines, regulating the steam pressure at which the same will blow off, and they shall at all times, while their engines are working at a fire, carry a water pressure of one hundred and twenty (120) pounds, except when ordered to carry a higher or lower pressure by the officer in command at such fire.

Sec. 14. They shall have their apparatus clean and ready for inspection daily at 10 o'clock a. m., except in case of a working fire after 12 o'clock during the previous night.

Sec. 15. Whatever work is done on apparatus other than cleaning must be fully noted in the company journal.

Sec. 16. They shall carefully instruct the other members of their respective companies, who may be in charge of the engine, heater, etc., during their watches, as to the proper care of the same, and shall report to the Captain any neglect or violation of the rules in regard to the care of engine, heater, etc., which they may find to have occurred during said watches.

Sec. 17. They shall remove and relay the fire in the fire-box immediately upon the return of the engine to quarters after exercising, and also upon the return to quarters after the apparatus has traveled one-half mile or more without having ignited fire.

Sec. 18. There shall be in each Engine Company at least one member thereof who must be competent to take charge of the engine, and whose duty it shall be to act as Engineer and perform the required duties thereof in the absence of the regular Engineer. When not acting as Engineer he shall, in responding to alarms of fire ride on the rear step of the hose wagon and make connection of hose line to engine or hydrant and also assist the Engineer to connect to hydrant by taking cap from hydrant, chocking wheels, and assisting otherwise to put engine to work. He shall then assume the duties of Hoseman.

Sec. 19. They shall perform such other duties as may be required of them by their superior officers and the rules and regulations of the Department.

RULE 11—DRIVERS.

Section 1. Drivers shall take proper care of their horses; exercise the greatest caution in their care and management; keep the stalls clean, and see that everything pertaining to their department is in perfect order and in readiness for immediate service.

Sec. 2. They shall not run their horses while responding to or returning from alarms of fire, nor shall they pass other apparatus of the Department, unless such apparatus or horses be disabled (except that drivers of Chemicals may pass other apparatus except Chemicals, if the same can be done with safety), but all proper dispatch consistent with safety must be used in responding to alarms of fire.

Sec. 3. They must, on all occasions, securely strap themselves to the seat of their apparatus immediately upon mounting the same.

Sec. 4. Drivers of Monitor Batteries, upon returning to quarters from an alarm of fire, shall ascertain from the register if any alarm has been sent in during their absence, before entering the house with the apparatus.

Sec. 5. Drivers of Chemical Engines are expected to get their apparatus to a fire at the earliest possible moment, and in so doing shall drive at as rapid a gait as is consistent with the safety of the public and the apparatus. Chemical Companies may pass other companies, except other Chemical Companies, when it can be done with safety.

Sec. 6. In returning from a fire, all driving shall be at a moderate rate of speed.

Sec. 7. They shall exercise their horses one hour each day when the horses have not performed any work after 1 o'clock a. m.

Sec. 8. Drivers of hill companies when responding to alarms that take their apparatus off the hills shall be careful to slow up as much as possible at crossings and look up and down each street, so as to avoid passing the fire.

Sec. 9. They will see that bells or gongs are rung at short intervals when proceeding to a fire.

Sec. 10. Drivers of engines shall not pass a fire to take a hydrant, unless by so doing they can obtain a closer position to the fire without shutting out another company that may be seen coming from another direction.

Sec. 11. Drivers of trucks, chemicals, towers and batteries shall not stop their apparatus in front of a hydrant.

Sec. 12. They shall not drive their apparatus over hose except when absolutely necessary.

Sec. 13. Drivers of Engine Companies shall, while said companies are in service at a fire, take proper care of all the horses and the hose wagon, and shall also, when necessary, assist the Engineer in firing his engine.

Sec. 14. They shall perform such other duties as are required by their superior officers and the rules and regulations of the Department.

RULE 12—STOKERS.

Section 1. The duties herein imposed upon Drivers shall, as far as practicable, apply to Stokers.

Sec. 2. They shall always, in response to alarms of fire, precede the engine with the hose wagon, unless otherwise ordered.

Sec. 3. They shall, after having led into a fire, tie up their horses in some position close to the engine, turn the care of horses and wagon over to the Driver, and immediately assume the duties of a Hoseman.

Sec. 4. They shall perform such other duties as are required by their superior officers and the rules and regulations of the Department.

RULE 13—HOSEMEN AND TRUCKMEN.

Section 1. Hosemen and Truckmen shall respond to all alarms of fire prescribed for their respective companies, and in every case they shall conform to and promptly and cheerfully obey all rules and regulations of the Department, and perform such other duties in connection with the Department as their superior officers may require of them.

FIRE COMMISSIONERS

RULE 14—TILLERMEN.

Section 1. Tillermen shall be at the tiller in going to and returning from fires, and upon all other occasions when their services in that capacity are required.

Sec. 2. They shall also perform such other duties as are required by their superior officers and by the rules and regulations of the Department.

RULE 15—CHEMICAL ENGINE, WATER TOWER AND MONITOR BATTERY COMPANIES.

Section 1. Officers and members of Chemical Engine, Water Tower and Monitor Battery Companies shall be subject to the same rules governing other officers and members of the Department, as far as applicable, and shall perform such other duties as may be required of them by their superior officers and the rules and regulations of the Department.

Sec. 2. Drivers of Monitor Batteries shall be under the supervision and subject to the orders of the Captain of the company in whose quarters they may be located.

RULE 16—HOUSES AND HOUSE WATCH.

Section 1. The house should be kept at an even temperature of about 60 degrees; thorough ventilation must be maintained in order that a good supply of pure air may be secured with as little draught as possible.

Sec. 2. Houses must be washed twice a month, weather permitting. The use of chloride of lime or any like substance on the floors of the houses is prohibited, except on stall floors.

Sec. 3. Members receiving forage, fuel, etc., will only receipt for the actual amounts received by them. Coal, 2,240 pounds to the ton; wood, per cord, 4x4x8—128 cubic feet; feed, per 100 pounds or fraction thereof.

Sec. 4. Engineers will carefully instruct their assistants in the engine house in the care and management of the apparatus, heater, syphon, etc., while in quarters; the house watchman being held personally and solely responsible for said apparatus after having assumed charge of the floor.

Sec. 5. A continuous watch shall be maintained in the apparatus rooms of all company houses of the department during the whole twenty-four hours of the day. The hours of the different watches shall be as follows: First watch, six a. m. to six p. m.; second watch, six p. m. to ten p. m.; third watch, ten p. m. to two a. m.; fourth watch, two a. m. to six a. m. The men to stand the different watches shall be designated in turn by the Captain of each company, unless otherwise provided, and no man shall be called upon to stand more than one night watch in twenty-four hours. The Captain of each engine and truck company shall also designate one man in turn who has had no watch during the preceding night and who shall be called at five o'clock a. m. to assist the watchman in taking up bedding and feeding horses. The man on watch shall be designated as house watchman, unless otherwise provided.

Sec. 6. (a) In all engine and truck companies there shall be two men on the first watch and one man on each of the other watches, unless otherwise provided. There shall be no change from this rule where an engine and truck company occupy the same house.

(b) In chemical companies or water tower companies occupying the same house with an engine or truck company, there shall be one man on the first

watch and one man on the second watch, but no later watch shall be maintained; provided, however, that the hoseman of such chemical or water tower company, when not acting as lieutenant or driver, shall take his turn on late watches in common with the members of the other company occupying the house.

(c) In chemical or water tower companies occupying houses alone there shall be one man on each of the watches.

(d) Where a chemical and water tower company occupy the same house there shall be one man on each of the four watches, the same as if each company was alone, and the crews of the respective companies shall have charge of the house alternately every twenty-four hours. During vacations and regular days off men shall be detailed from other companies in order to keep four men on duty at all times with chemical and water tower companies occupying houses alone.

Sec. 7. (a) In all engine and truck companies, and in chemical or water tower companies occupying the same house with an engine or truck company the captain shall stand no watch, but shall remain in general supervision of the apparatus floor at all times between the hours of six o'clock a. m. and six o'clock p. m., unless called away on other duties, in which case the Lieutenant shall remain in supervision until the Captain's return.

(b) Captains of chemicals or water tower companies occupying quarters alone shall stand a regular watch.

(c) No substitute shall be qualified or allowed to stand a night watch alone in any company unless he has previously worked in that particular company for at least fifteen days and is known by the captain of that company to thoroughly understand the rules applying to the duties of house watchman, and to be otherwise reliable and competent. When a substitute who is not so qualified is required to stand a night watch, said watch shall consist of two men, one of whom must be a regular member. These rules shall apply to all companies except chemical and water tower companies occupying houses alone, in which companies the previous time worked need not be considered, provided that the substitute is known by the Captain to be otherwise qualified.

(d) Captains of chemical and water tower companies occupying houses alone must endeavor at all times to secure substitutes who are qualified as provided. If such qualified substitutes are not available said Captains must request their Chief of Battalion to detail a man from some other company, sending the unqualified substitute to said other company.

(e) In engine companies where only seven men are on duty, if there are two unqualified substitutes on duty in place of regular members, if necessary, the Captain shall take the watch from six to ten p. m., and the Lieutenant shall take the watch from ten p. m. to two a. m. in order to have a regular member in charge of each watch.

Sec. 8. The regular house watches in each company of the department shall be constituted as follows:

Engine Companies—

Engineer and Driver.....	6 a. m. to 6 p. m.
Lieutenant.....	6 p. m. to 10 p. m.
One man.....	10 p. m. to 2 a. m.
One man.....	2 a. m. to 6 a. m.

In all engine companies during the watch from 6 o'clock a. m. to 6 p. m. the engineer shall be designated house watchman and the driver shall be designated assistant house watchman.

Truck Companies—

Tillerman and Driver.....	6 a. m. to 6 p. m.
Lieutenant	6 p. m. to 10 p. m.
One man.....	10 p. m. to 2 a. m.
One man.....	2 a. m. to 6 a. m.

In all truck companies during the watch from 6 o'clock a. m. to 6 o'clock p. m. the tillerman shall be designated house watchman and the driver shall be designated assistant house watchman.

Chemical or Water Tower Companies—

(When occupying the same house with an engine or truck company.)

Driver.....	6 a. m. to 6 p. m.
Lieutenant.....	6 p. m. to 10 p. m.

Chemical or Water Tower Companies—

(In houses alone.)

Driver.....	6 a. m. to 6 p. m.
Captain.....	6 p. m. to 10 p. m.
Lieutenant	10 p. m. to 2 a. m.
Hoseman.....	2 a. m. to 6 a. m.

During the absence of the engineer, driver or tillerman of any company at meals the relief engineer, relief driver or relief tillerman, as the case may be, shall assume their respective duties on watch on the apparatus floor.

Sec. 9. In no case shall the men on watch or either of them leave their post of duty on the apparatus floor until relieved, except in case of fire. In the event of failure on the part of their successors to relieve them after being called, the Captain of the company shall be promptly summoned and advised of the fact.

Sec. 10. They shall not permit visitors after 10 o'clock at night, except by consent of the Captain, or a superior officer.

Sec. 11. No changing or trading of "offs" or any watch duty in companies will be allowed without the consent of the Captain.

Sec. 12. Members shall not leave company quarters after ten o'clock p. m. while on duty, and the house watchman shall report to the Captain any member so doing as soon thereafter as possible.

Sec. 13. Watchmen shall not doze or sleep while on watch, nor permit any violation of these rules or regulations by any one in or in front of quarters, and shall at once call the Captain if any disturbance occurs in or about quarters which they cannot control.

Sec. 14. Captains or Acting Captains of Companies shall at the end of each day sever the tape connected with the register in their respective houses on which alarms of fire are registered, thoroughly familiarize themselves with each box registered thereon, and then safely keep and store the same away in some convenient place for at least one week. Whenever there is anything wrong with the tapper, gong or register, or anything in connection therewith, they shall immediately report the same to the Fire Alarm Office.

Sec. 15. Whenever, after one alarm has been received from any station, another alarm is received from the same or any other station before the first alarm has been tapped out, the housewatchman shall immediately call the Captain or Acting Captain in order that he may supervise the pegging on the record board.

Sec. 16. At six o'clock a. m. the house watchman shall call the company, and all members thereof must immediately arise and proceed with their regular duties of the day.

Sec. 17. The House Watchman shall have charge of the Company journal during his watch and shall make all necessary entries therein unless otherwise provided by the officer in charge of the company; provided, however, that he shall make no entry therein of any accident or injury to a member or any other unusual or important occurrence during said watch without first calling the attention of the officer in charge of the company to the same. Upon the completion of each day's journal entries the officer in charge of the company shall inspect and endorse the same.

RULE 17—ACTS OF VALOR TO BE REPORTED.

The officer in charge at a fire shall report to the Chief Engineer the names of such officers and members of the Department as may distinguish themselves in the discharge of their duties by the saving of human life at the risk of their own, and Assistant Chiefs and Battalion Chiefs shall report any other meritorious acts which are worthy of special attention that may have been performed by members of the companies under their command, while on duty, either at a fire or elsewhere, giving a full and correct statement of the facts. The Chief Engineer shall submit all such reports to the Board of Fire Commissioners for their consideration.

RULE 18—LEAVES OF ABSENCE.

Section 1. Except as herein provided, all leaves of absence must be obtained from the Board of Fire Commissioners, upon proper written application made therefor.

Sec. 2. The Assistant Chiefs and Battalion Chiefs are authorized to and may grant leaves of absence to the officers and members of companies under their control for a period not to exceed four days, and in all such cases they must put on substitutes at the expense of the men granted leave. All such substitutes to be taken from the regular authorized list thereof.

Sec. 3. The Chief Engineer is authorized to and may grant leaves of absence to officers and members of the Department not to exceed ten days, and he may also extend leaves of absence, granted in accordance with the foregoing section, not to exceed six days.

Sec. 4. The President of the Board of Fire Commissioners may grant leaves of absence to the Chief Engineer.

Sec. 5. When any member of the Department is sick, he shall report or cause the fact to be promptly reported to his Captain and Battalion Chief. The Battalion Chief shall verify the statement and grant a leave of absence "on account of sickness" and shall put on a substitute in his place.

Sec. 6. Not more than three members of any engine or truck company having the full complement of men, and not more than two members of any engine or truck company of less than the full complement, and not more than two members of any chemical company will be allowed off on leaves of absence at the same time. Exceptions may be made by the Battalion Chiefs in cases of sickness or urgency, after an investigation of the same.

Sec. 7. All leaves of absence granted, with the time and cause for granting the same, must be reported to the Board of Fire Commissioners at the first regular meeting held after such leave is granted.

Sec. 8. Applications for leaves of absence from members of companies will not be considered by the Board of Fire Commissioners unless the same have been approved and countersigned by the Chief of Battalion and the Captain of the company of which the applicant is a member or to which he may be detailed for duty.

RULE 19—SUPERINTENDENT OF ENGINES.

Section 1. The Superintendent of Engines shall be responsible to the Board of Fire Commissioners and the Chief Engineer for the conduct and management of the repair shop. He is charged with the control and direction of the men assigned to duty under him, and shall see that their time is employed to the greatest advantage to the Fire Department, and report to the Chief Engineer in writing all accidents or injuries received by said men, and all absentees from duty, together with the reasons for their absence.

Sec. 2. He shall keep a detailed record of all the work done, and shall make and keep a record in a book provided for that purpose, of any and all apparatus which becomes injured, broken or in any way disabled, together with the date of such occurrence, the company or place to which it belongs, the nature of the injury or disability, the cause, if known, and such other and further information regarding the same as may be necessary.

Sec. 3. He shall visit the quarters of each company once a month, or as often as occasion may require, and inspect the apparatus in service in the Department, and report at least once each month the condition of the same to the Chief Engineer, and make such recommendations as he may deem advisable.

Sec. 4. He shall see that the apparatus is at all times kept in good repair and ready for immediate service.

Sec. 5. He shall attend all fires for which third alarms are sent in.

Sec. 6. He shall also perform such other duties as may be required or prescribed by the Commissioners or Chief Engineer.

RULE 20—CLERK AND COMMISSARY CORPORATION YARD.

Section 1. He shall be responsible to the Board of Fire Commissioners and the Chief Engineer, and shall be on duty at his office at Corporation Yard of this Department from 8 o'clock a. m. to 5 o'clock p. m. daily (Sundays and legal holidays excepted) and at such other times as the Chief Engineer may direct.

Sec. 2. He shall have the care and management of the supply department, and have charge of all hose, and apparatus and supplies purchased by order of the Commissioners.

Sec. 3. He shall, upon the receipt of requisitions therefor, deliver to the various companies the monthly supplies and stores for each company.

Sec. 4. He shall keep the books and accounts of the supply department in a systematic manner, showing the supplies received by him, the amount delivered to each company and the amount remaining on hand, and report monthly to the Board of Fire Commissioners.

Sec. 5. It shall be his duty to keep in a book provided for that purpose an account of the quantity, kind and condition of the hose in the Department, and in each company thereof, with such other record as may be required to insure at all times full knowledge of the condition of the same.

Sec. 6. He shall not deliver any supplies or stores of the Fire Department except upon an order signed by the Chief Engineer and the Secretary of the Commissioners (except during a conflagration supplies or apparatus may be delivered on the order of the Chief Engineer, Assistant Chief Engineer, Battalion Chiefs or Captains) and shall procure a written receipt for all such supplies or stores delivered.

Sec. 7. He shall answer all third alarms of fire, and perform such other duties as the Commissioners or Chief Engineer may direct.

RULE 21—VETERINARY SURGEON.

Section 1. The Veterinary Surgeon shall be responsible to the Chief Engineer, and shall visit the hospital or stables daily. He shall also tend to all sick or injured horses belonging to the Department at any time of the day or night that such service may be needed. He shall give instructions to the attendants in charge of such horses, and shall report to the Chief Engineer and Board of Fire Commissioners any neglect of duty of same.

Sec. 2. Each person attending to horses under treatment of Veterinary Surgeon shall report to him the condition of horses in his care, and obey all orders given by the Veterinary Surgeon as to their treatment.

RULE 22—SUPERINTENDENT OF HORSES.

Section 1. He shall be responsible to the Board of Fire Commissioners and the Chief Engineer for the performance of his duties in the general care and treatment of the horses of the Department.

Sec. 2. He shall instruct his men to give such medical, surgical and other attention to the horses of the Department as may be ordered by the Veterinary Surgeon, regulate their feed, and give such directions to those in charge of horses as in his judgment is necessary.

Sec. 3. He shall report to the Chief Engineer once a month, or as often as circumstances may require, the condition of the horses, etc., under his charge, and shall also report all deaths of horses, and recommend the condemnation and disposal of horses which become unfitted for service in the Department.

Sec. 4. It shall be his duty, at least twice each month, to visit each company quarters and inspect the horses and the forage furnished, give advice and direction as to feeding, and to report to the Chief Engineer any willful neglect or any undergrade forage found.

Sec. 5. He shall keep an accurate, numerical and descriptive record of all horses in the Department, containing number, date of purchase, age, color, record of accidents, sickness and date of condemnation, death or transfer, together with such other information concerning the same as may be useful.

Sec. 6. He shall have the charge and direction of the hostlers assigned for duty at the stables, and shall prescribe their duties.

Sec. 7. When not otherwise engaged on Department business he shall always be in attendance at the Department stables.

Sec. 8. He shall have and assume charge of the stables and see that everything appertaining thereto is kept in proper order and condition.

Sec. 9. He shall perform such other duties as may be required or prescribed by the Commissioners or the Chief Engineer.

RULE 23—HOSTLERS.

They shall devote their entire time and attention to the stable work assigned them, and shall perform such duties as may be prescribed by the Chief Engineer or Superintendent of Horses.

RULE 24—HYDRANTMEN.

Section 1. Hydrantmen shall attend to all hydrants and cisterns in their respective districts, see that the same are in good condition and ready at all times for immediate use.

Sec. 2. They shall see that the hydrants are at all times kept free from obstructions of every character, so that access thereto may be readily had by the engines of the Department.

Sec. 3. They shall visit and inspect the cisterns in their respective districts once in each week, keep the same filled with water and see that they are in proper condition and ready for immediate use at all times. They shall report the condition of the several cisterns once in each week to the Battalion Chief of the district wherein said cisterns are located, but if for any reason a cistern becomes useless the fact shall be immediately reported to the proper Battalion Chief.

Sec. 4. They shall register in books provided for that purpose the exact location of all hydrant gates in their respective districts and shall see that said gates are conspicuously exposed and not covered over or hidden in any way by pavement, bitumen or other material or substance used for street purposes.

Sec. 5. They shall perform such other duties as may be required of them by the Commissioners or Chief Engineer.

RULE 25—WATCHMEN.

Section 1. Night watchmen shall be in attendance daily at the Corporation Yard of the Department to which they may be assigned for duty from 6 o'clock p. m. until 7 o'clock a. m. the following morning, and shall carefully guard and protect the property intrusted to their care.

Sec. 2. They shall perform such other duties as may be required of them by the Superintendent of Engines.

RULE 26—CARE AND USE OF HOSE, APPARATUS, HORSES, HARNESS, IMPLEMENTS, ETC.

HORSES.

Section 1. All horses of the Department must be watered at 5 o'clock a. m. and fed at 6 o'clock a. m. with the regular allowance of cooked grain; the allowance of grain will be set aside by the driver, and the assistant house watchman will, about 1 o'clock each morning, pour boiling water over the same in a bucket provided for that purpose, and then fix the cover on tight so as to prevent the escape of the heat or steam therein. On feeding said allowance another allowance shall be immediately prepared. At 11 o'clock a. m. the horses shall be watered and given a small quantity of hay, and at about 12 o'clock m. fed the regular allowance of prepared grain. At 6 o'clock p. m. water and bed the horses, give them their allowance of hay, then give a few carrots, or other feed which may be ordered by the Superintendent of Horses.

Sec. 2. All horses shall be exercised daily for one hour, unless a run was had after 1 o'clock a. m. In wet weather exercising shall be done, if possible, between showers.

Sec. 3. In good weather, during the spring and summer months, the horses shall be permitted to stand outside the houses from 9:45 to 11 a. m.

Sec. 4. In case of sickness or injury to any horse, it shall be the duty of Captains to promptly report the same to the Superintendent of Horses, and he shall see that measures are taken for the relief of such horse.

Sec. 5. Any horse which neglects to eat or shows any signs of being sick or lame, and any horse loosing a shoe, will be immediately reported to the Superintendent of Horses, and a relief horse shall be provided.

Sec. 6. Teasing or annoying horses or teaching them any tricks, or unnecessarily or severely punishing them, is prohibited.

Sec. 7. No gas or electric light shall be placed or kept directly in front of a horse's eyes.

Sec. 8. Muzzles are strictly prohibited on horses between the hours of 6 p. m. and 6 a. m., except while standing on the street.

Sec. 9. On cold or stormy nights, when it is necessary to remain at a fire for a long time, the drivers shall blanket their horses well, and exercise them every half hour for ten minutes. If possible put them in some sheltered place.

Sec. 10. A horse shall never be given water or grain while he is hot after a run, except that his mouth and nostrils shall be sponged out with cold water and he shall be given two of three swallows only. Sweat shall be wiped from around the eyes and under the tail with a damp sponge.

Sec. 11. Horses shall be blanketed when standing in the open air.

Sec. 12. If a horse be under medical treatment, the driver shall be careful to follow the instruction of the Veterinary Surgeon in administering the medicines and otherwise attending to the horse. If a driver lays off while attending a sick horse, he shall instruct his substitute as to how the horse is to be attended to.

Sec. 13. After returning from exercise or an alarm, horses' feet (not legs) shall be washed out and examined for nails, loose shoes, etc., then rubbed down and if warm, blanketed (in houses that have no heater). The back door shall be kept shut and draughts avoided as much as possible.

Sec. 14. In cold weather the chill shall be taken off drinking water, or only a small quantity of cold water shall be given at one time. You are directed to see that this rule is strictly observed by all members or employees of the Department having the care or charge of horses, and any neglect or failure on their part to comply therewith will be brought to the attention of the Board of Fire Commissioners.

Sec. 15. A bucket shall not be used to catch the horses urine in. If a horse is straining to urinate and afraid to do so, straw shall be shaken under him, which will encourage him to pass it. The stall shall be rinsed out or washed down immediately. Manure shall also be removed immediately.

Sec. 16. The mane and tail shall be washed once a week with soap and warm water, weather permitting, and the sheath once every two weeks.

Sec. 17. Horses predisposed to scour shall get small quantities of water often, instead of a large drink at one time.

Sec. 18. Grey or white horses stained on quarters, etc., may have spots sponged off with warm water and soap, but must be thoroughly dried with a "rubber" immediately. White legs may be treated likewise when necessary; otherwise the legs shall never be washed, except by order of the Superintendent of Horses.

Sec. 19. Rain, sweat and mud shall be removed immediately on getting into the house; first with scraper and afterwards with a wad of straw or sack, care being taken to dry out the hollow of the heels thoroughly; what is left can be washed or brushed off when dry; use no water to remove it. Washing horses is prohibited.

Sec. 20. The feet shall be stuffed every other night in dry weather.

Sec. 21. Musty or overdried hay, or musty food of any kind shall be rejected, as it is injurious to the horse's wind.

Sec. 22. Clipping horses shall be done under the directions of the Superintendent of Horses, but the mane and legs shall be clipped clean at all times.

Sec. 23. Bedding shall be removed for ventilation from the house in dry weather where it is convenient to do so.

Sec. 24. Drivers are strictly prohibited from using a twitch or other like appliance upon the horses while clipping the legs, cutting the manes, washing tails, etc. If a horse cannot be handled without the use of said appliances, the driver shall notify the Superintendent of Horses.

HARNESS.

Sec. 25. No hot or warm water shall be used in cleansing harness.

Sec. 26. The use of emery cloth in polishing the points and bells of Hale or Berry hames is strictly prohibited. Nothing but oil shall be used.

APPARATUS.

Sec. 27. No alterations shall be made in trace or pole chains other than necessary adjustments.

Sec. 28. The use of water in and around the furnace of fire engines for removing sparks or other evidence of fire is prohibited. A dry broom shall only be used for said purpose.

Sec. 29. On returning from a run, the apparatus will be left outside of the house, the horses blanketed, and the running gear thoroughly washed with small hose. Companies having a yard may wash their apparatus therein.

HOSE.

Sec. 30. Cotton hose shall not be allowed to remain on the wagon more than twenty-four hours in a wet or damp condition unless unavoidable. The hose shall be changed every fifteen days unless the same has been in actual service during said time, and when said change is made, a note thereof shall be entered in the company journal.

Sec. 31. Cotton hose, after being used at a fire, and when returned to quarters, if only wet or damp, shall be immediately hung up in the tower. If any hose is in a dirty condition from mud, etc., it shall be thoroughly cleaned, with a broom and water if necessary.

Sec. 32. When changing hose, before it is taken from the wagon or reel, there must be lowered down from the tower all the hose that is to be put on, and the lengths coupled together, care being taken to see that the couplings and swivels are in perfect order and that all have proper washers. A small quantity of tallow or oil should be used on the threads or swivels, but not enough to run on the fabric or rubber, as grease will injure either. What hose is necessary can then be removed from the wagon or reel and the dry hose placed thereon; the wet hose then hoisted in the hose tower. If any of the lengths of hose are injured, they shall not be rolled up and set aside, but must be marked and hung up until called for by the supply wagon.

Sec. 33. Hose covers shall not be folded. The inner or go-between cover shall be rolled and stored under the seat; the outer cover of hose wagons and carriages, when not in use, shall be hung at full length or width in a dry place, and not creased in any manner.

RULE 27.—RULES GOVERNING MEMBERS ON SICK LEAVE.

Section 1. When a member of the Department becomes sick or disabled to such an extent as to render him unable and unfit to properly perform his required duties in the Department, he shall report the fact, or cause the same to

be promptly reported to the Captain of the Company to which he may belong or to which he may at that time be assigned for duty.

Sec. 2. The Captain or officer receiving such report shall immediately notify his Battalion Chief, who shall promptly investigate the case, and if he deem it necessary, grant the member a leave of absence on account of sickness, and as soon thereafter as possible notify the Department physician and surgeon thereof, giving him the exact location at which such member may reside or can be found.

Sec. 3. He shall also visit such sick member within twenty-four hours after the granting of the leave of absence; provided, the member resides or is located in his Battalion District during his sickness, and submit a report in writing thereof to the Chief Engineer. He shall continue to visit him once a week or oftener, if necessary, during his disability, and file a written report thereof, together with any other circumstances connected with his sickness that he may deem proper, with the Chief Engineer.

Sec. 4. Should the sick member reside or be located outside the boundaries of the district of the Battalion Chief, such Battalion Chief shall, immediately after granting him the leave of absence, notify the Battalion Chief of the district in which the member may reside or be found of the fact, and the Battalion Chief so notified shall then proceed to carry out the requirements of Section 3.

Sec. 5. The Department Physician and Surgeon shall, within twenty-four hours after notification by the Battalion Chief, visit and examine each and every thus reported sick member, and shall continue to visit them at least once a week thereafter during the continuation of their sickness, and he shall also report in writing once a week to the Board of Fire Commissioners the names of all such members visited, with the nature of their illness or disability and condition of the same, and also any circumstances or irregularities that may come under his observation in connection therewith.

Sec. 6. All members of the Department that may be granted leaves of absence on account of sickness or disability must file with the Board of Fire Commissioners weekly a certificate from a regularly certificated physician clearly specifying the character and nature of such sickness or disability, and all such certificates must be submitted to the Department Physician and Surgeon to be countersigned before filing the same with the Board.

Sec. 7. Any member who becomes sick or incapacitated from the performance of his required duties in the Department through intemperance, vicious habits, immoral or unlawful acts, or through the reckless negligence of his person or health, shall not be entitled to any salary or compensation from this Department during such illness or disability.

Sec. 8. Any member whose sickness or disability does not necessarily confine him to his residence or a hospital, shall report to the Department Physician and Surgeon in person at his office, once a week, or oftener, if directed by him, on the regular visiting days that he may name.

Sec. 9. Members off duty on sick leave shall not be permitted to leave the City without having first obtained the consent of the Board of Fire Commissioners to so do, and when thus absent from the City must file a physician's certificate, as required by Section 6.

Sec. 10. No member of the Department will be allowed salary during any sickness or disability contracted or incurred while said member is off duty on leave-of-absence that may be granted or allowed without pay by the Board of Fire Commissioners or any authorized officer of the Department.

Sec. 11. No member of the Department off duty on leave-of-absence granted on account of sickness or disability shall be absent from his residence after eight o'clock p. m.

Sec. 12. Captains or other officers in charge of companies, shall immediately notify the Department Physician and Surgeon whenever members who have been absent from duty on sick leave report back to their Companies for duty.

Sec. 13. Any member of the Department violating any of the above rules or failing to strictly conform thereto while on leave-of-absence for sickness or disability shall not be allowed salary for the time absent from duty on said leave.

Sec. 14. Any member of the Department who willfully misrepresents himself to be sick or injured and unfit to properly perform his required duties in the Department shall, after a trial, be dismissed therefrom without the alternative of a fine.

GENERAL RULES.

1. All officers and members of the Department shall devote their entire time and attention to the services of the Department, and shall not engage in any other business or calling.

2. No political, social or other organization shall be formed or maintained in the houses of the Department, and no meetings of any character, other than regular company meetings, will be permitted therein; and no officer, member or employee of the Department shall take any part whatever in any political conventions, canvass or campaigns, except to vote, and no interference in the free exercise of this right by every member of the Department will be tolerated. Any violation of this rule will be deemed sufficient cause for dismissal from the Department.

3. The officers and members of the Department are prohibited from forming and maintaining, exclusively amongst themselves, any society, company or organization supported by assessments upon or contributions from the members or employees of the Department, without having first obtained permission from the Board of Fire Commissioners to so do.

4. Officers shall be just, dignified and firm in their intercourse with subordinates, and shall abstain from using violent, abusive or immoderate language in giving orders and directions, as well as when in conversation with them.

5. Officers and members shall at all times conduct themselves in a gentlemanly manner and refrain from using obscene, immoral, disrespectful, impudent or improper language.

6. Members of the Department shall not enter saloons or places where liquor is sold while wearing their uniforms or while on duty, except in the legitimate discharge of their duty.

7. No intoxicating beverages shall be brought into, kept or drunk in or about any of the houses or premises of the Department, and any member or employee, who, while on duty, or while in uniform, or when about the premises of the Department, becomes intoxicated, or who absents himself from duty because of drink shall be subject to dismissal, or such other penalty as the Board of Fire Commissioners, after trial, may impose.

8. Smoking, while on the apparatus or vehicles of the Department, is at all times prohibited.

9. Gambling of all kinds is strictly prohibited in or about the houses of the Department.

10. Congregating on the sidewalk in front of or adjacent to company houses is also prohibited.

11. Members of companies are prohibited from using the telephones in service therein without having first obtained permission to so do from their superior officers, and then only for as brief a period as possible, and no person or persons, other than public officials, shall be allowed to use the same, after permission has been granted by the officer in charge of the company, and then

only on official business connected with their respective departments. Whenever the Captain or Lieutenant of a company is not upon the apparatus floor and in close proximity to the telephone, any other member of the company who can conveniently do so shall answer any calls that may come in thereon. After taking the receiver from the hook the member so answering shall immediately give the number of the company. In cases where more than one company are stationed in the same quarters the number of the engine company shall be given first, then followed by the number of the truck or chemical company, as the case may be. Where truck and chemical companies are quartered together the number of the truck company shall be given preference, followed by the number of the chemical or water tower company, as the case may be. The officer in charge of the company shall be held strictly responsible for the observance of this rule.

12. No member or employee shall sell or assign or discount his salary warrant or demand on the Treasurer; nor shall any member or employee endorse or guarantee, in writing, the note, assignment, or other instrument of like nature of any other member of the Department.

13. All members and employees of the Department shall promptly pay their just and lawful debts, contracted or incurred while in the service. Failure to do so will be considered cause for suspension or dismissal.

14. No officer, member or employee shall at any time be guilty of any act or omission which impedes, injures or hinders, or tends to impede, injure or hinder, the progress, welfare, discipline, efficiency or good name of this Department.

15. Members of the Department, as a mark of respect, shall rise and salute Commissioners and ranking officers of the Department, or any other public officers visiting their quarters. When a ranking officer visits the quarters of a company, all members thereof that may be outside of the house or on the street in the vicinity thereof shall immediately return to quarters.

16. The members of the Department shall at all times address their superior officers by their proper titles, and in all cases use the word without any abbreviation whatever. The Chief Engineer, Assistant Chief Engineers and Battalion Chiefs, when addressed verbally by any member of the Department shall be addressed as "Chief," but when addressed in writing the full title of the officer shall be used.

17. Every member of the uniformed force shall provide himself with the regulation uniform within thirty days after his appointment, but such uniform must not be worn on duty until it has been inspected and approved by the Battalion Chief. It shall be the duty of said members of the Department to wear the prescribed uniform at all times, except from the time of retiring until 10 o'clock a. m. All members of the Department, while at a fire, shall wear their official badge in a conspicuous place on the left breast of their coat or outer garment, and shall wear their regulation fire hat.

18. Members of the Department shall conduct themselves quietly at fires; shouting or boisterous conduct will not be permitted. Water will be turned on by order of a commanding officer and not otherwise. Members who are on the pipe leading into a fire above the ground floor will shut the nozzle off immediately upon connecting the same to the hose.

19. No exchange of badges will be permitted except when it becomes necessary in cases of promotion or transfer; nor shall the same be loaned to any person, or used for any but the legitimate purposes of the Department.

20. No officer, member or employee shall ride or attempt to ride on any street car on his official badge or uniform and without paying his fare, unless such privilege has been accorded the members by the railroad companies, and then only under such conditions as may be imposed by the said companies.

21. Members of the Department, when resigning, or upon dismissal or suspension, shall immediately surrender to the commanding officer of their company their official badge, cap insignia, and all other property of the Department that may be in their possession.

22. Members of companies shall sleep in their company houses when on duty, and while so sleeping shall not be unnecessarily disturbed.

23. Members of companies, while on duty, shall not leave their respective company quarters after ten o'clock p. m. without first having obtained permission to do so from the officer in charge of the company.

24. The hours for meals in the various companies shall be designated by the Captain, every man being entitled to one hour for each meal when three meals are taken outside of quarters during the day, or one and one quarter hours for each meal when only two meals are taken outside of quarters; provided that the total time for all men of the company at each meal shall not be more than three and one-half hours. The number of men absent at meals at one time shall be in accordance with these hours, taking into consideration the number of men in the company.

25. Members of Companies shall not go beyond the limits of their respective company districts for their meals when on duty, and while absent at meals they shall immediately respond to all alarms of fire to which their respective companies respond, either for service or for the purpose of covering-in to other quarters. Nor shall they go beyond the limits of their said company districts for any other purpose while on duty without first obtaining permission to do so from the Battalion Chief in charge of their respective companies.

26. Members shall procure at their own expense tappers to be placed in their respective eating places.

27. Members of companies shall notify their Captains of the address of their eating place and residence and of any change therein, and said officer shall keep a record of these particulars concerning every man under his charge.

28. All uniformed members of the Department, when appearing before the Board of Fire Commissioners for trial or otherwise, shall so appear in the full regulation uniform of the Department.

29. No visitors shall be allowed in the houses of the Department after 10 o'clock p. m. without permission of the Captain.

30. No member of the Department shall receive any reward or present of any kind for services rendered in the discharge of his duties, without permission of the Board of Fire Commissioners, and no member shall give or contribute toward the giving of any present or thing of value to any member or officer of superior rank without having first obtained such permission.

31. No officer or member of the Fire Department shall wantonly or maliciously make any false report of any other member, nor fail to report any real violation of the rules, etc.

32. Department property shall not be loaned, sold or given away, but shall be carefully protected from waste and abuse.

33. The various companies of the Department shall have and attend such drills as their superior officers may prescribe and the members thereof shall attend such practice drills at the Drill Towers as the Chief Engineer or Drill Masters direct, and all the required duties of such drills shall be properly and efficiently performed.

34. No officer or member of any company shall be absent from his company quarters while on duty, without permission, except at meal hours, unless by order of the Chief Engineer.

35. Officers and members shall report back to quarters promptly at the expiration of meal hours, leaves of absence, etc.

36. All assignments of officers and of companies for answering alarms and attending fires and the movements of companies in covering-in, shall be made under the direction of the Chief Engineer.

37. No work or labor not absolutely necessary shall be performed on Sundays.

38. All members of companies (Drivers and Engineers excepted) shall wear the regulation fire hat while going to and returning from alarms of fire and while working thereat.

39. Officers and members of the Department shall be governed by the rules and regulations, as set forth in the Assignment Book, in responding to alarms of fire, and a strict observance of said rules is required of them.

40. The First Assistant Chief Engineer, Second Assistant Chief Engineer and Battalion Chiefs may suspend any subordinate officer, member or employee of the Department for a violation of any of the rules of the Department, and shall forthwith report in writing such suspension, with the reasons therefor, to the Chief Engineer.

41. All officers, members and employees of the Department shall perform all their required duties therein in a prompt, proper and energetic manner, and continued failure or neglect to so do will be considered as incompetency by the Board of Fire Commissioners.

42. No officer, member or employee shall neglect or refuse to perform any duty or to obey any order of a superior officer, pertaining to matters of the Department.

43. Officers shall call the attention of all members present to any misconduct, occurrence, act or words which might become the subject of charges before the Commission.

44. It shall be the duty of all members or employees of the Department to take notice of any conduct or action of any member or employee therein which they are in a position to see or any language which they may hear, and which may be prejudicial to the good and welfare of the Department, and said members shall ascertain the true facts and conditions in every case to which their attention may be called, for the purpose of acting as witnesses.

45. False swearing or willfully withholding the truth on the part of members while acting as witnesses in the trial of charges before the Commission will be made the ground for charges and be punished as the Commission may determine.

46. The duties imposed upon members of the Department shall also apply to Substitutes when on duty, and a strict observance of the rules and regulations of the Department will be required of them.

47. Any officer, member or employee violating any of the foregoing rules and regulations of the Department, or any subsequent rules and regulations which may be adopted by the Board of Fire Commissioners, or any general or special orders or instructions of the Board of Fire Commissioners or Chief Engineer, or orders of any superior officer, shall, upon conviction, be punished by reprimand, fine, suspension or dismissal from the Department, as the Board of Fire Commissioners may determine.

INSIGNA OF RANK.

Chief Engineer.—Five trumpets, measuring one and three-sixteenths inches each, crossed with the bells outward, and projecting beyond mouthpieces, so as to form a design one and one-half inches in diameter, and all to be made of gilt metal and worn on the front of the cap.

First Assistant Chief Engineer.—Same as above, with the exception that there shall be but four trumpets.

Second Assistant Chief Engineer.—Same as above, with the exception that there shall be but three trumpets.

Battalion Chiefs.—Same as above, with the exception that there shall be but two trumpets.

Captains of Engine, Chemical Engine and Water Tower Companies.—Two trumpets, one and three-sixteenths inches long; made of white metal; trumpets placed perpendicularly, bells downward; letter and number designating company on same. To be worn in the center of cap front.

Lieutenants of Engine, Chemical Engine and Water Tower Companies.—Same as above, with the exception that there shall be but one trumpet, placed horizontally.

Captains of Truck Companies.—Two axes, one and three-sixteenths inches long; made of white metal; axes to be placed diagonally above; letter and number designating company on same. To be worn in center of cap front.

Lieutenants of Truck Companies.—Same as above, with the exception that there shall be but one axe, placed horizontally.

Engineers, Drivers, Stokers, Tillermen, Truckmen and Hosemen.—White metal Maltese cross badge, one and five-eighths inches each way, with the Department number of the wearer in figures three-eighths of an inch long. To be worn in the center of the cap front.

REGULATION UNIFORM, SAN FRANCISCO FIRE DEPARTMENT.

CHIEF ENGINEER.

COAT to be double-breasted, square cut; to button to the neck, with rolling collar, made to be worn open or closed; seam in back; raw edge, $\frac{1}{2}$ inch double stitched, two lower, one upper pockets with scalloped flaps $3\frac{1}{2}$ inches deep at points; two inside, cut crosswise; two rows of buttons, eight in each row, to be placed in pairs. Sleeves to be stitched to a point from $3\frac{1}{2}$ to 6 inches; four buttons on sleeve. Buttons to be gilt and set in with rings. Length to be to the middle of first finger. Lining to be of heavy Italian cloth and striped sateen sleeve lining.

VEST—Single-breasted; no collar; raw edge; double-stitched one-half edge; four pockets outside, none inside. The pockets to have scalloped flaps $2\frac{1}{4}$ inches deep at points, $1\frac{3}{4}$ inches between points. Vest to be opened no more than fourteen inches from center to back and closed with six gilt buttons.

TROUSERS—Two top, two hip and one fob or watch pocket; sewed down lap seam three-eighths of an inch; width of trousers to be one inch smaller at bottom than at knee.

SHIRT—Linen or muslin, with standing collar.

CRAVAT—A narrow necktie or bow of black silk, not less than three-quarters of an inch in width, tied in a flat knot in front, the end to extend not more than three inches from the knot.

FIRST AND SECOND ASSISTANT CHIEF ENGINEERS AND BATTALION CHIEFS.

COAT.—To be double-breasted, square cut; to button to neck; raw edge, $\frac{3}{8}$ -inch double-stitched; two lower and one upper pocket, with scalloped flaps $3\frac{1}{2}$ inches deep at point; two inside pockets; two rows of buttons, six in each

row; sleeve to be stitched to a point from $3\frac{1}{2}$ to 6 inches; four buttons on each sleeve; open cuffs; lengths to middle of first finger; collar two inches all around; flaps to be sewed on outside of coat.

CAPTAINS AND LIEUTENANTS OF COMPANIES AND OPERATORS.

Same as above, with the exception that there shall be two rows of buttons, five in each row, placed equi-distant to within $8\frac{1}{2}$ inches of bottom of coat. Buttons to be of white metal; no outside pockets; three buttons on each sleeve; coat to be made to be worn buttoned up.

VEST same as specified for officers, with the exception that the two upper pockets are finished with welts one inch deep.

SHIRTS same as specified below.

ENGINEERS, DRIVERS, STOKERS, HOSEMEN, TILLERMEN AND TRUCKMEN.

COAT to be single-breasted, square cut, buttoned close to neck, with six buttons; to be finished raw edges, double-stitched one-half inch, plain seams, also seam down center of back. Prussian collar, turned down $2\frac{1}{2}$ inches deep in center of back, $2\frac{3}{4}$ inches deep at points in front; no pockets outside, two inside cross-ways. Sleeves to be stitched to a point $3\frac{1}{2}$ inches from edge up to 5 inches, double-stitched; three buttons, facing inside, raw edged and single-stitched. Buttons to be of white metal. The length of coat to be the middle knuckle of first finger.

TROUSERS same as specified for officers.

VEST same as specified for officers, with the exception that the two upper pockets are finished with welts one inch deep. All buttons on coat and vest to be fastened in with rings.

SHIRTS blue flannel, collar $4\frac{1}{2}$ inches deep at points, $2\frac{1}{2}$ inches at back when finished; three rows of stitching. Collar band three-quarter inch at front and $1\frac{1}{2}$ inches at back. Breast-piece 13 inches long, $2\frac{1}{2}$ inches wide, open $11\frac{1}{2}$ inches; three rows of stitching; four buttons and button-holes. Yoke two points, three rows of stitching. Body and sleeves double-stitched. Cuffs open five inches; long points $7\frac{1}{2}$ inches; short points $5\frac{1}{2}$ inches. Two button-holes, three buttons, three rows of stitching. Silk to be used in all top stitching and buttonholes. Buttons to be first grade white pearl; four holes; twenty-four line. Buttonholes to be hand-made.

CAPS.

Chief Engineer—Twenty-ounce blue cloth, bell crown, $3\frac{3}{8}$ inches high, 2-inch drooping visor, lustrous black mohair braid, $\frac{1}{2}$ -inch gold lace band around cap, $\frac{1}{2}$ -inch gold strap from button to button, one gilt button on each side of cap. Inside band of cap to be solid leather, lining to be of genuine hair cloth, covered with satin, sweatband to be dark Japan leather, 2 inches wide, two japanned metal eyelets on each side of cap for ventilation.

First and Second Assistant Chief Engineers—Same as above, with the exception that gold lace band around cap be $\frac{1}{4}$ -inch wide.

Battalion Chiefs—Same as above, with the exception that there shall be no gold lace band around entire cap, plain black mohair braid around cap, $\frac{1}{2}$ -inch gold strap in front.

Captains of Companies—Same as above, with the exception that there shall be only plain black mohair braid around cap and $\frac{1}{2}$ -inch silver strap in front, with silver buttons.

Lieutenants and Operators—Same as above, with plain black mohair braid around cap, ½-inch black leather strap in front, with two silver buttons.

Engineers, Drivers, Stokers, Hosemen, Tillermen, Truckmen, Pilots and Firemen of Fire Boats—Cap to be same as above, with the exception that visor to be straight instead of drooping, and no mohair braid around cap, ½-inch black leather strap in front, with silver buttons.

All insignia of office and cap devices shall be placed half way between the top of cap and the row of stitching at the upper edge of cap band.

Rain covers required for each cap to be made of rubber gossamer to fit the cap.

REGULATION FIRE HELMET

Chief Engineer.—White leather hat with twelve cones, having a gilded leather front, depending from a gilt-edge head, and attached to the front of the helmet, with the insignia of his rank and the words "Chief Engineer" painted upon it upon a scroll of gold.

First Assistant Chief Engineer.—Same as above, with the words "First Assistant Chief" thereon.

Second Assistant Chief Engineer.—Same as above, with the words "Second Assistant Chief" thereon.

Battalion Chiefs.—Same as above, with the words "Battalion Chief" and number of Battalion District designated thereon.

Captains of Engine Companies.—Black leather hats, with eight cones, with number of company and rank of office on white leather front.

Lieutenants of Engine Companies.—Same as above.

Hosemen.—Black leather hats, with eight cones, and name of company on black front.

Truck Companies.—Red and white leather hats, with eight cones.

Chiefs' Operators—Black leather hats, with eight cones, white letters on red background, with word "Operator" and number of battalion or rank of Chief thereon.

REPORT

OF THE

Board of Fire Pension Fund Commissioners

San Francisco, August 1, 1911.

To the Honorable P. H. McCarthy,
Mayor of the City and County of San Francisco.

Sir:—In compliance with Article XVI, Section 9 of the Charter of the City and County of San Francisco, the Board of Fire Pension Fund Commissioners herewith present and submit their report for the fiscal year ending June 30th, 1911.

ORGANIZATION.

The Board of Fire Pension Fund Commissioners, as now constituted, consist of four members and a secretary, viz.:

JAMES E. DILLON	Term expires January 8, 1915
JOHN DONOHOE	Term expires January 8, 1913
EUGENE E. PFAEFFLE	Term expires January 8, 1914
LORENZO D. BATCHELOR	Term expires January 8, 1912
H. L. KEEFE	Secretary

During the year the following named members of the Fire Department were pensioned under the provisions of Article 9, Chapter 7, Section 4 of the Charter, viz.:

John Mitchell, Hoseman Engine Co. No. 39, injured while in the performance of duty. Pensioned June 30th, 1910, effective from July 1st, 1910.

August Banker, Hoseman Engine Co. No. 28, injured while in the performance of duty. Pensioned June 30th, 1910, effective from July 1st, 1910.

Edward McConigle, Hoseman Engine Co. No. 32, injured while in the performance of duty. Pensioned June 30th, 1910, effective from July 1st, 1910.

John J. Quinn, Hoseman Engine Co. No. 9, injured while in the performance of duty. Pensioned on July 14th, 1910, effective from July 16th, 1910.

Mrs. Sarah Hayden, widow of Thomas Hayden, Stoker Engine Co. No. 4, who received injuries while the performance of duty from which he died on December 6th, 1908. Pensioned on August 4th, 1910, effective from July 1st, 1910, date of application for same.

Lemuel Rudolph, Hoseman Engine Co. No. 22, injured while in the performance of duty. Pensioned August 4th, 1910, effective from August 1st, 1910.

Mrs. Anna Wright, widow of Michael Dennis Wright, Truckman Truck Co. No. 9, injured while in the performance of duty from which he died on the 30th of November, 1910. Pensioned April 3rd, 1911, effective from April 1st, 1911.

James T. Cavanagh, Hoseman on Fire Boat Dennis T. Sullivan, injured while in the performance of duty on March 26th, 1910. Pensioned May 22nd, 1911, effective from June 1st, 1911.

During the year the following members of the Fire Department were retired under the provisions of the Charter, Section 3, Chapter 7, Article 9, viz.:

Alfred Florance, Hoseman Engine Co. No. 24, who had been a member of the Fire Department for more than twenty-five years. Pensioned June 30th, 1910, effective from July 1st, 1910.

Henry F. Horn, Battalion Chief, who had been a member of the Fire Department for more than twenty-five years. Pensioned June 30th, 1910, effective from July 1st, 1910.

J. Reimers, Hoseman Engine Co. No. 18, who had been a member of the Fire Department for more than twenty-five years. Pensioned June 30th, 1910, effective July 1st, 1910.

Charles F. Smith, Hoseman Engine Co. No. 30, who had been a member of the Fire Department for more than twenty-five years. Pensioned July 7th, 1910, effective July 8th, 1910.

Henry H. Gorter, Battalion Chief, who had been a member of the Fire Department for twenty-eight years. Pensioned August 25th, 1910, effective from August 1st, 1910, date of application for same.

Louis Kiehl, Engineer, Engine Co. No. 34, who had been a member of the Fire Department for twenty-five years. Pensioned October 3rd, 1910, effective October 4th, 1910.

DISBURSEMENTS

Salaries of Justices of the Peace (five at \$3,600.00 each)	18,000.00	
Salaries of clerk and five assistants.....	9,825.00	27,825.00
Excess of disbursements over receipts.....		\$757.25

Respectfully submitted,

GEO. S. McCOMB, Justices' Clerk.

REPORT

OF THE

Board of Trustees of the Exempt Firemen's Relief Appropriation

Hall of Veteran Firemen of San Francisco,
368 Fell Street.
San Francisco, July, 1911.

Honorable P. H. McCarthy,
Mayor of the City and County of San Francisco.

Sir:—In compliance with Charter requirements, we, the undersigned members of the Board of Trustees, make this our annual report, showing the management and final disposition of the fund placed at our disposal for the fiscal year 1910-1911 for the relief of old and infirm exempt firemen, that rendered service in the old Volunteer Fire Department of San Francisco previous to December 3, 1866.

In awarding the allowances to these old men we exercised our best judgment and discretion. The whole appropriation, with the exception of an annual allowance for office stationery of five dollars, was applied to the relief of the living and burial of the dead.

We are allowed by the ordinance a small amount annually (not named) for office rent, but owing to the courtesy and generosity of the Veteran Firemen, we are exempted from this. In fact, we deem ourselves an economical branch of the municipal government. We again most respectfully call your attention to the annual tabulated form for details, showing the names of beneficiaries, together with their age in years and the names of the companies in which they rendered service and from which they became Exempt Firemen.

The total number that became exempt between the years 1850 and 1866 both inclusive) was 1,290. During the fiscal year ending June 30, 1911, the following named members died, to wit: Charles Schultz, July, 1910; Pincus Harris, September, 1910; Orlando Fuller, November, 1910; August Browning, February, 1911; Thomas Kearney, May, 1911; John C. Carson, September, 1910; leaving 115 survivors. This may not be accurate, as we may not be able to locate that number, but it is as near accuracy as can be ascertained. Should your Honor deem it necessary to call for any further details as to our conduct in the distribution of the fund, we are ready to answer. All of which is most respectfully submitted.

HENRY D. HUDSON, President,
JAMES GRADY,

Attest: JAMES O'DONNELL,
Secretary.

JOHN J. MUNDWYLER,
D. A. FINN,

Trustees of the Exempt Firemen's Relief Appropriation.

JAMES O'DONNELL, Secretary.

Board of Public Works

San Francisco, October 28, 1911.

Hon. P. H. McCarthy, Mayor of the
City and County of San Francisco.

Dear Sir:—In compliance with the provisions of Section 9, of Article XVI of the Charter of the City and County of San Francisco, there is herewith rendered a full report showing the operations of the Department of Public Works for the fiscal year ending June 30, 1911.

Respectfully,

WM. A. NEWSOM, Commissioner,
C. S. LAUMEISTER, Commissioner,
MICHAEL CASEY, Commissioner and President.

Attest: JOS. L. McCORMICK, Secretary.

REPORT OF BUREAU OF ENGINEERING.

San Francisco, September 27, 1911.

The Honorable, The Board of Public Works,
Of the City and County of San Francisco.

Gentlemen: In compliance with the Charter provisions, I submit the following report of the operations of the Bureau of Engineering for the fiscal year 1910-1911. The work under this Bureau has been the design and construction of works necessary to rehabilitate the City and to put it in the fore of American cities.

AUXILIARY HIGH PRESSURE SYSTEM FOR FIRE PROTECTION.

During the past year nearly all materials for the Auxiliary High Pressure Water System for fire protection have been delivered. Pumping Station No. 1 at Second and Townsend Streets is approaching completion, the mechanical equipment is being installed and the Bay connection well under way. Pipe laying has not progressed rapidly by reason of the failure in several instances of contractors and their bondsmen to perform the work undertaken by them. The expenditures on the work done during the fiscal year amounted to \$817,530.44, bringing the total to date to \$3,013,178.32. The details of this work are shown in the report upon this division of the work.

SEWER SYSTEM.

Under this head two bond issues have been authorized; (1) that of November, 1903, and (2) that of May, 1908.

Under the former forty-eight contracts have been entered into and forty-four completed. The remaining four are nearly completed. The total value of the work completed to July 1st, 1911, under the Bond Issue of 1903, is \$897,821.15, of which value \$168,467.12 has been completed during the past fiscal year and \$629,354.08 previously.

Under the Bond Issue of 1908, thirty-two contracts have been entered into and eighteen completed. Total work to the value of \$2,204,842.42 has been completed, of which \$1,128,157.65 has been completed during the past fiscal year. In the body of the report the details of these expenditures are fully set forth.

INCINERATING PLANTS.

Contracts for two incinerating plants of the most modern and efficient type were awarded to the Destructor Company on November 28, 1910, for \$257,210.00. As soon as the details of these plants could be worked out the final plans and specifications for the buildings were commenced. These are nearly ready to let and the furnace castings are being made.

PHYSICAL AND CHEMICAL LABORATORY.

The control which accurate and numerous tests gives to work is evidenced in all divisions of this Bureau. Tests numbering 13,075, at an average cost of 56.2 cents each, have been made. The total expenditures for the Laboratory

have been \$7,352.32. Each class of tests, their number and full data, is given in the body of the report in tabular form.

STREET AND SEWER CONSTRUCTION.

The total cost of improvements under this division of the work has been \$1,330,219.43, performed under 512 private and 94 public contracts, as shown in detail in the body of the report.

STREET AND LOT SURVEYS.

The work of the Division of Street and Lot Surveys has been the restoration of lines and grades throughout the City and particularly the completion of work in the following details:

The fifty vara district, the 100 vara district, Reis Tract, University Mound, Lake View, Garden Tract, Belle Roche City, Pope Estate, Alms House, Ben Franklin, Sunny Dale, Sunny Vale, Soms Tract, and a portion of the Market Street Homestead. This work has required highly accurate surveys, aggregating in length 1,712.57 miles.

The receipts for Street and Lot Surveys aggregated \$24,459.50, which amount has been paid to the Treasurer. 951 grades have been established or altered which may be published as a supplement to the official grade book. The details of this work are fully given in the body of the report.

WATER SUPPLY DEVELOPMENT AND INVESTIGATION.

Work under this division has been greatly retarded for the reasons later set forth.

Rights and properties around Lake Eleanor have been purchased at \$400,000, and additional lands and properties essential to the development of the Tuolumne Supply are under option at \$600,000 with interest at 6 per cent for the first year and an agreed addition for the second year, both to be expended in development work. The closing of this option was recommended to be accomplished on February 11, 1911, but certain minor legal points and petty objections from several sources have at this date prevented final action.

This office has been called upon to undertake adjustments looking to the purchase of the Spring Valley Water Company's properties, Appendix I.

A committee, consisting of the President of the Board of Public Works, Consulting Engineer Freeman, and the City Engineer, has this matter under consideration.

There was also referred to this office for report the proposition of the Sierra Blue Lakes Water and Power Company to sell its filings, claims and properties, to the City for \$6,000,000. This report is given in Appendix II.

The staff of this Bureau is appended. To these officers and employees the City is indebted for faithful service, which is shown in the high character of the improvements throughout the City.

Respectfully submitted,

MARSDEN MANSON, City Engineer.

AUXILIARY HIGH PRESSURE WATER SUPPLY SYSTEM FOR FIRE
PROTECTION.

Loren E. Hunt, Assistant Engineer in charge of construction.

Thos. W. Ranson, Consulting Engineer in charge of Mechanical Eng.

Under the Bond Issue authorized May 11, 1908, sixty-three (63) contracts aggregating \$3,912,236.61 have been entered into for the construction of the Auxiliary Water Supply System for Fire Protection; thirty-two (32) of these contracts have been satisfactorily completed and the work accepted. At the beginning of the fiscal year 1910-1911, the estimated value of the work completed under this Bond Issue was \$2,195,647.88. During the fiscal year just passed work was completed to the amount of \$817,530.44, making a total value of the work completed under this Bond Issue on July 1, 1911, of \$3,013,178.32.

In the subjoined tables the location of the work, the name of the Contractor, the amount of each contract and the date of acceptance of the completed work are tabulated for each contract. A detailed statement of the recent work completed, under way and in preparation for immediate letting, with a description of the various divisions of the system which have been constructed under the Bond Issue of 1908, follows:

CONTRACTS COMPLETED.

CONTRACT NO. 1.—For the construction of two Fire Boats, the David Scannell and Dennis T. Sullivan.

Contract awarded October 21, 1908, to the Risdon Iron & Locomotive Works.

The construction and equipment of these fire boats has been completed and a total of \$279,618.61 was paid the Contractor. The work under this contract was accepted January 7, 1910.

CONTRACT NO. 2.—For the construction of one reinforced concrete fire cistern adjacent to the intersection of Mission and West Mission Streets.

Contract awarded to the American Construction Company October 9, 1908.

The work under this contract has been completed. A total of \$4,244.71 paid the Contractor. This work was accepted April 2, 1909.

CONTRACT NO. 3.—For the construction of one reinforced concrete fire cistern adjacent to the crossing of Battery and Bush Streets.

Contract awarded to the American Construction Company October 9, 1908.

A total of \$5,232.06 was paid the Contractor for this work. The work under this contract was accepted April 7, 1909.

CONTRACT NO. 4.—For the construction of one reinforced concrete fire cistern in Market Street opposite the termination of Van Ness Avenue.

Contract awarded to the Healy-Tibbitts Construction Company October 9, 1908. The work under this contract was accepted April 7, 1909. A total of \$4,236.79 was paid the Contractor.

CONTRACT NO. 5.—For the construction of two reinforced concrete fire cisterns one each in or adjacent to the crossings of Plymouth and Sadowa Streets and Berkshire and Diamond Streets.

Contract awarded to C. Coghill October 14, 1908. The work under this contract was accepted March 2, 1910. A total of \$7,293.25 was paid the Contractor.

CONTRACT NO. 6.—For the construction of three reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

- 5th Avenue and I Street.
- 9th Avenue and J Street.
- 47th Avenue and J Street.

This contract was awarded to the Keystone Construction Company on October 14, 1908. The work was accepted April 4, 1910. A total of \$11,461.37 was paid the Contractor.

CONTRACT NO. 7.—For the construction of four reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

- Van Ness and Golden Gate Avenues.
- Van Ness Avenue and Washington Street.
- Sutter and Octavia Streets.
- Fulton and Laguna Streets.

This contract was awarded to the Healy-Tibbitts Construction Company November 4, 1908. The work under this contract was accepted April 4, 1910. A total of \$15,622.02 was paid the Contractor.

CONTRACT NO. 8.—For the construction of five reinforced concrete fire cisterns and appurtenances in or adjacent to the following crossings:

- 23rd and Church Streets.
- Hill and Noe Streets.
- 24th and Noe Streets.
- 29th and Noe Streets.
- 21st and Eureka Streets.

This contract was awarded to P. H. Mahoney on November 27, 1908.

Five fire cisterns, together with the iron-stone pipe sewers and appurtenances, were constructed under this contract. The work under this contract was accepted February 21, 1910. A total of \$20,725.88 was paid the Contractor.

CONTRACT NO. 9.—For the construction of four reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

- 20th and Connecticut Streets.
- 8th and Townsend Streets.
- 15th and Kansas Streets.
- Precita Avenue and Alabama Street.

This contract was awarded to J. A. Dowling on November 30, 1908. This work included the construction of four reinforced concrete fire cisterns, together with iron-stone pipe sewers and appurtenances. The work was accepted June 10, 1910. A total of \$19,251.39 was paid the Contractor.

CONTRACT NO. 10.—For the construction of five reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

- Pacific Avenue and Baker Street.
- 1st Avenue and Clement Street.
- Commonwealth Avenue and California Street.
- Clay and Laurel Streets.
- 5th and Point Lobos Avenues.

This contract was awarded to the Keystone Construction Company on December 2, 1908. Five reinforced concrete fire cisterns were so constructed under this contract. The work was accepted February 25, 1910. A total of \$21,918.02 was paid the Contractor.

CONTRACT NO. 11.—For the construction of five reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

Laguna and Union Streets.
California and Buchanan Streets.
Greenwich and Webster Streets.
Vallejo and Webster Streets.
Scott Street and Broadway.

This contract was awarded to Healy-Tibbitts Construction Company. Five reinforced concrete fire cisterns together with the iron-pipe sewers and appurtenances were constructed under this contract. The work was accepted November 29, 1909. A total of \$21,416.22 was paid the Contractor.

CONTRACT NO. 12.—For the construction of five reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

Webster and Waller Streets.
Broderick and Post Streets.
Buena Vista Avenue and South Broderick Street.
19th and Diamond Streets.
Laguna Street and Golden Gate Avenue.

This contract was awarded to Flinn & Treacy. Under this contract five reinforced concrete fire cisterns, together with iron-stone pipe sewers and appurtenances, were constructed. The work was accepted March 21, 1910. A total of \$19,456.25 was paid the Contractor.

CONTRACT NO. 13.—For furnishing and delivering multi-stage turbine pumps and steam turbines.

Contract awarded to Byron Jackson Iron Works, December 7, 1908 for the estimated sum of \$120,000.

Ninety-nine per cent of the work under this contract has been completed. This includes all the work under this contract, except the supervision of the erecting and testing of the pumps and steam turbines upon their foundations in the Pumping Station.

CONTRACT NO. 14.—For the construction of seven reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

Beale and Howard Streets.
1st and Howard Streets.
4th and Harrison Streets.
4th and Bryant Streets.
5th and Bryant Streets.
5th and Harrison Streets.
5th and Bluxome Streets.

This contract was awarded to Cotton Brothers & Co., March 22, 1909. Seven reinforced concrete fire cisterns, together with iron-stone pipe sewers and appurtenances were constructed under this contract. The work was accepted June 22, 1910. A total of \$34,840.17 was paid the Contractor.

CONTRACT NO. 15.—For the construction of seven reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

5th and Folsom Streets.
6th and Howard Streets.
6th and Folsom Streets.
6th and Harrison Streets.
7th and Mission Streets.
7th and Howard Streets.
8th and Brannan Streets.

This contract was awarded to F. H. Dahnke, March 22, 1909. Seven reinforced concrete fire cisterns, together with iron-stone pipe sewers and appurtenances, were constructed under this contract. The work was accepted June 22, 1910. A total of \$30,829.49 was paid the Contractor.

CONTRACT NO. 16.—For furnishing and delivering one standard gauge Steam Locomotive Crane.

Contract awarded to Norman B. Livermore, May 19, 1909.

The standard gauge Steam Locomotive Crane has been installed and is in use at the Pipe Yard at Sixth and Hubbell Streets. A total of \$4,210 was paid the Contractor.

CONTRACT NO. 17.—For furnishing and delivering cast iron water pipe.

This contract was awarded to the United States Cast Iron Pipe and Foundry Company, March 24, 1909. A total of 39,686.399 tons of cast iron pipe were manufactured under this contract. The work was accepted October 21, 1910. A total of \$835,864.14 was paid the Contractor.

CONTRACT NO. 18.—For the construction and installation of Pipe Testing Plant No. 1 at Sixth and Hubbell Streets.

Contract awarded to the Pacific Rolling Mills Co., May 5, 1909.

The Pipe Testing Plant was installed at the Pipe Yard at Sixth and Hubbell Streets and has been used in testing high pressure cast iron water pipe upon its delivery at the Pipe Yard. The work under this contract was accepted July 31, 1909. A total of \$7,917 was paid the Contractor.

CONTRACT NO. 20.—For the construction of six reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

Duboce Avenue and Sanchez Street.
14th and Castro Streets.
Frederick Street and Masonic Avenue.
Frederick and Shrader Streets.
Belmont Avenue and Willard Street.
Douglas and Elizabeth Streets.

This contract was awarded to the Buena Vista Improvement Company. Six reinforced concrete fire cisterns, together with iron-stone pipe sewers and appurtenances, were constructed under this contract. The work was accepted June 8, 1910. A total of \$23,621.90 was paid the Contractor.

CONTRACT NO. 21.—For the construction of seven reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

Mariposa and Missouri Streets.
22nd and York Streets.
23rd and Kansas Streets.
25th Street and San Bruno Avenue.
26th and Bryant Streets.
Army Street and Holiday Avenue.
22nd Street and Pennsylvania Avenue.

This contract was awarded to Healy-Tibbitts Construction Company May 17, 1909. Seven reinforced concrete fire cisterns, together with iron-stone pipe sewers and appurtenances, were constructed under this contract. The work was accepted June 10, 1910. A total of \$39,249.17 was paid the Contractor.

CONTRACT NO. 22.—For the construction of six reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

13th and Folsom Streets.
 15th and Capp Streets.
 18th and Harrison Streets.
 18th and Capp Streets.
 19th and York Streets.
 20th and Kansas Streets.

This contract was awarded to the Keystone Construction Company on August 13, 1909. Six reinforced concrete fire cisterns, together with iron-stone pipe sewers and appurtenances, were constructed under this contract. The work was accepted April 25, 1910. A total \$30,880.18 was paid the Contractor.

CONTRACT NO. 24.—For furnishing and delivering cast steel specials. Contract awarded to Chas. C. Moore & Co., September 3, 1909.

Under this contract 10,991 cast steel sleeves, 762 reducers, 925 cast steel T's and Crosses, and 653 cast steel elbows were furnished and delivered.

The work under this contract was accepted April 25, 1910. A total of \$263,454.63 was paid the Contractor.

CONTRACT NO. 25.—For furnishing and delivering twelve hundred fire hydrants.

This contract was awarded to the Union Iron Works Co., June 14, 1909. Under this contract 1,140 fire hydrants were furnished and delivered to the Pipe Yard at Sixth and Hubbell Streets. The work was accepted June 22, 1910. A total of \$123,704.85 was paid the Contractor.

CONTRACT NO. 28.—For the construction of a fence around the Pipe Yard. This contract was awarded to Jas. D. McSheehy on May 24, 1909.

A total of \$1,247 was paid the Contractor for the construction of a fence around the Pipe Yard at Sixth and Hubbell Streets.

CONTRACT NO. 35.—For the construction of a Fire Boat Station at the easterly end of Harrison Street Pier.

Contract awarded to Ramsden & Flamsberg, September 10, 1909.

The work under this contract was accepted December 1, 1909. A total of \$5,678 was paid the Contractor.

CONTRACT NO. 37.—For the construction of sixteen reinforced concrete fire cisterns, one each in or adjacent to the following crossings:

Baker and Greenwich Streets.
 Broderick and Green Streets.
 Steiner and Union Streets.
 Divisadero and Washington Streets.
 Baker and Sacramento Streets.
 Lyon and Bush Streets.
 Divisadero and Eddy Streets.
 Fulton and Broderick Streets.
 Divisadero and Fell Streets.
 Parker Avenue and Fulton Street.
 Masonic Avenue and Oak Street.
 Page and Shrader Streets.
 Alma Avenue and Cole Street.
 28th and Diamond Streets.
 Glenn and Surrey Streets.
 Vienna Street and Persia Avenue.

This contract was awarded to the Metropolis Construction Company on November 17, 1909. Under this contract sixteen reinforced concrete fire cisterns, together with sewers and appurtenances, were constructed. The work under this

contract was accepted September 7, 1910, and a total of \$75,422.58 was paid the Contractor.

CONTRACT NO. 38.—For furnishing and erecting an Electric Traveling Hoist at the Municipal Pipe Yard.

This contract was awarded to Butte Engineering & Electrical Company on October 20, 1909. The Electric Traveling Hoist was installed and has been used in the storing and delivering of cast iron pipe at the Municipal Pipe Yard at Sixth and Hubbell Streets. The work under this contract was accepted December 29, 1909. A total of \$2,300 was paid the Contractor.

CONTRACT NO. 43.—For the construction of a reinforced concrete swimming tank in the North Beach Playground.

This contract was awarded to Wm. Bruce, July 8th, 1910. Under this contract a reinforced concrete swimming tank was constructed in the North Beach Playground. A sump was constructed and connected with the swimming tank so that the water in the tank could be used for fire protection. This work was accepted June 5, 1911. A total of \$6,517.36 was paid the Contractor.

CONTRACT NO. 45.—For furnishing and delivering bolts, tie rods, nuts and washers. Awarded to the Union Iron Works Company of August 12, 1910.

The Union Iron Works Company have finished and delivered bolts, tie rods, nuts and washers having a total weight of 228,890 pounds, of which the estimated value of \$11,067.51 which has paid to the Union Machine Company.

CONTRACT NO. 52.—For furnishing and delivering Pig Lead.

Contract awarded to the Selby Smelting & Lead Company, September 7, 1910.

90,444 pounds of Pig Lead were furnished and delivered by the Contractor. The work was accepted October 21, 1910. A total of \$4,150 was paid the Contractor.

CONTRACT NO. 53.—For furnishing and delivering creosoted wooden duct and cover plank.

Contract awarded to the Western Electric Company, October 14, 1910.

90,000 lineal feet of creosoted wooden duct and 36,836 B. M. of cover plank were furnished and delivered by the Contractor. The work was accepted May 17, 1911. A total of \$10,496.14 was paid the Contractor.

CONTRACT NO. 56.—For furnishing and delivering Pig Lead.

Contract awarded to the Selby Smelting & Lead Company, October 31, 1910.

360.052 pounds of Pig Lead were furnished and delivered. A total of \$16,598.40 was paid the Contractor.

CONTRACT NO. 27.—For the construction of Pumping Station No. 1, at Second and Townsend Streets.

SECTION A.—General Contract. Awarded to the Healy-Tibbitts Construction Company on February 11, 1910, for \$138,300.00

On July 1, 1910, 50% of the excavating for the site of this pumping station, or about 10% of all of the work to be done under this contract, had been completed.

During the past year the remaining excavation, with the exception of the venturi meter chamber under the sidewalk, has been completed.

The concrete foundations, floors, walls and roof of the building have been completed; five steel tanks for the storage

BOARD OF PUBLIC WORKS

of fuel oil have been finished and built into reinforced concrete foundations; 30% of the electrical work has been completed; 65% of the metal door and window frames and the interior trim of the building has been finished; and 50% of the ornamental iron work is completed. The water tanks under the floor of the pumping station have been coated with four coats of cement wash and are now ready for use.

It is estimated that 81% of the work contemplated under this contract has been completed.

Payments amounting to \$73,640.10 have been awarded to Healy-Tibbitts Construction Company to date.

SECTION B.—Structural steel and iron work. Awarded to Dyer Brothers on March 2, 1910, for \$60,000.00.

On account of changes made by the Board of Public Works in the plans for this contract, the price was reduced to \$57,363.65.

On July 1, 1910, 60% of the work contemplated had been completed. This included the assembling and riveting of the columns, roof trusses and floor beams.

During the past year the remainder of the contract has been finished, with the exception of the painting of the roof trusses, which it is estimated will cost about \$480.00.

Payments amounting to \$53,850.37 have been made to Dyer Brothers, leaving a balance of \$3,513.28 which is withheld to insure Dyer Brothers completing the above painting.

SECTION C.—Tile work. Awarded to Mangrum & Otter, Inc., December 15, 1909, for \$6,284.00.

The material for this tile work has been ordered from the factory, but the building has not yet reached such a stage of completion that the Contractor can commence the work of installing this tile work.

SECTION D.—Sheet Copper Roofing. Awarded to the San Francisco Cornice Company on January 7, 1910, by the Board of Public Works for \$3,295.00.

No work has been done on this contract as yet.

SECTION E.—Asphalt and Gravel Roofing. Awarded to Ford & Mallott, December 15, 1909, for \$555.00.

No work has been under this contract as yet.

SECTION F.—Rolling Doors and Shutters. Awarded to the Lilley & Thurston Company, on December 15, 1909, for \$4,630.00.

All of the material for this work is on the ground, and the brackets and shutters have been installed in place.

It is estimated that the Lilley and Thurston Company have completed 85% of the contract.

No payments have as yet been made on this contract.

SECTION G.—Plumbing and Gas Work. Awarded to Robert Dalziel, Jr. Company on December 15, 1909, for \$2,997.00.

Second and Townsend Street Pumping Station—View of Top Looking North, June 26, 1911.

Second and Townsend Street Pumping Station—View of North and East Wall, June 13, 1911.

Second and Townsend Street Pumping Station—View of Inside South Wall, May 15, 1911.

Second and Townsend Street Pumping Station—View of Inside Looking North, June 8, 1911.

Excavating the Site for the Twin Peaks Reservoir.

Construction of Reinforced Concrete Lining for the Twin Peaks Reservoir.

Eighteen-inch Horizontal Gate Valve for the High Pressure Fire System.

All the roof water drain pipes and fittings; all the sewer drain pipes and fittings to connect to the main sewer in Stanford Street; all of the water supply pipes and fittings and all of the gas pipes and fittings up to the fixtures and appliances which are to be connected therewith have been installed, tested and found satisfactory.

It is estimated that 80% of the work contemplated under this contract has been completed.

Payments amounting to \$1,177.50 have been made to the Robert Dalziel, Jr. Company.

SECTION H.—Mechanical Equipment. Awarded to Chas. C. Moore & Company, Engineers, December 31, 1909, for \$190,000.00.

On July 1, 1910, 10% of the work under this contract has been completed. This included the partial construction of gate valves and boilers.

During the past year, all of the material for this work has been completed and delivered at San Francisco and is now being installed in the Pumping Station.

It is estimated that 75% of the work contemplated under this contract has been completed.

Payments amounting to \$103,552.50 have been made to the contractor.

CONTRACT NO. 29.—For the construction of the Twin Peaks Reservoir. Contract awarded to the Healy-Tibbitts Construction Company on December 8, 1909, for the sum of \$158,143.00. Time allowed 330 days.

Payments amounting to \$80,801.53 have been made to the contractor to July 1, 1911.

A sub-contract for the construction of the structural steel and iron work for this reservoir was entered into by the Healy-Tibbitts Construction Company with the Vulcan Iron Works for the sum of \$5,100.00.

All of this work, with the exception of the picket fence, has been completed, and all of the material for this fence is in the shop being assembled.

It is estimated that 95% of this sub-contract has been finished.

All of the special fittings and pipes for this reservoir were ordered from the Enterprise Foundry Company under Contract No. 39, and have been completed and delivered at the Reservoir. Their weight and cost is included under Contract No. 39.

CONTRACT NO. 36.—For furnishing, testing and delivering Gate Valves.

SECTION A.—For furnishing, testing and delivering 1200 8" Gate Valves. Awarded to the Pittsburg Valve Foundry and Construction Company for \$63,360.00.

Under the option provided in the specifications, the Board of Public Works reduced the number of gate valves ordered under this contract to 1,140. On July 1, 1910, 793 gate valves had been shipped. The remaining 347 8-inch gate valves were finished and the last of them shipped on August 23, 1910. The value of the work completed under this contract is estimated at \$60,192.00, of which \$57,182.40 has been paid to the contractor and the balance is withheld until one year after the completion of the contract to insure the fulfillment of the Pittsburg Valve Foundry and Construction Company's guarantee of the material and workmanship.

SECTION B.—Awarded to the Pelton Water Wheel Company, for furnishing, testing and delivering 890 10-inch gate valves, for \$91,575.70.

Under the option provided in the contract, the Board of Public Works reduced the number of gate valves to be delivered under this contract to 810. On July 1, 1910, 530 gate valves had been finished and delivered. The remaining 280 gate valves were finished and the last of them delivered on September 9, 1910.

The total value of the work completed under this contract is \$82,426.90, of which \$78,305.55 has been paid to the Pelton Water Wheel Company and balance has been withheld until one year after the shipment of the last gate valve, to insure the fulfillment by the Pelton Water Wheel Company of their guarantee of the workmanship and material for these gate valves.

SECTION C.—For furnishing, testing and delivering 310 12-inch gate valves. Awarded to the Pittsburg Valve Foundry and Construction Company for \$59,584.00.

Under the option provided in the specifications, the Board of Public Works reduced the number of gate valves to be delivered to 279. On July 1, 1910, 192 of these gate valves had been finished and delivered. The remaining 87 gate valves were finished and the last of them shipped on July 29, 1910.

The total value of this work is estimated at \$49,643.20, of which \$47,161.04 has been paid to the contractor and the balance withheld until one year after the delivery of the last gate valve, to insure the fulfillment by the Contractor of his guarantee of the workmanship and material.

SECTION D.—For furnishing, testing and delivering 70 14-inch gate valves. Awarded to the Pittsburg Valve Foundry and Construction Company.

Under the option provided in the contract, the Board of Public Works reduced the number of gate valves to be delivered to 63. All of these valves had been shipped on July 1, 1910. The total value of the work performed under this contract is \$15,179.00, of which \$14,420.05 has been paid to the Contractor and the balance is being withheld until one year after the shipment of the last gate valve to insure the fulfillment on the part of the Contractor of his guarantee as to the workmanship and material.

SECTION E.—For furnishing, testing and delivering 260 16-inch gate valves. Awarded to the Union Machine Co.

Under the option provided in the contract, the Board of Public Works reduced the number of gate valves to be delivered under this contract to 234, for which the Union Machine Co. are to receive, when completed, \$76,713.00.

On July 1, 1910, the Union Machine Company had finished and shipped 62 gate valves. Since that time 71 gate valves have been completed and delivered at the Municipal Pipe Yard and 101 gate valves have been completed with the exception of fitting the bypasses and headgear and delivered at the Municipal Pipe Yard.

The value of the work completed is estimated at \$89,693.50, of which \$66,208.82 has been paid to the Contractor and the balance withheld to insure his completion of the contract.

SECTION F.—For furnishing, testing and delivering 60 18-inch gate valves. Awarded to the Union Machine Company for \$26,760.00.

In accordance with the option provided in the contract the Board of Public Works reduced the number of gate valves to be delivered under this contract to 54, for which the Union Machine Company will receive upon the completion of the contract \$24,084.00.

On July 1, 1910, 20 gate valves had been finished and delivered. Since that time 21 gate valves have been finished and delivered at the Municipal Pipe Yard and 13 gate valves have been finished with the exception of the bypasses and headgear and delivered at the Municipal Pipe Yard. The estimated value of the work completed is \$23,070.00, of which \$21,916.50 has been paid to the Contractor and the balance is being withheld to insure the contractor's completion of the contract.

CONTRACT NO. 39.—For furnishing and delivering 1,000 tons of cast iron specials. Awarded to the Enterprise Foundry Company on April 20, 1910, for \$75.00 per ton of 2,000 pounds.

On July 1, 1910, 230 castings weighing approximately 43 tons, had been finished and delivered at the Municipal Pipe Yard.

During the past year all of the patterns for this work have been completed, and 3,592 castings, weighing 906 tons, have been finished and delivered.

The estimated value of the work completed is \$80,057.41.

Payments amounting to \$74,012.39 have been made to the Contractor on account of this contract.

CONTRACT NO. 40.—For furnishing 600 manhole frames, covers and dust pans. Awarded to the Ajax Brass and Foundry Company for \$54.00 per ton on May 18, 1910.

540 manhole frames, 539 manhole covers and 121 dust pans, weighing 333,785 pounds, have been finished and delivered at the Municipal Pipe Yard. The value of the work which has been completed is \$9,012.19, of which 75%, or \$6,759.14 has been paid to the Contractor.

CONTRACT NO. 41.—For furnishing and delivering 500 cast iron manhole frames, covers and dust pans. Awarded to the Vulcan Iron Works at \$58.40 per ton on June 15, 1910.

418 manhole frames, 399 manhole covers and 311 dust pans, the whole weighing 91,272 pounds, have been finished and delivered at the Municipal Pipe Yard. The estimated value of this work is \$2,665.15, of which 75%, or \$1,999.86, has been paid to the Contractor.

CONTRACT NO. 42.—For furnishing and delivering 1,000 cast iron manhole frames, covers and dust pans. Awarded to the Ajax Brass and Iron Works on June 30, 1910, at \$54.00 per ton of 2,000 pounds.

886 manhole frames, 561 manhole covers and 500 dust pans, the whole weighing 105,093 pounds, have been finished and delivered at the Municipal Pipe Yard. The value of this work is \$2,837.51, of which 75%, or \$2,128.13, has been paid to the Contractor.

CONTRACT NO. 44.—For hauling and laying cast iron high pressure mains, conduits and appurtenances.

This contract was awarded to the Keystone Construction Company, July 8, 1910, for the estimated sum of \$130,260.41. On July 1, 1911, 16 per cent of the work under this contract has been completed. This included the construction of 622 lineal feet of 8-inch bell and spigot cast iron pipe; 32 lineal feet of 10-inch bell and spigot cast iron pipe; 3,756 lineal feet of 12-inch bell and spigot cast iron pipe; 4,652 lineal feet of 14-inch bell and spigot cast iron pipe; 13 lineal feet of 16-inch bell and spigot cast iron pipe; 1,866 lineal feet of 18-inch bell and spigot cast iron pipe; 542 lineal feet of 10-inch double spigot cast iron pipe; 1,666 lineal feet of 12-inch double spigot cast iron pipe; 1,699 lineal feet of 14-inch double spigot cast iron pipe; 28 lineal feet of 16-inch double spigot cast iron pipe, together with the construction of valve vaults and setting gate valves and fire hydrants along the constructed pipe line. 7,906 cubic yards of material were excavated from trenches and 4,199 lineal feet of telephone conduit were constructed. All of this work was constructed in the district bounded by the westerly line of Powell Street, the southeasterly line of Market Street and the Bay of San Francisco.

CONTRACT NO. 46.—For hauling and laying cast iron high pressure mains, conduits and appurtenances.

This contract was awarded to Michael Murphy on April 24, 1911, for the estimated sum of \$107,902.53. On July 1, 1911, 16 per cent of the work under this contract had been completed. This included the construction of 184 lineal feet of 8-inch bell and spigot cast iron pipe; 3,518 lineal feet of 12-inch bell and spigot cast iron pipe; 9,005 lineal feet of 14-inch bell and spigot cast iron pipe; 234 lineal feet of 18-inch bell and spigot cast iron pipe, together with the construction of valve vaults and setting of gate valves and hydrants along the constructed pipe lines. 6,619 cubic yards of material were excavated from trenches and 3,026 lineal feet of telephone conduit were constructed. All of this work was constructed in the district bounded by the westerly line of Van Ness Avenue, the northwesterly line of Market Street, the northerly line of Duboce Avenue, the westerly line of Devisadero Street and the northerly line of Pacific Avenue.

CONTRACT NO. 47.—For hauling and laying cast iron high pressure mains, conduits and appurtenances from the Twin Peaks Reservoir to Scott Street and to Castro Street.

This contract was awarded to the Raisch Improvement Company, July 29, 1910, for the estimated sum of \$44,705.40. On July 1, 1911, 90 per cent of the work under this contract had been completed. This included the construction of 783 lineal feet of 8-inch bell and spigot cast iron pipe; 385 lineal feet of 10-inch bell and spigot cast iron pipe; 1,056 lineal feet of 14-inch bell and spigot cast iron pipe; 17,340 lineal feet of 18-inch bell and spigot cast iron pipe; 3,624 lineal feet of 20-inch bell and spigot cast iron pipe, together with the construction of valve vaults and setting gate valves and fire hydrants along the constructed pipe lines. 12,688 cubic yards of material were excavated from trenches and 15,220 lineal feet of telephone conduit were constructed.

CONTRACT NO. 48.—For hauling and laying cast iron high pressure mains, conduits and appurtenances.

Contract awarded to Oscar Levy on August 12, 1910, for the estimated sum of \$82,743.55. On July 1, 1911, 23 per cent of the work under this contract had been completed. This included the construction of 1,335 lineal feet of 8-inch bell and spigot cast iron pipe; 2,379 lineal feet of 12-inch bell and spigot cast iron pipe; 2,486 lineal feet of 14-inch bell and spigot cast iron pipe; 2,495 lineal feet of 16-inch bell and spigot cast iron pipe; 5,101 lineal feet of 18-inch bell and spigot cast iron pipe; 4,890 lineal feet of 12-inch double spigot

Construction of the 20-inch High Pressure Pipe Lines Near the Twin Peaks Reservoir.

cast iron pipe; 118 lineal feet of 16-inch double spigot cast iron pipe, together with the construction of valve vaults and setting gate valves and fire hydrants along the constructed pipe lines. 8,642 cubic yards of material were excavated from trenches and 5,251 lineal feet of telephone conduit were constructed. All of this work was constructed in the district bounded by the northwesterly line of Market Street, the westerly line of Castro Street, the southerly line of Twenty-ninth Street, the southeasterly line of Mission Street, the southerly line of Twenty-sixth Street, the easterly line of Harrison Street and the northeasterly line of Eleventh Street.

CONTRACT NO. 49.—\$10,000 was made available by the Board of Supervisors for the construction of high pressure pipe lines in Second Street between Townsend and Howard Streets. This work is to be done by day labor under the direction of the Board of Public Works.

Setting a 16-inch Horizontal Gate Valve for the High Pressure Fire System at Thirteenth and Market Streets.

CONTRACT NO. 50.—For hauling and laying cast iron high pressure mains, conduits and appurtenances.

This contract was awarded to Foster & Vogt on September 12, 1910, for the estimated sum of \$102,809.54. On July 1, 1911, 14 per cent of the work under this contract had been completed. This included the construction of 564 lineal feet of 8-inch bell and spigot cast iron pipe; 2,218 lineal feet of 12-inch bell and spigot cast iron pipe; 5,389 lineal feet of 14-inch bell and spigot cast iron pipe; 2,969 lineal feet of 20-inch bell and spigot cast iron pipe, together with the construction of valve vaults and setting of gate valves and fire hydrants along the constructed pipe lines. 5,921 cubic yards of material were

excavated from trenches for the pipe line and 7,419 lineal feet of telephone conduit were constructed. All of this work was constructed in the district bounded by the westerly line of Powell Street the southeasterly line of Market Street and the westerly line of Van Ness Avenue and the Bay of San Francisco.

CONTRACT NO. 54.—For furnishing, testing and delivering 60 blow-off valves. Contract awarded to the Union Machine Company on August 26, 1910, at \$49.25 per valve.

CONTRACT NO. 55.—For furnishing and delivering cast iron water pipe. Contract awarded to the United States Cast Iron Pipe & Foundry Company, September 7, 1910, for the estimated sum of \$79,000.

CONTRACT NO. 57.—For furnishing and delivering bolts, tie rods, nuts and washers. Awarded to the Union Iron Works Company on February 17th, 1911, at \$106.00 per ton of 2,000 pounds. Approximately 20,105 pounds of bolts, having a value of \$1,065.56, have been finished and delivered at the Municipal Pipe Yard. No payments have been made to the Contractor on account of this contract.

CONTRACT NO. 58.—For furnishing and delivering gate and check valves. Contract awarded to the Union Machine Company on February 17th, 1911, for \$11,593.00.

Four 18-inch gate valves are 40% assembled and two 18-inch gate valves are 25% assembled.

It is estimated that the Union Machine Company have completed 70% of the work to be done under this contract.

No payments have as yet been made to the Contractor.

CONTRACT NO. 60.—For the construction of Section "A" of the Intake Tunnel for the Townsend Street Pumping Station.

This contract was awarded to the Healy-Tibbitts Construction Company, April 17, 1911, for the estimated sum of \$34,762. On July 1, 1911, 13 per cent of the work under this contract had been completed. This included the construction of 87 lineal feet of 5-foot circular reinforced concrete intake tunnel.

CONTRACT NO. 61.—For the construction of Section "B" of the Intake Tunnel for the Townsend Street Pumping Station.

This contract was awarded to the Healy-Tibbitts Construction Company, April 7, 1911, for the estimated sum of \$38,134.35. On July 1, 1911, 9 per cent of the work under this contract had been completed. This included the construction of 9 lineal feet of standard section of 5-foot circular reinforced concrete intake, supported on piles, and 5 lineal feet of heavy section of 5-foot circular reinforced concrete intake, supported on piles.

CONTRACT NO. 62.—For furnishing and delivering Pig Lead. This contract was awarded to the Selby Smelting & Lead Company on June 2, 1911, for the estimated sum of \$16,956. The Contractor was allowed 30 days in which to deliver the pig lead to the Pipe Yard at Sixth and Hubbell Streets.

CONTRACTS BEING PREPARED.

CONTRACT NO. 32.—One 500,000 gallon steel tank on property facing Clayton Street, between Seventeenth and Eighteenth Streets.

SECTION A.—For excavating the site, constructing concrete foundations and installing pipes, valves and fittings.

Specifications completed. Bids advertised.

2'6"x3'9" concrete sewer in Sherman Avenue and Sadowa Street from Wyoming Avenue to Plymouth Avenue and a 2'4"x3'6" concrete sewer in Sadowa Street from Plymouth Avenue to Capitol Avenue, together with junction and taper structures and appurtenances. This work was accepted June 1, 1910. A total of \$45,967.76 was paid the Contractor.

3' x 3' 6" Reinforced Concrete Sewer on Reinforced Concrete Supports in Winnepeg Street, between Sherman and Worden Avenues.

For the construction of sewers and appurtenances in 31st Avenue, California to Clement Street; Clement Street, 31st Avenue to 32nd Avenue; and in 32nd Avenue, Clement Street to Point Lobos Avenue.

Contract awarded on December 22, 1909 to Williams & Belser.

The work under this contract included the construction of a 2'6"x3'9" concrete sewer in 31st Avenue and Clement Street from California Street to 32nd Avenue, and a 21" ironstone pipe sewer in Clement Street and 32nd Avenue from 33rd Avenue to Point Lobos Avenue, together with appurtenances. This work was accepted June 3, 1910. A total amount of \$9,251.34 was paid the Contractor for the work.

For the construction of sewers and appurtenances in T Street from 17th Avenue westerly to V Street and 45th Avenue, the cost of which was paid out of the \$180,000 worth of 3½% bonds purchased by the Crocker Estate.

Contract awarded on April 14, 1909 to F. Leffler.

The work under this contract included the construction of a 2'x3' concrete sewer in T Street, between 17th and 21st Avenues, of a 2'6"x3'9" concrete sewer in T Street, in 22nd Avenue and in V Street from 27th to 34th Avenue, of a 6' circular concrete sewer in V Street from 37th to 45th Avenue, together with junction and taper structures and appurtenances.

This work was accepted September 14, 1910. A total amount of \$86,569.30 was paid the Contractor for the work.

For the construction of sewers and appurtenances in Fulton Street, 30th Avenue to 48th Avenue, together with sewers in adjacent streets.

Contract awarded on January 5, 1910 to the Metropolis Construction Co.

Concrete Mixing Plant Used in the Construction of the West Richmond District Sewer in Fulton Street, between 30th and 48th Avenues.

The work under this contract included the construction of a 2'x3' concrete sewer in 39th Avenue, in C Street and in 40th Avenue from B Street to Fulton Street and a 2'x3' concrete sewer in 43rd Avenue from C Street to Fulton Street. The construction of a 2'x3' concrete sewer in Fulton Street between 30th and 32nd Avenues, of a 2'6"x3'9" concrete sewer in Fulton Street between 32nd and 35th Avenues, of a 3'x4'6" concrete sewer in Fulton Street between 35th and 37th Avenues, of a 3'6"x5'3" concrete sewer in Fulton Street between 37th and 43rd Avenues and of a 4'x6' concrete sewer in Fulton Street between 43rd and 48th Avenues, together with taper and junction structures and appurtenances. This work was accepted November 14, 1910. A total amount of \$59,139.75 was paid the Contractor for this work.

For the construction of sewers and appurtenances in Silver Avenue from Vienna to Mission Street; and in Lisbon Street, between Avalon and Silver Avenues.

Contract awarded on June 10, 1910 to Wm. Heafey.

The work constructed under this contract was an 18" ironstone pipe sewer in Lisbon Street, between Avalon and Peru Avenues; an 18" ironstone pipe sewer in Silver Avenue, between Vienna and Congdon Streets; a

21" ironstone pipe sewer in Silver Avenue between Congdon and Lisbon Street and a 2'x3' concrete sewer in Lisbon Street and Silver Avenue from Peru Avenue to Mission Street, together with appurtenances. This work was accepted December 5, 1910. A total amount of \$11,367.90 was paid the Contractor.

For the construction of sewers and appurtenances in Kentucky and Fourth Streets.

Contract awarded on July 8, 1910 to the Metropolis Construction Co.

Under this contract there were constructed a 12" ironstone pipe sewer in Kentucky Street, between 16th and El Dorado Streets, an 18" ironstone pipe sewer in Kentucky Street, between El Dorado and Alameda Streets, a 2'x3' concrete sewer in Kentucky Street between Alameda and 4th Streets, and a 2'6"x3'9" concrete sewer in 4th Street, between Kentucky and Channel Streets, together with taper connections and appurtenances. This work was accepted March 22, 1911. A total of \$32,606.43 was paid the Contractor.

For the construction of sewers and appurtenances in San Jose Avenue, between Regent Street and Sherman Avenue.

Contract awarded on August 31, 1910 to J. W. Flinn.

This work included the construction of a 2'x3' concrete sewer in San Jose Avenue, between Regent Street and Plymouth Avenue, and a 2'4"x3'6" concrete sewer in San Jose Avenue, between Plymouth and Sherman Avenues, together with a taper connection and appurtenances. This work was accepted on December 19, 1910. A total of \$7,589.10 was paid the Contractor.

For the construction of sewers and appurtenances in Somerset Street from Wayland to Woolsey Street; and in Woolsey Street from Somerset to Holyoke Street.

Contract awarded on October 14, 1910 to the Federal Construction Co.

A 2'6"x3'9" concrete sewer together with a junction structure and appurtenances was constructed under this contract. This work was accepted March 8, 1911. A total of \$6,299.40 was paid the Contractor.

For the construction of sewers and appurtenances in Section "A" of the Sunnyside Sewer.

Contract awarded on December 28, 1910 to the Coast Improvement Co.

There were constructed under this contract a 3'6"x5'3" concrete sewer in Santa Rosa Avenue between San Jose and San Gabriel Avenues, and a 4'x6' concrete sewer in Santa Rosa Avenue, between Cayuga and Capistrano Avenues, together with a taper connection and appurtenances. This work was accepted June 5, 1911. A total of \$9,588.21 was paid the Contractor for the work.

For the construction of a Septic Tank in Golden Gate Park.

Contract awarded on November 30, 1910 to L. H. Westdahl.

A septic tank was constructed in Golden Gate Park near the intersection of Lincoln Way and 20th Avenue. This work was accepted February 3, 1911. A total of \$1,222.80 was paid the Contractor.

BOND ISSUE OF 1908.

CONTRACT NO. 1.—For the construction of a sewer in Fulton Street and Divisadero Street, from Masonic Avenue to Grove Street.

Contract awarded on October 18, 1908 to the City Street Improvement Co.

The work under this contract included the construction of a 2'6"x3'9" concrete sewer in Fulton Street, between Masonic and Central Avenues, and the construction of a 3'x4'6" concrete sewer in Fulton Street and Divisadero Street, between Central Avenue and Grove Street, together with ironstone pipe sewers and laterals in adjacent streets. The work was accepted on June 25, 1909. A total of \$25,015.15 was paid the Contractor.

CONTRACT NO. 2.—For the construction of a sewer in 14th Street, between Howard and Harrison Streets, together with the lateral sewers in adjacent streets.

Contract awarded on October 21, 1908 to Peter McHugh.

The work under this contract included the construction of a 6' circular concrete sewer in 14th Street, between Harrison and Howard Streets and the construction of a 2'x3' concrete sewer in Howard Street, between 14th and Erie Streets, together with ironstone pipe sewers in Folsom and Erie Streets and appurtenances. This work was accepted January 17, 1910. A total of \$41,179.23 was paid the Contractor.

CONTRACT NO. 3.—For the construction of the northerly portion of the East Potrero Intercepting Sewer.

Contract awarded on November 27, 1908 to Hanrahan & Ehrhart.

This work included the construction of a 2'x3' concrete sewer in San Bruno Avenue, between Division Street and Alameda Street; of a 3'x4'6" concrete sewer in San Bruno Avenue between Alameda and 16th Streets, and of a 2'4"x3'6" concrete sewer in 16th Street between San Bruno Avenue and Kansas Street. The construction of a 4'6" circular concrete sewer in Rhode Island Street between Alameda and 16th Streets; of a 5' circular concrete sewer in Rhode Island and 17th Streets between 16th and Carolina Streets; of a 3'x4'6" concrete sewer in Carolina Street between 17th and Mariposa Streets; of a 2'6"x3'9" concrete sewer and 24" ironstone pipe sewer in Mariposa Street between Carolina and Arkansas Streets. The construction of a 2'6"x3'9" concrete sewer in 17th Street between Carolina and Texas Streets; of a 2'x3' concrete sewer in 17th Street between Texas and Mississippi Streets; of a 24" ironstone pipe sewer in Mississippi and Mariposa Streets, together with junctions and overflow chambers and appurtenances. This work was accepted June 1, 1910. A total of \$76,236.41 was paid the Contractor.

CONTRACT NO. 4.—For the construction of the southerly portion of the East Potrero Sewer.

Contract awarded on January 29, 1909 to the Eureka Construction Co.

The work under this contract included the construction of a 21" ironstone pipe sewer at 22nd and Mississippi Streets; of a 2'x3' concrete sewer in 22nd Street and Pennsylvania Avenue between Mississippi and 23rd Streets, and of a 2'6"x3'9" concrete sewer at Pennsylvania Avenue and 22nd Street. The construction of a 3'x4'6" concrete sewer in 22nd Street between Iowa and Minnesota Streets; of a 3'6"x5'3" concrete sewer in 22nd Street and in Kentucky Street between Minnesota and 19th Streets; of a 2'6"x3'9" concrete sewer in Kentucky Street and in Mariposa Street between 19th and Minnesota Streets, and of a 2'x3' concrete sewer in Mariposa Street between Minnesota and Indiana Streets. The construction of a 3'x4'6" concrete sewer in Mariposa and Illinois

Streets between Kentucky and 17th Streets; of a 2'6"x3'9" concrete sewer in Illinois Street between 17th and 16th Streets, and of a 6' circular outlet sewer at the foot of Mariposa Street. The construction of ironstone pipe sewers in Mariposa, Minnesota, 18th, Tennessee and 19th Streets from Iowa to Kentucky Street, together with junction and overflow structures and appurtenances to the main sewers. This work was completed June 1, 1910. A total of \$101,931.71 was paid the Contractor.

CONTRACT NO. 5.—For the construction of the North Beach Intercepting Sewer.

Contract awarded on August 13, 1909 to the Healy-Tibbitts Construction Co.

The work under this contract included the construction of a 2'x3' concrete sewer in Bay Street between Jones and Taylor Streets; of a 3'x4'6" concrete sewer in Taylor Street between Bay and North Point Streets; of a 4'x6' concrete sewer in Taylor and Beach Streets between North Point and Mason Streets, and in Powell Street between North Point and Beach Streets. The construction of a 5'x9' concrete sewer in Beach Street between Mason Street and the Embarcadero, and a 6'x7' outlet sewer at the foot of Dupont Street, together with ironstone pipe sewers, junction and overflow chambers and appurtenances. This work was accepted August 1, 1910. A total of \$87,945.86 was paid the Contractor.

CONTRACT NO. 12.—For the construction of the Laguna Street Sewer. Contract awarded on April 30, 1909 to the Healy-Tibbitts Construction Co.

This work included the construction of a 5' circular concrete sewer in Lombard Street between Octavia and Laguna Street; of a 5'6" circular concrete sewer in Laguna Street between Lombard and Chestnut Streets; of a 6' circular concrete sewer in Laguna Street between Chestnut and Jefferson Streets, together with ironstone pipe sewer, taper connection and appurtenances to the main sewer. This work was accepted April 6, 1910. A total of \$43,220.83 was paid the Contractor.

CONTRACT NO. 15.—For the construction of sewers and appurtenances in Section "B" of the North Point Main.

Contract awarded on December 15, 1909 to the Keystone Construction Co.

The work under this contract included the construction of a 2'x3' concrete sewer in Sansome Street between Filbert and Union Streets; of ironstone pipe sewers in Sansome Street between Union and Vallejo Streets; of an 8' circular concrete sewer in Sansome Street between Jackson and Pacific Streets, and of an 8'6" circular concrete sewer in Sansome Street between Pacific and Filbert Streets, together with tapers and appurtenances to the main sewer. This work was accepted June 5, 1911. A total of \$59,498.59 was paid the Contractor.

CONTRACT NO. 21.—For the construction of sewers and appurtenances in Section "A" of the Division Street Sewer.

Contract awarded on August 20, 1909 to the Contra Costa Construction Co.

There were constructed under this contract a three-compartment 8'3"x9'6" concrete sewer in Division Street and a private Right of Way from Kansas to Channel Street, together with ironstone pipe sanitary sewers and appurtenances. This work was accepted on March 22, 1911. A total of \$164,248.82 was paid the Contractor.

CONTRACT NO. 22.—For the construction of sewers and appurtenances in Section "B" of the Division Street Sewer.

Contract awarded on July 23, 1909 to the Healy-Tibbitts Construction Co.

The work under this contract included the construction of a three-compartment 8'3"x9'6" concrete sewer in Division Street between Kansas and 10th

Excavating Rock in Open Cut for 8-foot 6-inch Circular Concrete Sewer in Sansome Street, near Filbert Street. A Small Portable Motor-driven Compressor Was Used to Operate the Drills.

Using Air Drill in Driving Tunnel for 8-foot 6-inch Circular Concrete Sewer in Sansome Street, near Broadway. At This Point the Sewer Is 45 Feet Below the Street Surface.

Streets, and of ironstone pipe sewers, junction structures and appurtenances to the main sewer. The work under this contract was accepted August 1, 1910, except the ironstone pipe sanitary sewers, the cost of which was retained by the Board of Public Works. A total of \$146,225.83 was paid the Contractor.

CONTRACT NO. 23.—For the construction of sewers in 5th Street from Market to Howard Street; and in Market Street from 5th to Powell Street.

Contract awarded on July 9, 1909 to the Healy-Tibbitts Construction Co.

Under this contract a 5'3" circular concrete sewer was constructed in 5th Street between Howard and Market Streets; a 4'6" circular and a 3'6"x5'3" concrete sewer were constructed in Market Street between 5th and Powell Streets, together with ironstone pipe sewers, junction structures and appurtenances to the main sewer. This work was accepted August 1, 1910. A total of \$27,903.08 was paid the Contractor.

CONTRACT NO. 24.—For the construction of sewers in Greenwich Street from Octavia to Gough Street.

Contract awarded on July 9, 1909 to G. W. McGinn & Co.

The work under this contract included the construction of a 2'6"x3'9" concrete sewer in Greenwich Street between Octavia and Gough Streets, and of a 2'x3' concrete sewer in Gough Street between Greenwich and Filbert Streets, together with taper connections and appurtenances to the main sewer. This work was accepted January 9, 1911. A total of \$8,746.13 was paid the Contractor.

Section of the Relief Outlet Sewer in Division and Seventh Streets. The Structure Is Built on a Pile Foundation and Has a Total Width of 32 Feet 6 Inches.

Equalizing chamber in the three-compartment rectangular concrete sewer in Division Street, near Tenth Street. Each compartment of this relief sewer is 8 feet 3 inches high, 9 feet 6 inches wide. The top of this structure is built to carry the tracks on the main line of the Southern Pacific Railroad.

Excavating for Section "A" of the Division Street Sewer with an Orange Peel Bucket.

CONTRACT NO. 25.—For the construction of the University Mound and Silver Terrace Outlet Sewer.

Contract awarded on August 2, 1909 to the Coast Improvement Co.

The work under this contract included the construction of a 2'x3' concrete sewer in San Bruno Avenue between Olmstead and Dwight Streets; of a 2'4"x3'6" concrete sewer in San Bruno Avenue between Woolsey and Dwight Streets, and of a 3'x4'6" concrete sewer in San Bruno Avenue between Woolsey and Wayland Streets. The construction of a 3'x4'6" concrete sewer in Wayland Street between Somerset and Goettengen Streets; of a 3'6"x5'3" concrete sewer in Wayland Street between Goettengen Street and San Bruno Avenue; of a 5'9" circular concrete sewer in Wayland Street, Charter Oak Avenue, P Street south, 28th Avenue south and M Street south from San Bruno Avenue to 25th Avenue south; and of a 7'3" circular concrete sewer in M Street south and 24th Avenue south from 25th Avenue south to L Street south, together with junction and overflow structures, ironstone pipe sewers and appurtenances. This work was accepted August 1, 1910. A total of \$81,472.82 was paid the Contractor.

CONTRACT NO. 26.—For the construction of sewers and appurtenances in Sections H and J of the North Point Main.

Contract awarded on November 12, 1909 to C. J. Harney.

The work under this contract included the construction of a 7'6" circular concrete sewer in Treat Avenue between 18th and 19th Streets, of a 6' circular concrete sewer in 19th Street between Harrison and 20th Streets. The construction of a 3'6"x5'3" concrete sewer in Alabama Street between 20th and 26th Streets; of a 3'x4'6" concrete sewer in 26th Street between Alabama and Capp Streets; of a 2'6"x3'9" concrete sewer in Capp Street, in Serpentine Avenue and in Army Street from 26th Street to Valencia Street, together with junction structures and appurtenances and ironstone pipe sewers adjacent to the main sewer. This work was accepted June 21, 1911. A total of \$121,617.37 was paid the Contractor.

CONTRACT NO. 28.—For the construction of the outlet sewer to the Bay View District.

Contract awarded on August 11, 1909 to the Contra Costa Construction Co.

The work under this contract included the construction of a 4'x6' concrete sewer in 16th Avenue south, in G Street south, in 19th Avenue south, in H Street south and in 20th Avenue south from F Street south to J Street south. The construction of a 3'6"x5'3" concrete sewer in J. Street south and 21st Avenue south from 21st Avenue south to K Street south; of a 2'6"x3'9" concrete sewer in K Street south between 21st Avenue south and 22nd Avenue south; of a 2'4"x3'6" concrete sewer in K Street south, in 23rd Avenue south and in L Street south from 22nd Avenue south to 24th Avenue south, and of a 5'6" circular concrete sewer in 24th Avenue south between L Street south and K Street south, together with overflow and junction structures, appurtenances, and ironstone pipe sewers. This work was accepted on July 25, 1911. A total of \$83,890.91 was paid the Contractor.

CONTRACT NO. 29.—For the construction of sewers and appurtenances in the Harbor View District.

Contract awarded on September 10, 1909 to Wm. Heafey.

The work under this contract included the construction of a 2'x3' concrete sewer in Steiner and Chestnut Streets from Filbert to Pierce Street; and in Pierce Street from Chestnut to Lombard Street. The construction of a 2'6"x3'9" concrete sewer in Scott Street from Lombard to Francisco Street; of a 3'x4'6" concrete sewer in Francisco Street between Scott and Pierce Streets;

A Junction Structure in Lincoln Way and 30th Avenue. The 4-foot by 6-foot Oval Shaped Sewer from 30th Avenue Empties into the 6-foot 6-inch Circular Sewer in Lincoln Way.

of a 3'6"x5'3" concrete sewer in Francisco Street between Fillmore and Pierce Streets, and of a 6' circular concrete sewer in Pierce Street between Francisco and Bay Streets, together with junction structures and appurtenances and iron-stone pipe sewers. This work was accepted July 25, 1910. A total of \$35,484.96 was paid the contractor.

CONTRACT NO. 33.—For the construction of a sewer in H Street from 20th Avenue to 40th Avenue.

Contract awarded on September 10, 1909 to J. A. Dowling.

The work under this contract included the construction of a 6'6" circular concrete sewer in Lincoln Way from 20th to 40th Avenue, and of a 4'x6' concrete sewer at the crossings of Lincoln Way with 30th and 31st Avenues, together with junction structure and appurtenances. This work was accepted October 19, 1910. A total of \$82,776.15 was paid the contractor.

CONTRACT NO. 34.—For the construction of a sewer in Ocean Avenue from Lee Avenue to Arlington Avenue.

Contract awarded on September 10, 1909 to E. J. Gallagher.

The work under this contract included the construction of a 2'x3' concrete sewer in Ocean Avenue between Lee and Miramar Avenues and of a 2'6"x3'9" concrete sewer in Ocean Avenue between Miramar and Arlington Avenues, together with junction structures and appurtenances to the main sewer. This work was accepted June 24, 1910. A total of \$14,327.49.

Construction of the 6-foot 6-inch circular concrete sewer in Lincoln Way, near 35th Avenue. The concrete invert and vitrified brick lining are completed and the steel reinforcement is in place. The concrete is poured around a wooden center form, which is afterwards removed in sections and hauled ahead.

Excavating for the 4' x 6' Concrete Sewer in P Street, between 10th Avenue South and 14th Avenue South, in the Hunters Point District.

Construction of 4' x 6' Reinforced Concrete Sewer in the Hunters Point District, Showing Forms and Steel Reinforcement.

Excavating Trench for the 6-foot Circular Concrete Sewer in the Hunters Point District, with Steam Shovel.

CONTRACT NO. 38.—For the construction of sewers and appurtenances in the Hunter's Point District.

Contract awarded on January 10, 1910 to Robert C. Storrie & Co.

The work under this contract included the construction of a 6' circular concrete sewer in 5th Avenue south, in L Street south, in 6th Avenue south, in M Street south, in 7th Avenue south and in N Street south, from H Street south to 10th Avenue south, and of a 4'x6' concrete sewer in 10th Avenue south and P Street south, from N Street south to 14th Avenue south, together with junction structures and appurtenances. This work was accepted March 8, 1911. A total of \$180,715.71 was paid the contractor.

CONTRACTS AWARDED AND UNDER CONSTRUCTION BOND ISSUE 1903

For the construction of sewers and appurtenances in Section "B" of the Sunnyside Sewer.

Contract awarded on January 20, 1911 to F. Rolandi for the sum of \$26,841.50. Time allowed, 180 days.

44% of the work under this contract has been completed. This includes the construction of 380' of 24" ironstone pipe sewer in Spreckels Avenue, 2,663' of 2'x3' reinforced concrete sewer in Spreckels, Foerster and Hearst Avenues, 669' of 2'4"x3'6" reinforced concrete sewer in Hearst Avenue and 170' of 3'x4'6" reinforced concrete sewer in Hearst Avenue, together with junction and taper structures and other appurtenances.

For the construction of sewers and appurtenances in San Bruno, Oakdale, Rutledge and Holladay Avenues.

Contract awarded on February 17, 1911 to Mitchell & Savage for the sum of \$20,418.80. Time allowed, 180 days.

51% of the work under this contract has been completed. This includes 597' of 12" ironstone pipe sewer in San Bruno, Rutledge and Holladay Avenues, 862' of 18" ironstone pipe sewer in Rutledge, Oakdale and Holladay Avenues, 46' of 2'x3' reinforced concrete sewer in Oakdale and San Bruno Avenues, and 116' of 2'6"x3'9" concrete sewer in Oakdale Avenue, together with taper connection and other appurtenances.

For the construction of sewers and appurtenances in the Glen Park District Sewer.

Contract awarded March 8, 1911 to the Buena Vista Improvement Co. for the sum of \$24,399.50. Time allowed, 180 days.

24% of the work under this contract has been completed. This includes the construction of 166' of 8" ironstone pipe sewer in Diamond Street, 47' of 12" ironstone pipe sewer in Diamond Street, 224' of 18" ironstone pipe sewer in Diamond Street, 557' of 21" ironstone pipe sewer in Diamond Street, 50 of 5' circular reinforced concrete sewer and 20' of 5'3" circular concrete sewer, together with appurtenances.

For the construction of sewers and appurtenances in Mission Street and Mount Vernon Avenue, between the County Line and Winnipeg Avenue.

Contract awarded on April 17, 1911 to C. J. Harney for the sum of \$61,206.32. Time allowed, 300 days.

13% of the work under this contract has been completed. This includes the construction of 294' of 2'6"x3'9" reinforced concrete sewer in Mission Street and 444' of 3'x4'6" concrete sewer in Mt. Vernon Avenue, together with taper structure and appurtenances.

BOND ISSUE OF 1908.

CONTRACT NO. 9.—For the construction of sewers and appurtenances in Section "D" of the Yerba Buena District.

Contract awarded on April 1, 1910 to the Healy-Tibbitts Construction Co. for the sum of \$211,898. Time allowed, 360 days.

On July 1, 1911, the work under this contract was completed except restoring the pavement over the ironstone pipe sanitary sewers in Mission and Howard Streets, and over the concrete storm sewers in Mission Street between 2nd and Main Streets, and in Howard Street between Steuart and Main Streets. This work included the construction of 17,547 lineal feet of ironstone pipe sanitary sewer in the district bounded by the Embarcadero, Market Street, Second Street and Howard Street, of 1,514 lineal feet of 2'6"x3'9" concrete sewer in Mission and Steuart Streets, of 679 lineal feet of 3'x4'6" concrete sewer in Mission Street between Beale and 1st Streets, of 359 lineal feet of 3'6"x5'3" concrete sewer in Mission Street between Main and Beale Streets, of 642 lineal feet of 4'x6' concrete sewer in Main Street between Howard and Mission Streets, of 694 lineal feet of 7' circular concrete sewer in Howard Street between Steuart and Main Streets, and of 314 lineal feet of 7'6" circular concrete sewer in Howard Street east of Steuart Street, together with junction and taper connections and other appurtenances.

CONTRACT NO. 11.—For the construction of sewers and appurtenances in Section "F" of the North Point Main Sewer.

Contract awarded on September 16, 1910 to the Metropolis Construction Co. for the sum of \$100,033.72. Time allowed, 300 days.

This contract was assigned to the Federal Construction Co. 26% of the work under this contract has been completed. This includes the construction of 115 lineal feet of 15" ironstone pipe sewer in 15th Street, of 270 lineal feet of 7' circular reinforced concrete sewer in Harrison Street, of 33 lineal feet of 7'6"x8'6" concrete sewer at Harrison and Alameda Streets, of 200 lineal feet of 7'6"x7'x8'6" concrete sewer in Harrison Street between 14th and 15th Streets, together with overflow, junction and taper structures and other appurtenances.

CONTRACT NO. 14.—For the construction of sewers and appurtenances in Section "A" of the North Point Main Sewer.

Contract awarded on June 10, 1910 to the Healy-Tibbitts Construction Co. for the estimated amount of \$157,376. Time allowed, 360 days.

96% of the work under this contract has been completed. This includes the construction of 288 lineal feet of 8" ironstone pipe sewer in Greenwich Street, of 404 lineal feet of 12' ironstone pipe sewer in the Embarcadero and Sansome Street, of 46 lineal feet of 21" ironstone pipe sewer in the Embarcadero, of 461 lineal feet of 2'x3' reinforced concrete sewer in the Embarcadero and Battery Street, of 316 lineal feet of 5'6" circular reinforced concrete sewer in Greenwich Street, of 302 lineal feet of 6' circular concrete sewer in Greenwich Street and of 2,945 lineal feet of 8'6" circular concrete sewer in the Embarcadero and Sansome Street, together with overflow, junction and taper connections and other appurtenances.

CONTRACT NO. 16.—For the construction of sewers and appurtenances in Section "C-1" of the North Point Main.

Contract awarded on September 16, 1910 to Robert C. Storrie & Co. for the sum of \$98,255.00. Time allowed, 300 days.

On July 1, 1911, 92% of the work under this contract had been completed. This includes the construction of 78 lineal feet of 18" ironstone pipe sewer in

Open trench in Howard Street, near Spear Street, for the construction of a 7-foot 6-inch circular concrete sewer. All material excavated from the trench was at once removed in wagons and the street kept open for traffic.

Laying Vitrified Brick Lining in the Invert of the 7-foot 6-inch Circular Sewer in Howard Street, near the Embarcadero.

Construction of North Point Main Sewer in Sansome Street.

Stiff legged derricks were used to elevate the excavated material and load it into wagons. The concrete mixers were set directly over the open trench. In this way the work was carried on with little obstruction to team traffic. The sewer at this point is 8 feet 6 inches in diameter and built on a pile foundation.

Sansome Street at Washington and at Bush Street, of 50 lineal feet of 3'x5' reinforced concrete sewer, of 14 lineal feet of 4'x6' concrete sewer, of 30 lineal feet of 5'6" circular concrete sewer, of 2,063 lineal feet of 8'6" circular concrete sewer of 76 lineal feet of 8'6"x10' reinforced concrete sewer, together with overflow and junction structures and appurtenances.

CONTRACT NO. 17.—For the construction of sewers and appurtenances in Section "C-2" of the North Point Main.

Contract awarded on Decemer 16, 1910 to the Keystone Construction Co. for the sum of \$80,540.25. Time allowed, 300 days.

No work has been done on this contract.

CONTRACT NO. 18.—For the construction of sewers and appurtenances in Section "D-1" of the North Point Main.

The sum of \$85,000 has been set aside to construct this section of the North Point Main Sewer. It is in Howard Street between 2nd and 4th Streets.

CONTRACT NO. 19.—For the construction of sewers and appurtenances in Section "C" of the Division Street Main Sewer.

Contract awarded on August 10, 1910 to the Healy-Tibbitts Construction Co. for the sum of \$62,244. Time allowed, 240 days.

36% of the work under this contract has been completed. This includes 290 lineal feet of 15" ironstone pipe sewer in Alameda Street, 234 lineal feet of 7'6"x8'6" reinforced concrete sewer, and 145 lineal feet of 9'x10'6" reinforced concrete sewer in Division Street, together with a junction structure and other appurtenances.

Eight-foot Six-inch Circular Concrete Sewer in Sansome Street, near Greenwich Street. This Section Is Part of the North Point Main Sewer.

Trench Excavated for the Construction of the North Point Main Sewer at Montgomery Street and the Embarcadero.

Excavating with a Steam Shovel for the North Point Main Sewer at Montgomery Street and the Embarcadero.

Construction of Section "L" of the North Point Main Sewer in Springdale Street, near Mission Street. Material for construction is handled on a track laid over the work. The sewer at this place is 9 feet in diameter.

Detail Showing Section of the 9-foot Circular Sewer in Springdale Street.

Shows the Invert Constructed and Vitrified Brick in Place for 5-foot 3-inch Sewer in Lyell Street.

CONTRACT NO. 20.—For the construction of sewers and appurtenances in Section "D-2" of the North Point Main Sewer.

The sum of \$80,000 has been set aside to construct this section of the North Point Main Sewer. It is in Howard Street between 4th and 6th Streets.

CONTRACT NO. 27.—For the construction of sewers and appurtenances in Section "L" of the North Point Main Sewer.

Contract awarded on April 26, 1911 to the Healy-Tibbitts Construction Co. for the estimated amount of \$51,179. Time allowed, 300 days.

28% of the work under this contract has been completed. This includes the construction of 44 lineal feet of 5'3" circular concrete sewer in Springdale Street, 50 lineal feet of 8'6" circular concrete sewer in Springdale Street, 356 lineal feet of 9' circular concrete sewer in Springdale Street between Lyell and Milton Streets, and 15 lineal feet of 7'x9' reinforced concrete sewer at Springdale and Milton Streets, together with diversion, junction and taper structures and other appurtenances.

CONTRACT NO. 31.—For the construction of sewers and appurtenances in 7th Street from Howard to Hubbell Street.

Contract awarded on June 22, 1910 to the Metropolis Construction Co. for the estimated amount of \$159,212.25. Time allowed, 360 days.

On July 1, 1911, 85% of the work under this contract had been completed. This includes the construction of 4,362 lineal feet of 8" ironstone pipe sewer, 356 lineal feet of 18" ironstone pipe sewer, 21 lineal feet of 24" ironstone pipe sewer, 272 lineal feet of 2'6"x3'9" reinforced concrete sewer in 7th Street between Irwin and Hubbell Streets, 680 lineal feet of 3'x4'6" reinforced concrete sewer in 7th Street between Channel and Irwin Streets, 578 lineal feet of 3'6"x5'3" concrete sewer in 7th Street between Howard and Folsom Streets, 26 lineal feet of 4'x6' concrete sewer at 7th and Brannan Streets, 1,767 lineal feet of 5'6" circular concrete sewer in 7th Street between Folsom and Brannan Streets, and 1,443 lineal feet of 6' circular reinforced concrete sewer in 7th Street between Brannan and Channel Streets, together with overflow, junction and taper connections and other appurtenances.

CONTRACT NO. 32.—For the construction of sewers and appurtenances in Mission Street between Silver Avenue and Bosworth Street.

Contract awarded on May 25, 1910 to the Keystone Construction Co. for the sum of \$39,243.50. Time allowed, 420 days.

On July 1, 1911, 58% of the work under this contract had been completed. This includes 117 lineal feet of 4'x6'6" concrete sewer in Mission Street between Springdale and Bosworth Streets, 43 lineal feet of 2'x3' reinforced concrete sewer at Mission and Silver Avenue, 1,268 lineal feet of 2'6"x3'9" reinforced concrete sewer in Springdale and Mission Streets, and 48 lineal feet of 3'x4' concrete sewer at Springdale and Mission Streets, together with ironstone pipe sewers, junction, taper and diversion structures and other appurtenances.

CONTRACT NO. 35.—For the construction of sewers and appurtenances in Section "A" of the Ingleside Outlet Sewer.

Contract awarded on January 21, 1911 to F. Rolandi for the sum of \$26,841.50. Time allowed, 240 days.

93% of the work under this contract has been completed during the last fiscal year. This includes 2,764 lineal feet of 3'x4'6" concrete sewer in a private Right of Way across the Ingleside racetrack, together with a taper connection and other appurtenances.

In construction of 7th Street storm water sewer the contractor used a locomotive crane to hoist the excavated material from the trench. The crane was also used in driving the sheet lagging.

The Overflow and Junction Structure at 7th and Brannan Streets, Looking South in Seventh Street.

During the time of large run-off the storm water which cannot follow the ordinary course to the left into Brennan Street finds a Relief Outlet by overflowing and continuing along Seventh Street in the 6-foot circular Sewer to the Channel.

CONTRACT NO. 36.—For the construction of sewers and appurtenances in the Lower Sunset District.

Contract awarded on March 25, 1910 to the Metropolis Construction Co. for the sum of \$166,999.02. Time allowed, 360 days.

66% of the work under the contract has been completed. This includes the construction of 299 lineal feet of 2'x3' reinforced concrete sewer, 809 lineal feet of 6'6" circular concrete sewer in 45th Avenue and Vicente Street, 1,372 lineal feet of 7' circular concrete sewer in 46th Avenue between Ulloa and Santiago Streets, 1,350 lineal feet of 7'6" circular concrete sewer in 46th Avenue between Santiago and Quintara Streets, and 2,117 lineal feet of 8' circular concrete sewer in 46th Avenue and Quintara Street, together with overflow, junction, taper structures, and other appurtenances.

CONTRACT NO. 40.—For the construction of sewers and appurtenances in Lincoln Way from 40th Avenue to La Playa Street; and in 48th Avenue from Kirkham Street to Lincoln Way.

Contract awarded on April 21, 1911 to Robert C. Storrie & Co., for the sum of \$132,543. Time allowed, 360 days.

This contractor has assembled equipment and materials on the work preparatory to starting construction.

This concrete mixing plant was erected by the contractor in the construction of the 8-foot circular concrete sewer in 46th Avenue, near Quintara Street, Lower Sunset District. The rock and sand were elevated into bunkers by conveyors. The proportions of the aggregate were measured on the elevated platform and dropped into the mixer. The mixed concrete was delivered along the work in cars holding a single batch.

VIADUCTS— CONSTRUCTED FROM GENERAL FUND FOR REPAVING,
GRADING AND REPAIRING STREETS, OF 1910-1911.

Loren E. Hunt, Assistant Engineer in Charge of Construction.

For the construction of the southerly section of a reinforced concrete viaduct and an earth filled approach along Mission Street between Marshall Street and Springdale Street.

The contract for the work included, in addition to the construction of the southerly portion of the viaduct, the construction of a reinforced concrete sewer and appurtenances in Mission Street from Silver Avenue to a point 28.8 feet southerly from Bosworth Street. The details of this portion of the works are given under Contract No. 32 of Sewer System, Bond Issue of 1908.

The contract was awarded to the Keystone Construction Company on May 25th, 1910, for the estimated sum of \$143,243.50, of which the estimated sum of \$104,000 was for the construction of the southerly portion of the reinforced concrete viaduct, and \$39,243.50 for the construction of the reinforced concrete sewer and appurtenances. On July 1, 1911, 18 per cent of the work under this contract was completed. This included the construction of 6,864 lineal feet of reinforced concrete piles, the excavation of 13,800 cubic yards for the foundation, and the delivery of 10 tons of reinforcing steel to be used in the viaduct.

For the construction of the northerly section of a reinforced concrete viaduct and an earth filled approach along Mission Street between Bosworth Street and the southeasterly line of Springdale Street.

This contract was awarded on April 26, 1911, to the Healy-Tibbitts Construction Company for the estimated sum of \$104,200.00.

On July 1, 1911, 3 per cent of the work under this contract was completed. This included the excavation of 4,000 cubic yards of material for the foundation, the construction of 241 lineal feet of reinforced concrete piles, and the driving of 150 piles for the temporary viaduct to be constructed to carry the traffic during the construction of the permanent work.

For the construction of a bridge over the Southern Pacific Railroad tracks between Richland Avenue and Miguel Street.

This contract was awarded to F. Rolandi on January 13, 1911, for the estimated sum of \$8,275.00.

On July 1, 1911, the east and west reinforced concrete abutments and the east and west piers were constructed. The steel work is being fabricated by the Central Iron Works and is about 10 per cent completed.

Description of Work.	Mission Viaduct Southerly Section	Mission Viaduct Northerly Section	Richland Ave. Bridge
Amount set aside.....	\$105,000.00	\$109,000.00	\$10,500.00
Date contract was awarded.....	May 25, 1910	April 26, 1911	Jan. 13, 1911
Contractor	Keystone Con. Co.	H'ly-Tib'ts Cn. Co.	F. Rolandi
Contract price	\$104,000.00	\$104,200.00	\$8,275.00
Date contract was signed.....	July 21, 1910		Jan. 26, 1911
Days time allowed.....	420 days	365 days	180 days
Days extension granted.....			90 days
Estimated value of work com- pleted July 1, 1910 to July 1, 1911	\$18,603.80		\$750.00
Estimated value of work com- pleted July 1, 1911.....	\$18,603.80		\$750.00
Amount paid contractor.....	\$13,370.25		

Construction of the Reinforced Concrete Piles for the College Hill Viaduct.

Concrete Piles Being Driven as a Foundation for the Mission Street Viaduct.

The piles are square in section, 16 inches at the butt and 8 inches at the point. The shield which protects the head of the pile from being broken by the steam hammer is made up of steel plates bolted together and filled with layers of rope and boards. In some cases it has taken 1000 blows with a 5000-pound hammer to drive 26 feet. This was done without damage to the concrete. A test load of 60 tons was applied to one pile and resulted in no settlement.

INCINERATING PLANTS.

Contracts for the construction of two Incinerating Plants were awarded to the Destructor Company on November 28, 1910, upon the basis of their bid of \$132,075.00 for constructing the North Beach plant, and \$123,141.00 for constructing the Islais Creek plant. These prices, are however, subject to a payment of a bonus or a deduction, depending upon the excess or deficiency in the fulfillment of certain guaranteed requirements as to the cost of garbage destruction per ton. This bonus or deduction will be determined by a thorough test of the actual operation of the plants.

As soon as the detailed plans of these Incinerators were submitted, as above, the architectural plans for each building were commenced upon this basis and upon the detailed contour maps of the two sites which had been prepared. It will be noted that these architectural plans could not be perfected until the type of furnaces and appurtenances had been determined by the award of the contract to the successful bidder. These are now well under way and the furnace parts are being cast, so that the work can be commenced in the very near future.

STREET AND SEWER CONSTRUCTION FISCAL YEAR 1910-1911.

During the fiscal year 1910-1911, the total cost of permanent improvements done under public and private contracts was \$1,330,219.43. This work was performed under 512 private contracts and 94 public contracts and is divided between these two classes of work as follows:

SEWERS.

Public Contracts	6,492.01 lineal feet	\$ 19,133.03
Private Contracts	93,213.35 lineal feet	276,543.77
	99,705.36 lineal feet	\$295,676.80

or 18.88 miles of sewers, including appurtenances, manholes, drains, wyes, etc. (Bond issue sewers not included and previously reported.)

The summaries of this work are shown in the appended Tables.

PAVING.

Paving, excluding temporary broken rock pavements and wooden curbs cost as follows:

PUBLIC CONTRACTS.

Pavements (permanent)	162,591.78 square feet	\$41,351.26
Curbs	7,078.89 lineal feet	8,999.91
Gutters	6,097.40 square feet	2,452.71
Sidewalks	71,753.08 square feet	10,660.83
Grading, Coping		18,104.91
	Total.....	\$81,569.62

PRIVATE CONTRACTS.

Pavements (permanent) 2,648,531.4 square feet, with gutters, sidewalks and grading\$1,053,675.66

These expenditures are given in the appended tables and are shown in great detail upon the records of this Bureau.

FISCAL YEAR 1910-1911, TOTAL VALUE PERMANENT IMPROVEMENTS

WORK OF THE CHEMICAL AND PHYSICAL LABORATORY FOR THE FISCAL YEAR 1910-1911.

C. L. Cook.....	Chemist in Charge
A. A. M. Russell.....	Assistant Chemist
J. Reavey	Assistant Chemist
C. J. Doran.....	Assistant Chemist

During the fiscal year just passed the number of tests made in the physical and chemical laboratory was 13,075, distributed by months and nature of test made as shown in the accompanying table.

Owing to the more active operations of last year, the increase over the tests made in the previous year is 3,783.

The cost of this work including the proportion of rentals of the laboratory rooms is \$7,352.32, or a total cost of \$0.562 per test. The items of this cost are as shown on the accompanying table, which also gives the salaries of the Chemist in charge and his Assistants.

LABORATORY EXPENSES, 1910-1911.

SALARIES—

C. L. Cook, Chemist in Charge.....	\$2,100.00	
A. A. M. Russell, Assistant Chemist	1,500.00	
J. Reavey, Assistant Chemist	1,500.00	
C. J. Doran, Assistant Chemist.....	720.00	
		<hr/>
		\$5,820.00
Rent (proportion of building occupied).....	\$1,007.41	
Gas and Electricity	178.56	
Supplies, repairs, etc.	346.35

REPORT OF DIVISION OF SURVEYS

San Francisco, Cal., June 30, 1911.

Hon. Marsden Manson, City Engineer.

Dear Sir:—In accordance with your request, I submit herewith a report of the work performed by the Division of Surveys, Bureau of Engineering, during the fiscal year ending June 30, 1911; also tables showing the work performed, including restoration surveys and fees received from April 18, 1906 to June 30, 1911, and a map showing the location of completed restoration surveys and that nearing completion.

Respectfully submitted,

CHAS. H. HOLCOMB, Assistant Engineer.

There are seventy-five employes in the Division of Surveys, and their classification are shown in "Table No. 1."

Surveys for property lines are shown in "Table No. 2."

Surveys for public improvements and fees received are shown in "Table No. 3."

Surveys for the restoration of Monument, Street and City property lines are shown in "Table No. 4."

An inventory of instruments, maps, examination sheets, profiles, grade sheets, books, etc., are shown in "Table No. 5."

An official grade map, made to a scale of 100 feet to the inch (in 176 sheets) covering the entire City and County, has been completed and is kept posted to date, showing all official grades and all contemplated changes of grades or establishment of new grades.

A new official grade book is being compiled, giving official grades of the entire City and re-arranging in alphabetical order the new names of streets, as recently adopted by the Board of Supervisors.

A finished map of a portion of the Market Street Homestead (that part most densely populated) extending from 18th to 20th Streets, and from Douglas Street to a line west of Stanyan Street, will be finished and submitted for approval in about two weeks. This tract extends from 18th to 26th Streets, about one mile in length by three-quarters of a mile in width; the entire tract or Homestead will not be finished for some time.

The one hundred vara district map will be submitted for approval in about six weeks.

The field work of the blocks and intersecting streets along the line of Geary Street between Larkin Street and First Avenue through the Western Addition is now in progress, and being pushed to completion on account of the proposed Geary Street Railway.

The field work of the re-survey, monumenting and defining the street and monument lines in the Excelsior Homestead covering about 373 street block frontages will be finished in about three months. A finished map of same will be ready for ratification in about six months. The population of this district has increased about 300 per cent since 1906.

A finished map showing the position of monuments, streets and monument lines in that portion of the Mission District bounded by 15th, 19th, Valencia

and Harrison Streets will be ready for ratification in about two months. A map covering the entire Mission District will be submitted later.

A new index map of the City and County of San Francisco, made to a scale of 800 feet to 1 inch, giving the correct names of streets as fixed by ordinance of the Board of Supervisors, showing position of all Fire Engine Lots, School Lots, Boulevards, public parks and City property and U. S. Government reservations was completed in December 1910, and copies of same furnished to all Municipal Departments. This map is five feet wide and four feet long and was made for a wall map.

A smaller index map of the City and County, similar to the one above, has been completed on a scale of 1,500 feet to the inch; these maps are two by one and one-half feet in size and are made for desk use.

A summary of the work performed in the restoration surveys is as follows:

SUBDIVISIONS FINISHED.

Fifty Vara District, One Hundred Vara District, Reis Tract, University Mound, Lake View, Garden Tract, Belle Roche City, Pope Estate (or Tract) Alms House Tract, Ben Franklin, Sunny Dale, Sunny Vale, Soms Tract, and a portion of the Market Street Homestead.

STREETS FINISHED AND MONUMENTED.

Geary Street from Market Street to the Cliff House,
Fulton Street from 8th to 48th Avenues, 8th, 24th, 36th and 47th Avenues,
from Geary to Fulton Streets.

Lincoln Way from 20th Avenue to the Great Highway.

Potrero Avenue, from Brannan to 25th Streets.

Sloat Boulevard, from Ocean Avenue to the Great Highway.

Portions of the County Line and other portions of streets and blocks too numerous to mention, (for further details see "Table No. 4" and Map showing the progress of the restoration surveys.)

The work performed represents 1,712.57 miles of surveying, which has been done with the greatest care and accuracy. All measurements made are pole measurements, tested or compared daily with the U. S. Standard Measure, temperature 62 degrees Fahrenheit, with a co-efficient of expansion of 0.000063 feet per degree, 10 pounds pull.

The map shows the finished work, also that nearing completion. Table No. 4 shows the work performed by districts in lineal feet and miles; also that remaining unfinished in feet and miles.

In making this report I deem it advisable to make a brief statement of the deplorable condition of our street and property lines before the fire of 1906.

In making surveys of private property in the old portion of the City (the Fifty Vara District) where today, it is valued at thousands of dollars per front foot, in the early years the City and County surveyor in many cases, did not use a transit or any surveying instrument, other than a steel tape; there were no street monuments or other surveyor's points or data to guide them; it was not known where the street lines were; in fact, there were no official street lines. In many cases, they simply measured from the nearest existing improvements and marked on the ground a piece of property the dimensions called for by the owner. This is the principal cause of the irregular lines and widths of streets in the Fifty Vara District. This loose and hazardous system was continued for many years.

That part of the City known as the Homestead was never surveyed or monumented. Before the Charter went into effect, any one could subdivide an acreage tract of land on paper and file it with the City and County Recorder,

giving no consideration whatever to adjacent tracts or sub-divisions or streets, in many cases, closing the streets of adjacent tracts and thus compelling the City at this time, to purchase private property for the opening of these streets. I do not know of a single instance of a map filed that showed a tie or connection with any adjoining tract.

In compiling the official Maps of the City and County, these tracts or homesteads had to be twisted and fitted in until they had the semblance of correctness. There were no figures except block numbers on the Official Maps of 1870 and 1899, showing the connections of these sub-divisions. Most of the maps filed with the Recorder omitted the lengths of many blocks, lots and widths of streets. Upon the original map filed of Gift Map No. 4 (which is one of the largest Homestead Sub-divisions) there are no figures whatever, except the number of the lots. It does not show the width of any street or dimension of any lot or block; the streets are irregular, some are curved, but there is nothing to show their curvature, or their beginning or ending or any tie or connection with any adjoining tract or sub-division. Before the Charter went into effect the City and County Surveyors would not make a survey for private parties in any of the homesteads for less than \$35.00 per day, for the first day, and \$30.00 per day after, making the cost of survey from \$95.00 to \$165.00 for a 25-foot lot, which was equal to his refusal to do the work, as the value of the property would not justify the expense.

1890, City and County Surveyor, S. Harrison Smith had one of his deputies, (Thomas Whitten) enter into contract with a large percentage of the property owners in Gift Maps, 1, 2 and 3, for the survey of their property. In that way he made a partial survey of these homesteads, sufficient to determine the position of the lots under contract.

The survey levels (Bench Marks) before the adoption of the Charter, 1900, were in a most deplorable condition, differences existing in all parts of the City from one-tenth of a foot to two feet or more. To run a long line of levels, it was necessary to change field notes by dropping or raising the elevations in the field book to conform to the elevation of the datum plane in the district in which work was being done.

In the construction of public improvements, such as the grading of streets, curbing, macadamizing and construction of public sewers in the early years, no diagrams were furnished contractors, showing the cuts, fills or depths for construction of sewers. The only information furnished the Contractor by the City and County Surveyor for the guidance of his work was written with heavy blue pencil on the adjoining fences or buildings. In the absence of fences or buildings a stake was driven and the contractor was told (verbally) its relation to the official grade or inside bottom of the sewer. Line was never given for the construction of sewers; the contractor dug his trench along the center of the street.

The City Charter went into effect January 2, 1900. Up to that date, the City and County Surveyor's office was a fee office; the Surveyor received a salary from the City and County, (fixed by law) of \$500.00 per year, merely to make his acts official. All the fees paid into the office became his private funds. All salaries and the cost of office and field operations had to be paid from his private purse; hence, it was to the interest of the County Surveyors to keep the operating expenses of the department down to the minimum. They did not perform any work they could avoid, either in office or field. There was no system of records; the field books, maps and other data were kept in drawers, on shelves, old dry goods boxes and often piled in the corners on the floor. I remember one old-fashioned discarded washstand with drawers, in which considerable valuable information was stored. All of the shelves and improvised cases were open, none of the records were kept from the accumulation of dust

and dirt, except those kept in the old washstand and a few other box drawers built under the draughting boards.

There was no system of indexing, except memoranda written on legal cap or letter paper and tied with a string to the box, drawer or shelves containing the records. Some of the records, such as bearings of streets, etc., were written in pencil on the walls. Where these records came from or who placed them there, no one seemed to know, but they were always accepted and used as reliable data.

The official block books compiled by and a part of the report of the Board of Engineers of 1866 lay on the public counter day and night and was in constant use for over thirty-five years, the torn and worn leaves were patched with transparent linen, from time to time by draughtsmen in the office, until they resembled a lady's patch-work, badly worn and soiled. Some of the leaves were loose, others fastened back in place; in many places the figures were obliterated by age and constant use. This was the only official record of the street lines in the Fifty and One Hundred Vara Districts, and a portion of other parts of the City. These books were destroyed by the fire in 1906. A copy of the book containing the Fifty and One Hundred Vara Survey was filed in the Hall of Records by Wm. P. Humphreys, City and County Surveyor, November 20, 1871. This book was saved from the fire and a duplicate of same is now in the Bureau of Engineering. This thoughtful precaution of Mr. Humphreys saved this city from the greatest possible confusion of land titles and endless litigation. It furnished a basis for the Bureau of Engineering to restore to their original position the street and monument lines, as defined by the Board of Engineers in 1866.

It is, indeed, a most difficult task to make clear the seriousness of the omissions, irregularities and confusion of Records and Survey lines throughout this City and County; when the Charter went into effect in 1900, we had a City between 60 and 70 years of age and the Bureau of Engineering was just born, hence the Bureau of Engineering, in keeping pace with the city on this line of work, is between 60 and 70 years behind. If a profile was made of the datum plane of the City's levels before the adoption of the Charter, it would look like a pair of stairs or steps. Excluding the Homesteads or sub-divisions surveyed and monumented by City Engineer C. E. Grunsky, between 1900 and 1904 and after the Charter went into effect, the street lines of the City were in such a state of confusion and the records and data so bewildering that it was an utter impossibility for the most efficient surveyor to make a survey in any part of this city who was not familiar with its irregularities and had some knowledge and experience with its confused records.

This was the condition before the fire and earthquake. What could I say to describe its true condition after the fire and earthquake? The shift of the ground and improvements in portions of the Mission District was as much as nine (9) feet; in the One Hundred Vara District in the neighborhood of 7th and Howard Streets, the shift was over seven (7) feet. Improvements, buildings, monuments and monument locations throughout the City were shifted in all directions and records destroyed. Conditions were so serious that a special session of the State Legislature was called about June 15, 1906, and passed the McInerney Act, so that property owners of this City could restore and quiet the titles to their land, and the money expended in that direction by the property owners, paying Abstract Companies', Searchers', Attorneys' and Court fees, no doubt, has reached an enormous sum.

These facts are the strongest possible argument for rushing to completion the restoration of the streets and property lines of this City, and the setting aside of funds, from year to year, for this specific purpose. The titles to property, to either City or taxpayer, is of small importance if the true position and dimensions of same are not known.

RECEIPTS OF CITY ENGINEER'S OFFICE,—STREET AND LOT
SURVEYS 1910-1911.

Fees for Surveying Streets and Lots, as Prescribed by the Charter were received and delivered to the City and County Treasurer as follows:

	Street Surveys.	Lot Surveys.
1910—July	\$ 1,953.00	\$ 265.40
August	2,347.75	185.60
September	1,602.50	50.00
October	1,673.00	27.50
November	1,753.50	127.50
December	2,116.50	150.00
1911—January	1,761.00	125.00
February	1,159.75	102.50
March	2,103.00	205.00
April	1,937.25	125.00
May	2,425.50	286.50
June	1,824.25	152.50
Totals	\$22,657.00	\$1,802.50
Street Surveys	\$22,657.00	
Lot Surveys		1,802.50
Total	\$24,459.50	

GRADES WERE CHANGED OR ESTABLISHED ON THE FOLLOWING STREETS AND AVENUES FOR THE FISCAL YEAR 1910-1911.

The datum plane of these elevations is City Base, which is 12.05 feet above mean of the lower tides of the U. S. & G. Survey.		
Anza Street.....	At Nineteenth Avenue.....	1,455 N 150

DIVISION IV.

HETCH HETCHY WATER SUPPLY.

The order of Secretary of the Interior Ballinger of May 27, 1910, practically put a stop upon all development work upon the Hetch Hetchy Water Supply System, except such as was necessary to hold the City's rights. The work of 1910 was therefore practically confined to carrying out the order above referred to.

In compliance with this order and as agreed upon by the Mayor before the President, on May 25, 1910, application was made through the Board of Public Works on July 6, 1910, for \$50,000, to examine the following sources:

- (1) Spring Valley
- (2) Eel River
- (3) Putah Creek
- (4) Clear Lake and Cache Creek
- (5) Sacramento River
- (6) Feather River
- (7) Yuba River
- (8) American River
- (9) Lake Tahoe
- (10) Mokelumne River
- (11) Stanislaus River
- (12) Tuolumne River
- (13) San Joaquin River
- (14) Bay Shore Gravels
- (15) Peoples Water Company
- (16) Bay Cities Water Company
- (17) McCloud River

Through correspondence with the Army Board of Advising Engineers composed of Colonel John Biddle, Corps Engineers, U. S. A., Colonel Spencer Cosby, Corps Engineers, U. S. A., Lieutenant Colonel Harry Taylor, Corps Engineers, U. S. A., the following eliminations and additions were made:

(3) Putah Creek; (4) Cache Creek and Clear Lake; (9) Lake Tahoe; (13) San Joaquin River; were eliminated by letter of October 26, 1911, and (16) the Bay Shore Gravels, eliminated by letter of July 24, 1911.

San Joaquin River, (13) was restored by letter of January 4, 1911, and McCloud River, (17) was added by letter of May 9, 1911.

There therefore remain thirteen sources which must be re-examined and reported upon as to availability under this order.

In response for the request for funds, \$ was made available on and \$ on

These sums had to be expended, not only under the above work, but also to protect the State rights and filings and to renew filings as presented by Order No. 7302 (New Series) of the Board of Supervisors.

As soon as the season of 1910 permitted, a reconnaissance was made of the head water of Stubblefield and Jack Main Creeks. It has been known for many years that quite a number of glacial lakelets exist in this region, many of which were examined and rejected as too small in 1900-02. But, the three largest of the small lakes were selected for survey. These were the only ones in this region which might be supposed to serve for the purpose of reinforcing Lake Eleanor.

It is well to note here that the above tributaries of Tuolumne River enter it over the North Canon wall of Hetch Hetchy and form the Hetch Hetchy Falls. To store and divert these streams would permanently deprive the region of this attractive feature.

In the reconnoissance and in the subsequent surveys, it was necessary to repair and restore trails. This region lies between one and a quarter and one and three-quarters miles above sea level and is difficult of access under present conditions and it would be extremely costly to construct roads and supply materials of construction at these elevations.

The following is a brief summary of the work done in these surveys:

SUMMARY OF WORK DONE 1910-1911.

Surveys of the following three proposed reservoir sites were made during July and August:

(1) Tilden Lake Reservoir, at an elevation of about 9,500 feet was surveyed and contours up to 150 feet determined. It requires the erection of two dams. This work required 34,722.2 feet of combined transit and level lines. The results show that a dam 100 feet high will impound 10,761 million gallons, and a dam 75 feet high will impound 7,205 million gallons. A side channel about 20 feet higher than the base of the main dam will have to be closed by a lower but smaller dam.

(2) Wilmer Lake, lies at an elevation of 7,850 feet. The survey of this reservoir and dam site required 21,864.4 feet of combined transit and level lines. A dam 100 feet high will impound 2,854 million gallons and a dam 75 feet high will impound 1,917 million gallons.

(3) Lake Vernon lies at an elevation of 6,600 feet. The survey of this reservoir and dam site required 37,057 feet of combined transit and level lines. The capacities of various heights of storage at this site are as follows:

A dam 150 feet high will impound 28,503 million gallons; dam 125 feet high 22,322 million gallons or a dam 100 feet high 16,582 million gallons.

A survey was made to determine the length and character of a conduit from Kerrick and Stubblefield Canyons to Frog Creek, a tributary of Lake Eleanor, as proposed by G. O. Smith, Director of the U. S. Geological Survey. This survey required over 91,381 feet of combined transit and level lines and demonstrates that such a diversion will be very expensive as there will be tunnels aggregating 37,671 feet and two diverting dams, one on Rancheria Creek in Kerrick Canyon below Stubblefield Canyon, and the other on Falls Creek below Lake Vernon.

HETCH HETCHY CONDUITS.

A survey of that portion of the Hetch Hetchy Water Supply System, designated as the Tuolumne Main Canal was completed from the west boundary of the Stanislaus National Forest to Bear Gulch Power Station, a distance of 120,413.3 feet including the pressure pipe line survey of 5,218.3 feet.

Surveys and contours of lands at the junction of the South Fork and the Main Tuolumne River required 3,000 feet of lines and levels.

Surveys for segregating lands in and about the Lake Eleanor Reservoir site preparatory to letting a contract for clearing, required 30,091 feet of line.

Contour surveys were made of 39,917 feet of the southerly wall of the Tuolumne River from a point above and opposite Jawbone Creek to the South Fork of the Tuolumne River.

Levels were run from the intersection of the boundary of the Yosemite National Park with Tuolumne River to a point near the cabin and gauging

station in the Hetch Hetchy Valley, a distance of about 12 miles along the rough and steep canyon showing a difference of 676.14 feet in the elevations of the two stations.

About 28.3 miles of retracements of public land surveys were made in conjunction with the other work.

CONSTRUCTION OF QUARTERS FOR EMPLOYEES.

The house and barn at Portulaca (Hog Ranch) have been repaired and made serviceable, also a blacksmith shop 34 feet x 16 feet has been erected on this ranch, at the head of the trail to the diverting dam at the Park Line. A log cabin and spring house has been built at the Homestead Ranch, as a supply station to North Mountain Power Station and the trail repaired.

2,600 feet of the trail leading from the Portulaca road to the proposed diverting dam on the Tuolumne River at the boundary of the Yosemite National Park, has been completed and the remainder is under construction.

Notices of water appropriations were posted on the Tuolumne River at the Hetch Hetchy dam site, boundary of the Yosemite National Park, North Mountain Power Station and at the mouth of Jawbone Creek, also on the Cherry and Eleanor Creek amounting to approximately 180,000 miners inches, in the name of the City and County of San Francisco, under the provisions of Resolution No. 7302.

A reconnaissance of that portion of the survey for the proposed industrial railroad from Moccasin Creek to the South Fork, designated as the Third Division was made, the distance approximated at 40 miles. This road is projected on a maximum grade of three (3) per cent, ascending and four and one-half ($4\frac{1}{2}$) per cent descending towards the objective point on curves not sharper than 20° or not less than 287.9 feet radius. An improved location with sharper curves may be found to materially cheapen the cost of construction.

The preliminary location of the above Third Division of the proposed industrial railroad had advanced 10,657 feet, June 30, 1911.

Estimates of cost have been made for the several projects but can be used only as approximate results at present.

WATER SUPPLY INVESTIGATIONS OF AVAILABLE SOURCES.

Considerable time and labor has been devoted to the investigation of water supply sources. Large scale maps have been made, showing mean annual rainfall, from reliable data of the several possible sources, viz., Feather River, Yuba River, American River, Cosumnes River, Mokelumne River, Stanislaus River, Tuolumne River, also a single similar map including the territory from the Feather River to the Merced River.

RUN OFF AND GAUGING RECORDS.

Gauging and weather observation stations have been maintained on Eleanor Creek just below Lake Eleanor, on the Tuolumne River above the junction of Falls Creek and at the lower end of the valley near the proposed dam site for the Hetch Hetchy reservoir. From the data thus recorded, discharge curves have been determined for the Tuolumne River and Eleanor Creek and by differences for Fall Creek. A weather observation station was also maintained at Portulaca. A map showing all water appropriations extant on the Tuolumne River and its branches has been made from abstracts of the Tuolumne County records.

Thirty-nine original maps, 87 tracings, 2 models and four comparative blocks were made as follows:

Name of Map.	Size.	No. Orig. Maps.	No. Tracings.

\$22,272.95 was paid out for salaries and labor also \$6,773.56 for general expenses exclusive of the official expenses of the City Engineer.

This data will be presented in full in the report under preparation for the Board of Army Engineers.

PLANS AND SPECIFICATIONS PREPARED.

Plans and Specifications and an estimate of cost for clearing Lake Eleanor Reservoir have been submitted to the Board of Public Works and plans and specifications for the dam are so far completed that the work can be let early in 1912.

The sale of \$1,125,000.00 bonds for this work was recommended for February 1, 1910, but various delays prevented the consumation of this sale until too late to advertise and let this work in time for the Contractor to assemble a plant and to commence work advantageously for this season.

PURCHASE OF NECESSARY LANDS AND RIGHTS.

As previously reported, it is necessary in order to fully develop and utilize Lake Eleanor Reservoir, that Cherry Creek be diverted into it. Options were therefore secured through the co-operation of the Mayor and the Committee on Public Utilities for the purchase of all lands, reservoir and canal rights of way, etc., of the Tuolumne Water Supply Company. These options were secured on April 11, 1910, and are for \$600,000. Upon this 6% must be paid for the first year of the life of the option and an agreed sum for the second. It was the purpose of the administration to take up and close this option, but delay in selling the necessary bonds and obstructing suits at law have prevented. This option is therefore running on the second year of which due notice was given.

Under the terms of this option, the sums paid therefore are to be expended in works for the protection of the rights and the development of the same as agreed upon by the Company and City Engineer.

Under this agreement these rights have been fully kept up and roads, bridges and trails built and maintained, which make the region accessible.

It will be noted from the above that the development of the city's properties and rights has been practically kept at a standstill and that the order of the Honorable Secretary of the Interior of May 27, 1910, relieves this city of the obligation to commence and complete the Lake Eleanor dam within the time limits defined in Section 9 of the Grant of May 11, 1908.

THE PURCHASE OF THE SPRING VALLEY WATER COMPANY'S PROPERTIES.

Negotiations for the purchase of these properties was resumed under the order of the Board of Supervisors by the Committee on Public Utilities. The City Engineer was called upon to suggest a price for the properties including expensive purchases of additional lands, construction of betterments and settlement of suits.

His report is appended:

WATER SUPPLY INVESTIGATIONS.

An offer of sale of reservoir rights of way, real estate and undeveloped State filings on the waters of Mokelumne River was made on February 11, 1911, by The Sierra Blue Lakes Water Company. This offer was referred to the City Engineer and a report rendered given as Appendix II.

APPENDIX I.

A REPORT AT THE REQUEST OF THE COMMITTEE ON PUBLIC UTILITIES FOR A SUGGESTED PURCHASE VALUE OF THE SPRING VALLEY WATER COMPANY'S PROPERTIES.

San Francisco, January 20, 1911.

The Honorable, The Board of Public Works,
City and County of San Francisco.

Gentlemen:—There has been forwarded to this office the request of the Committee on Public Utilities that the City Engineer review “the purchase value of the properties of the Spring Valley Water Company and the reported recent acquisition of properties and settlements of suits, and, if possible, suggestion as a basis for the purchase of all of the properties of that company.”

This request manifestly rests in part upon a recognition of the fact that, although the vote on this matter in January, 1910, was very light, the great majority of the voters and citizens generally realize that the interests of the City will be best served by the acquisition of these properties.

In the letter of the Spring Valley Water Company of date November 28, 1910, the President expresses the following views:

“We are now willing to sell all properties at a fair and reasonable price, and hope that negotiations now in progress may be characterized by a spirit of fairness on each side with a view to an agreement upon a price which the city can well afford to pay and which the stockholders may reasonably accept.”

and submits the following additions to the properties of the Company:

“2. The Clough suit. We have acquired all the stock of the Washington and Murray Township Water Company, and any embarrassment arising from a minority ownership in that company has been removed.

“3. Great stress was laid in Washington and elsewhere as to the limitation on the quantity of water which this company might convey from its transbay sources. No such limitation now exists.

“4. Suits then pending affecting the Company's right to avail of a source, from which it obtains a large daily supply of water, have been adjusted.

“5. More than fifteen thousand acres of property have been recently acquired which are now under control or ownership of this Company. The acquisition of this property greatly increases the amount of water capable of development, perfects reservoir sites, protects watersheds and removes the possibility of conditions arising that might have been embarrassing.

“6. Financial requirements for protecting and developing our properties were not then easy to arrange, but plans have now been perfected whereby the Company is enabled to further develop its sources of supply. The Calaveras dam is now in course of construction.

"7. The Company can now market a large additional supply, thus increasing its revenue.

"8. While our previous offer was pending, it was stated by representatives of the administration that the properties of the Company could not be developed to supply in excess of sixty million gallons per day. We were as confident then as we are now that proper development will enable them to furnish more than one hundred and twenty-five million gallons per day, but it was not possible for us to bring this truth home to the citizens who were then and are now vitally concerned in knowing the extent to which the city may safely rely upon our properties as a source of supply. It may safely be assumed that the average citizens accepted the assurance of those representing the municipality regarding the limit of our ability to furnish water. If the statements made by the representatives of the last administration that the output of our properties is limited to sixty million gallons per day shall be found to be inaccurate and that they will produce greatly to exceed that quantity, it cannot but have a marked effect in the minds of the voters concerning the value of the properties and the desirability of their acquisition. Information which will set these questions at rest will undoubtedly be furnished in the report of the commission of Federal engineers.

"9. Last January our plant could deliver and distribute in San Francisco only thirty-five million gallons per day. As a result of work long in progress and now completed, we are distributing forty million gallons per day.

"The great value of these changes in conditions is self-evident.

"At this time we are in a position to sell all the properties embraced in our previous offer and all property since directly or indirectly acquired. This condition cannot long continue. Financial reasons require us to segregate properties not required for a water supply, and the transbay situation may create conditions that will make it impossible for us to offer our water properties free from contracts and obligations which do not now exist. It is not inappropriate to remind you here that these properties are very valuable not alone for a water supply, but they possess unexampled possibilities for a magnificent park system which their subdivision would render altogether impracticable."

Under these conditions, and with men in earnest to accomplish the good of this City, it should not be difficult to arrange for the acquisition of the Spring Valley properties at once, and to take possession of the properties prior to the final transference of the title, substantially upon the basis herein set forth. This will put this vital matter, which has been agitated since 1871, or for forty years, upon a satisfactory and secure basis, and enable successive administrations of officials to devote their time and energies to developing the city, instead of annually discussing the problems of rates and prices for months, only to end in costly and prolonged litigations for which the city ultimately pays the cost of both sides. In purchasing these properties the City can better afford to deal generously, or from the standpoint of some extravagantly, with the company than by an over-economical policy cause serious delay in their acquisition.

Under these conditions further delay in municipal ownership of the existing water supply is disadvantageous to both the buyer and the seller, and cannot

continue without grave injury to both sides. Each is therefore in an unsatisfactory, if not dangerous, situation, from which it is possible to pass into one of antagonism when the rules of sound business judgment may not be the guide.

It is known that within the last twelve months the Spring Valley Water Company has added very materially to its lands and water properties, and has closed or adjusted litigations previously unsettling its rights. These purchases and settlements have probably been made upon a better basis than the city could have made them.

The company announced more than a year ago that it could not again make so low an offer as was made in the fall of 1909. Therefore, in response to the request above quoted and with a desire to meet the duties and problems of tomorrow rather than to quarrel over those of yesterday, I suggest that the subjoined offer be recommended to the proper authorities as a basis for the acquisition either of the entire properties of the Spring Valley Water Company and its subsidiary companies or of those portions which are desirable for the City to own in a general water supply from any source.

The following properties of the Spring Valley Water Company will be useful and desirable in the development of any supply such as that from the Tuolumne River:

- (1) The distributing pipe system and connections.
- (2) The service reservoirs.
- (3) Conduits, pipes, rights of way, pumping stations and equipments.
- (4) Storage and proposed storage reservoirs.
- (5) Lands essential to the protection of the storage reservoirs.
- (6) Developments, properties, rights and works essential to the use and integrity of the above.

It is possible, considering these properties as parts of the Tuolumne system, to purchase them with a part of the bond issue of \$45,000,000.00 now authorized. But to make this assured, it might be submitted to the electorate at a special election. There will remain from this bond issue as hereinafter shown sufficient to carry out the stipulations of the grant of May 11, 1908.

The following minor properties, mentioned in my letter of July 9, 1910, are not desirable in the development of a supply from the Tuolumne sources and can be omitted, with reasonable and proper deductions therefore, to the advantage of the City:

1. Manzanita Water Company. (Portola).
2. Searsville tunnel.
Searsville dam.
Searsville lands and improvements.
3. Pescadero lands and improvements.
4. Purissima lands.
5. Sausalito Water Works.
6. Buchanan and Market Street reservoir lot.
7. Brannan Street reservoir.
8. Islais flume.
9. Lobos Creek and flume.
Lobos Creek lands, pump and wells.
10. All lands on the southwest slope of Montara Mountains outside the drainage basin of the Peninsula reservoirs.
11. Lafayette Park Pump lot.

12. Ringgold Street pump lot.
13. San Pedro Pumps and works.
14. Thomasson lot, Ashbury Heights.
15. Lake Merced coal yard lot.
16. Old office lot and buildings, California Street.
17. Stevens Creek lands.
18. All lands adjacent to but not within the drainage basins of the Peninsula Systems of reservoirs, as portion of Polhemus tract, etc.
19. McKissick tract.
20. Santa Clara and San Benito County, Pajaro Valley lands, Miller & Lux purchase.
21. Camp Howard lands.
22. McCormic tract, San Gregorio Creek and all riparian rights adjacent and pertaining thereto.
23. Ravenswood and Guadalupe swamp lands except direct rights of way for conduits.

But the purchase of these properties may be incidental to the acquisition of the whole, in which event their acquisition is, I believe, sanctioned by law.

It is therefore suggested that the City acquire as may be found proper either the whole of the properties, or, if found advisable, those classified as minor properties may be omitted, leaving those which are desirable and useful in any system as follows:

For all of the properties the price offered in the fall of 1909, plus ten per cent advance on all acquisitions and betterments made subsequent to the date of the offer. This will bring the cost of these properties to the City approximately to the following figures:

Price offered in 1909	\$35,000,000.00
Lands and expenditures for betterments (approximately).....	2,100,000.00
10% advance	210,000.00

Total	\$37,310,000.00

That upon the acceptance of satisfactory terms based substantially upon this offer that all pending litigations be dismissed, without prejudice, and that funds impounded by order of the Court be released in favor of the company.

There remains the question of how to meet this expenditure; two methods are suggested:

(1) To submit to the people the proposition to utilize a given portion of the bonds now authorized for a water supply for the purpose of acquiring all or the portions of the Spring Valley Water Company's properties which will form a part of the Tuolumne system, as may be decided upon. This proposition can be submitted at any time at a special election in a form divested of the complications involved in Amendment No. 4 of the Charter as submitted in November last.

If this purchase shall be approved at a figure approximating the above, there will still be left in the \$45,000,000.00 bond issue, now authorized, sufficient to carry out the full stipulations of the grant of May 11, 1908. Moreover, in time the second suggestion now made can be put into effective form.

(2) An amendment to the Charter which will:

(a) Restrict the 15% of the total assessment roll as a permissible limit of bond issues to non-productive utilities, such as sewers, public buildings, fire protection system, schools, parks and playgrounds, libraries, etc., and even to reduce this limit to 10%;

BOARD OF PUBLIC WORKS

(b) To place productive utilities, such as Water Works, Street Railroads, Gas and Electric Works in a separate category not within the above limit;

(c) To make investments in these productive utilities secure by prescribing that each shall constitute a security for the bonds issued therefor, as in the case in the exploitation of these utilities by private corporations; and, to pledge any deficiency in revenue to meet interest during construction by a general tax levy; and, to make the service rates for such utility sufficient to meet the interest and sinking funds.

Bonds based upon these conditions will command at least as ready a sale as those of private corporations involving the burden of stock, not paid up to its full face value and invested in the enterprise but upon which dividends are required.

The above amendment will put the development of Productive Utilities upon its proper and logical basis, instead of standing as a burden upon the properties and industries of the citizens. Upon the establishment of a Productive Utility upon this basis, it becomes a source of revenue, as has been the case in the water supply of Sacramento since its incorporation, and in other cities; and as has been recently established in the Los Angeles water supply.

It is true that a Charter amendment to this effect cannot be put into force for two years, but in the meantime a definite arrangement can be entered into, upon which for a fixed payment to the company the City can acquire possession of the properties herein set forth, the title to pass only upon the consummation of the agreements.

I therefore submit the above as at least supplying what appears to be lacking, namely, an equitable basis for arriving at a price which the company can accept and the people approve. It has the merit of being better than either the present condition, or the expenses, delays and difficulties of a prolonged and probably unsatisfactory suit in condemnation.

As this is a matter in which our entire citizenship, regardless of parties, affiliations or interests, is deeply concerned, it is desirable, before formally acting on the above propositions, that representatives of all of these parties and interests be requested to meet, and to secure, in greater part at least, their approval of these purchases.

Respectfully submitted,

(Signed) MARSDEN MANSON,
City Engineer.

APPENDIX II.

REPORT ON THE PROPOSITION OF THE SIERRA BLUE LAKES WATER
& POWER COMPANY.

San Francisco, May 20, 1911.

The Honorable, The Board of Public Works,
Of the City and County of San Francisco.

Gentlemen:—There has been forwarded to this office by you from the Committee on Public Utilities of the Board of Supervisors the proposition of The Sierra-Blue Lakes Water & Power Company to sell to this City the rights and properties claimed by that company. This reference is by letter from the Clerk of the Board, of date of March 16, 1911. Prior to that date, namely, on October 29, 1910, this office had secured from the President of that company the report of the Consulting Engineer, Mr. Russell L. Dunn, to its predecessor, the Sierra Nevada Water & Power Company, to which properties and rights the present proponent has succeeded. There are also available the printed letters and circulars of the Sierra Nevada-Blue Lakes Water & Power Company of date January 23, 1911; a "Summary of the Advantages and a Comparison with other Available Sources of Supply"; the typewritten report of the address of the attorney of the Company, Ex-Governor Gillett, before the Committee on Public Utilities on February 15, 1911; and the Supplementary Report of Mr. C. M. Burleson, Engineer of the Company.

On April 4th this office was advised that an additional supplementary report with a map of a large reservoir would be submitted on or before April 15th. This data was received on May 10th. Hence delay in reporting upon this project was necessary until the submission of the later data.

SUMMARY.

It will be seen from the subjoined report that the offer of the Sierra-Blue Lakes Water & Power Company should be rejected for the following reasons:

(1) The drainage areas are largely in private ownership and consequently are not free from present and future contamination, nearly 70% of that tributary to the principal available reservoir being in private ownership;

(2) The reservoirs are of far less capacity than those now owned by the City and the storage is secured by higher, longer and consequently more costly dams;

(3) No right has been, or can be, acquired under present laws to the North Fork or largest reservoir;

(4) The power possibilities are much less than those now owned by this City;

(5) The system as proposed is not as alleged a gravity system;

(6) The alleged lower cost of construction is principally secured by the use of wood stave pipe and the delivery of the supply only as far as Dumbarton Point on the east shore of the Bay;

(7) Adverse ownership of the Blue Lakes reservoirs;

Each and all of the above are valid reasons for rejection. They are the fundamental characteristics which determine the selection or rejection of a source of water supply. They outweigh all other considerations so greatly and

are possessed in so superior a degree by the sources now owned by this City that it is neither useful nor desirable to reconsider the selection. In only one particular does the source offered by the Sierra-Blue Lakes Water & Power Company appear to have the advantage of the Hetch Hetchy sources, namely, a possibly shorter conduit. This is due to the fact that its proposed reservoirs are lower down on the slopes of the Sierra Nevada and are consequently more exposed to the contaminating effects of human activities and possess less power possibilities. It is therefore not necessary to make comparative estimates of routes nor costs. Moreover, by no possible process could any change be made without submitting the same to the electorate of the City.

PHYSICAL DATA OF MOKELUMNE RIVER DRAINAGE BASIN.

It is necessary at this time, and before reviewing the history of this source, to present the physical data embraced in the drainage basin of this river.

DRAINAGE AREA.

Mokelumne River drains 657 square miles of the west slope of the Sierra Nevada Mountains in the Counties of Amador, Calaveras and Alpine in this State and lying northeast of San Francisco. The length of this drainage area in the mountains is 75 miles, the maximum width 17 miles, and the average width about 9 miles. The basin is naturally divided by the ridges which mark its subdivisions into the minor basins of its forks, as follows: The North Fork, drains 327.0 square miles; the Middle Fork, drains 53.6 square miles, and the South Fork, drains 66.0 square miles. These forks unite in the foothills near West Point at an elevation of about 1,500 feet.

The subdrainage basin of the North Fork extends easterly to the crest of the Sierra Nevada Mountains, which crest has a general elevation of about 9,000 feet with peaks rising to a maximum of over 10,000 feet. The subdrainage basins of the Middle and South Forks do not reach the summit of the Sierra Nevada or so great an elevation, as they are cut off from the crest of the Sierra by the North Fork and the Stanislaus. These two streams reach above the Middle Fork and South Fork drainage basins and restrict their elevation to a maximum of about 7,500 feet above sea level. The remainder of the area, 211 square miles, drains into the main stream below the junction of the forks. The main river enters the great valley of California near Clement and flows across this valley past Woodbridge into San Joaquin River.

FORESTRY CONDITIONS.

The lower portion of the watershed of Mokelumne River is covered with foothill pine, oak and brush. Where suitable for farming, some of the lands have been cleared and are occupied by a prosperous population. The great mother lode on which many mines are located traverses the westerly portion of the drainage area. Above the 3,000 foot contour forests of pine, spruce and fir prevail on northerly slopes. The most desirable of the timber areas have been taken up and are in private ownership. The entire basin has been very heavily grazed over, and as most of the desirable timber has been acquired by private parties forest protection is not assured, although the Forest Reservation lines now embrace the remaining area.

RAINFALL.

The normal rainfall over the area is from 20 to 60 inches, and has been studied quite closely by myself in the preparation of the Rainfall, Forest and Drainage Area Map of the State in 1900; and recently in the preparation of the

data for a report to the Board of Engineers acting under the order of Secretary Ballinger of May 27, 1910.

Whilst rainfall records are somewhat scarce, the more recent study corroborates the former very closely, and combined with the records of adjacent stations and discharge measurements afford reliable data for preliminary and comparative studies.

The distribution of precipitation is expressed on the accompanying map, which also shows the areas of the several drainage basins, streams and existing ditches, roads, villages, etc. It is compiled from U. S. Geological Survey Maps and other data. The rainfall records are based upon the U. S. Weather Bureau records and all other available data. These will be more particularly set forth in a report now in preparation covering all streams from Tuolumne River to Feather River, both inclusive. From this report the above map has been extracted.

The normal seasonal precipitation upon the entire area is 49.2 inches as shown by Isohyetes on the map, but varies from this in the following percentages:

During seasons of deficient precipitation, such as 1862-1863, 1863-1864 and 1897-1898, the precipitation was 57, 46 and 58 per cent of the normal respectively.

During periods of excessive precipitation, such as 1889-1890, 1905-1906 and 1906-1907, the rainfall was 170%, 136% and 148% of the normal respectively.

It is, however, with the former group of seasons that we have to deal; or with seasons during which the rainfall is less than one-half the normal or average; and when the runoff is approximately one-quarter only of normal runoff.

Applying these principles to that portion of the drainage basin tributary to Railroad Flat Reservoir, we have a normal precipitation of 55 inches and a normal runoff of 31.5 inches. The minimum precipitation occurred in 1863-1864 of 25.3 inches, and the maximum in 1889-1890, 93.5 inches. The runoff from this catchment area for the minimum year would approximate 8.2 inches.

DISCHARGE.

The discharge of Mokelumne River at Clement varies between a low water discharge of about 80 second feet to an extreme flood discharge of about 20,000 second feet.

In the study of the rainfall and runoff phenomena of this river, the accompanying curve has been constructed, and found to express the ratio between these two factors with sufficient accuracy for preliminary studies. (See following page.)

HISTORY.

It has been stated that as early as 73-4 the Mokelumne River basin has been the subject of studies of the water supply possibilities of this city. A brief resume of these studies is appended:

The basin of Mokelumne River, notably the Blue Lakes in Alpine County, near the head of the main branch, have been frequently under consideration by the city authorities; and, the region has for several decades been sufficiently well known to compare its possible water resources with those of other drainage basins.

The first investigations of the Mokelumne and Blue Lakes sources was made by Engineer Scowden who was employed by the city in 1874-5 for the purpose of investigating possible sources of Water Supply. (See Municipal Reports 1874-5, pp. 627-31.)

A specific offer of the Blue Lakes properties was made in 1874 by Mr. W. W. Clark. (See Municipal Report 1874-5, pp. 675-677).

Again in 1876-7, the Mokelumne Basin and Blue Lakes were carefully examined and reported upon by the late Colonel Geo. H. Mendell of the Corps of Engineers, U. S. Army. (See Report, pp. 14 to 23, also Municipal Reports 1876-7, pp. 718-725).

In 1900-01, Mr. Grunsky, then City Engineer, and myself as Commissioner of Public Works, examined this source and so long as other more desirable sources were available, Mokelumne River was not considered desirable. From page 205 of the Appendix to the Municipal Report of 1900-01, the following is quoted:

"Mokelumne River has frequently been suggested as a desirable source of supply, the nucleus for storage on this stream being the Blue Lakes. The merits of this project together with others, were discussed by Colonel G. H. Mendell in his report of 1878. Much additional information concerning the possibility of water development in the watershed of this river has since been collected by the Blue Lakes Water Company and the Standard Electric Company. The latter company is now engaged in installing an extensive electric power plant from which water will be liberated at an elevation sufficient to permit its being carried across San Joaquin Valley and pumped over Livermore Pass, as suggested for the other Sierra Nevada projects.

"The interference with established rights and an established business which would be involved in obtaining water from this source, as well as conditions relating to sources of supply, which are not entirely favorable, have made it appear less desirable to consider a project for the utilization of this water than that from such other sources of supply from the Sierra Nevada Mountains, as Stanislaus River, or possibly the Tuolumne River."

In 1904-5, I examined the Railroad Flat reservoir for the Sierra Nevada Water and Power Company and reported to Mr. Martel, its President, that this had excellent power possibilities with a much lower dam than has been subsequently proposed and advised him that this source was not so desirable for Municipal purposes as Tuolumne River.

In 1905-6, as Consulting Engineer of the City with Mr. John R. Price, Assistant City Engineer, I examined and reported upon the particular reservoir and source now offered. Considering the extremely high dam required for Railroad Flat reservoir, the character and large proportion of the drainage area under private ownership, together with the complications resulting from the joint or probably absolute ownership and use of the Blue Lakes by a power company, we did not deem this source a desirable one, although favorable power possibilities attach to it. This report was submitted in 1904-6 but was not published. The conclusion then reached as to rainfall and runoff have been verified by the more detailed study of the additional data.

In order to relieve this office of any just allegation of prejudice against either the present owners or the proposition which they submit, as has frequently appeared in public print, this report of 1906, which was concurred in by my associate, Mr. Price and the then City Engineer, Mr. Woodward, is specially referred to.

The various branches of Mokelumne River have therefore been offered to the City, as follows:

Blue Lakes, the present main supply of the Pacific Gas and Electric Company, in 1874-75. (See Mun. Rep. 1874-5, pp. 675-77).

In 1877, (See Col. Mendell's Report, pp. 184-188; also Mun. Reports 1876-7, pp. 718-25).

In 1900, (See letter of Prince Poniatowski, Mun. Reports 1900-01, Appendix page 404.)

In 1905-6, the Sierra Nevada Water and Power Company, through Charles Martell, President, offered the Railroad Flat reservoir, reinforced by the introduction of some of the run-off from areas to the North of the South and Licking Fork of Mokelumne River, together with the Blue Lakes. The right to use the water from the Blue Lakes did not appear at that time to vest in Mr. Martell's Company; and the use of this water for the time necessary to gain a prescriptive right by the Woodbridge Irrigation District further complicates the diversion of this water at low stages of the river, when its use would be required.

PRESENT OFFERS OF THE MOKELUMNE AS A SOURCE.

In the several communications heretofore referred to, the Sierra Blue Lakes Water & Power Company makes offer of a source of water and power supply for the City and County of San Francisco of certain lands, filings and inchoate rights in the basin of Mokelumne River for \$6,000,000. These properties and rights are as follows:

(1) Railroad Flat Reservoir, on the South Fork of Mokelumne River having a direct drainage area of 65 square miles, a possible diverted supply from an additional area on the Middle Fork of 67 square miles, and with a storage

capacity of 32,800,000,000 gallons behind a 300 foot dam, or 39,000,000,000 behind a 325 foot dam;

(2) A Reservoir on the north branch of the Middle Fork having a tributary drainage area of 16 square miles, and a storage capacity of 14,000,000,000 gallons behind a 100 foot dam;

(3) A Reservoir on the North Fork of Mokelumne River having a drainage area of 396 square miles, and a storage capacity of 52,000,000,000 gallons with a dam 325 feet high and 1,520 feet crest length;

(4) Blue Lakes near the headwaters of the North Fork having capacities of 4,000,000,000 gallons behind dams constructed by the Pacific Gas & Electric Company or its predecessor, the Standard Electric Company, and owned and operated by the former company.

(5) Inchoate Rights and Appropriations of water amounting to 52,000 miners inches, with filings for rights of way for canals, etc.

(6) Diversion Points below Rich Gulch or below Electra; at elevations of 850 feet and 800 feet above sea level respectively;

(7) - Lands. 1,600 acres patented and applied for;

(8) Alleged possibilities for developing electric power to the extent of 40 to 50 thousand horse power;

(9) An unacquired right of way across the Valley of California and the Coast Range to Dumbarton Point on the east shore of the Bay opposite Ravenswood in San Mateo County.

COMPARISONS.

The presentation of the proposition of the Sierra Blue Lakes Water & Power Company takes, as now appears fashionable, more of the form of a criticism and attack upon the properties and rights now held by the City than a just and fair presentation of what that company has for sale for \$6,000,000.00. This gage is not new to this office and is accepted. This course on the part of the proponent of the Sierra Blue Lakes Water & Power Company's scheme is manifestly intended to lead the citizens of this city into the belief that the Engineers advising them in the selection of the Hetch Hetchy sources have led them into a stupendous mistake; and that successive Boards of Supervisors have been grossly mistaken in their review of these sources after officially inspecting them; also that the Engineers of the U. S. Geological Survey, who in 1898-9 advised that Hetch Hetchy Valley was a most desirable source, and that Professor Whitney, who in 1868-9 advised Lake Eleanor as a source, were grossly in error. This course on the part of the proponent makes it necessary to compare these sources more fully than would otherwise be necessary.

It becomes necessary therefore to present comparisons which really compare the relative drainage areas and their ownership, storage capacities and elevations available for power of the two sources.

In the comparisons which have been made by the Sierra Blue Lakes Water & Power Company and its counsel, the storage behind dams of 300 and 325 feet in height at Railroad Flat and at the North Fork reservoirs have been compared with the storage behind such lower dams at Lake Eleanor and Hetch Hetchy. Comparative reservoir capacities thus obtained have been laid before the people of this city in this misleading form to make it appear that gross blunders had been made in the selection of the reservoirs and rights now owned by this city, and further effort has thus been put forth to make it appear that the citizens of this city would gain many millions of dollars by an abandonment of the rights now held by them and by the purchase in lieu thereof for \$6,000,000.00 of the claims presented by the Sierra Blue Lakes Water & Power Company. Instead of

making these comparisons in the above misleading and deceptive form, they will be presented with dams of somewhat equivalent heights, when the superiority of the storage capacities of the reservoirs owned by the city will be made manifest. In this comparison the soundness and truth of Ex-Governor Gillette's statement, "that the supply depends upon the storage and not upon the flow of the river." (Page 4 of Stenographic Report of proceedings). This manifest truth must be applied to the reservoir capacities offered by his clients. Also the consequent truths that the "Average season" and the "average flow" have very little bearing upon the problems of water supply; and, that seasons or groups of seasons of minimum precipitation and flow impose the conditions that must be met.

There is no such thing as the average flow or discharge of a river. This is a mere concept, an expression used to convey an idea of the total volume of water flowing during a year or a season from a given drainage area. Unless this total volume could all be determined in advance and stored and caused or permitted to flow, under complete control as to quantity and time, it cannot be dealt with in human affairs. When we consider the floods of 20,000 second feet which are presented by the 657 square miles of the drainage basin of Mokelumne River, or 40,000 second feet which are presented by the 1,501 square miles of Tuolumne River watershed, the futility of attempting to store and actually "average" these discharges with the low water discharge of these rivers is made manifest. Consequently all deductions based on the "average precipitation" or "average flow" are fallacious in the extreme. When these terms are plausibly used they mislead the public, but are given short shrift by experts who deal with the fact "that the supply depends upon the storage and not upon the flow of the river."

In order to lay the facts of ownership and mines fully before you, the accompanying maps of the private ownerships in the drainage basins tributary to the Mokelumne sources and of those tributary to Lake Eleanor, Hetch Hetchy and Cherry Valley reservoirs are submitted. It will be observed that with the exception of a small and uninhabited strip of timber claims on the northwest edge of the drainage area tributary to Cherry Valley Reservoir, the City of San Francisco is by far the largest owner of land in the drainage basins tributary to Hetch Hetchy, Lake Eleanor and Cherry Valley reservoirs, and that no habitations nor mines whatever exist in these entire drainage basins. Moreover, the reservoir areas owned by the City are more capacious and require much lower and shorter dams than those offered by the Sierra Blue Lakes Water & Power Company, and the water being stored at greater elevations is not only from un-owned and uninhabitable areas, but has a greater potential than equal volume stored at lesser elevations. This difference will be more definitely indicated later.

It is to be regretted that the advocates of the Sierra Blue Lakes Water & Power Company do not more fully know both sources, that they might more justly put forward the real advantages and disadvantages of each source. It is not necessary to allege, for instance that the Sierra Blue Lakes Water & Power Company's source is "above the level of human habitation," when its principal reservoir, Railroad Flat, has the village of that name in its drainage basin and lies below the 2,500 foot contour above sea level. Moreover, the maps of the United States Geological Survey show dwellings and roads all through the tributary drainage area and the United States Land Office maps show some 70 per cent of the first and artificially tributary drainage areas to be in private ownership.

It is not reasonable to compare the storage behind a dam at Railroad Flat 300 or 325 feet in height with that behind the first level of the dam 120 feet high at Lake Eleanor, particularly when the drainage area naturally tributary to this reservoir is considerably greater than that draining into Railroad Flat, and a still larger area can be artificially diverted into Lake Eleanor. With a dam of

the same height as that proposed for Railroad Flat reservoir, Lake Eleanor reservoir has a storage capacity more than three times greater. Nor is it rational to allege that water stored 2,175 feet has a potentiality greater than that stored at 4,600 feet. Lake Eleanor water, after having been passed through 2,000 feet fall into a power station, will still be at a greater elevation than the gates of the proposed Railroad Flat reservoir.

One has but to turn to the U. S. Geological Survey Reports of over two decades ago to learn that the two most superb reservoirs in the Sierra Nevada Mountains are Lake Eleanor and Hetch Hetchy, and to the records of Tuolumne County to learn that over one-half of the area of each is irrevocably vested by U. S. patent in this city.

Exaggerated statements of the nature of those above referred to detract from whatever real merits and values which the project of the Sierra Blue Lakes Water & Power Company may have, and deter investors from taking them upon these merits. It is only to prevent gross misconceptions and misstatements from gaining credence among those not fully informed that attention is called to these exaggerations.

In order to make these comparisons so plain that there can be no misunderstandings whatever, there are presented a few graphic illustrations. The first are the comparative areas and contours of the reservoir spaces as mapped by the U. S. Geological Survey:

(1) Lake Eleanor, (2) Hetch Hetchy, and (3) Railroad Flat. The North Fork reservoir, being unavailable, as elsewhere stated, is not included. The areas of each are shaded as if filled to the same maximum depth, namely, 300 feet. The second illustration is a photograph of blocks, the heights of which are proportionate to the height of the dams, and the volumes of which are proportionate to the quantity of water stored behind each dam. The Lake Eleanor

HETCH-HETCHY RESERVOIR—TUOLUMNE RIVER.

RAILROAD FLAT RESERVOIR—SOUTH FORK OF MOKELUMNE RIVER.

dam is projected to a height of 250 feet, the others to 300 feet. It will be observed that either of the City's reservoirs has an ultimate capacity several times that of Railroad Flat reservoir, the principal available storage of the proponent. The third illustration is a diagram showing proportionately and in exact figures the areas naturally and artificially tributary to the reservoir, their capacities and the elevations above sea level. The fourth is a photograph of blocks proportionate in height and volume to the dams and reservoirs and making it manifest that the combined capacities of Lake Eleanor and Hetch Hetchy reservoirs is double that of Railroad Flat and the North Fork of Mokelumne. This latter reservoir is, however, entirely out of consideration by reason of the excessive cost of storage per unit of masonry and the withdrawal of the site as herein explained. In figures, and including all the controlling reservoirs contemplated under each source, the ultimate storage is as follows:

COMPARATIVE STORAGE.

The Sierra Blue Lakes Water & Power Company offers the following storage:

(1) Railroad Flat Reservoir	325' dam	39 Billion Gallons
(2) North Branch of Middle Fork Reservoir.....	100' dam	14 Billion Gallons
(3) North Fork Reservoir.....	325' dam	52 Billion Gallons
(4) Blue Lakes (operated by P. G. & E. Co.)....		4 Billion Gallons
Grand Total		109 Billion Gallons

The Hetch Hetchy and Lake Eleanor Reservoirs have capacities as follows:		
Lake Eleanor	250' dam	100 Billion Gallons
Hetch Hetchy	300' dam	82 Billion Gallons
		182 Billion Gallons
Cherry Valley Reservoir	125' dam	30 Billion Gallons
Grand Total		212 Billion Gallons

These figures, showing the advantages of larger storage on the Hetch Hetchy sources, are amply borne out by Ex-Governor Gillette, of Counsel for the Sierra Blue Lakes Water & Power Company, where he says, "that the supply depends upon storage and not the flow of the river" (page 4 of stenographic proceedings); and "After all the great proposition is to get the reservoir site that furnishes all of the water" (Page 11 of Stenographic Reports). These principles must be kept constantly in mind and applied in the choice of a source of water supply, as they were fundamental in the selection of the two superb reservoirs now the property of this city.

There are also some radical contradictions in the statements presented by the Sierra Blue Lakes Water & Power Company which are difficult to reconcile.

First, in Ex-Governor Gillette's statement to the Committee on February 15, 1911, page 6, "It can be run by gravity into the City by way of Altamont Pass"; second, in the circular of the Sierra Blue Lakes Water & Power Company of date January 23, 1911, it is alleged of the city "It can have a system that will be run by gravity and not by pumping"; third, in an undated circular letter it is alleged in headlines of this supply:

"THE ONLY GRAVITY SYSTEM OF PURE MOUNTAIN WATER."

On the other hand, the Engineer of the Company on pages 8 and 11 of his Supplemental Report of February 11, 1911, accounts for a "Pumping plant

DIAGRAM SHOWING

Relative Areas of Drainage; Storage Capacities; Elevation above Sea Level, and possible power development of: LAKE ELEANOR & HETCH-HETCHY RESERVOIR AND OF RAILROAD FLAT RESERVOIR.

Livermore pumping station, \$840,000.00," and "7 miles force main double line of 48-inch iron pipe \$791,400.00," or an expenditure of \$1,631,400.00 in a pumping plant and accessories. On page 14 of the Stenographic Report of the proceedings of the Committee on Public Utilities he says "we would therefore have to pump the water from the pumping station over the Livermore Pass, a vertical height of 450 feet," etc.

These statements do not appear to be in exact accord.

ROUTES.

It is not necessary to discuss the routes, materials and costs of conduits since all Sierra sources have to cross the valley of California, and comparisons of the cost of one source delivered through cheap wooden stave pipe with the cost of another delivered through laminated iron pipe, is grossly misleading. The prime question is not one of relative costs on different basis of estimates and conduits, but of the source, its purity, abundance, freedom from the complications of a portion of its ownership with a private corporation, or similar "entangling alliances," such as a power company in the actual use of a portion of the supply. San Francisco is now arranging costly purchases in order to be absolutely free of just such entanglements. Moreover, the Tuolumne source promises the greatest development of power for pumping and other municipal purposes. These advantages are higher than is now fully recognized. All of these essential and prime requirements are greater in the sources now owned and in process of development.

The route adopted by Mr. Burlison practically parallels that of the city across the "broad valley, which is very hot in the summer months," and thence is the same as that adopted by the City to Dumbarton Point, where his project and estimates end.

The route adopted by Mr. Dunn is more direct and makes four crossings under branches of San Joaquin River, a tunnel $4\frac{1}{2}$ miles long from near Martinez into the Valley of Rodeo Creek, one under Oakland Harbor and a transbay pipe $5\frac{1}{2}$ miles long, and delivers the water by gravity into San Francisco near Hunter's Point at an elevation of 25 feet above tide. From this elevation every gallon would have to be pumped to the various levels at which it is consumed.

The above statement regarding tunnels do not agree with the printed statement of the S. B. L. W. & P. Company "To bring water from Hetch Hetchy there will have to be about eleven miles of expensive tunneling; from our property there will be none." (Page 3) These discrepancies are, however, possibly due to the fact stated by Mr. Dunn: "Detailed surveys are required to establish the precise location and construction specifications for every structure of the proposed waterworks. The Company has absolutely nothing of engineering data of this character." (Page 37)

A COMPARISON OF FIRST COST OR COSTS OF RIGHTS, PROPERTIES FILINGS.

The Sierra Blue Lakes Water & Power Company's lands, rights, filings and properties are offered for \$6,000,000.00 (page 18 of Proceedings Public Utilities Com.) These have been recited in detail. The City holds and is perfecting lands, rights and properties of the Hetch Hetchy project as follows:

Reservoir and exchange lands Smith-Kellett purchase.....	1,362 acres
Lake Eleanor purchase, including water and reservoir rights.....	920 acres
Cherry Valley purchase, including water and 6 reservoir rights, about made	960 acres
	3,242 acres
The two first mentioned and all work and expenses from 1900 to date have cost about.....	\$ 715,000.00
The Cherry Creek lands, reservoirs and rights will cost about.....	676,000.00
	\$1,391,000.00
Or a total of	\$1,391,000.00
Or less than \$1,500,000.00.	

Deducting this from the \$6,000,000.00 price asked for the rights and properties of the Sierra Blue Lakes Water & Power Company, we have left \$4,500,000.00. This sum, considering the foregoing, is worth saving, as it will more than pay for the alleged difference in length of conduit between the two sources.

OWNERSHIP OF LANDS IN THE SEVERAL DRAINAGE BASINS.

The comparisons and allegations have been so thoroughly exploited in a portion of the public press that in order to avoid further or greater deception of the public it is necessary to take into consideration the private ownership and patented mines in the two sources now under comparison.

In the drainage basin of the South Fork tributary to Railroad Flat reservoir about $69\frac{1}{2}$ per cent, including the village of Railroad Flat, are in private ownership, and the entire area is subjected to the denuding agencies of destructive lumbering and sheep pasturing. There are 12 patented mines in this drainage area.

In the drainage basin of the Middle Fork, which it is proposed to divert into Railroad Flat Reservoir and on which it is also proposed to construct a smaller reservoir, $74\frac{1}{2}$ per cent of the land is in private ownership. This area is also subjected to the pasturage of sheep and cattle.

Of the drainage basin of the North Fork, only 7½ per cent of the land above the proposed reservoir is in private ownership and the remainder is Forest Reserve, subject to pasturage. But this reservoir area is withdrawn and not open to filing, as herein detailed.

These comparative areas of ownership, mines and Forest Reserve are shown on maps accompanying this report. The data upon which they are based are

from the U. S. Land Office records at Sacramento, California, copies of which are on file in this office.

It will also be noted that of the drainage area above the diversion point at Rich Gulch, 27 per cent is in private ownership, and this area contains 79

patented mines; that of the drainage area above Electra, also mentioned as a point of diversion, 27 per cent is in private ownership, and the area contains 80 patented mines.

Besides these private ownerships, the Pacific Gas & Electric Company and its predecessors have long had certain developed works and inchoate rights on the North Fork of Mokelumne River, which further complicate any developments of the possibilities of the North Fork.

It is also known from the United States Geological Survey maps that no large nor desirable reservoir areas occur in the basin of Mokelumne River as was pointed out by Mr. J. B. Lippincott, C. E., of that service, in suggesting Hetch Hetchy reservoir as a desirable source for this city in 1898-99; and by Professor Whitney State Geologist of California, who, in 1868-9, suggested Lake Eleanor. The general features and conditions were known by the Engineers who recommended the selection and approval of the Hetch Hetchy sources.

The above would seem to set at rest any question as to "mistakes" which have been made in the selection of the sources now owned by this city. They were recommended so long ago that the alleged partiality or prejudice of the writer, who was not then connected with the City Government, is of no moment.

As against this private ownership and patented mines in the drainage basins of the reservoirs and above the diversion points of the Sierra Blue Lakes Water & Power Company's project, we have:

In the drainage basin of Hetch Hetchy less than one and one-tenth per cent in private ownership; in that of Lake Eleanor less than two per cent; in the drainage basin of Cherry Valley less than 2 per cent; in the entire drainage basin of the Tuolumne at Cherry Mouth one and two-tenths per cent.

These private holdings are all uninhabitable and there are no mines whatever. These relative conditions of ownership of lands and mines are shown on the accompanying maps.

OBJECTIONS.

There are therefore serious objections to the consideration of the above offers:

1st. The dams proposed for Railroad Flat and the North Fork are of unusual height and the storage afforded is very costly by reason of the comparative restriction of the reservoir areas which are in narrow canons, rather than in expanded valleys. The average width of water surface in the largest reservoir, that on the North Fork, is not twice the length of the crest of the dam.

2nd. About 69 per cent of the drainage area above Railroad Flat reservoir is in private ownership, including the village of Railroad Flat. The denudation of timber and brush in this area is excessive and 12 patented mines are in this drainage basin.

3rd. The drainage area which can be made tributary to this reservoir by diverting canal is also about 74 per cent in private ownership. It has not been considered necessary to determine the present population within these areas, but it is known to be considerable. It is alleged that these drainage areas are above the limit of human habitation, but as Railroad Flat Reservoir is below the 2,500 foot contour, and as the village of Railroad Flat is within this area, and 69 per cent of the tributary drainage area is in private ownership, this allegation does not appear to harmonize with the facts. The large percentage of privately owned lands in these drainage areas makes it certain that diverted storm waters and stored waters therefrom when mixed with the natural run-off will soon have to be filtered for safe domestic use.

4th. The temporary withdrawal of the North Fork Reservoir site for power purposes was promulgated by the Commissioner of the General Land Office in Letter K of December 29, 1909, under orders from the Secretary of the Interior

made December 20, 1909, which order was in pursuance of a letter from the Director of the Geological Survey of date December 15, 1909. The withdrawal was made permanent by the Commissioner's letter K of August 11, 1910, in pursuance of Executive Order of July 2, 1910.

This site is therefore not subject to filing, and so far as this office has been advised no filing has been made. The subsidiary offer of May 10, 1911, is restricted to the submission of a survey of this site. Storage therein is rendered extremely costly by natural conditions, and impossible of acquisition by Executive Order, as above recited. Furthermore, much of the drainage area is in private ownership.

RECOMMENDATION.

All of the physical facts and the comparative possibilities of this source were known to the Engineers making the selection and advocating the adoption of the Hetch Hetchy or Tuolumne sources. For the reasons mentioned in the summary at the beginning of this report, it is recommended that the offer of the Sierra Blue Lakes Water & Power Company be rejected.

Respectfully submitted,

(Signed) MARSDEN MANSON,

REPORT OF CITY ARCHITECT

To the Honorable, The Board of Public Works,
Of the City and County of San Francisco.

Gentlemen:—In accordance with the provisions of the Charter, I submit herewith a report of the Bureau of Architecture for the fiscal year 1910-1911.

Respectfully submitted,

A. I. COFFEY, City Architect.

INTRODUCTION.

During the first three months of the fiscal year, the Bureau of Architecture was under the charge of Mr. John L. Fisher, who was appointed April 18, 1910, as Acting Architect, and served until September 30, 1910, on which date he accidentally met his death. George de Colmesnil, Assistant Architect, temporarily filled the position from September 30, 1910, until December 1, 1910, on which date Alfred I. Coffey was appointed Architect of the Board of Public Works.

The total cost of work contracted for during the fiscal year 1910-1911 is as follows:

School Houses	\$1,019,584.00
Hall of Justice	201,405.00
City and County Jail	237,362.00
San Francisco Hospital	458,480.00
Fire Houses	54,102.00
Police Stations	79,325.00
	<hr/>
	\$2,037,597.00

The details of this work are given in the following statements and totals:

HALL OF JUSTICE.

Five-story class "A" structure being erected on lot 137'6" x 160'0" bounded by Washington, Kearny, Merchant and Dunbar Alley. It is erected to accommodate the following branches of the city government: Superior Courts, Criminal Department; Police Courts; Police Department, Central Station; Detective Bureau; District Attorney; Grand Jury; City Prison.

Contracts awarded previous to July 1, 1910:

General, July 14, 1909, Caldwell & Company, \$257,139; Excavation, April 2, 1909, Healy-Tibbitts Co., \$28,800; Steel, April 12, 1909, Dyer Bros., \$113,675; Exterior Marble, Nov. 1, 1909, Vermont Marble Co., \$5,478; Heating and Ventilating, Dec. 17, 1909, Lennig-Rapple Co., \$28,692; Plumbing, Dec. 17, 1909, Wittman, Lyman & Co., \$30,248; Electric Wiring, Dec. 17, 1909, Standard El. Cons. Co., \$6,690; Metal Sash, Dec. 17, 1909, Rudgear-Merle Co., \$24,700; Prison Cells, Dec. 1, 1909, Dyer Bros., \$29,900. Total, \$525,322.

Contracts awarded during the fiscal year 1910-1911:

Add. Stair Steel, July 1, 1910, C. A. Blume Co., \$795.75; Add. Ext. Marble, July 29, 1911, Vermont Marble Co., \$988.00; Vault Linings, Aug. 2, 1911, Hermann Safe Company, \$3,584.00; Concrete Curbs, Nov. 25, 1910, E. Stone, \$1,175.00; Plastering, Nov. 16, 1910, A. Knowles, \$36,650.00; Elevators, Dec. 23, 1910, Otis Elevator Co., \$13,945.00; Int. Finish, Feb. 6, 1911, Wm. Bateman, \$53,900.00; Add. Gen. Const., Mar. 20, 1911, McSheehy Bros., \$11,992.00; Ornamental Iron, April 7, 1911, Rudgear-Merle Co., \$19,770.00; Hardware, June 7, 1911, Bennett Bros., \$3,778.00; Interior Marble, June 23, 1911, Columbia Marble Co., \$54,830.00. Total, \$201,405.75.

CITY AND COUNTY JAIL.

A 4-story class "A" structure being erected on lot 137'6" x 96'0" bounded by Washington, Merchant and Dunbar Alley, to accommodate the following branches of the City government: Coroner, Emergency Hospital (Central), Sheriff, County Jail.

Contracts awarded previous to July 1, 1910:

Excavation and Foundation, Nov. 24, 1909, Carterra Const. Co., \$11,900.00; Steel, Dec. 10, 1909, Pacific Rolling Mill, \$70,660.00. Total, \$82,560.00.

Contracts awarded during fiscal year 1910-1911:

General, July 22, 1910, Ferrolite Co., \$121,000.00; Electric Wiring, Sept. 2, 1910, Gen. Elec. Cons. Co., \$3,000.00; Heating and Ventilating, Sept. 2, 1910, Lennig-Rapple Co., \$14,430.00; Plumbing, Sept. 2, 1910, Wittman, Lyman & Co., \$35,588.00; Cast Iron Frames, Oct. 19, 1910, Monarch Iron Works, \$2,985.00; Prison Cells, June 9, 1911, Dyer Bros., \$44,600.00; Plastering, June 19, 1911, A. Knowles, \$15,759.00. Total \$237,362.00.

SAN FRANCISCO HOSPITAL.

A group of class "A" structures comprising the following detached buildings with their connecting corridors: Administration Building, Four Ward Buildings, Receiving or Operating Building, Nurses' Home Building, Service Building, Power House.

Contracts awarded previous to July 1, 1910:

Excavation and Foundation, May 5, 1909, Foster & Vogt, \$42,397.00; Structural Steel, June 25, 1909, Pacific Rolling Mill, \$210,600.00; Fireproofing, December 10, 1909, Foster & Vogt, \$102,897.00; Pent House Steel, January 7, 1910, Pacific Rolling Mill, \$11,070.00; Plumbing, April 22, 1910, V. J. Belknap, \$59,891.00; Heating and Ventilating, June 20, 1910—Ward No. 1, The Turner Co., \$2,192; Ward No. 2, The Turner Co., \$2,192; Ward No. 3, The Turner Co., \$2,192; Ward No. 4, The Turner Co., \$2,230; Receiving Building, Wittman, Lyman & Co., \$4,058; Nurses' Home, The Turner Co., \$1,328; Administration Building, Wittman, Lyman & Co., \$1,790; Service Building, The Turner Co., \$1,830; Total Heating and Ventilating, \$17,812.

Of the above listed contracts the first three were completed during the fiscal year ending June 30, 1911.

Contracts awarded during the fiscal year 1910-1911:

General Brickwork, Aug. 3, 1910, Caldwell & Co., \$220,500.00; Exterior Window Frames, Sept. 2, 1910, Lange & Bergstrom, \$21,000.00; Steel Frame Power House, Sept. 12, 1910, C. A. Blume Cons. Co., \$12,595.00; Additional Plumbing, Oct. 10, 1910, V. J. Belknap, \$3,191.00; Roofing, Oct. 19, 1910, Guilfof Cornice Works, \$6,942.00; Sterilizers, Nov. 9, 1910, Walter Surgical Co., \$1,356.00; Plumbing Fixtures, Nov. 9, 1910, D. H. Gulick, \$3,895.55; Special Hospital Fixtures, Nov. 9, 1910, D. H. Gulick, \$11,778.45; Foundation Power House, Nov. 25, 1910, Foster & Vogt, \$23,897.00; Exterior Sheet Metal, Dec. 21, 1910, Pacific Fire Extinguisher Co., \$7,343.00; Partitions and Furring,

March 17, 1911, Roebing Const. Co., \$57,000.00; Exterior Ornamental Iron, March 17, 1911, Ralston Iron Works, \$3,494.00; Exterior Floor Tiling, April 3, 1911, W. W. Montague & Co., \$1,470.00; General Masonry Power House, April 12, 1911, Lange & Bergstrom, \$16,579.00; Steam Risers, Receiving Bldg., April 26, 1911, Wittman, Lyman & Co., \$4,230.00; High Pressure Piping, Four Ward Bldgs., April 26, 1911, The Turner Co., \$4,880.00; Interior Plastering, June 19, 1911, Smith & Johnson, \$57,329.00. Total, \$458,480.00.

Condition of Firehouses, Police Stations and Playground work, on which plans and specifications were prepared and contracts awarded prior to July 1, 1910, and on which construction was carried on during the fiscal year 1910-1911.

FIRE HOUSES.

CHEMICAL NO. 12 (45th Avenue, near I Street—Sunset District).

Contracts were let at an approximate cost of \$28,500.00 for this special type of "Class C" structure. The entire exterior brick walls and partitions were in place and building ready for plastering at the end of the fiscal year 1909-1910. This building was completed December 23, 1910.

PARK POLICE STATION (Situated off Waller Street in Golden Gate Park).

A reinforced concrete "Class B" station and stable building. Contracts were awarded and work had advanced fifty per cent toward completion at the beginning of the fiscal year 1910-1911. Completed October 7, 1910. Cost approximately \$43,000.00.

INGLESIDE POLICE STATION (Located on Ingleside Tract).

These structures of similar type and construction to the Park Police Station were nearing completion at the beginning of the fiscal year 1910-1911, being completed on July 29, 1910. Cost approximately \$44,000.00.

PLAYGROUNDS.

NORTH BEACH GROUNDS—Girls' Section.

Plans and specifications were prepared and contracts were awarded by the Playground Commission for the construction of reinforced concrete retaining walls, buttresses, steps, wrought iron fencing, gates, etc., for said grounds. Approximate cost \$3,000.00. Completed September 1, 1910.

SOUTH SIDE GROUNDS.

Plans and specifications were prepared and contracts were awarded by the Playground Commission for the construction of a one-story frame field house building. Approximate cost \$3,500.00. Completed September 1, 1910.

Conditions of Firehouses, Police Stations and Playground work, on which plans and specifications were prepared and contracts were awarded during the fiscal year 1910-1911.

FIRE HOUSES.

TRUCK NO. 14 AND ENGINE NO. 6 (Located on the west side of 7th Street, between Folsom and Harrison Streets.)

A two-story and basement reinforced concrete "Class B" building. Appropriation \$42,500.00.

Contracts awarded January 18, 1911:

General Construction, Lange & Bergstrom, \$34,811.00; Plumbing, Kiernan & O'Brien, \$2,420.00; Electrical, National Electric Company, \$910.00; Hardware, Palace Hardware Company, \$223.25.

Said structure will be completed about the latter part of October, 1911.

ENGINE HOUSE NO. 42 (Located on San Bruno Avenue, near Silliman Street—San Bruno District).

A special type of reinforced concrete basement and two-story frame building. Appropriation \$16,000.00.

Contracts awarded April 17, 1911:

General Construction, Hawkins Building Company, \$11,580.00; Plumbing, J. G. Sutton & Company, \$1,814.00; Electrical, Butte Engineering Co., \$545.00.

Said structure will be completed and ready for acceptance about October 1, 1911.

ENGINE HOUSE NO. 43 (Located on the southwest side of Brazil Avenue, near Athens Street—Excelsior District)

This building is a similar type of construction to Engine House No. 42. Appropriation \$16,000.00.

Contracts awarded May 3, 1911:

General Construction, O. C. Holt, \$11,940.00; Plumbing, J. E. O'Mara, \$1,955.00; Electrical, National Electric Company, \$468.00.

Said structure will be completed about the latter part of October, 1911.

POLICE STATIONS.

RICHMOND POLICE STATION (Located on the west side of 6th Avenue, near California Street).

Two "Class C" brick structures comprising station and stable building. Appropriation \$42,000.00.

Contracts awarded February 15, 1911:

General Construction, Robert Trost, \$32,397.00; Electrical, National Electric Co., \$644.00; Plumbing, Snook & Company, \$2,675.00; Hardware, Bennett Bros., \$271.00.

Said structure will be completed about November 1, 1911.

BAY VIEW POLICE STATION (Located on 14th Avenue South, near Railroad Avenue).

Two "Class C" brick structures comprising station and stable building. Appropriation \$22,500.00.

Contracts awarded April 10, 1911:

General Construction, W. Hough & Company, \$15,594.00; Plumbing, J. G. Sutton Company, \$2,022.00; Electrical, National Electric Co., \$499.00.

Buildings will be completed about December, 1911.

POTRERO POLICE STATION (Southwest corner of Kentucky and 20th Sts.)

Plans and specifications for this station are almost completed and bids will be called for the construction of same within a few weeks.

Appropriation \$27,925.00.

SCHOOLS.

School buildings on which contracts were awarded prior to June 30, 1910, and on which construction was carried forward during the fiscal year 1910-1911; costing approximately \$1,764,000.00.

GARFIELD PRIMARY SCHOOL (Northeast corner Filbert and Kearny Sts.)

Class Rooms, 19; Approximate Cost, \$107,600.00; Contract Awarded, February 5, 1909. Occupied by the Board of Education November 21, 1910.

Condition of contract July 1, 1910—Grading of yard progressing; reinforcing of retaining wall completed and 75% of concrete poured; exterior painting 80% completed; telephones being installed.

HANCOCK GRAMMAR SCHOOL (Filbert and Roach Streets).

Class Rooms, 18; Approximate Cost, \$164,000.00; Contract Awarded, April 26, 1909. Occupied by Board of Education, February 1, 1911.

Condition of contract July 1, 1910—Plastering practically completed; glass 75% set; one section of heating and ventilating plant set; yard work progressing; sidewalk curb has been delivered.

FRANK MCCOPPIN PRIMARY SCHOOL (7th Avenue, between Balboa and Cabrillo Streets.)

Class Rooms, 18; Approximate Cost, \$105,000.00; Contract Awarded, April 30, 1909. Occupied by Board of Education, October 24, 1910.

Condition of contract July 1, 1910—Floors completed except corridors; first coat painting done; kalamein work 90% completed; cement steps progressing; blackboards 90% completed.

McKINLEY PRIMARY SCHOOL: 14th and Castro Streets.

Class Rooms, 18; Approximate Cost, \$109,000.00; Contract Awarded, May 21, 1909. Occupied by Board of Education, November 21, 1910.

Condition of contract July 1, 1910—Plastering 50% completed; plumbing fixtures being set; wood floors being laid in second floor class rooms; stairs of south entrance completed.

CLEMENT PRIMARY SCHOOL: Noe, Day and 30th Streets.

Class Rooms, 15; Approximate Cost, \$99,000.00; Contract Awarded, July 9, 1909. Occupied by Board of Education, March 20, 1911.

Condition of contract July 1, 1910—Concrete walls completed; rough carpentry 90% completed; rough plumbing 95% completed; boiler 70% installed.

FRANKLIN GRAMMAR SCHOOL: 8th Street, between Bryant and Harrison Sts.

Class Rooms, 14; Approximate Cost, \$69,500.00; Contract awarded June 17, 1910. Now in course of construction.

Condition of contract July 1, 1910—No reports from inspectors August 20th. Building of forms for concrete walls about 25% completed; iron for reinforcement delivered on job; no other material received.

JEAN PARKER GRAMMAR SCHOOL: Broadway between Powell and Mason Sts.

Class Rooms, 18; Approximate Cost, \$171,500.00; Contract Awarded, Sept. 13, 1909. Now in course of construction.

Condition of contract July 1, 1910—Steel work will be completed about July 6th.

SPRING VALLEY GRAMMAR SCHOOL: Washington between Hyde and Larkin.

Class Rooms, 14; Approximate Cost, \$110,000.00; Contract Awarded, May 23, 1910. Now in course of construction.

Condition of contract July 1, 1910—Concrete of foundation poured except five piers; west retaining wall completed; east wall 25% poured.

DENMAN GRAMMAR SCHOOL: Pierce between Hayes and Fell Streets.

Class Rooms, 18; Approximate Cost, \$152,000.00; Contract Awarded, Dec. 1, 1909; Completed, April 21, 1911.

Condition of contract July 1, 1910—Basement 50% poured; first and second floors ready for pouring; ceiling joists in place; rafters 50% in place.

CLEVELAND PRIMARY SCHOOL: Persia Avenue, between Moscow and Athens.

Class Rooms, 14; Approximate Cost, \$61,000.00; Contract Awarded, June 3, 1910; Completed, May 26, 1911.

Condition of contract July 1, 1910—No construction work started.

HOLLY PARK PRIMARY SCHOOL: Holly Park Ave., between West Park and Highland.

Class Rooms, 18; Approximate Cost, \$87,000.00; Contract Awarded, Dec. 24, 1909. Occupied by the Board of Education, January 5, 1911.

Condition of contract July 1, 1910—Plastering scratch coat on first and second stories; basement 90% lathed; outside 70% lathed; glass 80% set.

LONGFELLOW PRIMARY SCHOOL: Morse and Lowell Streets.

Class Rooms, 14; Approximate Cost, \$66,500.00; Contract Awarded, Dec. 1, 1909. Occupied by Board of Education, January 3, 1911.

Condition of contract July 1, 1910—Blackboards 80% finished; grading of yard completed; painting and tinting progressing.

FARRAGUT PRIMARY SCHOOL: Capitol, Faxon and Holloway Avenue.

Class Rooms, 18; Approximate Cost, \$96,000.00; Contract Awarded, Sept. 24, 1909. Occupied by Board of Education, March 29, 1911.

Condition of contract July 1, 1910—Interior plastering 50% on; exterior plastering 70% on; electrical work completed; outside iron stairs completed.

SHERIDAN PRIMARY SCHOOL: Farallones and Lobos Streets. and Capitol Ave.

Class Rooms, 18; Approximate Cost, \$105,000.00; Contract Awarded, September 10, 1909. Occupied by Board of Education, December 12, 1910.

Condition of contract July 1, 1910—Electrical work completed; plaster being completed on toilets; painting completed; windows being cleaned.

S. F. COMMERCIAL HIGH SCHOOL: Grove Street, between Polk & Larkin Sts.

Class Rooms, 31; Approximate Cost, \$261,000.00; Contract Awarded, April 7, 1909. Occupied by Board of Education.

Condition of contract July 1, 1910—Plasterers running cement base; plumbing fixtures being set; electric light and clock wiring ready for inspection; yards being prepared for asphalt paving.

SUMMARY

Of Costs of Contracts Awarded Before July 1, 1910

Name of School.	Contract Awarded.	Occupied by B. of E.	Cost.
Garfield Primary	Feb. 5, 1909	Nov. 21, 1910	\$107,500
Hancock Grammar	April 26, 1909	Feb. 1, 1911	164,000
Frank McCoppin Primary.....	April 30, 1909	Oct. 24, 1910	105,000
McKinley Primary	May 21, 1909	Nov. 21, 1910	109,000
Clement Primary	July 9, 1909	Mar. 20, 1911	99,000
Franklin Grammar	June 17, 1910	Not completed	69,500
Jean Parker Grammar	Sept. 13, 1909	Not completed	171,500
Spring Valley Grammar	May 23, 1910	Not completed	110,000
Denman Grammar	Dec. 1, 1909	April 21, 1911	152,000
Cleveland Primary	June 3, 1910	May 26, 1911	61,000
Holly Park Primary	Dec. 24, 1909	Jan. 5, 1911	87,000
Longfellow Primary	Dec. 1, 1909	Jan. 3, 1911	66,500
Farragut Primary	Sept. 24, 1909	Mar. 29, 1911	96,000
Sheridan Primary	Sept. 10, 1909	Dec. 12, 1910	105,000
Commercial High.....	April 7, 1909	Dec. 14, 1910	261,000

\$1,764,000

School buildings on which contracts were awarded during the fiscal year and on which work is being carried forward. Contracts awarded on same amount to approximately \$1,019,584.00.

BURNETT PRIMARY SCHOOL: 14th Avenue South and L Street.

Class Rooms, 12.

Contracts—General, Lange & Bergstrom, \$30,900.00; Heating and Ventilating, Pac. Blower & Heat. Co., \$5,000.00; Plumbing, Gainford-Lattich Co., \$2,538.00; Electrical, J. G. Sutton Company, \$1,220.00; Vacuum Cleaning, Mech. Dust Suction Co., \$957.65; Hardware, Bennett Bros., \$629.00.

Construction—Frame.

Completed and taken over by the Board of Education, May 12, 1911.

GRATTAN PRIMARY SCHOOL: Shrader, between Alma and Grattan Sts.

Class Rooms, 16.

Contracts—General, F. H. Born, \$39,200.00; Heating and Ventilating, Pac. Fire Extinguisher Co., \$7,324.00; Plumbing, V. J. Belknap, \$4,091.00; Plastering, A. Knowles, \$4,850.00; Electrical, Standard El. Cons. Co., \$1,992.00; Vacuum Cleaning, Palm Vacuum Cl. Co., \$995.00; Hardware, Bennett Bros., \$1,028.00.

Construction—Frame with fireproof staircases.

ADAMS GRAMMAR SCHOOL: Eddy St., between Van Ness and Polk St.

Class Rooms, 14.

Contracts—General, Lange & Bergstrom, \$54,822.00; Steel, Ralston Iron Works, \$13,890.00; Heating and Ventilating, Wittman, Lyman & Co., \$7,380.00; Plumbing, J. P. Doherty, \$3,375.00; Electrical, Butte Eng. & Elec. Co., \$1,222.00; Vacuum Cleaning, Mechanical Dust Suct. Co., \$973.75; Hardware, Bennett Bros., \$779.00.

Construction—Class 'C' steel frame with brick walls and fireproof staircases.

HARRISON PRIMARY SCHOOL: Jamestown Ave., between R. R. and Jennings.

Class Rooms, 6.

Contracts—General, McSheehy Bros., \$12,938.00; Plumbing, Ahlback & Mayer, \$2,470.00; Hardware, Joost Bros., \$315.00.

Construction—Frame.

LINCOLN GRAMMAR SCHOOL: Harrison St., near 4th.

Class Rooms, 12.

Contracts—General, Robert Trost, \$43,949.00; Heating and Ventilating, C. E. Thomas Co., \$8,500.00; Plumbing, Kiernan & O'Brien, \$4,094.00; Electrical, Butte Eng. & Elec. Co., \$1,767.00; Vacuum Cleaning, Palm Vacuum Cl. Co., \$887.00.

Construction—Frame.

VISITACION PRIMARY SCHOOL: Visitacion Ave., bet. Leland and Schwerin.

Class Rooms, 12.

Contracts—General, McLeran & Petersen, \$26,700.00; Heating and Ventilating, Wittman-Lyman Co., \$5,845.00; Temp. Regulation, M. V. Murray, \$975.00; Plumbing, J. G. Sutton Company, \$3,217.00; Electrical, J. G. Sutton Company, \$1,352.00; Vacuum Cleaning, Palm Vacuum Cl. Co., \$891.00; Hardware, Bennett Bros., \$667.00.

Construction—Frame.

PEABODY PRIMARY SCHOOL: 6th Ave., bet. California and Clement Sts.

Class Rooms, 14.

Contracts—General, McSheehy Bros., \$51,480.00; Heating and Ventilating, John G. Sutton Co., \$8,630.00; Oil Burning Apparatus, John G. Sutton Co., \$870.00; Plumbing, Wm. S. Snook & Sons, \$3,790.00; Electrical, Central Electric Co., \$1,495.00; Vacuum Cleaning, Mech. Dust Suction Co., \$985.00; Hardware, Bennett Bros., \$887.00.

Construction—Frame with fireproof staircases.

JOHN SWETT GRAMMAR SCHOOL: McAllister bet. Gough and Franklin.

Class Rooms, 16.

Contracts—General, O. C. Holt, \$60,685.00; Heating and Ventilating, Abrahamson & de Gear, \$8,589.00; Plumbing, Wm. S. Snook & Sons, \$6,058.00; Electrical, National Elec. Co., \$2,300.00; Vacuum Cleaning, Pac. States Sales Corp., \$870.00; Steel, Brode Iron Works, \$15,600.00.

Construction—Class "C", steel frame, brick walls and fireproof staircases.

POLYTECHNIC HIGH SCHOOL (SHOP BUILDING): Frederick between Willard and First Avenue.

Draughting rooms and shops, 13.

Contracts—General, McLeran & Petersen, \$94,961.00; Heating, J. G. Sutton Company, \$2,770.00; Plumbing, Wm. S. Snook & Sons, \$7,270.00; Electrical, Butte Eng. & Elec. Co., \$5,292.00; Blast System, Atlas Heat & Vent. Co., \$1,589.00.

Construction—Class "A" reinforced concrete.

LOWELL HIGH SCHOOL: Hayes between Ashbury and Masonic.

60-room building.

Contracts—General, Elmer Carlson, \$148,500.00; Steel, Pacific Rolling Mill, \$53,600.00; Brickwork, Brandon & Lawson, \$28,570.00; Heating and Vent., C. E. Thomas Company, \$29,850.00; Plumbing, V. J. Belknap, \$13,891.00; Vacuum Cleaning, Pacific States Sales Corp., \$985.00; Electrical, General Elec. Cons. Co., \$4,275.00; Painting, Wm. Le Baron, \$5,395.00.

Construction—Class "C" steel frame and brick walls.

SUTRO GRAMMAR SCHOOL (YARD WORK): 13th Ave., bet. California and Clement Sts.

General Construction, McCabe & Brown, \$6,590.00.

BAY VIEW SCHOOL (YARD WORK).

General Construction, Flinn & Treacy, \$5,480.00.

OCEANSIDE SCHOOL (YARD WORK)

General Construction, Flinn & Treacy, \$5,946.00.

PACIFIC HEIGHTS SCHOOL (YARD WORK)

General Construction, Flinn & Treacy, \$4,228.90.

MISSION GRAMMAR SCHOOL (FENCE)

General Construction, Robert Trost, \$1,698.00.

CLEMENT PRIMARY SCHOOL (YARD WORK)

General Construction, Henning & Burke, \$24,840.00.

SUMMARY

Approximate Costs of Contracts Awarded and Completed in Fiscal Year Ending June 30, 1911

Name of School.	Contract Awarded.	Occupied.	Cost.
Burnett School	Aug. 1, 1910	May 12, 1911	\$52,000
Harrison Primary	Sept. 16, 1910	May 15, 1911	19,000

SUMMARY

Approximate Costs of Contracts Awarded in Fiscal Year Ending June 30, 1911

Name of School.	Contract Awarded.	Incomplete.	Cost.
Adams Grammar	Aug. 1, 1910	Incomplete	\$ 87,500
John Swett	May 22, 1911	Incomplete	101,000
Polytechnic Shops	May 10, 1911	Incomplete	111,000

SUMMARY OF APPROXIMATE COSTS OF NEW SCHOOLS FOR WHICH CONTRACTS HAVE NOT BEEN AWARDED.

Girls' High School	\$375,000.00
Polytechnic High School, Academic Building.....	400,000.00

BUREAU OF STREETS

July 1st, 1911.

To the Honorable, The Board of Public Works,
Of the City and County of San Francisco.

Gentlemen:—I have the honor to transmit herewith the annual report of the operations of the Bureau of Streets for the fiscal year commencing July 1st, 1910, and ending June 30th, 1911, being the twelfth annual report presented since the inauguration of the Bureau.

The more important work of the Bureau is reported herein under the following classifications:

1. Assessments for Street Work.
2. Side Sewer Construction.
3. House Numbering.
4. Resolutions of Intention and Notices of Street Work.
5. Register of Street Work Proceedings.
6. Inspection of Corporation Trench Work.
7. Sidewalk Inspection.

Respectfully submitted,

A. J. DONOVAN,
Office Deputy, Board of Public Works.

ASSESSMENTS FOR STREET WORK.

Fifty-six assessments were prepared and issued for the cost of street work performed under public contract.

The total cost of the street work as shown by these assessments amounted to \$70,415.35.

These assessments were issued to the contractors and a copy of each was recorded in the Street Assessment Records in the Bureau of Streets, together with the returns made thereon.

The following exhibit presents the character of the street work performed, the name of the contractor, and the cost of the work, as shown by these assessments.

Work Performed.	Cost of Work.
Fourteenth Avenue crossing of Judah Street— Sewering—Contractor, E. J. Gallagher	\$ 533.00
Castro Street between Valley and Twenty-ninth Streets, and the crossing of Castro and Twenty-ninth Streets— Sewering, etc.—Contractor, P. H. Mahoney.....	996.80
Sixteenth Avenue from a point 25 feet north of Clement Street to a point 300 feet northerly from Clement Street— Sewering, etc.—Contractor, Felix McHugh.....	556.45

Work Performed.	Cost of Work.
France Avenue between Mission and London Streets and the crossing of France Avenue and London Street— Sewering, etc.—Contractor, Peter McHugh.....	1,131.97
Greenwich Street crossing of Polk Street— Paving, etc.—Contractor, J. J. Dowling.....	932.34
Twentieth Avenue between Clement and Lake Streets, and the crossing of Twentieth Avenue and California Street— Curbs, Catchbasins and Artificial Stone Sidewalks—Contractor, P. J. McGaffigan	2,250.31
Irving Street crossing of Seventh Avenue— Catchbasins—Contractor, Peter McHugh.....	521.10
Fifteenth Street, between Castro Street and Buena Vista Terrace and the intersections of Fifteenth and Beaver Streets— Grading—Contractors, Flinn and Treacy.....	8,923.25
California Street between Fifteenth and Sixteenth Avenues and the crossing of California Streets and Sixteenth Avenue— Sewering, etc.—Contractor, Peter McHugh.....	576.00
Elizabeth Street between Castro and Diamond Streets— Paving, etc.—Contractors, Flinn and Treacy.....	1,661.90
Diamond Street crossing of Elizabeth Street— Paving, etc.—Contractors, Flinn and Treacy.....	1,379.46
Buena Vista Terrace Intersection of Fourteenth Street— Paving, etc.—Contractors, Flinn and Treacy.....	757.78
Judah Street between 15th and 16th Avenues— Macadam, etc.—Contractor, Sunset Construction Company.....	1,240.27
Clement Street between Ninth and Tenth Avenues— Paving, etc.—Contractor, J. G. Harney.....	201.83
Nineteenth Street, north side, between Sanchez and Noe Streets— Artificial Stone Sidewalks—Contractor, City Street Improvement Company	855.45
McAllister Street between Larkin and Polk Streets— Artificial Stone Sidewalks—Contractor, City Street Improvem't Co.	1,445.15
Nineteenth Avenue between Pacheco and Ortega Streets, and the crossing of Nineteenth Avenue and Ortega Street— Sewering, etc.—Contractor, Fred Leffler.....	1,208.30
Buchanan Street between Filbert and Greenwich Streets— Artificial Stone Sidewalks—Contractor, City Street Imprv. Co.....	102.41
Valencia Street between Eighteenth and Nineteenth Streets— Artificial Stone Sidewalks—Contractor, City Street Imprv. Co.....	96.10
Mission Street between Fair Avenue and Army Street— Artificial Stone Sidewalks—Contractor, City Street Imprv. Co.....	976.58
Folsom Street crossing of 26th Street— Paving, etc.—Contractor, City Street Imprv. Co.	873.97
Eighteenth Street between Missouri and Connecticut Streets— Paving, etc.—Contractor, City Street Improvement Company.....	511.17
Fourth Avenue between Kirkham Street and Parnassus Avenue and the crossing of Fourth Avenue and Kirkham Street and the crossing of Fourth Avenue and Parnassus Avenue— Grading, Sewering, etc.—Contractor, A. J. Raisch.....	11,915.46

Work Performed.	Cost of Work.
Ashbury Street between Clayton Street and Clifford Street and the intersection of Ashbury and Downey Streets— Sewering, etc.—Contractor, Fred Leffler	1,578.11
Sixth Avenue between Anza Street and Geary Street— Paving, etc.—Contractor, City Street Improvement Company.....	1,165.00
Clement Street between 33rd and 34th Avenues and the intersection of Clement Street and 33rd Avenue and the intersection of Clement Street and 34th Avenue— Sewering, etc.—Contractor, Felix McHugh.....	1,233.25
Lincoln Way between 16th and 20th Avenues and the intersection of Lincoln Way and 16th Avenue and the intersection of Lincoln Way and 17th Avenue— Artificial Stone Sidewalks—Contractors, McCabe and Brown.....	669.68
Cabrillo Street crossing of Forty-fifth Avenue— Grading, etc.—Contractor, Frank L. Sheerin.....	430.31
Edinburgh Street from a point 175 feet northeasterly from the northeasterly line of Brazil Avenue, to a point 275 feet southwesterly from the southwesterly line of Excelsior Avenue— Sewering, etc.—Contractor, P. H. Mahoney.....	363.85
Brazil Avenue crossing of Vienna Street— Paving, etc.—Contractors, Flinn and Treacy.....	1,358.52
Geary Street between 7th and 12th Avenues and the crossing of Geary Street and 8th Avenue and the crossing of Geary Street and 11th Avenue— Artificial Stone Sidewalks—Contractor, City Imprv. Co.....	1,598.62
Diamond Street between Elizabeth and 24th Streets— Paving, etc.—Contractor, F. C. Dowling.....	1,005.36
Brazil Avenue crossing of Moscow Street— Paving, etc.—Contractors—Flinn and Treacy.....	1,355.72
Ninth Avenue between Geary and Clement Streets— Paving, etc.—Contractor, J. J. Dowling & Co.	705.95

Total Cost of Work.....	\$70,415.53

SIDE SEWER CONSTRUCTION.

The Bureau of Streets constructed 2113 side sewers during the fiscal year. The cost of the work was apportioned as follows:

Wages of Side Sewer Men.....	\$40,853.00
Teaming	2,851.45
Inspection, time keeping and buggy hire.....	5,155.00
Materials, tool sharpening, cribbing and repairs.....	1,459.01
Repaving over Side Sewer Trenches.....	9,835.60
	\$60,154.06

The following schedule shows the number of side sewers constructed for each month of the fiscal year:

July, 1910	157
August, 1910	159
September, 1910	225
October, 1910	248
November, 1910	154
December, 1910	165
January, 1911	145
February, 1911	116
March, 1911	179
April, 1911	162
May, 1911	207
June, 1911	196
Total	2,113

HOUSE NUMBERING.

During the fiscal year the Bureau of Streets undertook the re-numbering of buildings along those streets upon which confusion in house numbers was occasioned by the changes in street names.

In our last annual report it was shown that by the adoption of ordinances numbered 988, 989 and 1029, the Board of Supervisors changed the official names of four hundred and fifty streets, and these changes would necessitate the re-numbering of one hundred and one blocks of buildings. This work has been undertaken, and is now nearing completion.

During the year 4,395 certificates were issued for new house numbers. The buildings along 362 blocks were re-numbered, and 1,517 notices were served upon property-owners requesting them to change their old house number; to conform with the ordinances now in force.

The following is a monthly tabulation of the work performed:

Month.	Certificates Issued.	Blocks Renumbered.	Notice to Remove Old Nos.
July, 1910	323	23	87
August, 1910	277	14	68
September, 1910	375	9	93
October, 1910	312	18	59
November, 1910	402	27	48
December, 1910	368	12	110
January, 1911	441	189	280
February, 1911	500	10	412
March, 1911	289	14	178
April, 1911	308	20	73
May, 1911	330	15	62
June, 1911	470	11	47
	4,395	362	1,517

RESOLUTIONS OF INTENTION AND NOTICES OF STREET WORK.

During the year there were prepared 26 Resolutions of Intention recommending the ordering of street work. According to Section 3, Chapter 2, Article 6 of the Charter, requiring that a copy of said resolution should be sent to each per

son represented on the Assessment Roll as liable to be assessed for said improvements and that notices be posted along the line of said contemplated improvements, the Bureau of Streets prepared and posted 2,201 "Notices of Street Work" and obtained from the Assessor's Block Books and the City Directory the names and address of 4,280 persons liable for the cost of the proposed street work, and addressed and mailed copies of the Resolution of Intention to each of them.

The following table shows the different resolutions adopted and the separate pieces of work, blocks, crossings and intersections affected by said resolutions and the number of notices prepared, posted, addressed and mailed as a result of said adoption.

Resolutions No.	Separate Pieces of Work.	Crossings		Notices Posted.	Notices Mailed.

REGISTER OF STREET WORK PROCEEDINGS.

A record of all street work proceedings is kept in the Bureau of Streets, which is consulted every day by representatives of the Title Insurance Companies, searchers of records, attorneys and property owners. This record must be absolutely correct, and necessitates the investigation and recording of all resolutions of the Board of Public Works, Ordinances of the Board of Supervisors and publications in the official newspaper pertaining to street work, of which there were the following number during the fiscal year.

Resolutions of Board of Public Works.....	6,871
Private Contracts	820
Certificates of satisfactory completion	644
Proposals for street work	215
Awards of contract	160
Ordinances of Supervisors	54
Resolutions of Intention	26

INSPECTION OF CORPORATION TRENCH WORK.

There are three inspectors whose principal duties are the supervision of pavement restoration over the trenches opened in the streets by the public service corporations.

In addition to the above work these inspectors report on the condition of streets upon the completion of building operations. Deposits of money are refunded upon their favorable reports for street space permits, sub-sidewalks permits, and house moving permits. The construction of bulkheads, removal of street obstructions, repair of side sewers, etc., and all general complaints are matters that receive the attention of these inspectors.

Inspector James Riordan served notices and reported upon matter as follows:

- 1 notice to construct bulkhead; 1 complied with.
- 10 notices to repair side sewers; 10 complied with.
- 118 obstruction notices; 101 complied with.
- 40 miscellaneous notices; 40 complied with.
- 15 blasting petitions reported upon.
- 18 water trough petitions reported upon.
- 956 street space and sub-sidewalk permits reported upon; approved, 892.
- 25 house moving permits reported upon; approved, 23.

Reported upon street openings by public service corporations as follows:

Spring Valley Water Company—73 repairs to mains, 840 service connections. Total street openings, 913.

San Francisco Gas and Electric Company (Gas and Electric)—221 blocks of mains, 1,806 service connections. Total street openings, 2,027.

San Francisco Gas and Electric Company (Steam)—9 blocks of mains, 9 crossings of mains. Total street openings, 18.

Metropolitan Light and Power Company—25 service connections.

City Electric Company—17 blocks of mains, 27 service connections. Total street openings, 44.

Municipal Light and Power Company—4 blocks of mains, 15 service connections. Total street openings, 19.

Equitable Light and Power Company (Steam)—25 blocks of mains, 37 service connections. Total street openings, 62.

Pacific Telephone and Telegraph Company—9 blocks of mains, 4 service connections. Total street openings, 13.

Bay Cities Home Telephone Company—8 blocks of mains, 2 service connections. Total street openings, 10.

San Francisco Electric Protective Company—1 service connection.

Inspector D. J. O'Brien served notices and reported upon matters as follows:

46 notices to construct bulkheads; 34 complied with.

The majority of those who failed to erect bulkheads have remedied the conditions by grading their lots.

17 notices to repair side sewers; 15 complied with.
 62 obstruction notices; 61 complied with.
 211 miscellaneous notices; all complied with.
 5 blasting petitions reported upon.
 4 runway petitions reported upon.
 1 water trough petition reported upon.
 13 miscellaneous petitions reported upon.
 1,465 street space permits approved.
 14 sub-sidewalk space permits approved.
 9 house moving permits approved.
 17 miscellaneous permits approved.

Reported upon street openings by public service corporations as follows:

Spring Valley Water Company—1,404 service connections.

San Francisco Gas and Electric Company (Gas)—149 blocks of mains and 156 crossings, 3,215 service connections. Total street openings, 3,520.

About fifteen per cent of the above openings were for electric services.

San Francisco Gas and Electric (Steam)—8 blocks of mains and 7 crossings. Total street openings, 15.

Metropolitan Light and Power Company—11 blocks of mains, 13 crossings, 493 service connections. Total street openings, 517.

City Electric Company—3 blocks of mains and 2 crossings, 54 service connections. Total street openings, 59.

Municipal Light and Power Company—1 block of mains and 1 crossing, 15 service connections. Total street openings, 17.

Equitable Light and Power Company (Steam)—4 blocks of mains and 3 crossings. Total street openings, 7.

Pacific Telephone and Telegraph Company—43 blocks of mains and 51 crossings, 127 service connections. Total street openings, 221.

Bay Cities Home Telephone Company—18 blocks of laterals and 11 crossings. Total street openings, 29.

Olympic Salt Water Company—3 blocks of mains and 2 crossings, 9 service connections. Total street openings, 14.

Inspector Edward Barron served notices and reported upon matters as follows:

2 notices to construct bulkheads; 2 complied with.
 12 notices to repair side sewers; 12 complied with.
 5 guard rail notices served; 5 complied with.
 22 miscellaneous notices; 22 complied with.
 3 blasting petitions reported upon.
 15 water trough petitions reported upon.
 1,005 street space permits reported upon; 1,005 approved.
 16 house moving permits reported upon; 16 approved.

Reported upon street openings by public service corporations as follows:

Spring Valley Water Company—65 blocks of mains, 910 service connections. Total street openings, 975.

• San Francisco Gas and Electric Company (Gas)—181 blocks of mains, 2,152 service connections. Total street openings, 2,333.

Metropolitan Light and Power Company—30 service connections.

City Electric Company—8 blocks of mains, 32 service connections. Total street openings, 40.

Municipal Light and Power Company—3 blocks of mains, 32 service connections. Total street openings, 35.

Consumers Light and Power Company (Steam)—8 blocks of mains, 33 service connections. Total street openings, 41.

Equitable Light and Power Company (Steam)—12 blocks of mains, 35 service connections. Total street openings, 47.

Pacific Telephone and Telegraph Company—12 service connections.

Bay Cities Home Telephone Company—25 service connections.

Postal Telegraph Company—2 service connections.

Pacific Auxiliary Fire Alarm Company—2 service connections.

Western Union Telegraph Company—1 service connection.

San Francisco Electric Protective Company—3 service connections.

SIDEWALK INSPECTION.

There are four inspectors whose principal duties are the preparation and service of notices requiring property owners to construct or repair sidewalks, in conformity with Section 16 of Chapter II, Article VI of the Charter.

During the year 1,010,797 square feet of sidewalks were laid by property owners through the efforts of these inspectors.

The other duties performed are set forth in the following reports of the work accomplished by each inspector.

REPORT OF INSPECTOR LAWTON FROM JULY 1, 1910 TO JULY 1, 1911.

CHIEF BOOKKEEPER'S REPORT

San Francisco, October 25, 1911.

To the Honorable, The Board of Public Works,
Of the City and County of San Francisco.

Gentlemen:—Herewith transmitted you will please find a summary of expenditures, also a tabulation of all classes of work performed during the fiscal year of 1910-1911.

In many instances the work was not completed prior to June 30, 1911, and the moneys were transferred—carried forward to the fiscal year 1911-1912. Wherever balances were carried forward from the previous fiscal year, the accounts as compiled will show a total expenditure in their respective classes.

The separate appendices will show concisely the "Exhibit" as compiled from the books and records of this office, inclusive of all work done under the direction of both the City Engineer and City Architect, the expense of which was borne out of the several bond issue series.

Respectfully submitted,

By LEONARD S. LEAVY, Chief Bookkeeper.

FINANCIAL REPORT OF CHIEF BOOKKEEPER, BOARD OF PUBLIC WORKS, FISCAL YEAR 1910-1911.

CONTRACTS AWARDED AND WORK COMPLETED—EXPENSE BORNE OUT OF GENERAL FUND AND SPECIAL TAX.

WORK FRONT OF CITY PROPERTY.			
Location of Work.	Contractors.	Amount.	Class of Work.
Crossing 45th Ave. and Lincoln Way	Blanchard Brown Co.	\$ 10.00	Macadamizing, resetting curbs.
California St., between 13th and 14th	Peter McHugh	495.00	Artificial stone sidewalks.
Lincoln Way—1st to 7th Aves.	Barber Asphalt Paving Co.	13,173.30	Gutters, curbs, culverts, asphalt pavement.
Lake St., between 13th and 14th Aves.	Peter McHugh	501.00	Artificial stone sidewalks.
17th St., between Arkansas and Carolina and crossing Arkansas and 17th	Stanley J. Fay	3,198.50	Asphalt pavem't, curbs, culv'ts, etc.
Laguna—Chestnut to Bay	Raisch Improvement Co.	3,439.85	Bitumen pavement, granite curbs.
Lapidge between 18th and 19th	Flinn & Treacy	3,068.00	Asphalt pavement & granite curbs.
Laguna, between Bay and Beach	G. W. McGinn & Co.	5,411.53	Curbs, basalt gutters, pavem'ts, etc.
Crossing Carolina and Mariposa	Peter McHugh	148.24	Constructing sewer.
Intersection 36th Ave. and Clement	Peter McHugh	140.00	Constructing sewer.
Clement between 34th and 35th	Peter McHugh	370.00	Reconstructing sewer.
Crossing 7th Ave. and Irving	Peter McHugh	23.69	Cesspools.
Intersection 35th Ave. and Clement	Peter McHugh	150.00	Constructing sewer.
Clement between 35th and 36th	Peter McHugh	370.00	Reconstructing sewer.
East Side of Connecticut at 17th	Stanley J. Fay	205.50	Asphalt pavem't, cement sidewalks.
24th Ave. between Geary and Anza	Felix McHugh	195.00	12-in. ironstone pipe, sewer, man-holes, etc.
Crossing of 4th and Harrison	City Street Improvement Co.	11.13	Cement sidewalks.
Crossing of Walnut and Pacific	City Street Improvement Co.	497.50	Granite curbs & bitumen pavem't.
Crossing of California and 19th Ave.	City Street Improvement Co.	115.00	Improvement.
San Bruno Ave., between Sullivan and Silver	Coast Improvement Co.	75.00	Constructing sewer.
Crossing Persia and Athens	Flinn & Treacy	344.00	Pavement, curbs, cesspools.
15th St., Castro to Tilden and Tilden between 15th and South Broderick	Flinn & Treacy	1,428.37	Grading.
30th Ave. between Geary and Clement	Flinn & Treacy	554.50	Constructing sewer with manholes.
Crossing Geary St., 24th Ave.	Felix McHugh	150.00	Constructing sewer with culverts.
Crossing 7th Ave. and J	Warren Improvement Co.	70.00	Pavement.
Crossing 31st Ave. and Clement	G. W. McGinn & Co.	75.00	Pavement (Asphalt).

Crossing 23rd Ave. and California.....	G. W. McGinn & Co.	70.00	Pavement (Asphalt).
Crossing 4th Ave. and Balboa.....	Western Construction Co.	15.00	Bitumen pavem't, curbs, cesspools.
37th Ave., between Balboa and Cabrillo.....	Owen McHugh	499.00	Grad. & brok. rock pavem't, curbs.
Crossing 38th Ave. and Cabrillo.....	Owen McHugh	30.00	Grad. & brok. rock pavem't, curbs.
Crossing 37th Ave. and Cabrillo.....	Owen McHugh	30.00	Grad. & brok. rock pavem't, curbs.
13th Ave., between Kirkham and Lawton.....	Donovan & Gallagher	430.00	Grading and sewerage.
Crossing 12th Ave., and Kirkham.....	J. J. Dowling	75.00	Curbs, cement sidewalks, bitumen pavement.
Crossing 8th Ave. and Kirkham.....	J. J. Dowling	100.00	Improvement.
24th, between Douglas and Hoffman.....	Flinn & Treacy	460.00	Asphalt pavement.
Crossing 12th Ave. and Lawton.....	E. J. Gallagher	45.00	Grading, sewer, manholes, etc.
Precita Ave. facing Bernal Park.....	City Street Improvement Co.	1,808.56	Pavement.
Southerly ½ of Fulton, bet. 47th and 48th Aves.....	Owen McHugh	490.00	Brok. rock pavem't, redwood curbs.
Southerly ½ of Fulton, bet. 38th and 39th Aves.....	Owen McHugh	495.00	Brok. rock pavem't, redwood curbs.
Southerly ½ of Fulton, bet. 37th and 38th Aves.....	Owen McHugh	495.00	Brok. rock pavem't, redwood curbs.
Southerly ½ of Fulton crossing 37th Avenue.....	Owen McHugh	170.00	Brok. rock pavem't, redwood curbs.
Southerly ½ of Fulton crossing 38th Avenue.....	Owen McHugh	170.00	Brok. rock pavem't, redwood curbs.
30th, between Church and Dane.....	Flinn & Treacy	187.50	Repaving.
Crossing 36th Ave. and Geary.....	Peter McHugh	20.00	Sewering.
Crossing 37th Ave. and Geary.....	Peter McHugh	25.00	Sewering.
19th, between Ortega and Pacheco.....	F. Lefler	135.00	8-in. ironstone pipe sewer.
Brazil, between Vienna and Athens.....	Flinn & Treacy	330.00	Asphalt pavement, granite curbs.
Crossing 7th Ave. and Cabrillo.....	J. G. Harney	75.00	Granite curbs and paving.
Crossing 8th Ave. and Cabrillo.....	J. G. Harney	7.50	Granite curbs and paving.
19th Ave., between Irving and Judah.....	Sunset Construction Co.	414.00	Regrading, granite curbs, cement sidewalks.
Clement, between 13th and 14th Aves.....	Peter McHugh	498.60	Artificial stone sidewalks.
19th Ave., between Kirkham and Lawton.....	Sunset Construction Co.	461.35	Grading, curbs, art. stone sidew'ks.
23rd Ave., between California and Clement.....	G. W. McGinn & Co.	977.50	Asphalt pave'mt, granite curbs,
Crossing Bay and Laguna.....	Coast Improvement Co.	476.38	Paving.
Southerly ½ Fulton, bet. 48th and 49th Aves.....	Owen McHugh	490.00	Brok. rock pavem't, redwood curbs.
Southerly ½ Fulton, bet. 45th and 46th Aves.....	Owen McHugh	495.00	Brok. rock pavem't, redwood curbs.
Southerly ½ crossing Fulton and 46th Aves.....	Owen McHugh	170.00	Brok. rock pavem't, redwood curbs.
Southerly ½ Fulton bet. 46th and 47th Aves.....	Owen McHugh	495.00	Brok. rock pavem't, redwood curbs.
Southerly ½ crossing Fulton and 47th Aves.....	Owen McHugh	170.00	Brok. rock pavem't, redwood curbs.

MISCELLANEOUS CONTRACTS—STREETS AND SEWERS.

Location of Work.	Contractor.	Amount.	Class of Work.
Brazil and Naples; Brazil and Athens; Brazil and Lisbon	Flinn & Treacy	\$ 62.70	Repairs to sewers.
Brazil and Paris; Brazil and Lisbon	Flinn & Treacy	175.00	Reconstructing 5 cesspools.
Brazil and London	Flinn & Treacy	70.00	Reconstructing 2 cesspools. Pavement.
Crossing Lake and 19th Avenue.	Barber Asphalt Co.	85.00	
Crossing 15th Ave. and Pt. Lobos	Blanchard Brown Co.	110.00	12-in. pipe sewer, reconst. culverts.
N. E. cor. Grant Ave. and Market	City Construction Co.	39.80	Gutter and asphalt pavement.
Various Locations	P. J. Gartland	1,732.03	Asphalt and basalt pavement.
Various Locations	P. J. Gartland	4,852.02	Repairing over sewer trenches. Pavement.
Crossing Lake and 24th Avenue	Barber Asphalt Paving Co.	85.00	
Various Locations	S. F. Soc. Prev. Cruelty to Animals.	1,000.00	Concrete and iron water troughs.
Various Locations	P. J. Gartland	472.28	Asphalt Grouting.
Dolores—27th to 30th	E. W. Stone	2,950.00	Concrete coping.
Market St., between 8th and 9th	Stanley J. Fay	176.60	Repaving.
Savings Union Place, off O'Farrell	Stanley J. Fay	129.35	Pavement.
Grant Ave. and O'Farrell	Stanley J. Fay	75.00	Asphalt Pavement.
Market, Gough and Haight	J. P. M. Phillips	1,990.00	Safety Station.
Kearny, between Bush and Pine Streets.	Peter McHugh	228.25	Repaving, asphalt and binder.

MISCELLANEOUS CONTRACTS—BRIDGES AND VIADUCTS.

Sixth Street Bridge	Union Machine Co.	\$ 799.95	Overhauling and repairing.
Fourth Street Bridge	Union Machine Co.	1,178.71	Overhauling and repairing.
Third Street Bridge	Union Machine Co.	30.85	Overhauling and repairing.
Bridge over S. P. tracks—Circular Avenue	J. B. & W. Zindars	489.06	Grading approaches.
Mission St., between Marshall and Springdale	Keystone Construction Co.	13,370.25	Const. viaduct southerly section.
Mission St., between Marshall and Springdale	Healy-Tipbitts Construction Co.	1,867.50	Const. viaduct northerly section.
Various Locations	Spring Valley Water Co.	1,975.00	Setting back hydrants.

REPAIRS TO AND REPAVING OF ASPHALT AND BITUMINOUS STREETS

RECAPITULATION OF WORK DONE BY THE "MUNICIPAL ASPHALT PLANT," JULY 1, 1910, TO JUNE 30, 1911.

Work at Plant.	Cubic Feet of of Mixture.	Cost of Material Incorporated.
Wearing surface	328,820.64	\$ 80,520.20
Binder	72,126	10,097.64
Labor at Plant as per monthly statement.....		29,698.17
Labor at Plant (closed down), repair work.....		775.50
Repairs, fuel, power ,etc., as per monthly statem't		15,032.52
Repair and equipment not included in statement..		2,515.34
		<hr/>
Total cost of material at Plant.....		\$188,639.37
Total number of square feet laid.....		1,974,570
Cost per square foot for material.....		\$0.0702

WORK ON STREETS

	Cost of Labor and Teams.	Square Feet Laid.
Miscellaneous repairing and repaving, including all locations	\$85,316.96	1,974,570
Cost per square foot for labor.....		\$0.0432

SUMMARY.

Cost per square foot for material delivered from plant.....	\$0.0702
Cost per square foot for labor and teaming in streets.....	.0432
	<hr/>
Total average cost per square foot.....	\$0.1134

The initial cost of the Asphalt Plant (built in 1909) was, with equipment, approximately \$17,000. All new equipment subsequently purchased and all repairs and incidental expenses have been charged to and have become a part of the average cost scheduled monthly in the reports as submitted.

Were we to estimate the average cost per square foot yearly for depreciation and interest the rate of increase would be but nominal. Allowing 10% for depreciation and 6% per annum for interest we would obtain a total of \$2,720.00, which would necessarily be prorated to the 1,974,570 square feet paved, or an increased expense of \$0.0013 per square foot. This is too minute to be considered. The overhead office expenditure is no greater than when this class of work was done under contract. That the city is saving not less than 3 cents per square foot on all completed pavements is a very fair margin to work on, and it can readily be seen that "Asphalt Plant" repairs and repaving is no longer an "experiment."

REPAIRS TO, CONSTRUCTION AND RECONSTRUCTION OF BUILDINGS

Fund.	Appropriation.	Expended.	Surplus or Unexpended.	Deficit.	Remarks.

June	20,375.24
Total	\$295,016.81 ½
Average expense per month	\$24,584.75

PERMANENT IMPROVEMENTS.

Under this heading will come an expenditure of \$1,300.00 in the months of October and November 1910, being our pro rata of the cost of building a shed 500 feet long and 20 feet wide in conjunction with the Repair Department, this Department furnishing the material and the Repair Department paying the labor, said shed to be used by both Departments when needed, also the putting in of a floor in Yard Workshop at a cost of \$120.00, and alterations and repairs to water pipes in yard at a cost of \$12.00, making a total for improvements for year, \$1,432.00.

Respectfully submitted,

JOHN ROGERSON, Superintendent.
Street Cleaning Dep't, Board of Public Works.

BUILDING INSPECTION

San Francisco, August 1, 1911.

To the Honorable,
The Board of Public Works.

Gentlemen:—I have the honor to submit the following as an annual report upon all private building operations in this City and County during the past fiscal year ending June 30, 1911:

Character of Permits Granted.	Number.	Estimate of Cost.
Class "A" Buildings	17	\$ 1,922,500.00
Class "B" Buildings	11	927,100.00
Class "C" Buildings	249	6,682,631.00
Frame Buildings	2,448	8,292,812.00
General—Additions, Alterations, Repairs.....	3,101	1,385,508.00
Total	5,826	\$19,210,551.00

The fees collected upon the above amounted \$28,450.70

In addition to the above more important matters this Bureau received applications, as follows:

To Raze Structures	316
To Move Buildings	89
Applications Filed and Withdrawn.....	125
General Complaints received and attended to.....	400
Total number of general applications filed.....	6,288

For your further information I desire to state that since the Board of Supervisors refused to extend the time for the removal of the temporary buildings, 238 have been torn down. Those remaining are, in the majority, of cases, standing upon property that is to be improved as soon as leases upon buildings have expired. I believe that, at the outside, one year will entirely mark their passing.

I had occasion to reject and disapprove about 75% of applications filed, which in most cases were subsequently corrected and permits granted.

There have been no improvements made for this Bureau during the past year beyond the usual minor mechanical changes in the temporary quarters.

Respectfully submitted,

JOHN P. HORGAN,
Chief Building Inspector.

SEWER DEPARTMENT

San Francisco, Cal., July 1, 1911.

To the Honorable, The Board of Public Works,
Of the City and County of San Francisco.

Gentlemen:—I have the honor to submit herewith the annual report of the operations of the Sewer Department for the fiscal year commencing July 1, 1910, and ending June 30, 1911.

The principal work of the Department is reported under the following classification:

- Sewer Reconstruction and Repairs.
- Sewer Cleaning.
- Cesspool Cleaning.
- Sewer and Cesspool Flushing.
- Carpenter Work.
- Repairs and Cleaning of Fire Cisterns.

Respectfully submitted,

THOS. H. BRADY,
Superintendent of Sewers.

SEWER REPAIRS AND RECONSTRUCTION.

There were 434 sewer breaks during the year, of this number 282 were repairs to iron stone pipe sewers, and 152 were repairs to brick sewers, 125 manholes and 110 cesspools and inlets were constructed, 162 manholes were repaired and old and defective rims and covers were replaced by new ones, 509 cesspools and inlets were reconstructed and repaired and old defective frames and grates were replaced by new ones.

There were 22,758½ lineal feet of iron stone sewers and 15,930 lineal feet of brick sewers reconstructed during the year.

In the accomplishment of the above work the following quantities of material were used:

- 27,290 lineal feet of iron stone pipe.
- 8,658 sacks of cement.
- 469,650 brick.
- 176 manhole rims and covers.
- 276 frames and grates.

The principal repair and reconstruction work was performed at the following locations:

- Geary, between Polk and Van Ness Avenue.
- Geary, between Taylor and Jones Streets.
- Alvarado, between Hoffman and Douglass Streets.
- Broderick, between Clay and Sacramento Streets.
- Austin Avenue, between Franklin and Gough Streets.

Washington, between Baker and Broderick Streets.
Spear, between Mission and Market Streets.
Willard and Golden Gate Avenue.
Jones, between Filbert and Greenwich Streets.
Mission, between Thirtieth and Cortland Avenue.
Thirtieth, between Sanchez and Noe Streets.
Haight, between Baker and Broderick Streets.
Mission, between Twenty-eighth and Powell Avenue.
Sacramento, between Hyde and Larkin Streets.
Brannan, between First and Second Streets.

Total	1,174	1,297	16,377	\$18,243.05

CARPENTER WORK.

The carpenter employed by the sewer department constructs and places all danger barricades, constructs sewer forms, windlass frames, and performs all the general jobbing, makes repairs to the plank roadways, and timbers dangerous sewer trenches.

In addition to the above work the following are the principal items of construction and repair work performed during the year.

- Clay and East Streets—Repaired wooden box sewer.
- Green and Kearney Streets—Repaired wooden box sewer.
- Filbert and Sansome Streets—Repaired wooden box sewer.
- Filbert, near Montgomery—Repaired wooden box sewer.
- Fifth, between Folsom and Howard—Repaired wooden box sewer.
- Union near Montgomery Street—Repaired wooden box sewer.
- Filbert Place, near Union Street—Repaired wooden box sewer.
- Diamond near Surry—Repaired wooden box sewer.
- Chennery near Diamond Street—Repaired wooden box sewer.
- San Bruno Avenue and Eve Street—Constructed box culvert.

The sewer repair and cleaning forces of the sewer department made repairs and cleaned out the following water cisterns of the fire department, and made them ready for service.

- Cumberland and Guerrero Streets.
- Twenty-second and Shotwell Street.
- Broadway Street and Ohio Place.

STREET REPAIR DEPARTMENT

San Francisco, Sept. 1, 1911.

To the Honorable, the Board of Public Works,
of the City and County of San Francisco.

Gentlemen:—Complying with instructions, I submit herewith a report showing the operations of the Street Repair Department for the fiscal year ending June 30, 1911.

Respectfully,

JAS. R. McELROY,
Superintendent.

Department of Electricity

San Francisco, Cal., July 1, 1911.

To the Honorable P. H. McCarthy,
Mayor of the City and County of San Francisco.

Dear Sir:—I have the honor to transmit herewith the Twelfth Annual Report of the Department of Electricity, and the forty-sixth for this service, for the fiscal year ending June 30, 1911.

Respectfully submitted,

W. H. URMY,
Chief, Department of Electricity.

INTERIOR INSPECTION.

Applications on file June 30, 1910.....	1,816
Received for inspection during year.....	5,915
	7,731
Installations approved	5,842
	1,889
Applications on file June 30, 1911.....	1,889
Inspections made during year.....	13,337
Jobs found defective	4,407
Installations disconnected from service.....	158
Non-reported jobs detected	788
Electrical Licenses revoked	10
Arrests for violations or Ordinance.....	6

DOCUMENTS ISSUED.

Contractors' Licenses	219
Complaints on defective wiring	4,407
Certificates of Approval	5,842
Electric Sign Permits	340
Housemovers' Permits	40
Receipts for fees	2,292
Permits for Overhead Construction	975

MONEYS RECEIVED.

Fees for wire inspection, Ordinance 1008.....	\$11,753.85
Fees for Electric Sign Permits, Ordinance 1009.....	557.75
Fees for Fire Tapper Service, Ordinance 698.....	916.15
	\$13,327.75
Total amount of fees.....	\$13,327.75
Cutting wires for Housemovers.....	232.00
	\$13,559.75
Total	\$13,559.75

INTERIOR INSPECTION.

The administration of the Electrical Inspection Bureau as now organized has resulted in a decided improvement in the standard of electrical construction in San Francisco, which has been definitely established under a code of regulations applied uniformly to all contractors, insuring owners against fire loss through careless wiring. There has been published and distributed throughout the electrical and building fraternity a manual of local rules and Ordinances, clearly defining all requirements and the precise methods of installation to be followed under varying conditions.

Throughout the year a thorough and continuous inspection of nickelodeons and other places of amusement was maintained by an especially detailed Inspector. The passage of an Ordinance was secured providing for a strict compliance with all necessary regulations governing such places, and permitting, under expert supervision, the use of motors for the operation of moving picture machines, when equipped with additional safeguards around the films when in use. The merit of these rules is apparent from the fact that no fires or accidents have occurred where the motor driven machines have been in service.

In order to keep pace with the building activity, consequent to the approach of the World's Fair, it is recommended that the appointment of 3 additional Wiring Inspectors be provided for.

A comparison of the receipts for the past two fiscal years will show an increase in fee collections for the latter year of nearly one thousand dollars.

While the number of Applications for inspection filed during the fiscal year exceeded those for the year just preceding by more than one thousand, the gain in the quantity remaining on file was but seventy-three; and, to accomplish this result, an increase over the previous year of but 362 inspections was necessary.

OVERHEAD INSPECTION.

Inspection of Overhead Electrical Construction involved the investigation and approval of plans and specifications of work on 3428 poles at various locations, requiring the issuance of 315 Approval Permits, under the provisions of Ordinance 1564, to public service corporations, companies and individuals.

There has been available only one Inspector on aerial construction, and with the limited means at hand, earnest efforts were put forth to make the operation of Ordinances 621 and 214 as effective as possible, 387 complaints having been served. It is impossible for one man to observe all of the operations of the several companies constructing and operating aerial wires, and several more Inspectors should be appointed. This Bureau could be made more than self-sustaining by the passage of an Ordinance along the lines of that which governs interior inspection, providing for a schedule of fee charges. There should be made a complete survey of every street and alley in the city every 30 days, in order that violations of the specific provisions of the Ordinances, as well as all careless or defective construction may be detected and corrected before it becomes a menace to life and property.

MACHINE SHOP.

In the Machine Shop, during the fiscal year, 12 Fire Alarm Boxes were built and 40 were 90% completed, all of the latest improved type equipped with patent flush glass key-guards. There were also reconstructed 54 Fire Alarm Boxes, some of which have been in service since 1870. These boxes now con-

tain the new style platinum contacts and character wheel, new escapements, cutouts, with movement grounded on shell, relay, rebuilt keyboard, new wiring, bushings, screws, etc.; thereby providing 54 fire signal boxes containing mechanism of a higher quality than when originally manufactured, many of which would have otherwise shortly been condemned for continued reliable service. There were repaired without removal to shop 43 fire alarm boxes. There were reconstructed and repaired 26 Police Boxes, auxiliarized 46 fire alarm boxes, box numbers changed, 26.

New work included 60 inner fire box locks, 8 cutouts, 2275 keyguard glasses, 14 box winding keys, 1210 outside fire alarm box keys, 198 police box keys, 75 platinum fire box contacts, 100 let-go springs, 83 box number plates and 6 new engine house registers.

Instruments repaired or reconstructed: 87 engine house registers, 69 pony relays, 63 bells, 185 let-goes, 18 Morse sets, 9 telephones, 4 line relays, 16 4-pen registers, 9 Sechrist switches, 2 burglar alarms, 25 fire box relays, 9 motors, 6 take-up reels, 5 police box relays, 4 remote control switches and 8 Morse keys.

The equipment of the Shop consists of 2 milling machines, 1 shaper, 1 universal grinder, 3 drill presses, 2 emery grinders, 2 engine lathes, 12 speed lathes, 1 turret lathe, 1 saw table, 1 forge, 1 squaring shears, 1 7-H. P. gas engine, 1 D. C. generator, 1 3-H. P. A. C. motor, together with all necessary taps, drills, dies, gigs, chucks, vises, patterns and tools adapted to the manufacture and repair of all portions of the Fire and Police Signal Systems in an efficient manner.

OUTSIDE CONSTRUCTION, AERIAL SYSTEM.

On the aerial fire alarm system, there were installed 26 fire signal boxes and 12 were moved to new locations. Line troubles repaired numbered 409 and miscellaneous complaints 567. Outside local loops were run to the homes of 150 Firemen, 46 disconnected and 107 repaired. There were pulled for test 5,976 fire alarm boxes. On account of the bad condition of the old circuits along Plymouth Avenue, from Ocean to Sickles Avenue, the same were renewed with 10 miles of new copper wire.

The fire alarm circuits from Army to Railroad Avenue, along San Bruno Avenue, were transferred to top positions, in order to provide clearance and safety from telephone toll circuits.

Underground District No. 6 was cleared of overhead construction on Mission and Valencia Streets, out as far as 23rd Street, involving the re-running of 10 miles of new copper wire along Guerrero Street.

The berth of Fire Boat Sullivan was provided with fire alarm service by extending Nos. 5 Tapper and Alarm circuits one mile.

Fire and Police circuits were removed from the old Park Police Station and extended to the underground connection with the new station.

In order to provide a police signal system for new Ingleside Police Station, two circuits, consisting of 10 miles of No. 12 copper wire were built, to which were transferred from the Mission District 15 patrol boxes. No. 2 Tapper line was also extended to the new station.

New fire alarm boxes, of the latest type with fixed keys guarded by glass, were installed at the following corners: Pacific-Buchanan, Green-Manchester, Mayflower-Peralta, Union-Taylor, Grafton-Harold, San Jose Avenue-Lake View, Capitol-De Montford, Capitol-Lakeview, Mariposa-Illinois, Georgia-Sixteenth, Persia-Athens, Embarcadero, opp. Mason, opp. Stockton, opp. Kearny, 19th Avenue-Lincoln Way, Vallejo-Jones, Vallejo-Columbus Avenue, 30th-Dolores, Pine-

Jones, Sacramento-Gough, Eureka-20th, Ashbury-Clifford, 7th-Folsom, Pacific-Kearny, Fulton-36th Avenue, Sutter-Hyde.

An improved method of increasing the prominence of the locations of Fire Alarm Boxes at night was effected by the installation of ruby semi-globes on electric arc lamps adjacent to the signal boxes. These red globes have proved very efficient in compelling attention to the fire alarm boxes. The same result during daylight has been secured recently by continuing the vermilion color of the box itself entirely around the pole supporting it, showing, from all directions, the presence there of means for transmitting an alarm of fire.

UNDERGROUND FIRE ALARM SYSTEM.

Trenches were excavated and duct was laid at 15 locations, embracing 1310 feet of underground construction.

Old cable was pulled out for the purpose of clearing ducts and for use at other points at 11 locations to the extent of 6,854 feet.

Fifteen stretches of cable of various lengths were pulled into ducts aggregating 13,683 feet.

On portions of 20 streets, 14,213 feet of ducts were rodded.

Standards were set and Fire Alarm Boxes were installed and connected to the system at 9 corners, in the Underground Districts.

A new 40-conductor main cable and laterals were spliced in and bonded between the Central Fire Alarm Office and Third and Market Streets, all underground box circuits being transferred to same. This cable is of the best type made and is adequate to accommodate all fire alarm boxes which will be required in the down-town district for some years.

Plans and estimates have been prepared, and cable purchased, for further extensions of the present underground system, which will permit of the removal of the unsafe and unsightly aerial construction existing on Polk and many other streets. The clearing of all wires and poles from Valencia, Mission and Fillmore Streets, except railroad construction, which is exempt, has already been accomplished under the operation of the new Underground Ordinances.

INTERIOR CONSTRUCTION.

Three Fire Department Houses were wired and equipped with new instrument boards and electric lighting systems. New test switches and fuses on tapper and alarm systems were installed in all fire houses not so equipped, providing facilities for quickly locating and correcting trouble throughout the Fire Department on those circuits. Electric lighting service was extended to Fire Boats 1 and 2. The new Ingleside and Park Police Stations were wired for police signaling and instrument boards were installed. In the homes of Firemen, to announce alarm of fire during meal hours, 150 outside local bells were installed, 132 moved to new locations and 34 were disconnected. There were 1273 complaints on equipment in fire and police stations repaired, 216 tape renewals and 1273 repairs were made to outside local bells. An addition to 30 Engine's quarters, for a new Truck Co., was wired for electric lighting and signaling systems. Chemical House No. 12 was equipped with an instrument board and signaling apparatus. The batteries on tapper and alarm locals in 38 Fire Department houses were overhauled and renewed.

DEPARTMENT OF ELECTRICITY

1073

ORGANIZATION OF DEPARTMENT JUNE 30, 1911.

- 1 Chief.
- 1 Secretary.

Inspection Bureau—

- 1 Chief Inspector.
- 1 Assistant Chief Inspector.
- 1 Bookkeeper.
- 7 Inspectors of Interior Wiring.
- 1 Overhead Wire Inspector.

Fire Alarm Office—

- 1 Chief Operator.
- 7 Fire Alarm Operators.
- 4 Telephone Operators.
- 1 Relief Telephone Operator.

Construction and Repair Shop—

- 1 Shop Foreman.
- 6 Instrument Makers.
- 1 Machinist.

Outside Construction—

- 1 Foreman Fire Alarm Construction.
- 2 Assistant Foremen.
- 8 Linemen.
- 7 Repairers.

Inside Construction—

- 1 Foreman Wireman.
- 6 Wiremen.

Underground System—

- 1 Electrical Engineer.
- 4 Underground Wiremen.

General—

- 1 Storekeeper.
- 1 Painter.
- 1 Hostler-Teamster.
- 1 Helper Messenger.

—

RECOMMENDATIONS AND REMARKS.

NEW CENTRAL FIRE ALARM STATION.

I desire to call your attention to the necessity of making provision, within the next year, for the permanent housing of this Department in a fireproof building, located, preferably, in some central, city square, isolated from exposure by fire and especially designed to safeguard that very important adjunct of the Fire Department—the Central Station equipment of the Fire Signalling System. The Central Fire Alarm Office, Inspection Bureau and Repair Shop of the Department occupy at present a class "C" structure, erected

by the city at 55 Fulton Street, leased in January, 1908, for a period of 5 years, in which is installed a temporary combustible central station switchboard. The new building should be provided with a marble board, completely mounted with the best instruments for handling alarm of fire and police signals.

UNDERGROUND EXTENSION.

In sections of the city where public service corporations have diverted their wires to underground, the Department of Electricity still maintains many fire signal circuits supported on the corporations' old poles long since cleared of all other wires, and, on many streets, is also using railroad trolley poles on which to carry the city's fire alarm wires. Sufficient money should be appropriated for the undergrounding of fire alarm wires under such conditions, in order that the City may at least keep pace with the service companies in clearing the streets of aerial electrical construction.

POLICE TELEGRAPH SYSTEM.

No provision has as yet been made to re-establish that portion of the Police Telegraph System which was destroyed in 1906, except the substitution of common telephones in wooden boxes placed on available poles; an unreliable and cumbersome means of communication for police work, as compared with the modern type of police patrol box, especially in the handling of unruly prisoners. Our annual estimates for the past two years included a request for money for new circuits, patrol boxes and station boards in 8 police districts and new station equipment and boards in 4 districts, and it is to be regretted that no appropriations were made, in whole or in part, under the detailed specifications as submitted.

TRANSPORTATION.

The necessity for rapid transportation in the maintenance of the Fire Alarm System is imperative. There are more than 400 miles of overhead wires extending from the North Beach to the County Line and from the ocean to the bay, and the movement of a horse and wagon to the points of trouble in this area entails great loss of time, frequently two hours being required to arrive. This means that from 15 to 30 fire alarm boxes are out of service during that period of time, and that, in the event of their being pulled for a fire, no response of apparatus would ensue. This condition could be overcome by the purchase of two automobiles, which in a year would pay for themselves in saving horse and buggy hire. With our shop equipment and skilled mechanics, the repair account for the upkeep of the machines would be little or nothing.

RENEWAL OF AERIAL CIRCUITS.

A great portion of the 400 miles of circuits mentioned above consists of iron wire installed from 3 to 10 or more years ago, which is in a poor state of preservation. While, during the past year, some 40 miles of this has been replaced with new copper wire, constant repairs to other portions of the system have been necessary, particularly during the stormy winter months. The entire system, where impracticable to go underground, should be rebuilt with copper of adequate quality to withstand the injurious action to which iron circuits are exposed in this climate.

MANUFACTURE AND REPAIR.

The construction of fire alarm boxes by the City and the facilities for making immediate repairs to boxes and electrical equipment has proved highly economical and convenient. During the year, the Department built a lot of 50 of the latest type, glass key guard, improved fire signal boxes at a cost of \$80.00

each, whereas, the last lot of 50 eastern made boxes, of inferior quality, were purchased at \$125.00 each. The features of our new guarded key box are fully covered by patents, the rights to which are controlled by the City. In order that citizens might become familiar with the present development and precise operation of the modern type of fire signaling apparatus, a working exhibit was made at the Pacific Coast Electrical Exposition last September, which attracted great attention and favorable comment, being pronounced by experts one of the best demonstrations of signaling equipment ever made in the country, and a tribute to the skill of the City's mechanics and the efficiency of its shop.

In conclusion, I desire to commend the members of the Department for the faithful performance of their duties and to acknowledge my indebtedness to them for their co-operation and assistance.

Respectfully submitted,

W. H. URMY,
Chief, Department of Electricity.

TABLE NO. 1.

San Francisco, August 1, 1911.

To the Honorable P. H. McCarthy,

Mayor of the City and County of San Francisco.

Sir:—In accordance with the requirements of the Charter, the Board of Trustees of the Public Library and Reading Rooms presents its report for the fiscal year ending, June 30, 1911.

It has been customary for the Board of Supervisors in making the annual appropriations to allow one and one-half cents on each one hundred dollars taxation for the maintenance of the Library, and in spite of the extraordinary losses of approximately 140,000 volumes with buildings, furnishings and equipment in 1906, the only special appropriation that has been made to replace these losses was about \$17,000 given by the Board of Supervisors in 1908 with the understanding that it was to apply towards the building of the Park Branch on Page Street. As the Report of the Librarian will show, during the past five years there have been expended from current funds, approximately \$200,000 for Branch Library buildings and property, for books and periodicals. The comparatively small percentage of expenditure for salaries and expense has been almost unrivalled among the larger cities of the country.

In the many pressing necessities that have arisen in our city during the last five years, the Trustees have not felt justified in asking for the full measure of consideration that is freely given in cities of the same class, nor indeed, in neighboring cities of smaller size; but the gratifying increase in circulation justifies the hope that the needs of the Library (not merely for the main building, but for Branches) will be provided in the next budget.

The total number of volumes in the Library on June 30, 1911 was 107,374, as against 166,000 volumes before the fire. 138,000 of these were destroyed, 28,000 saved; and approximately 80,000 volumes have been purchased from current funds since 1906. It must be conceded that this showing could not have been made except for the economy, the intelligence and devotion of the staff of Library employees.

The disbursements for the past fiscal year were \$72,548.72, as against \$98,492.25 in the fiscal year 1909-1910. There being less money available for improvements and for the purchase of books, the percentage expended for salaries and fixed charges is necessarily higher. But, the small increase in salaries is justified by the large increase in circulation—12½% over that of the preceding year—810,792 volumes having been circulated, as against 719,995 in the preceding year.

The disbursements for the year were as follows:

Disbursements.	Amount	Percentage
Books	\$14,458.32	19.9
Periodicals	1,868.76	2.6
Binding	4,902.38	6.7
Repairs	1,337.46	1.9
Printing and Stationery	2,307.80	3.2
Salaries	42,526.55	58.6
Miscellaneous	5,147.45	7.1
	\$72,548.72	100.00

The total number of cards in force shows a small increase over the preceding year, but the significant fact is that the largest increase—some 2,000 cards—has come to the Park Branch, No. 5, where an attractive, airy, roomy, well-lighted and otherwise suitable building has been provided. A corresponding increase will follow the building of much-needed Branch Library Buildings in the Richmond and Sunset Districts.

Lack of funds prevented the extension of Library service, though there is a persistent demand from Bernal Heights, Ingleside, Polk Street, the Down-town District and other localities where Library Stations should be established. The Board of Supervisors was requested to provide \$30,150 for these extensions in making up the last budget, but the request was not granted.

The Music Department which has been made possible by the thought and kindness and influence of Mr. Julius Weber has not been opened to the public for the reason that funds have not been available for the proper binding, arrangement, or indexing of these volumes, nor is there suitable space available in our over-crowded quarters. Some progress has been made with the binding; and it is hoped that access can be given in the near future. It is obvious that the full benefit will not come to our music-loving community until ample quarters are provided for the study of this rare collection of the World's best music, with such musical instruments as may be necessary, and under conditions that will not disturb other patrons of the Library. Such departments have become important features of some of the larger public libraries in Eastern cities, giving artists, teachers, pupils and all patrons of the Library access to the musical collections under conditions similar to those governing the loan or perusal of books. It is hoped that in building a new Main Library, suitable provision will be made for this department.

It is with profound regret that the Trustees report the death of Mr. A. L. Mann, who served as a Library Trustee for over twenty-five years. His long association with the School Department of the City of San Francisco, his faithful, intelligent and loving service to the community in these and other relations will long be remembered with gratitude. Mr. Eustace Cullinan has been elected to fill this vacancy.

As there appears to be some misapprehension regarding the status of the 3½% bonds authorized by the people for the purpose of acquiring lands and erecting thereon Library building, and as the Building Committee of the Board

of Supervisors had under consideration a plan for discounting the unsold portion of said bonds (at present unsalable on account of the low rate of interest), the Trustees addressed the following communication under date of May 17th, 1911:

“To the Hon. Charles A. Nelson,
Chairman of the Building Committee,
of the Board of Supervisors, San Francisco.

“Dear Sir:—The Board of Library Trustees desires an early construction of the Main Library building and the much-needed Branch Libraries; but as the Charter requires that the 3½% Library bonds heretofore authorized but unsold, be sold at par, the plan suggested at the recent conference does not appear to comply with this provision of the charter.

“We would therefore respectfully urge the adoption of the plan submitted by the Board of Library Trustees to the Honorable Board of Supervisors under date of May 5, 1910, a copy of which is submitted herewith. If a bond election is to be held in the near future looking to the construction of a new City Hall or for other purposes, it is hoped that this question of a new issue of Library bonds at current interest, be submitted to the people, providing \$600,000 for the Main Library building and in addition thereto \$150,000 for Branch Libraries.

Respectfully yours,

C. H. BENTLEY,
President, Board of Library Trustees.”

The Main Library building is to be located on the property bought for that purpose on Hayes Street, extending from Franklin Street to Van Ness Avenue. The plans adopted for the Panama Pacific Exposition contemplate the establishing of a Civic Center in that vicinity and the Trustees respectfully urge upon your attention the necessity for early action to the end that a building worthy of its high purpose and a credit to the City may be provided.

You are respectfully referred to the Reports of the Secretary and of the Librarian herewith presented for further information regarding the work of the Library during the last fiscal year.

Respectfully submitted, by order of the Board of Trustees of the San Francisco Public Library and Reading Rooms.

CHARLES H. BENTLEY, President.

REPORT OF THE SECRETARY

To the Trustees of the San Francisco Public Library and Reading Rooms:

Gentlemen:—Following is a statement showing the Receipts and Expenditures for the year ending June 30, 1911.

RECEIPTS.

Books of Deposit Collections have been distributed to Branches and Stations, June 30, 1911.

Respectfully submitted,

GEORGE A. MULLIN, Secretary.

REPORT OF LIBRARIAN

To the Trustees of the Public Library and Reading Rooms,
of the City and County of San Francisco.

Gentlemen:—I have the honor to submit herewith the report of the Librarian for the fiscal year ending June 30, 1911. As this report practically marks the completion of five years since the destruction of the Library in 1906, it will be of interest to note what has been accomplished during that period in the matter of rehabilitation. When the fire raged through the Library in the City Hall five years ago last April, the accumulation of years was utterly wiped out in a few hours. Nor was the loss one which could be entirely replaced with money; there were volumes of newspapers, for instance, that could not be replaced because no other available copies existed. Of the 166,000 volumes in the Library all were destroyed, with the exception of approximately 28,000 volumes which were in the possession of borrowers, or in the four branches and six deposit stations which were not burned. All the splendid sets of newspapers, periodicals, transactions of learned societies, the collection of local history, memoirs, and reference works of every kind were lost. The difficulties to be overcome in re-establishing the work of the Library were numerous and serious, but within two weeks books were again being issued to the public from Branch No. 6, on Sacramento Street.

The headquarters of the Library were first established at this Branch, being moved to the McCreery branch building as soon as it had been put in condition for use. As soon as possible arrangements were made for the erection of a temporary building on the corner of the Library block at Hayes and Franklin streets and on March 10, 1908 the Main Library was once more established in quarters of its own. Having provided for the Main Library steps were taken to restore the branches that had been destroyed. The North Beach district was geographically and topographically more remote from library facilities than any other, so this branch was the first to be replaced. It is situated on almost the same spot it occupied before the fire, in rented quarters that were constructed in accordance with plans which were designed to accommodate the library. This branch was opened on November 4, 1908.

Before the fire Branch No. 5 was located at Fourth and Clara streets in the building donated by Mr. James D. Phelan. As conditions in this district were entirely changed after the fire it was not deemed advisable to reestablish the branch there, but to place it in the district south of the Park Panhandle. The Board of Supervisors, in making the annual appropriation, allowed the Library two cents on the hundred dollars, instead of the customary cent and a half, with the understanding that this branch should be built. A lot was purchased and the building erected at a total cost of \$31,976.00, of which \$17,000.00 was derived from the additional half cent allowed by the Supervisors, the balance being taken from the regular Library appropriation. This branch was opened on October 29, 1909. From time to time new deposit stations have been established in the districts most remote from library facilities, until the total number is now eleven, which is three more than were in operation at the time of the fire.

On July 1, 1906, there was carried over a balance of \$40,776.32, and the receipts for the five years ending June 30, 1911, amount to \$392,110.56, making a total of \$432,886.88 which have been available for the use of the Library. Of this amount \$363,502.51 were received from taxes, \$12,813.70 from insurance, and the balance from miscellaneous sources. During that period \$75,757.13 have been expended for the purchase of a lot and the erection of buildings, \$16,888.62 for furniture and repairs including the equipment of the Main

Library and three branches, \$99,055.26 for books and periodicals, \$165,230.88 for salaries, and \$51,967.07 for all other expenses, leaving a balance of \$23,987.92 in the treasury at the date of this report. The amount received from taxes for the year ending June 30, 1906, was \$78,018.27, which is more than has been received for any subsequent year except for the year ending June 30, 1909, when \$90,928.86 were appropriated, being the greatest amount ever granted the Library in any one year. The only extra appropriation that has been made to replace the loss caused by the fire was the additional half cent on the hundred dollars allowed in 1908 for the erection of Branch No. 5 on Page Street. Considering the funds at the disposal of the Library its growth has been remarkable; not only has the Main Library been built up into a good working collection of 53,732 volumes, but the branches and deposit collection contain more volumes than ever before, the latter having more than two and a half times as many as it had at the date of the fire. Taking the report for 1904-05 as a basis, as it contains the latest available figures before the fire, we find that the Main Library has 72,593 volumes less than it had then, Branch No. 1 has 2,188 more, Branch No. 2 has 4,522 more, Branch No. 3 (destroyed and reestablished) has nine more, Branch No. 4 has 2,320 more, Branch No. 5 (destroyed and reestablished) has 3,250 more, Branch No. 6 has 3,051 more, and the Deposit Collection has 4,170 more. Aside from the Main Library and Branch No. 3 an increase is also shown in the number of card holders and in the circulation. Reference to the table at the end of this report will show the changes in detail. The past five years have shown a great increase in the use of the branches and deposit stations, demonstrating that they fill a very real need. An examination of the table of circulation by classes will show, however, that a much greater proportion of solid reading is done by the patrons of the Main Library, undoubtedly because of the much larger collection of books other than fiction which are to be found there.

ACCESSIONS AND GIFTS

Fewer volumes were added during the past year than for either of the two years previous, owing to the smaller amount of money available for book purchase. Nevertheless the spending of \$14,458.32 for books and \$1,868.76 for periodicals out of a total expenditure of \$72,548.72 is a very creditable showing as compared with similar institutions. There were 14,934 volumes added and 6,526 worn out and withdrawn, leaving a net gain of 8,408 and a total of 107,374 in the Library. The large circulation from the branches and deposit stations has made it necessary to expend for these agencies of the Library's activity a great proportion of the book fund for the replacement of worn out copies and the purchase of new books, nearly half of the entire amount spent for books the past year having been expended for the branches and stations.

Three firms submitted bids for supplying American publications for the coming year, and the contract was again awarded to The Emporium as the lowest bidder, at practically the same rates as have been in force the past year. The English and foreign publications are purchased through G. E. Stechert of New York on very satisfactory terms.

The Library has been the recipient of a number of gifts during the year, and a list of the donors will be found at the end of this report.

The gift of 45 volumes from Dr. J. L. Whitney is of special interest, inasmuch as the volumes were from the library of the late James Lyman Whitney, who was one of the charter members of the American Library Association, and who was connected with the Boston Public Library for 41 years.

It is a pleasure to record from year to year the continued and untiring interest of Mr. Julius Weber in the music section of the Library. This past year particularly he has given a great deal of his valuable time and assistance

in the arrangement of the music donated by the Boston Music Company, and in the selection of musical works. The Library is indeed fortunate in having the benefit of Mr. Weber's advice and assistance in building up the music section.

PRINTING AND BINDING

A "List of Books on Electricity" was issued during the year and distributed from the headquarters of electrical workers, and through firms dealing in electrical supplies, as well as from the Library itself. The list consists of about two hundred and fifty titles and is of a size suitable for the pocket.

Twelve numbers of the Bulletin are issued each year, and in addition to the new books each contains one or more short reading lists.

There was an increase of 567 in the number of volumes sent to the bindery, the total being 9,632. We have had to pay a considerably higher rate for binding during the previous year, and it seems probable that the price will be still further advanced for the coming year. It is a difficult matter to economize on binding without laying up trouble for the future, and yet the constantly increasing cost makes the problem a serious one. Nearly all of the unbound portion of the collection of the Boston Music Company is being bound in Holliston Mills library buckram, as it is strong and durable and less expensive than leather.

CIRCULATION

There were circulated last year from all sources 810,792 volumes. This is an increase of 90,797 volumes, 12½ per cent, over the circulation for 1909-1910. The total number of volumes in the Library on June 30, 1911, was 107,374, so that each book was loaned an average of 7.5 times, showing an increase per volume over the previous year. According to the last census the population of San Francisco was 416,912, which gives us a per capita circulation of 1.94.

The Main Library and every branch and station had an increased circulation with the exception of Station D, which showed a loss of 252.

The increase and decrease in circulation was distributed as follows:

	Increase.	Decrease.
Main Library	3,438	
Branch No. 1	2,665	
Branch No. 2	5,778	
Branch No. 3	5,100	
Branch No. 4	9,696	
Branch No. 5	36,132	
Branch No. 6	358	
Station A	1,440	
Station B	2,067	
Station C	535	
Station D		252
Station E	728	
Station F	513	
Station G	225	
Station H	689	
Station I	2,289	
Station J	12,839	
Station K	6,557	
Total	91,049	252
Net Increase	90,797	

For the two years 1908-1910 Branch No. 2, Branch No. 6 and Station E showed a loss in circulation. While the increase at Branch 6 the past year was not large, that at Branch 2 amounted to 6½ per cent. The large increases shown at Branch No. 5 and Stations I, J and K are due to the fact that last year's report covered but eight months for Branch No. 5, six months for Station I, five months for Station J and four months for Station K. Twenty per cent of the circulation was from the Main Library, 17 per cent from Branch No. 1, 11 per cent from Branch No. 2, 6 per cent from Branch No. 3, 9 per cent from Branch No. 4, 14 per cent from Branch No. 5, 13 per cent from Branch No. 6, and 10 per cent from the deposit stations. The combined circulation of all the branches amounted to 70 per cent of the total.

REFERENCE DEPARTMENT

The lack of sufficient space for patrons is more keenly felt here than in any other department of the Library. A reference room should be large enough to accommodate readers without crowding, and it should be free from the distraction common to periodical and newspaper reading rooms. Under present conditions, however, it is impossible to place our magazines and newspapers elsewhere, and each year shows a constantly increasing number of readers. During the winter, when the room is crowded, it is difficult to secure proper ventilation, and conditions are far from ideal for the serious student who has occasion to work in the Library. At no point is the great needs of an adequate building more keenly felt than here.

CATALOGUE DEPARTMENT

During the year 16,470 titles were catalogued, divided as follows:

	New Titles.	Additional Copies.	Replacement Copies.	Total.
Main Library	4,352	1,503	630	6,485
Branches	6,916	912	2,157	9,985
Totals	11,268	2,415	2,787	16,470

A great deal of work has been done on new shelf lists for Branches 1, 2, 4 and 6, and in revising the catalogues in these branches. The rapid growth of the catalogue has made it necessary to purchase a new nine double-drawer cabinet for the official catalogue, and three more eighteen-tray sections for the public catalogue. The use of the latter has been made much more convenient by inserting a large number of guide cards, which are of great assistance in finding quickly the author or subject desired.

The preparation of copy for the Bulletin and for all special lists is done in this department, as well as the proof reading on the Library publications.

BRANCHES AND DEPOSIT STATIONS

No additional branches or deposit stations have been opened, although there have been several applications for such an extension of the Library service. If our funds permitted it would be desirable to establish several more deposit stations, but with the present income it is inadvisable to assume the additional expense.

All the branches show a growth in the number of volumes and in circulation. Branch No. 1 is still the leader with a total of 10,350 volumes and a circulation of 136,104. This branch enjoys the distinction of having a far larger

juvenile circulation than the Main Library or any of the other branches, the total being 40,120, as against 24,695 for Branch 2, the nearest competitor. Over 10 per cent of the adult circulation at Branch No. 3 was fiction in foreign languages, principally Italian; and while the Main Library circulated over two and a half times as many volumes of foreign fiction, it constituted only 6½ per cent of the total.

Branch No. 4 increased its circulation by 9,696, a gain of over 15 per cent. This was partly due to the fact that since January, 1st the branch has been open twelve hours a day, instead of seven, as was previously the case. This branch has far outgrown its quarters and the congestion steadily becomes worse.

Additional shelving has been put in which has given some relief, and by taking out the newspaper racks a little additional room can be made, but at the rate the work is growing in that section of the city some more adequate provision must be made at the earliest possible moment. In the present cramped quarters it is impossible to give the kind of service that should be given. For the past two years the Supervisors have been asked for funds for the erection of a branch building in this district, and for the establishment of several deposit stations in various parts of the city, but no additional appropriation has been granted. With adequate quarters there is every reason to believe that Branch No. 4 would have a circulation equal to that at Branch No. 5. The fact that each volume in the collection circulated, on an average, nearly 14 times is an indication of the use made of this branch.

Branch No. 5 has fulfilled the expectation that it would be one of our busiest branches. The light, airy room, free from any sense of crowding, has undoubtedly been a great influence in attracting readers. Each volume in the branch collection circulated over 15 times on an average, and there was a circulation of 3,054 from books drawn from the Main Library, this branch being by far the largest borrower from this source. The collection now contains 7,344 volumes, and we hope that this number can be materially increased the coming year. The crowded condition of the shelves and floor space at Branch No. 6 has been trying to both the public and the staff. Plans for enlarging the building are now under way, and when carried out will add much to the comfort, convenience and attractiveness of the room.

The stations have shown a very decided increase in circulation over last year, amounting to nearly 53 per cent. Station J is far in the lead with a circulation of 15,436, while Station H is at the other extreme with a total of 3,811.

THE STAFF

There have been two resignations from the staff during the year. An additional assistant was appointed at Branch No. 4 when the hours of opening were extended from seven to twelve per day. We now have on the staff, including pages, but exclusive of deposit station keepers and those employed in taking care of the building, 40 employees on full time and 12 on part time, being the equivalent of 47 full time positions. This, so far as I am aware, is far below the average employed in similar institutions doing an equal amount of work.

The first meeting of the American Library Association in California since 1891 was held at Pasadena in May. The Library was represented by your Librarian and two other members of the staff, and it is a matter for regret that it was impossible for a larger number to attend.

The members of the staff are entitled to credit for the loyal and careful performance of their duties. I desire to express my appreciation of the support and assistance which they have given me.

Respectfully submitted,

WM. R. WATSON,
Librarian.

District Attorney

San Francisco, Cal. July 14, 1911.

Hon. P. H. McCarthy, Mayor City and County of San Francisco,
San Francisco, California.

Sir:—I have the honor to submit herewith the report of the District Attorney's office of this City and County for the fiscal year ending June 30, 1911.

Respectfully,

C. W. FICKERT,
District Attorney.

Sheriff's Report

San Francisco, Cal., Sept. 14, 1911.

To the Honorable P. H. McCarthy,
Mayor of the City and County of San Francisco.

Dear Sir:—I herewith submit to you my Annual Report of the Fiscal Year, ending June 30th, 1911, as per Section 9, Article XVI, of the Charter.

OFFICE,

The following amounts were received and paid into the City and County Treasury, as per statement filed with the Auditor:

1910—July	\$ 2,296.55	1911—January	\$ 2,733.16
August	2,670.73	February	2,026.65
September	2,542.36	March	2,228.56
October	2,428.03	April	1,615.59
November	2,089.03	May	2,115.18
December	2,403.55	June	2,171.62
Total paid in for year ending June 30th, 1911.....		\$27,321.14	
Received for U. S. Prisoners, quarterly account U. S. Marshal and paid into Treasury.....		12.00	
Grand total paid into Treasury, 1910-1911.....		\$27,333.14	

JAIL NO. 1.

This Jail was destroyed by dynamite and fire on April 19th, 1906, and has not been repaired. Jail No. 1 was used exclusively for the holding of defendants waiting trial in the Superior Court, and convicted prisoners whose appeals were pending in the Courts of Appeal. These prisoners are now confined in one wing of Jail No. 2, situated at Ingleside. This condition not only occasions a crowded condition in Jail No. 2, but increases the work of this Office because of the long distance which the Prisoners awaiting trial in the Superior Courts have to be conveyed to and from court. This building when built was never intended for a Jail to hold men of the desperate character of those awaiting the action of the higher court, as the cells are entirely too small and the floors and ceilings are constructed of wood, instead of iron and concrete. Hence, you will appreciate the necessity of the use of all possible expedition in the completion of the New Branch County Jail No. 1.

JAIL NO. 2.

The buildings known as Jail No. 2 are very old and in great need of repair, but, when all felony prisoners may be kept in the new Jail No. 1 now in course of construction, this Jail, when properly repaired and improved, will suffice for the keeping of misdemeanor prisoners.

About 150 prisoners are engaged in the kitchen, butcher shop, tailor shop, stables and barns, and in repairing the walks and streets in the vicinity of the jails. This work has been of much benefit to the neighborhood in the vicinity of the jails, and keeps the prisoners in much better health.

JAIL NO. 3.

This jail was built in 1858 and was originally occupied by the industrial school. It was partially destroyed by the seismic disturbance of 1906 and condemned as being unsafe. Since then, one wing has been re-constructed and is now occupied exclusively by female prisoners who are as a rule the same all the year round, and are mostly weak, irresponsible women, unable to care for themselves.

Since my incumbency I have caused the other wing of the Jail to be razed, as it was a menace to those who had occasion to go near it. The brick I have had cleaned and piled for future use.

The prisoners are well housed in the Jail, and the cells are large and well ventilated.

The old wooden frame bedsteads, which were far from sanitary, I have had replaced by new metal bedsteads, as were recommended.

COMMISSARY.

Attached hereto will be found a statement showing the money expended from the appropriation for Sheriff's expense. This statement shows a net credit balance of \$59.93 to be turned into the treasury.

We respectfully call your attention to the fact that the Office equipments of the County Jail are entirely inadequate. In this connection I particularly suggest that a Fairbanks Platform Scale, in use at the relief home, would be a very valuable adjunct to the equipment of the commissary department, and would enable us to have a satisfactory check on the coal, hay and grain, and other bulky articles that are at present weighed on a small scale at a great loss of time and labor, the results obtained in this manner being far from satisfactory. A scale of this kind could be installed at the entrance of Jail No. 2 and all supplies thereby correctly weighed.

Since my induction into office I have removed the Sheriff's Office to City property situated at the gore of City Hall Avenue and McAllister Street, at a saving of One Hundred (\$100.00) Dollars per month rental to the City. I have installed a fireproof safe large enough to hold all the valuable papers and records of this office. I have successfully endeavored to conduct this Office strictly along business lines, and to the satisfaction of attorneys and litigants dealing with it. Courtesy and expedition are mandatory rules of the Office.

Since my administration of the Sheriff's Office I have appointed a competent physician, who resides at the Jail and is at all times at the call of the prisoners, many of whom are in constant need of medical attendance. I have installed a hospital or infirmary adjoining the rotunda of the jail, thereby obviating the necessity of conveying felony prisoners to the City and County Hospital for medical treatment, many of whom feign illness for the purpose of seeking opportunity to escape. I have abolished the swimming pool in the bath house and in lieu thereof installed shower baths, a far more sanitary manner of cleansing prisoners. I have also made alterations in the heating apparatus, thereby causing a great saving in the fuel. An entire new fence has been constructed around the reservoir supplying the drinking water. The old and dilapidated sulphur house I have had replaced by the building of a new and better one.

SHERIFF

In conclusion, I respectfully call to your attention thus: The City's many thanks are due Superintendent of Public Buildings John T. Burns for his untiring efforts and assistance, in connection with the Board of Public Works, for the repairing done any many improvements made in and about the County Jails. Also, to the ladies of the "California Club" for their many contributions of reading matter.

Respectfully submitted,

THOS. F. FINN,
Sheriff, City and County of San Francisco.

Faint, illegible text on the right side of the page, possibly bleed-through from the reverse side of the document.

FINANCIAL STATEMENT FOR THE FISCAL YEAR 1910-1911.

July 1, 1910, to June 30, 1911.

Public Administrator's Report

To Honorable P. H. McCarthy, Mayor of the City and County
of San Francisco, State of California.

Pursuant to the provisions of Section 9 of Article XVI of the Charter of the City and County of San Francisco, I herewith submit to you a report and return under oath of all estates which have come into my hands, as Public Administrator of the City and County of San Francisco, State of California, for the fiscal year 1910-1911.

Respectfully submitted,

M. J. HYNES,
Public Administrator of the City and County of San Francisco.

Tax Collector's Report

San Francisco, Cal., July 27, 1911.

Hon. P. H. McCarthy, Mayor, San Francisco.

Dear Sir:—In accordance with the provisions of Section 9 of Article XVI of the Charter, I beg to hand you herewith statements of the business of the Tax Collector's Office in the Departments of Property Tax Collections and License Tax Collections for the Fiscal Year 1910.

The total collection of Taxes against Real and Secured Personal Property and Unsecured Personal Property for the Fiscal Year 1910, is compared with the Total Collection from the same sources during the Fiscal Years 1908 and 1909 in the following statement:

COMPARATIVE STATEMENT OF COLLECTION OF TAXES FOR FISCAL YEARS 1908-1909-1910.

Segregation of Charge of Auditor.	TOTAL CHARGE OF AUDITOR.			NET DELINQUENCY.		
	Fiscal Year 1908	Fiscal Year 1909	Fiscal Year 1910	Fiscal Year 1908	Fiscal Year 1909	Fiscal Year 1910
Real Estate 1st Installment.....	\$3,320,584.44	\$4,062,254.49	\$4,332,632.43	\$11,511.26	\$ 9,138.89	\$11,665.64
Real Estate 2nd Installment.....	3,320,584.44	4,062,254.49	4,332,632.43	18,158.06	15,425.03	18,761.97
Secured Personal Property.....	1,125,806.56	904,815.07	722,847.62	257.19	392.92	540.40
Unsecured Personal Property....	223,084.45	43,149.59	27,597.79	27,058.65	3,987.53	1,539.30
	\$7,990,059.89	\$9,072,466.64	\$9,415,710.27	\$56,985.16	\$28,944.37	\$32,507.31

I beg to call attention to the very small delinquency amounting to \$1,539.30 in Unsecured Personal Property Taxes; this result has been accomplished by diligent work on the part of my Deputies in collecting from house to house.

As a commentary on the efficiency of the office, I beg to make a part hereof of the following report of the Expert of the late Grand Jury on the office of the Tax Collector:

“San Francisco, February 28, 1911.

To the Foreman and Members,
of the Grand Jury of the City and County of San Francisco.

Gentlemen:—I was fortunate in striking this office during the last week of the scramble to pay the first installment of current taxes before same became delinquent. It gave me an opportunity to observe team work of the finest kind on the part of the office force under the stress and strain of a rush that was really remarkable, and when after the final settlement was made with the Treasurer on November 30th, over five and a half millions of dollars (5,500,000.00) had been accounted for to the Auditor without one cent of a discrepancy, I felt that I had witnessed an exhibition of systematic accounting that could not be improved upon, joined to ability impossible to surpass.

This may seem like high praise, but I was in the rush that last week and observed every detail with the greatest care and no one but an accountant could realize how beautifully the great machine works and how harmoniously each and every part did its share in producing that perfect whole, “absolute accuracy.”

In the License Office all receipts, which are in triplicate, are charged to the office of the Auditor at their cash value and at the end of each month the unused receipts are counted by a Deputy Auditor and the total, plus the cash turned over to the Treasurer, as shown by his receipts, must agree with the total charged to the office of the Auditor's books. I assisted the Deputy Auditor in his count on November 30th and found that everything checked up to a cent.

(Signed) J. F. DALY,
Expert.”

In April, 1910, I estimated for the Honorable Board of Supervisors a collection for the fiscal year 1910-1911 from License Taxes,
of about\$1,300,000.00
The actual amount collected was 1,275,452.75

An amount less than estimate of..... \$24,547.25

Which is accounted for as follows:

First —By sales of a lesser number of Retail Liquor Licenses than for previous year	\$ 6,250.00
Second—By adverse legal decisions on Bankers License Ordinances, about	11,000.00
Insurance Brokers License Ordinances, about.....	2,275.00
Third —By amount dependent on legal decisions as to the effect on Various License Ordinances of Constitutional Amendment, about	5,400.00
A Total of	<u>\$24,925.00</u>

Respectfully submitted,

DAVID BUSH,
Tax Collector.

Law Library

San Francisco, Cal., Sept. 30, 1911.

Hon. P. H. McCarthy,
Mayor of the City and County of San Francisco.

Dear Sir:—The Librarian and Secretary of the San Francisco Law Library Association herewith presents his annual report for the fifth year following the earthquake and fire.

The accessions have not been as large for the year just ending as for previous years. The reason for this is that in some branches the library has been fairly well brought up to standard. The textbook department is now well supplied with books, and the reports, with the exception of some of the British Colonial reports, are practically complete.

The largest purchases of the year have been of statutes and legal periodicals. The statutes in a number of states have been supplied, and some of the leading English and American legal periodicals have been purchased. There is much to be done in both of these lines, however, before the library can compare with what it was before the fire.

There were 2,683 volumes added during the year, and there are now 23,654 volumes on the shelves.

Of the accessions, 62 volumes were presented, 65 are records of the Supreme Court, 149 are records of the District Court of Appeal, and 2,407 were purchased.

The donors were: P. V. Long, C. F. Curry, Public Printer of New Zealand, Board of Supervisors of San Francisco, Public Service Commission of New York, The Brown-Green Company, Bancroft-Whitney Company, B. K. Miller, and the Secretaries of the Various Departments at Washington, D. C.

The character of the books added is as follows:

Reports	338
Textbooks	497
Digests	117
Statutes	684
Periodicals	554
Encyclopedias and Dictionaries	28
Directories	22
Collected cases	31
Citations	21
Scotch, Irish and Australian publications.....	50
French, Mexican and other foreign publications.....	83
Supreme Court Records	65
District Court of Appeal Records	149
Governmental publications	44
Total	2,683

More particularly classified the accessions were:

American reports.....	243
American textbooks	317
American digests and indexes.....	112

American statutes	639
American legal periodicals	255
English reports	71
English textbooks	159
English digests and indexes.....	3
English statutes	17
English legal periodicals.....	288
Canadian reports	24
Canadian textbooks	21
Canadian digests	2
Canadian statutes	28
Canadian legal periodicals	11
Australian publications	22
Scotch publications	20
British-Indian publications	43
Irish publications	8
French, Mexican and foreign	40
Directories	22
Dictionaries (miscellaneous)	6
Encyclopedias (legal).....	21
Encyclopedias (miscellaneous)	1
Citations	21
Collected cases	31
Supreme Court Records	65
District Court of Appeal Records	149
Governmental publications	44
Total	2,683

The expenditures for the year were:

Books	\$9,122.28
Insurance	417.75
Binding	488.50
Miscellaneous expense	323.06
Salaries	3,590.00
Total	\$13,941.59

The items of expense are as follows:

American reports	\$ 947.53
American textbooks	1,098.25
American digests and indexes.....	650.15
American statutes	2,745.90
American legal periodicals	952.00
English reports	224.60
English textbooks	341.55
English digests and indexes	19.90
English statutes	50.50
English legal periodicals	600.00
Canadian reports and periodicals	225.25
Canadian textbooks	107.90
Canadian digests	9.45
Canadian statutes	170.35
Australian reports	89.00
Australian statutes	1.25

LAW LIBRARY

Australian legal periodicals	17.00
Scotch and Irish publications	126.25
Collected cases	106.95
Trials	2.50
Citations	253.50
Dictionaries	22.05
Encyclopedias (legal)	33.50
Encyclopedias (miscellaneous)	24.60
Foreign statutes and publications	184.65
Directories	127.70
Newspapers	61.45
Postage	29.50
Express, cartage and freight.....	147.39
Insurance	417.75
Binding	488.50
Stationery and printing.....	17.75
Miscellaneous expense	56.97
Salaries	3,590.00
Total	\$13,941.59

The income for the year was:

From dollar tax	\$22,692.00
Interest	333.92
Total	\$23,025.92

Since the fire the sum of \$91,838.46 has been expended by the Trustees in replacing and maintaining the Library. Of this sum \$70,675.87 was expended for books; \$1,841.85 for insurance; \$1,474.02 for miscellaneous expenses; \$1,031.72 for binding; and \$16,815 for salaries.

Quarters have been assigned to the Library in the temporary hall in course of construction. A generous amount of space has been set aside by the architect, sufficient to allow for the growth of the library for four or five years. The main room is over one hundred feet long and is forty feet wide. In addition work rooms have been set apart for the library. And unless these plans are changed the library will be better housed than at any time since the fire.

Very respectfully,

JAMES H. DEERING,
Secretary and Librarian.

Report of Civil Service Commission

San Francisco, July 31, 1911.

To His Honor, The Mayor.

Sir:—In accordance with the provisions of Section 9, Article XVI of the Charter, the Civil Service Commissioners present herewith a report of the operations of their department for the fiscal year ended June 30, 1911.

During said fiscal year, the Commission held fifty-one regular meetings and fifty-eight special meetings. Twelve meetings were also held in the office of the Commission by Boards of Special Examiners appointed by the Commission. The applications of 244 laborers were registered and ten examinations were held in which a total of 852 applicants were examined.

Following is a schedule of the examinations held:

Name and Date of Examination.	Examined.	Passed.	Failed.	Appointed.
Promotion in Police Department, Corporal to Sergeant. Aug. 6, 1910.....	19	12	7	4
Promotion in Police Department, Sergeant to Lieutenant. Dec. 17, 1910	32	28	4	1
Promotion in Fire Department, Fireman to Lieutenant. Feb. 4, 1911.....	328	(a)	(a)	(a)
Health Inspectresses of Schools. May 6, 1911	44	9	35	(b)
Hospital Stewards. May 6, 1911.....	24	13	11	(c)
Graduate Nurses. May 13, 1911.....	31	22	9	(d)
Cribbers. May 22, 1911.....	333	313	20	43
Inspectors, Department of Electricity. June 10, 1911	11	9	2	7
Inside Wiremen, Department of Electricity. June 24, 1911	8	7	1	6
Repairers, Department of Electricity. June 24, 1911	22	14	8	7

- (a) Rating of papers not yet completed.
- (b) About ten positions to be filled.
- (c) About four positions to be filled.
- (d) About ten positions to be filled.

The scopes of the foregoing examinations were as follows:

Corporal to Sergeant (Promotion)—

Subject.	Weight.
General Knowledge of Duties.....	5
Writing of Report	1
Arithmetic	1
Seniority of Service	1½
Meritorious Public Service	1½
Total weight.....	10

Sergeant to Lieutenant (Promotion)—

The total number of city employes under Civil Service on June 30, 1911, including the members of the Police and Fire Departments who came in with the Charter, was 2601. Of this number, 2128 were appointed through the Civil Service examinations.

Accompanying this report is a copy of our Publication No. 12, showing the Civil Service rules and classifications as revised to date.

Very respectfully,

CIVIL SERVICE COMMISSION.

(Signed) B. B. ROSENTHAL,
Commissioner.

(Signed) F. C. MacDONALD,
Commissioner.

(Signed) GEORGE H. BAHRIS,
President.

Attest:

(Signed) JAS. J. MAHER,
Chief Examiner and Secretary.

Recorder's Report

FISCAL YEAR 1910-1911

San Francisco, July 25, 1911.

To the Honorable, the Mayor and the Board of Supervisors,
City and County of San Francisco:

Gentlemen:—Pursuant to Charter provisions (Article XVI, Section 9), I beg to submit herewith a detailed report of the operations in the Recorder's office for the fiscal year ending June 30, 1911.

I am greatly pleased to report that the business for the year was the greatest in the history of the department, exceeding by a small percentage the year 1908-1909, which previously ranked as the banner year.

PAPERS FILED

Fiscal year ending June 30, 1911.....	65,291
Fiscal year ending June 30, 1910.....	57,673

Net gain over preceding year.....	7,618
-----------------------------------	-------

Deeds, which are the most numerous of all papers filed, were recorded to the number of 14,537 during the year, showing a substantial gain over the preceding fiscal year, when the number aggregated 12,877.

Mortgages to the number of 6,894 were filed, a slight gain over the figures for the preceding year—6,731.

In building contracts there was a regrettable decrease, the totals being 1,548 for the past year, against 1,812 for the preceding year.

Marriages more than held their own, 5,017 certificates being received during the past fiscal year, against 4,333 for the next preceding year.

CASH ACCOUNT

	Cash Receipts.	Expenditures,	Surplus.
Fiscal year 1910-11.....	\$107,218.15	\$73,400.00	\$33,818.15
Fiscal year 1909-10.....	97,813.40	71,472.55	26,340.85
	\$9,404.75	\$1,927.45	\$7,477.30
Gain, 1910-11.....			

In addition to the receipts for Recorder's fees, as above, there was collected as desk rentals during the year the sum of \$722.50. This amount was duly paid to the Treasurer as a special account, and is not further considered in the department's operations.

The large net surplus shown by the year's operations is specially gratifying to me, and doubtless to you and to all citizens. The recent raise of salaries provided by charter amendment will, to an extent, lessen the surplus earning capacity of the department in the future.

Tabulations on following pages, to which you are respectfully referred, show the details and comparisons of operations in this office for the past and preceding years.

A great item of business during the year was in the filing for record of lis pendens and decrees under the provisions of the McEnerney Act. A total of 9,341 lis pendens were filed, and a total of 6,826 decrees. A special feature was the filing of a vast number of lis pendens during the last few days of December, 1910, at the close of which month the act expired; being, however, subsequently continued in force by act of the Legislature which met the following January. During the one month of December (1910) 5,754 lis pendens in McEnerney suits were filed, the great majority being filed during the last week of the month. This unusual business put the equipment of the department to a special test, but by hard work the situation was satisfactorily met.

From the passage of the McEnerney Act, in the year 1906, until June 30, 1911, a total of 32,854 lis pendens have been filed in this department. During the same time decrees to the number of 25,721 have been filed. Owing to errors in procedure, and other causes, it is sometimes found necessary to dismiss a certain suit and file a new one, which accounts for the great excess of lis pendens filed over decrees issued. But it is estimated that about 3,500 decrees are still to follow from suits filed prior to July 1, 1911. When these decrees shall have been issued, the titles to the great bulk of the property of this city and county will have been established under this act.

Each suit, it must be remembered, represents from one to many pieces of property, some of the larger suits embracing hundreds of separate pieces. The largest single owner, the City and County of San Francisco, has taken advantage of the act, the suit covering all city property—over four hundred pieces. It is estimated that only from ten to fifteen per cent of the property holdings, and this of the less valuable class, remains to be brought under action.

The decrease of business from this source will, of course, be felt in the department; but I earnestly hope that it will be made up by an equivalent increase in the general business which should now ensue from the activities induced by the building and holding of a great international exposition.

I am enabled to report that the work of the department has been promptly done at all times, with the one brief exception when the office was flooded with the McEnerney suits filed in the closing days of December, 1910. The same rush cannot come again.

I am pleased to report that in the early part of this year there was effected an organization of the County Recorders of the State, the initial convention being held in this city. This organization purposes giving careful consideration to the laws and procedure regulating the recording of instruments, and will recommend to future law-making bodies such enactments and changes as will prove beneficial to the public and to the recording departments of the several counties of the State. I believe much good can be done in this way.

The last Legislature was induced to pass a law which illustrates the opportunities for betterment. Heretofore, when a recorded instrument was designed to give notice and have effect as a deed of trust, a real property mortgage, and a personal property mortgage, it was necessary to copy the instrument in three separate books—in deeds, real mortgages and chattel mortgages. This added greatly to the expense, as well as delaying the return of the paper to the party who filed it. Under the new law it is only necessary to copy the paper in one book, the additional notice being given by merely indexing the instrument in the several classes specified.

I desire to again call your attention to the fact that this department, while equipped with a fairly sufficient force, is miserably provided for in other ways. The building is cold, damp and unhealthful. Erected in the shape of a vast dome, it is peculiarly unfitted for its purpose, and especially difficult to make comfortable in the winter season. A gas heater installed in the basement supplies the only heat. It is, of course, entirely inadequate in extent, and absolutely poisonous by nature—so much so that the office force is inclined to endure the

greatest possible degree of cold and damp rather than take advantage of poisonous gas fumes as heat. A modern and sanitary heating plant should be installed.

An elevator is also badly needed, new metal furniture should be supplied to replace the wooden furniture and fixtures, and many smaller improvements for the health and convenience of the office force and the public should be made. While I realize that all that is needed cannot be supplied at once, I sincerely hope that the department will be favored with such urgently needed improvements as the building fund will allow.

I want, in closing, to thank your Honor and the Board of Supervisors for the courtesies which have been extended to me and my department during the past year, and I cordially invite you all to more frequently visit the office and become familiar with its conditions and needs.

Respectfully,

EDMOND GODCHAUX, ,
County Recorder.

NOTE: There was no record left by my predecessor showing the number of meals furnished, therefore, it is impossible to show correctly the average cost per capita per diem.

\$8,833.93

During the ten months of the fiscal year ending June 30, 1911, that the Detention Home was located on Harrison street, between Tenth and Eleventh, anything but acceptable conditions maintained, in spite of the conscientious effort made by every one in the Detention Home to remedy the bad condition created by totally inadequate space and lack of proper equipment.

The need of a proper Detention Home was made the more pressing by the amending of the Juvenile Court law at the last session of the Legislature, which increased the responsibility of the Juvenile Court by changing the age limit from 18 to 21 years.

Realizing the need of a proper and adequate Detention Home, under changed conditions, your Honor and the Honorable Board of Supervisors took such action as to enable the Probation Committee to secure very good quarters in the building located at 2344 Sutter street, and the Detention Home formally occupied the same on May 15, 1911.

The Probation Committee have planned many improvements here and contemplate the establishment of a hospital where the girls may receive special attention; a school where the children may be regularly instructed during their brief stay in the Detention Home, and such segregation among the different sizes of boys and girls as is found in the best Juvenile Court development throughout the United States.

There have already been installed fire escapes and fire fighting apparatus. That the further safety of the wards of the court may be insured, watchmen's stations have been installed in several parts of the building, which are visited every half hour between the hours of 8 P. M. and 6 A. M.

While keenly appreciating the great improvement over the old location, the Probation Committee are anxious that new quarters of a permanent character and owned by the municipality be secured for this most important work, and respectfully urge that your Honor and the Honorable Board of Supervisors give earnest consideration to the need as well as to the economy of erecting a suitable Juvenile Court Building and Detention Home.

It is further respectfully urged that there are suitable school lots not now being used for educational purposes that might be diverted for the use of this Juvenile Court Building, and when it is realized that the rent is the equivalent of an investment of \$65,000 at 6% interest, it is plain to be seen that economy as well as large improvement might be made.

In closing, I desire to express my sincere thanks to your Honor and the Honorable Board of Supervisors for your very kind assistance in securing this building for the use of the Juvenile Court wards, to the Probation Committee for their wisdom in directing the general work of the Home, to the Auxiliary of the Juvenile Court for their assistance and co-operation, and to J. C. Astredo, Chief Probation Officer, for his co-operation in bringing the Detention Home to its present state of efficiency.

Respectfully submitted,

B. F. MONTGOMERY,
Superintendent Juvenile Detention Home.

Report of Board of Censorship

San Francisco, Cal., August 31, 1911.

To the Honorable P. H. McCarthy,
Mayor of the City and County of San Francisco.

Sir:—I have the honor to submit herewith the report of the Board of Censorship for the fiscal year ending June 30, 1911.

Respectfully submitted,

NORMAN W. HALL, Secretary.

The Board of Censorship has been in existence for two years, having been organized on June 3, 1909, under and pursuant to Section 4 of Ordinance No. 761 (New Series) of the Board of Supervisors of the City and County of San Francisco, as passed on May 4, 1909, and approved by the Mayor on May 13, 1909, which authorized and directed the organization of an advisory committee on moving pictures for the purposes of censorship.

The Board as organized under Ordinance No. 761 (New Series) is constituted and appointed as follows:

One member respectively by the Mayor, by the Board of Education, the Board of Police Commissioners, the Society for the Prevention of Cruelty to Children and the Moving Picture Exhibitor's Association, each member to serve during the pleasure of the officer or body making the appointment.

The officers and members of the Board as first constituted consisted of J. C. Astredo, President; Norman W. Hall, Secretary; Mrs. F. M. Malloye, Miss Edith Hecht and J. Redmond.

At the close of the fiscal year 1910-1911, the officers and members were as follows: Mrs. F. M. Malloye, President; Norman W. Hall, Secretary; Mrs. W. H. Nicholl, T. P. Riordan, Dr. W. H. Whelan and W. P. Wobber.

While the Board has issued each month since its inception statements of the moving pictures censored, this, a report of the work thereof for the fiscal year ending June 30, 1911, is the first yearly report of the Board, and will, therefore, include a brief resume of the work of the preceding fiscal year, or that ending June 30, 1910.

The Board of Censorship occupies an unique and peculiar position in that it is the first municipal body of the character to have been established in the United States. There were no precedents to follow. The work of the Board during the earlier stages of its organization was consequently of an experimental nature.

It sprang into being in response to a general public demand, coincident to similar movements in most of the leading cities of the United States.

In some cities, the movement took the form of a rigid police censorship as in Chicago, while in others, local civic bodies with the co-operation of the business interest involved, undertook this work, as in New York, where the People's Institute were instrumental in the development of what is known as the National Board of Censorship of Motion Pictures, with which body this Board corresponds, receiving regularly reports detailing the moving pictures censored there, the verdicts of which most of the manufactures apply to their entire

output of pictures, realizing "that a manifest material advantage would at once accrue to the trade interests from the Censorship." In some past instances, a difference in the point of view has compelled this Board to reject verdicts of the New York Board.

The Board regrets this because it believes that the more nearly uniform such a censorship is made, the more effective and satisfactory it will be.

This result was however, to have been expected in view of the untried features which a censorship of moving pictures presented.

This Board has kept in mind three points in passing judgment upon the moving pictures that have come before it, first: the laws of this city; secondly, the public; thirdly, the business interest involved.

Primarily, the Board is called upon to enforce the law. Section 2 of Ordinance No. 761 (New Series) reads:

"It shall be unlawful for any person, firm, association or corporation to display, or cause or permit to be displayed at any moving picture exhibition or at any entertainment at which moving pictures are exhibited, any picture, illustration or delineation of any nude human figure or of any lewd or lascivious act, or of any other matter or thing of an obscene, indecent or immoral nature or offensive to the moral sense, or (in such detail as to offend public morality and decency) any murder, suicide, robbery, hold-up, stabbing, assaulting, clubbing or beating of any human being."

From the above, it will be seen that the scope of the Board's action is wide.

Within the limits prescribed, it is necessary to bring to bear an unbiased mind censoring in the light of reason, without bigotry on the one hand, or looseness on the other. Life—and the motion picture is life—is so made up of complex problems, the good, the bad and the indifferent so interwoven that the drama of the motion picture in faithful reproduction of life necessarily deals with all these phases.

Nor is this necessarily reprehensible. Nevertheless, there are phases of life that are just as well forgotten and that serve no good purpose through their public exploitation.

Certain it is, they cannot entertain any but the morbid. Fortunately, and to the credit of the producers of moving pictures, the number of such as depict immorality or criminality are not numerous and the percentage that they bear to the aggregate produced is steadily decreasing.

With those that depict positive immorality or criminality, in detail, there can be but one verdict; i. e., condemnation.

Where either form the motive of the picture story, the Board condemns. Where either are merely incidental to the story and not necessarily offensive, the Board gives approval, provided the effect produced is not harmful.

And here the public; viz., the motion picture public as it were, must particularly be considered.

Unlike some other cities where a moving picture censorship is in vogue, children have an unrestricted entry into the moving pictures theatres and largely patronize them. This, therefore, must be considered. Of course, where the subject of the picture passes over a child's head, so to speak, this consideration is, perhaps, not so important.

Still the Board recognizes that there is an impressionable age of youth when the future man or woman is in making.

A picture, for example, may be suggestive of criminal methods or instructive in crime in such a degree as to lead a boy to an overt act of crime. The police annals of this city bear out this statement. Such is true of those pictures that show the administering of poison, the picking of a lock, the cracking of a safe, a disguise for criminal purposes, etc. Again, a picture may seemingly

extoll crime and criminals until they assume falsely heroic proportions in the mind of a boy.

Such pictures as these were those known as "The Younger Brothers" and "The James Boys." They are always condemned by the Board.

Pictures of excessive brutality are offensive to the public generally. Pictures of this class have been produced and misnamed as representations of Western Life.

That class of moving pictures which may be termed immoral, either directly, or indirectly by suggestion, is exceedingly small.

A few striking examples have called forth strong condemnation, as witness, "Ouchard, the Merchant," a moving picture story produced last year and which was defended at the time as a "domestic tragedy," while in reality it portrayed a suggestively immoral Russian "white slave" tragedy.

Of more recent production, or release, as termed by the trade, is a picture known as "The Nun" which was declared by a trade publication to be "a menace to the entire industry." This picture besides being immoral is thoroughly offensive to religion, it represents a monk attempting to violate a novice in a nunnery.

These particular pictures are mentioned not to condemn a great industry, but to impress the necessity of avoiding such productions in order to secure the patronage of the decent—loving, self-respecting public, and at the same time, we have alluded to them to show the obvious importance of a careful censorship.

As was intimated in a former portion of this report, we have not neglected to consider the business interests as here mentioned; we refer particularly to what are known as film exchanges. These are the houses which stand in the position of middlemen between the producers of moving pictures on the one hand and the exhibitors of moving pictures on the other. These film exchanges buy or lease what moving picture films they secure from the manufacturers, and in turn, they (the exchanges) rent the pictures to the exhibitors; i. e., the theatres or nickelodeons.

When pictures are condemned the loss falls upon the local exchanges. This fact has led the Board to make limited eliminations in films where such could be safely done, allowing the modified pictures to be exhibited. It has also caused the Board to give the benefit of a doubt to the exchange in cases where a refinement of criticism might result in the prohibition of the exhibition of the picture.

As a result of the policy of the Board, there has been a minimum of criminal prosecution growing out of violations of the law.

There have been in all, four arrests made since the organization of the Board.

In one instance the action was dismissed at the request of the Board; in another, the court dismissed the case; in the third, a jury acquitted the defendant, and in the fourth, the court found the defendant guilty.

In the case mentioned as dismissed by the court, the Board had made an arrest for the exhibiting of the so-called Jeffries-Johnson prize fight pictures. The court held that such an exhibition was not prohibited within the meaning of the ordinance. The Board had taken a stand against this picture in co-operation with the Mayor. The original fight had been excluded from this city on grounds of public policy and as a violation of the laws of the State. The Board had never before taken any adverse action in similar exhibitions, recognizing the propriety thereof to be debatable.

The methods heretofore pursued by the Board in censoring may be briefly put, as follows:

Representatives of the Board daily visit "first run" houses and at intervals inspect all other houses, for the purpose dividing the city into districts, noting the pictures exhibited. ("First run" houses, it may be mentioned, are those dis-

playing pictures that have been released the same day they are exhibited in the house.)

At any such inspection, any picture which is within the general scope of those prohibited by the city ordinance is "questioned" that this, its exhibition is objected to and the film exchange responsible therefor is requested to present it to the Board for review, at which time the Board either "approves" "modifies" or "condemns." The exchange is notified of the verdict, and the Police Department is requested to see that it is observed.

Since the commencement of the fiscal year of 1911-1912, the Board, having received the necessary support from the Board of Supervisors, have secured the placing of a moving picture projecting machine in a municipal building, where pictures may be presented to the Board the day preceeding their public release and be finally passed upon. This method has been urged for some time as the preferable one, both for the business interests and the public.

The Board is enthusiastic in its endorsements of the moving picture, and desires to encourage its patronage by the public. It is on the whole, the most wholesome form of amusement offered to the people today.

Its possibilities along instructive lines are almost limitless. Every school house in the land ought to be equipped for the exhibition of the moving picture.

Its sermons are eloquent, its educational possibilities unbounded, its entertainments irresistible.

In closing this report, a tabulated statement giving the number of pictures inspected by the Board for the fiscal years 1909-1910 and 1910-1911 is submitted, together with a list of those pictures condemned or modified during the same periods, as follows:

MOVING PICTURES INSPECTED FISCAL YEAR 1909-1910.

Approved	2,194
Modified	37
Condemned	56
Total number inspected	2,287

MOVING PICTURES INSPECTED FISCAL YEAR 1910-1911.

Approved	3,778

Deceased Soldiers and Sailors

San Francisco, July 1, 1911.

Hon. P. H. McCarthy, Mayor,
City and County of San Francisco.

Sir:—I have the honor to report the following Applications, Allowances, and Rejections for the year ending June 30, 1911, made in accordance with the provisions of an Act of the Legislature of the State of California entitled, "An Act to provide for the burial of honorably discharged ex-Union soldiers, sailors and marines who may hereafter die in this State without leaving sufficient means to defray funeral expenses:" approved March 15, 1889, amended March 13, 1901, to include ex-U. S. soldiers, sailors, and marines, and amended March 24, 1911, to include the widows of such who die in indigent circumstances.

Namely:

Total number of applications for burial.....	62
Total number of applications allowed	53
Total number of applications rejected	9

CAUSES FOR REJECTION.

Insufficient record of military or naval service	2
Left sufficient means to defray funeral expenses.....	5
Died outside County of San Francisco.....	2

On June 8, 1911, I recovered fifty dollars from the Public Administrator for the burial of Patrick Gallagher, an ex-Union sailor, who died in supposed indigent circumstances on February 25, 1897, and left an estate of some seven hundred dollars in the Hibernia Savings and Loan Society. I mailed the check on the above date to John A. Kelly, Esq., chairman of the Finance Committee of the Board of Supervisors.

Very Respectfully,

EDWARD A. BULLIS,

Superintendent of Interment of ex-U. S. soldiers, sailors, and marines for the
City and County of San Francisco.

County Clerk's Report

San Francisco, July 1st, 1911.

Hon. P. H. McCarthy,

Mayor of the City and County of San Francisco.

Dear Sir:—

In compliance with Section 9, Article XVI, of the Charter of the City and County of San Francisco, I submit herewith the annual report of the office of County Clerk, for the fiscal year 1910-1911.

As to the condition and conduct of the office of County Clerk, I attach and make a part hereof, excerpts from the report of the Grand Jury, in and for the City and County of San Francisco, for the years 1910-1911.

As may be seen by reference to the Financial Statement hereto attached, the office has not only been self-sustaining during my incumbency, but for the first time in its history has been a source of great profit to the City and County, earning in excess of running expenses the sum of \$362,047.55.

Respectfully submitted,

H. I. MULCREVY.

County Clerk and ex-Officio Clerk of the Superior Court.

San Francisco, Cal., Feb. 8, 1911.

To the Foreman and Members of the Grand Jury
of the City and County of San Francisco.

Gentlemen:—

Your committee on the County Clerk's office reports as follows:

This office, temporarily housed in the Hibernia Building, is simply and neatly appointed. Though the office space is considerably inadequate for the accommodation of the public, the equipments are economically disposed with a view to facilitate the expeditious handling of the immense volume of business transacted.

Harry I. Mulerevy, the present County Clerk, by the adoption of the very latest counting-house improvements, supplemented with original conceptions of his own, has effected exhaustive reformations in the methods and accomplished a marvelous efficiency in the conduct of the office.

The records of every department, including general, civil, probate, quiet title, criminal, naturalization, marriage license, copyist and professional registration, are virtually written up to the minute and that a practical and effective checking system is everywhere in use.

For every fee received a triplicate cash tag is issued. A separate cash book containing the tag number, case number, kind of service and amount paid in, is kept by each department and a facsimile of each day's proceedings rendered to the cashier, whose general cash book is a complete daily check on the treasury and insures a correct transmission of all moneys.

All decrees, judgments and court orders are immediately entered, recorded or docketed as the case demands and great caution is observed in keeping every filing and record in its proper place, for which metal filing cabinets have been provided.

Though each department proceeds through methods adapted to its own peculiarities, Mr. Mulerevy's general scheme of system pervades the whole. He is a strict disciplinarian and insists that the interests of the general public are paramount to the personal convenience of himself and deputies.

It is particularly remarkable that this office, which a few years ago, with ten more than the present force of clerks and at a loss to the municipality, handling but about 30,000 documents per annum, now makes an annual saving of about \$50,000 in excess of running expenses and has received over the different counters upwards of 1,500,000 filings since the fire.

Respectfully submitted,

WILLIAM CRONAN,
JOHN CRONIN,
EDWARD S. LOWRY.
Committee.

COUNTY CLERK

City Attorney's Report

San Francisco, Cal., August 1, 1911.

Hon. P. H. McCarthy,

Mayor of the City and County of San Francisco.

Sir:—In compliance with the requirements of Section 7, Article XVI, of the Charter of the City and County of San Francisco, I have the honor to submit the following as my report as City Attorney for the fiscal year 1910-1911:

ACQUISITION OF WATER SUPPLY.

Two actions are pending before the Superior Court of Tuolumne County in which the City and County of San Francisco is a party defendant. One is an action to quiet title to the waters flowing into the Tuolumne River immediately west of the westerly boundary line of the Yosemite National Park and to restrain the City and County from the use or diversion of said waters. This action is brought by the National Park Electric Power Company upon the claim that it has a right to the use of these waters superior to that of the City. The other action is brought by the same company against the Tuolumne Water Supply Company and the City and County to quiet title to the waters of the Cherry River and to restrain the defendants from using or diverting said waters. The same claim is made that the plaintiff has a superior right to the use of said waters.

The same company has applied to the Forestry Service for a right of way along the southerly bank of the Tuolumne River from the westerly boundary of the Yosemite National Park. The City protested against the granting of such permit and the application was denied by the Chief Forester. An appeal has been taken by the company from the Forester's order to the Secretary of Agriculture. This appeal will be argued before the Solicitor of the Department of Agriculture in Washington, D. C., on August 28th.

On July 1, 1911, the Board of Army Engineers appointed by Secretary of the Interior Ballinger to investigate and report upon the Hetch Hetchy Valley as a reservoir site for the City, met in this City and held a preliminary hearing. Additional data is being prepared to be submitted to this Board and to the Secretary of the Interior at the hearing of the Order to Show Cause on December 1st of this year. This hearing is to be had in Washington, D. C.

WATER LITIGATION.

WATER RATES.

My annual report of 1908-1909 contained a detailed history of the litigation brought by the Spring Valley Water Works and its successor Spring Valley Water Company against the City and County of San Francisco enjoining the enforcement of Ordinances covering water rates for the fiscal years 1903-1904 to 1908-1909, inclusive. That report was submitted in my annual report for the year 1909-1910. Since the making of the last report another action has been begun by the Water Company to enjoin the enforcement of the rates for the year 1911-1912. In all of these suits preliminary restraining orders have been issued.

The first three cases, involving the ordinance rates for the years 1903-1904, 1904-1905 and 1905-1906, have been consolidated by order of court, and the final hearing upon these cases was had before Judge E. S. Farrington in the United States Circuit Court in October, 1910. These cases were finally submitted for decision on October 15, 1910, and no decision has as yet been made.

Action on the restraining orders in the subsequent cases has been delayed awaiting the decision in the cases under submission.

All the excess collected by the Spring Valley Water Company over the rates prescribed by ordinance for the years 1909-1910, 1910-1911 and 1911-1912 has been deposited in accordance with an order of court made upon the motion of this office in the Mercantile Trust Company Bank of this City and County. The sum so deposited is in the control of the Clerk of the United States Circuit Court, to be returned to the consumers if the City is successful in the litigation.

GAS RATES LITIGATION.

Suits were brought by the San Francisco Gas & Electric Company for the purpose of enjoining the gas rates fixed by Ordinance for the fiscal years 1908-1909, 1909-1910, 1910-1911. The Metropolitan Light and Power Company also brought suits for the purpose of enjoining the gas rates fixed by Ordinances for the fiscal years 1909-1910 and 1910-1911. In all of these cases temporary injunctions were issued by the Circuit Court of the United States, with the proviso that the moneys collected in excess of the Ordinance rate of 85 cents for 1000 cubic feet should be deposited by the Companies with the Clerk of the Circuit Court pending the determination of the various suits. In the San Francisco Gas & Electric Company cases the excess so impounded was approximately as follows: For the fiscal year 1908-1909, \$274,147.90; for the years 1909-1910, \$354,193.83; for the years 1910-1911, \$945,566.33; being a total of \$945,566.33. In the Metropolitan Light and Power Company cases the excess so impounded was approximately as follows: For the years 1909-1910, \$38,791.85; for the years 1910-1911, \$49,193.70, being a total of \$87,985.55.

These cases were being brought to trial when, on the 11th day of May, 1911, the Board of Supervisors adopted Resolution No. 7789 (New Series). That Resolution in effect provided that whenever any person or corporation engaged in the business of supplying gas to the City and County of San Francisco should file with the Mayor of the City a waiver and relinquishment of the right to call into question or dispute the validity of rates fixed or to be fixed by the Board of Supervisors for gas to be supplied to the City and County of San Francisco and its inhabitants for the year commencing July 1, 1911, and ending June 30, 1912, the City Attorney was empowered and requested in any and all actions which might be pending on the part of said persons or corporations against the City and County of San Francisco to invalidate or set aside the ordinances of the Board of Supervisors fixing gas rates for the years 1908-1909, 1909-1910 and 1910-1911, to enter into agreements, stipulations, judgments and decrees in said actions upon terms which should secure a division of the difference between the rates authorized by the Ordinance of the Board of Supervisors for the respective years and the rates collected by the companies and impounded in said actions, said division to be upon the basis of one-half to the rate payers who had paid in the excess and one-half to the companies who had filed the waiver and relinquishment. Both the San Francisco Gas & Electric Company and the Metropolitan Light & Power Company filed a waiver and relinquishment in accordance with said Resolution. Pursuant to and in accordance with said Resolution judgments were entered in the aforesaid various cases by which it was decreed that one-half of the impounded excess should be returned to the rate payers who had paid in the excess and the other one-half to the companies.

The effect of this decree is to return to the rate payers one-half of the above impounded excess.

The amount so impounded by the companies earned interest. Said Resolution No. 7789 (New Series) directed that this interest should be divided as follows: The compensation of the Master in Chancery should first be paid out of said interest fund and the balance remaining should be divided equally between the City and County of San Francisco and the respective companies, the City's share to be turned into the general fund of the City and County. The interest on the impounded excess collected by the San Francisco Gas & Electric Company amounted to approximately \$24,506.48. The interest earned on the impounded excess collected by the Metropolitan Light & Power Company amounted to, approximately, \$1,635.56. These amounts of interest will be slightly increased before the same are divided. The compensation of the Master in Chancery has not as yet been fixed by the Court.

The amounts that pursuant to said decree are to be returned to the rate payers are being returned as rapidly as possible, under the direction and supervision of the Master in Chancery. When these amounts have been entirely returned the aforesaid rate cases will be finally concluded. The gas rates for the fiscal year 1911-1912 is as follows: For the first six months of said fiscal year the rate is to be 85 cents for 1000 cubic feet; for the second half of said fiscal year the rate is to be 80 cents for 1000 cubic feet.

TAX CASES.

During the past fiscal year there have been tried four important classes of tax cases, namely:

1st. Cases in which was involved the question as to whether or not a tax could be levied to meet interest and redemption payments on bonds authorized, but, at the time of the tax levy, never issued or sold. In the case of *Connolly vs. City and County of San Francisco* the contention of the City was sustained and it was held that such a tax is a legal tax. An appeal has been taken by the plaintiff in the *Connolly* case, and the matter is now pending in the Supreme Court.

2nd. Cases in which was involved the question as to whether or not the emergency tax levied in 1907 for the construction of the Geary Street Road was or was not a valid tax. Practically the same matter had previously involved in a case tried before Judge Sturtevant, Judge of the Superior Court, and he had in that case decided against the contentions of the City. In the case of *Josselyn vs. City and County of San Francisco*, the matter was again decided against the City upon the ground that the matter involved was not an emergency or necessity in the sense in which these terms are used in the Charter and upon the further ground that the proper preliminaries for the construction of municipal road had not, at the time of the tax levy, been observed. Other technical points were also involved. The *Josselyn* case is now on appeal to the Supreme Court.

3rd. Cases in which was involved the question as to whether or not the so-called "Constitutional Tax Amendment No. 1," providing for the segregation of the sources of State and county taxes, exempted the public service corporations, banks and insurance companies from the payment of municipal license taxes. These cases have been submitted to and are now pending in the Superior Court in and for the City and County of San Francisco.

4th. Cases in which was involved the question as to whether or not the emergency tax levied for the fiscal year 1910-1911 is a proper tax. The points involved in these cases are, first, whether the vote of eighteen Supervisors is required to suspend the dollar limit; second, whether or not the ordinances suspending the dollar limit properly set forth the emergency or necessity.

ESTABLISHMENT OF TITLE TO CITY'S LANDS.

The action of the City and County of San Francisco vs. All Persons, etc., to establish the title of the City to its lands was filed December 29, 1910 (No. 27011, in Department No. 12 of the Superior Court). This action has required a great deal of time and attention. More than two years' time was spent in searching titles and correcting descriptions of lands. The complaint in this action sets up title to 394 parcels of land described therein. The pleadings are very voluminous and contain ninety-seven pages of closely printed matter.

Seventeen defendants were specifically named in the Summons and Affidavit as claiming interests adverse to the City and County, and, of them, twelve defaulted. The five who appeared and answered are as follows:

Lincoln Realty Company, which sets up a leasehold interest in One Hundred Vara Lot No. 128, or Parcel No. 68 in the Complaint; Spring Valley Water Company, which asserts title to a portion of parcel of land north of Fractional O. L. Block No. 59, and part of parcel number 198 in the Complaint; Bernard Gibbons, who asserts title to a portion of lot in Horner's addition Block No. 95, the same being a portion of Parcel No. 100 in the Complaint; Burnett Building and Loan Association, which asserts title to Lot No. 40 in Block No. 15 of the Ben Franklin Homestead Association tract, the same being parcel No. 309 in the Complaint, and August Bussi, who asserts title to South Park, the same being parcel 394 in the Complaint.

This action is now at issue, and will soon be tried and disposed of.

UNITED STATES CIRCUIT COURT OF APPEALS.

ACTIONS PENDING IN.

United R. R. of S. F. vs. City and County of S. F. No. 1922—Action for injunction to restrain sale of Geary Street Railroad bonds. On appeal from order of United States Circuit Court overruling demurrer of City and granting temporary restraining order. May 18, 1911, appeal argued and submitted.

UNITED STATES CIRCUIT COURT.

ACTIONS PENDING IN.

Spring Valley Water Works vs. City and County of S. F. No. 13395—Injunction to restrain enforcement of Ordinance No. 661, fixing water rates for year 1903-1904. Injunction pendente lite granted. Cause tried and submitted.

Spring Valley Water Co. vs. City and County of S. F. No. 13598—Injunction to restrain enforcement of Ordinance No. 1155, fixing water rates for year 1904-1905. Injunction pendente lite granted. Cause tried and submitted.

Spring Valley Water Co. vs. City and County of S. F. No. 13756—Injunction to restrain enforcement of Ordinance No. 1433, fixing water rates for year 1905-1906. Injunction pendente lite granted. Cause tried and submitted.

The three above cases have been consolidated by order of Court. They were argued upon final hearing before Hon. E. S. Farrington, in September and October, 1910, and were finally submitted for decision on October 15, 1910. The decision has not as yet been rendered.

Spring Valley Water Co. vs. City and County of S. F. No. 14275—Injunction to restrain enforcement of Ordinance No. 181 (N. S.), fixing water rates for year 1907-1908. Injunction pendente lite granted, awaiting decision in case No. 13395.

Spring Valley Water Co. vs. City and County of S. F. No. 14735—Injunction to restrain enforcement of Ordinance No. 486 (N. S.), fixing water rates for year 1908-1909. Injunction pendente lite granted, awaiting decision in case No. 13395.

Spring Valley Water Co., etc. vs. City and County of S. F. et al. No. 14892—Injunction to restrain enforcement of Ordinance No. 761 (N. S.), fixing water rates for year 1909-1910. Temporary restraining order granted, awaiting decision in case No. 13395.

Spring Valley Water Co. vs. City and County of S. F. No. 15131—Injunction to restrain enforcement of Ordinance fixing water rates for year 1910-1911. Temporary restraining order granted, awaiting decision in case No. 13395.

UNITED STATES CIRCUIT COURT.

ACTIONS DETERMINED IN.

S. F. Gas & Electric Co. vs. City and County of S. F. et al. No. 14742—Action for injunction to restrain enforcement of gas rate Ordinance for year 1908-1909.

S. F. Gas & Electric Co. vs. City and County of S. F. et al. No. 14903—Action for injunction to restrain enforcement of gas rate Ordinance for year 1909-1910.

S. F. Gas & Electric Co. vs. City and County of S. F. et al. No. 15121—Action for injunction to restrain enforcement of gas rate Ordinance for year 1910-1911.

Metropolitan Light & Power Co. vs. City and County of S. F. etc. No. 14922—Injunction to restrain enforcement of gas rate Ordinance No. 770 (N. S.) for year 1909-1910.

Metropolitan Light & Power Co. vs. City and County of S. F. etc. No. 15139—Injunction to restrain enforcement of gas rate Ordinance for year 1910-1911.

By order of the Board of Supervisors, decrees have been entered by consent in the above five cases in accordance with the terms of a compromise arranged by the Board of Supervisors with the two gas companies. Under these decrees one-half of the impounded excess of rates collected by the gas companies over those fixed by Ordinance is to be returned to the rate payers, and the companies have agreed to a rate of 85 cents per thousand cubic feet from July 1, 1911, to January 1, 1912, and of 80 cents per thousand cubic feet from January 1, 1912, to July 1, 1912.

SUPREME COURT OF CALIFORNIA.

ACTIONS TO OBTAIN DECREE QUIETING TITLE AGAINST CITY AND COUNTY OF SAN FRANCISCO IN LIEU OF A CITY DEED.

Since the practice of furnishing City deeds on petition of property holders has been abandoned, a great number of ordinary quiet title actions have been brought against the City to acquire title in lieu of City deeds, and it is, of

course, necessary to examine each action to protect any rights of the City that may be involved. Following is a list of such actions, pending and determined, for past fiscal year:

ACTIONS PENDING.

- Elizabeth A. Horn vs. No. 14626—To portions of Potrero Nuevo Block No. 17. Answer filed February 27, 1908.

- B. Cademartori vs. No. 14857—To part of Western Addition Block No. 117. Answer filed March 3, 1908. Ready for trial.
- F. Milani vs. No. 14969—To part of Western Addition Block No. 48. Answer filed May 5, 1908. Of calendar.
- A. K. Finley vs. No. 15043—To part of Mission Block No. 118. Ready for trial. Answer filed May 12, 1908. Ready for trial.
- Mary C. Malloye vs. No. 15049—To part of Western Addition Block No. 265. Answer filed May 12, 1908. Ready for trial.
- F. Heitmeyer vs. No. 15164—To part of Western Addition Block No. 458. Answer filed May 5, 1908. Ready for trial.
- H. S. Williamson vs. No. 15237—To part of Western Addition Block No. 314. Answer filed May 13, 1908. Ready for trial.
- Henry C. Hahn et al. vs. No. 15233—To part of Western Addition Block No. 313. Answer filed May 13, 1908. Ready for trial.
- O. G. Sage vs. No. 15423—To part of Western Addition Block No. 457. Answer filed May 12, 1908. Ready for trial.
- John Young et al. vs. No. 15425—To part of Mission Block No. 77. Answer filed May 13, 1908. Ready for trial.
- Julia Lyon vs. No. 15426—To part of Mission Block No. 11. Answer filed May 13, 1908. Ready for trial.
- Chas. F. Eckhardt vs. No. 15498—To part of Potrero Nuevo Block No. 15. Answer filed April 4, 1908. Ready for trial.
- Cecelia E. Norton vs. No. 15503—To part of Mission Block No. 22. Answer filed April 4, 1908. Ready for trial.
- F. R. Bank vs. No. 15619—To part of Mission Block No. 312. Answer filed April 4, 1908. Ready for trial.
- James McFarland et al. vs. No. 15690—To part of Western Addition Block No. 442. Answer filed April 13, 1908. Ready for trial.
- George Largomarsino vs. No. 15691—To part of Western Addition Block No. 200. Answer filed April 13, 1908. Ready for trial.
- N. C. Kist vs. No. 16055—To part of Outside Lands Block No. 1059. Answer filed April 24, 1908. Ready for trial.
- Grace Schaden vs. No. 16164—To part of Outside Lands Block No. 737. Answer filed May 18, 1908. Ready for trial.
- H. E. Sherman vs. No. 16165—To part of Western Addition Block No. 321. Answer filed May 18, 1908. Ready for trial.
- A. Serensky vs. No. 16168—To part of Mission Block No. 10. Answer filed May 18, 1908. Ready for trial.
- Chas. W. Mulloy vs. No. 16235—To part of Western Addition Block No. 609. Answer filed May 8, 1909. Ready for trial.
- Dinkelspiel Estate Co. vs. No. 16236—To part of Mission Block No. 96. Answer filed May 11, 1908. Ready for trial.
- Frank McGovern vs. No. 16239—To part of Western Addition Block No. 214. Answer filed May 11, 1908. Ready for trial.
- Andrew J. Clunie vs. No. 16473—To part of Western Addition Block No. 287. Answer filed May 18, 1908. Ready for trial.

- D. H. Walker et al. vs. No. 16581—To part of Western Addition Block No. 391. Answer filed May 20, 1908. Ready for trial.
- H. J. Eiben vs. No. 16739—To part of Western Addition Block No. 219. Answer filed May 27, 1908. Ready for trial.
- Louis J. Francis vs. No. 18210—To portion of Western Addition Block No. 117. Answer filed August, 1908. Ready for trial.
- Frederick A. Hanke vs. No. 22729—To portion of Western Addition Block No. 273. Ordered demurrer sustained, 10 days to amend, May 22, 1909.
- Nora Dempsey vs. No. 22654—To portion of Western Addition Block No. 260. Answer filed May 15, 1909. Ready for trial.
- Berthold Guttermesen and Helena Guttermesen vs. No. 22655—To portion of Mission Block No. 179. Answer filed May 18, 1908. Ready for trial.
- Julius Frankel vs. No. 20251—To part of Outside Lands Block No. 686. Answer filed December, 1908.
- Howard D. Kibbe vs. No. 20253—To part of Western Addition Block No. 456. Answer filed December, 1908.
- Susan W. Swain vs. No. 15689—To portion of Western Addition Block No. 26. Answer filed April 13, 1908. Ready for trial.

ACTIONS DETERMINED.

- Thomas Roach vs. No. 15429—To part of Mission Block No. 84. Roll filed. Decree docketed November 29, 1909.
- Michael Lynch vs. No. 15496—To part of Mission Block No. 175. Notice of decision, etc., filed October 22, 1909.
- M. G. Buckley vs. No. 16741—To part of Outside Lands Block No. 878. Roll filed October 27, 1908.
- Sarah Harmon vs. No. 17032—To part of Mission Block No. 104. Roll filed August 31, 1909.
- Elizabeth M. Mogan vs. No. 22730—To portion of Western Addition Block No. 267. Judgment filed August 13, 1909.
- John T. Dare vs. No. 20192—To part of Outside Lands Block No. 395. Judgment filed April 6, 1908.

- Connie B. Marchand vs. No. 15785—To portion of Western Addition Block No. 272. Judgment for plaintiff October 23, 1908.
- Joseph H. Coleman vs. No. 15786—To portion of Mission Block No. 52. Judgment for plaintiff October 7, 1908.
- Albert A. White vs. No. 16238—To portion of Western Addition Block No. 418. Judgment for plaintiff November 10, 1908.
- Starr Estate Co. vs. No. 16319—To portion of 50 Vara Lot No. 16. Judgment for plaintiff October 23, 1908.

Western Pac. Ry. Co. vs. No. 16478—To various parcels described in complaint. Judgment for plaintiff July 3, 1908.

Mary Attridge vs. No. 16583—To portion of Western Addition Block No. 362. Answer filed. Judgment for plaintiff November 10, 1908.

C. C. Kinsey vs. No. 16742—To portion of Western Addition Block No. 849. Judgment for plaintiff August 13, 1908.

Rosa Wolff vs. No. 16743—To portion of Mission Block No. 121. Judgment for plaintiff November 10, 1908.

Ellen Ryan vs. No. 17151—To portion of Mission Block No. 56. Judgment for plaintiff October 23, 1908.

Peter J. Clecak vs. No. 18033—To portion of Western Addition Block No. 368. Judgment for plaintiff October, 1908.

Adeline Schoenfield vs. No. 18206—To portion of Western Addition Block No. 229. Judgment for plaintiff November 17, 1908.

Nellie F. Bergeron vs. No. 22657—To portion of Western Addition Block No. 342. Judgment for plaintiff June 3, 1909.

Elizabeth Knowlton vs. No. 22875—To portion of Mission Block No. 41. Judgment for plaintiff June 4, 1909.

M. J. Blackman vs. No. 22876—To portion of Western Addition Block No. 453. Judgment for plaintiff August 6, 1909.

Marion Eventritt vs. No. 24521—To portion of Mission Blocks 64 and 137. Judgment for plaintiff October 22, 1909.

The Alden Co. vs. No. 24684—To portion of fifty vara Block No. 253. Judgment for plaintiff November 19, 1909.

Western Pacific Ry. Co. No. 25502—To portion of 100 Vara Block No. 412. Judgment for plaintiff October 15, 1909.

Jacob A. Fisher et al. vs. No. 25974—To portion of Mission Block No. 114. Judgment for plaintiff November 4, 1909.

William Wempe vs. No. 26902—To entire Outside Lands Block No. 811. Judgment for plaintiff December 30, 1909.

John Wiren vs. No. 26903—To portion of Outside Lands Block No. 903. Judgment for plaintiff December 30, 1909.

Minnie Palmer etc. vs. No. 26904—To portion of Western Addition Block No. 23. Judgment for plaintiff December 30, 1909.

Phoebe Rideout vs. No. 27394—To portion of Western Addition Block No. 122. Judgment for plaintiff March 22, 1910.

Mathilde Cliff vs. No. 27666—To portion of Fifty Vara Block No. 167. Order action dismissed as to defendant City and County of S. F., March 1, 1910. Dismissal filed March 12, 1910.

Julia O'Connell vs. No. 28301—To portion of Potrero Nuevo Block No. 305. Answer filed March 29, 1910.

Wiebke Strauven vs. No. 29014—To lot S. line Twenty-sixth Street, 27 feet east of Howard Street. Answer filed. Order Jos. Roger three days from date to plead filed.

Bertram H. Healey vs. No. 29320—To portion of Mission Block No. 70. Judgment filed August 23, 1910.

Johannah C. Beggs vs. No. 29882—To portion of Western Addition Block No. 643. Answer filed. Judgment for plaintiff June 17, 1910.

JUSTICE'S COURT OF THE CITY AND COUNTY OF SAN FRANCISCO.
ACTIONS PENDING IN.

City and County of S. F. vs. Chadwick & Sykes No. 22595—Action to collect \$100 license tax for owning and operating dirt cars. Ready for trial.

City and County of S. F. vs. Chadwick & Sykes No. 22593—Action to collect \$100 license tax for owning and operating dirt cars. Ready for trial.

City and County of S. F. vs. Blanchard Brown Co. No. 22592—Action to collect \$150 license tax for dirt cars. Ready for trial.

City and County of S. F. vs. Owen McHugh No. 22594—Action to collect \$140 license tax for dirt cars. Ready for trial.

ACTION TO OBTAIN DECREE QUIETING TITLE AGAINST CITY AND
COUNTY OF SAN FRANCISCO IN LIEU OF
A CITY DEED.

Since the practice of furnishing City deeds on petition of property holders has been abandoned, a great number of ordinary quiet title actions have been brought against the City, to acquire title in lieu of City deeds, and it is, of course, necessary to examine each action to protect any rights of the City that may be involved. Following is a list of such actions, pending and determined, for past fiscal year:

ACTIONS PENDING.

Elizabeth A. Horn vs. No. 14626—To portions of Potrero Nuevo Block No. 17. Answer filed February 27, 1908.

George D. Herrick vs. No. 14790—To part of Mission Block No. 101. Answer filed March 3, 1908. Ready for trial.

B. Cademartori vs. No. 14857—To part of Western Addition Block No. 117. Answer filed March 3, 1908. Ready for trial.

F. Milani vs. No. 14969—To part of Western Addition Block No. 48. Answer filed May 5, 1908. Off calendar.

A. K. Findlay vs. No. 15048—To part of Mission Block No. 118. Ready for trial. Answer filed May 12, 1908. Ready for trial.

Mary C. Malloye vs. No. 15049—To part of Western Addition Block No. 265. Answer filed May 12, 1908. Ready for trial.

F. Heitmeyer vs. No. 15164—To part of Western Addition Block No. 458. Answer filed May 5, 1908. Ready for trial.

H. S. Williamson vs. No. 15237—To part of Western Addition Block No. 314. Answer filed May 13, 1908. Ready for trial.

Henry C. Hahn et al. vs. No. 15233—To part of Western Addition Block No. 313. Answer filed May 13, 1908. Ready for trial.

O. G. Sage vs. No. 15423—To part of Western Addition Block No. 457. Answer filed May 12, 1908. Ready for trial.

John Young et al. vs. 15425—To part of Mission Block No. 77. Answer filed May 13, 1908. Ready for trial.

Julia Lyon vs. No. 15426—To part of Mission Block No. 11. Answer filed May 13, 1908. Ready for trial.

Chas. F. Eckhardt vs. No. 15498—To part of Potrero Nuevo Block No. 15. Answer filed April 4, 1908. Ready for trial.

Cecelia E. Norton vs. No. 15503—To part of Mission Block No. 22. Answer filed April 4, 1908. Ready for trial.

F. R. Bank vs. No. 15619—To part of Western Addition Block No. 312. Answer filed April 4, 1908. Ready for trial.

James McFarland et al. vs. No. 15690—To part of Western Addition Block No. 442. Answer filed April 13, 1908. Ready for trial.

George Largomarsino vs. No. 15691—To part of Western Addition Block No. 200. Answer filed April 13, 1908. Ready for trial.

N. C. Kist vs. No. 16055—To part of Outside Lands Block No. 1059. Answer filed April 24, 1908. Ready for trial.

Grace Shaden vs. No. 16164—To part of Outside Lands Block No. 737. Answer filed May 18, 1908. Ready for trial.

H. E. Sherman vs. No. 16165—To part of Western Addition Block No. 321. Answer filed May 18, 1908. Ready for trial.

A Serencky vs. No. 16168—To part of Mission Block No. 10. Answer filed May 18, 1908. Ready for trial.

Chas. W. Mulloy vs. No. 16235—To part of Western Addition Block No. 609. Answer filed May 8, 1909. Ready for trial.

Dinkelspiel Estate Co., vs. No. 16236—To part of Mission Block No. 96. Answer filed May 11, 1908. Ready for trial.

Frank McGovern vs. No. 16239—To part of Western Addition Block No. 214. Answer filed May 11, 1908. Ready for trial.

Andrew J. Clunie vs. No. 16473—To part of Western Addition Block No. 287. Answer filed May 18, 1908. Ready for trial.

D. H. Walker et al. vs. No. 16581—To part of Western Addition Block No. 391. Answer filed May 20, 1908. Ready for trial.

H. J. Eiben vs. No. 16739—To part of Western Addition Block No. 219. Answer filed May 27, 1908. Ready for trial.

Louise J. Francis vs. No. 18210—To portion of Western Addition Block No. 117. Answer filed August, 1908. Ready for trial.

Frederick A. Hanke vs. No. 22729—To portion of Western Addition Block No. 273. Ordered demurrer sustained. Ten days to amend May 22, 1909.

Nora Dempsey vs. No. 22,654—To portion of Western Addition Block No. 260. Answer filed May 15, 1909. Ready for trial.

Berthold Guttermesen and Helena Guttermesen vs. No. 22655—To portion of Mission Block No. 179. Answer filed May 18, 1908. Ready for trial.

Julius Frankel vs. No. 251—To part of Outside Lands Block No. 686. Answer filed December, 1908.

Howard D. Kibbe vs. No. 20253—To part of W. A. Block No. 456. Answer filed December, 1908.

Susan W. Swain vs. No. 15689—To portion of Western Addition Block No. 26. Answer filed April 13, 1908. Ready for trial.

ACTIONS DETERMINED.

Thomas Roach vs. No. 15429—To part of Mission Block No. 84. Roll filed. Decree docketed November 29, 1909.

Michael Lynch vs. No. 15496—To part of Mission Block No. 175. Notice of decision, etc., filed October 22, 1909.

M. G. Buckley vs. No. 16741—To part of Outside Lands Block No. 878. Roll filed October 27, 1908.

Sarah Harmon vs. No. 17032—To part of Mission Block No. 104. Roll filed August 31, 1909.

Elizabeth M. Mogan vs. No. 22730—To portion of Western Addition Block No. 267. Judgment filed August 13, 1909.

John T. Dare vs. No. 20192—To part of Outside Lands Block No. 395. Judgment filed April 6, 1908.

Sarah A. Hayden vs. No. 14798—To part of Mission Block No. 16. Roll filed October 23, 1908. Notice of decision November 17, 1908.

Real Property Investment Co. vs. No. 14964—To portion of Western Addition Block No. 75. Judgment for plaintiff April 22, 1908.

Malcolm O. Austin vs. No. 15366—To part of Mission Block No. 39. Judgment for plaintiff October 21, 1908.

Frank M. Elmendorf et al. vs. No. 15428—To portion of Western Addition Block No. 420. Judgment for plaintiff October 23, 1908.

Connie B. Marchand vs. No. 15785—To portion of Western Addition Block No. 272. Judgment for plaintiff October 23, 1908.

Joseph H. Coleman vs. No. 15786—To portion of Mission Block No. 52. Judgment for plaintiff October 7, 1908.

Albert A. White vs. No. 16238—To portion of Western Addition Block No. 418. Judgment for plaintiff November 10, 1908.

Starr Estate Co. vs. No. 16319—To portion of Fifty Vara Lot No. 16. Judgment for plaintiff October 23, 1908.

Western Pac. Ry. Co. vs. No. 16478—To various parcels described in complaint. Judgment for plaintiff July 3, 1908.

Mary Attridge vs. No. 16583—To portion of Western Addition Block No. 362. Answer filed. Judgment for plaintiff November 10, 1908.

C. C. Kinsey vs. No. 16742—To portion of Western Addition Block No. 849. Judgment for plaintiff August 13, 1908.

Rosa Wolff vs. No. 16743—To portion of Mission Block No. 121. Judgment for plaintiff November 10, 1908.

Ellen Ryan vs. No. 17151—To portion of Mission Block No. 56. Judgment for plaintiff October 23, 1908.

Peter J. Clecak vs. No. 18033—To portion of Western Addition Block No. 368. Judgment for plaintiff October, 1908.

Adeline Schoenfeld vs. No. 18206—To portion of Western Addition Block No. 229. Judgment for plaintiff November 17, 1908.

Nellie F. Bergeron vs. No. 22657—To portion of Western Addition Block No. 342. Judgment for plaintiff June 3, 1909.

Elizabeth Knowlton vs. No. 22875—To portion of Mission Block No. 41. Judgment for plaintiff June 4, 1909.

M. J. Blackman vs. No. 22876—To portion of Western Addition Block No. 453. Judgment for plaintiff August 6, 1909.

Marion Leventritt vs. No. 24521—To portion of Mission Blocks 64 and 137. Judgment for plaintiff October 22, 1909.

The Alden Co. vs. No. 24684—To portion of Fifty Vara Block No. 253. Judgment for plaintiff November 19, 1909.

Western Pacific Ry. Co. vs. No. 25502—To portion of 100 Vara Block No. 412. Judgment for plaintiff October 15, 1909.

Jacob A. Fisher et al. vs. No. 25974—To portion of Mission Block No. 114. Judgment for plaintiff November 4, 1909.

William Wempe vs. No. 26902—To entire Outside Lands Block No. 811. Judgment for plaintiff December 30, 1909.

John Wiren vs. No. 26903—To portion of Outside Lands Block No. 903. Judgment for plaintiff December 30, 1909.

Minnie Palmer etc. vs. No. 26904—To portion of Western Addition Block No. 23. Judgment for plaintiff December 30, 1909.

Phoebe Rideout vs. No. 27394—To portion of Western Addition Block No. 122. Judgment for plaintiff March 22, 1910.

Mathilde Cliff vs. No. 27666—To portion of 50 Vara Block No. 167. Order action dismissed as to defendant City and County of S. F. March 1, 1910. Dismissal filed March 12, 1910.

Julia O'Connell vs. No. 28301—To portion of Potrero Nuevo Block No. 305. Answer filed March 29, 1910.

Wiebke Strauven vs. No. 29014—To lot S. line Twenty-sixth Street, 27 feet east of Howard Street. Answer filed. Order Jos. Roger three days from date to plead filed.

Bertram H. Healey vs. No. 29320—To portion of Mission Block No. 70. Judgment filed August 23, 1910.

Johannah C. Beggs vs. No. 29883—To portion of Western Addition Block No. 643. Answer filed. Judgment for plaintiff June 17, 1910.

OPINIONS.

Addressed to the various departments and officials of the City and County by Percy V. Long, City Attorney, from July 1, 1910, to June 30, 1911.

CIVIL SERVICE COMMISSIONERS.

December 15, 1911.—Advising that the Police Commissioners have no power to prohibit any member of the Police Department from participating in an examination held under the Civil Service provisions of the Charter.

January 25, 1911.—Advising that until Civil Service rules are amended engineers cannot participate in examinations for promotion to the rank of Lieutenant.

January 31, 1911.—Advising that the Board of Fire Commissioners have the right to require firemen participating in an examination for promotion to furnish substitutes at their own expense during their absence when taking such examination.

CITY ENGINEER.

June 16, 1911.—Advising that proposed diversion of 600 second feet of waters from McCloud River may interfere with navigation and that such interference is a question of fact to be determined in each particular case.

EDUCATION, BOARD OF.

September 1, 1910.—Advising that the terms of the resolution appointing a teacher as shown by the minutes of said Board controls the appointment of said teacher rather than the nature of the notification of appointment to said teacher by the Secretary of said Board, and that the Board has power, if need be, to correct the minutes and to correctly state the facts.

October 10, 1910.—Advising that no authority exists for said Board to expend school funds for postage of post cards advertising Panama-Pacific International Exposition.

February 2, 1911.—Advising that it is entirely proper for the Board to request the Board of Supervisors to rescind its action in refusing to ratify a lease of the Board of Education to the Dundon Iron Works in February, 1909.

June 22, 1911.—Advising that the claim of Walter Morgan for \$3,809.32, the amount of his judgment, must be approved but payable only out of the funds of the fiscal year 1896-1897.

DEPARTMENT OF ELECTRICITY.

August 17, 1910.—Advising the Chief of the Department of Electricity that it is his duty to supervise the erection of poles, wires and other appliances under Section 6 of Ordinance 214 and to determine the necessity therefor.

December 1, 1910.—Advising that there is doubt as to whether or not Section 271-272-275-278 of Ordinance No. 1008 (N. S.), known as the Building Law, applied to the installation of electric lighting fixtures in buildings.

FIRE COMMISSIONERS, BOARD OF.

August 10, 1910.—Advising that the Board of Fire Commissioners is without power to reinstate or restore to membership in said department an ex-member thereof who severed his connection with the department prior to the adoption of the Charter except in accordance with the Civil Service provisions of the Charter.

FIRE PENSION FUND COMMISSIONERS, BOARD OF.

August 10, 1910.—Advising that Henry H. Gorter, as Superintendent of Engines, may be retired from the Fire Department upon pension estimated upon the salary attached to the rank of Battalion Chief.

May 1, 1911.—Advising that, according to the facts stated in a request for an opinion, the widow of M. F. Dougherty is not entitled to a pension.

June 29, 1911.—Advising that the Commission is without power to grant the petition of the widow of John Wilkinson for a pension.

HEALTH, BOARD OF.

September 16, 1910.—Advising that the City and County cannot be held responsible in law for death of horse driven by an inspector of the Board of Health while on official business and which death was caused by the inspector's negligence.

MAYOR.

May 1, 1911.—Advising: 1st. That the City may proceed with the construction of that portion of Geary Street Railway not covered by the injunction of the United States Circuit Court and may proceed with the sale and issue of bonds therefor.

2nd. That there is nothing to prevent the Supervisors from making alterations in the road outlined as long as they reach a convenient terminal near the ocean.

3rd. That upon the failure of the Geary Street Railway Company to remove its tracks when given notice so to do, the Board of Supervisors may direct the Board of Public Works to remove tracks, etc., preserving same as far as possible for delivery to the company.

PARK COMMISSIONERS.

December 20, 1910.—Advising that the Board has no power to cede park lands for the purpose of widening San Jose Avenue.

PLAYGROUND COMMISSION.

October 8, 1910.—Advising that the Playground Commission is not authorized to forfeit check of M. Levy for failure to enter into contract under the proposal notice inviting bids for the installing of certain plumbing.

October 29, 1910.—Advising that the Board of Education is without power to transfer permanently any school properties to the Playground Commission for its use.

POLICE COMMISSIONERS, BOARD OF.

September 17, 1910.—Advising that the widow of a citizen to whom had been granted a retail liquor permit as a soletrader, and who later married an alien, does not by said marriage lose her right to her permit.

November 14, 1910.—Advising that an additional position of captain in the Fire Department can be created only by Ordinance of the Board of Supervisors under Section 35 of Article XVI of the Charter.

December 17, 1910.—Advising that the application of Greenblatt & Cohen for a liquor license must be accompanied by the written consent of the majority of the property owners fronting on the same side of the street and in the same block in which the premises are situated, or that notice of the application for said permit must be posted at least ten days before the permit can be granted.

POLICE, CHIEF OF.

November 9, 1910.—Advising that he is not warranted in closing saloons on November 15, 1910, being a day on which a special election was held for voting on proposed Charter amendments.

POLICE RELIEF AND PENSION FUND COMMISSIONERS, BOARD OF.

May 9, 1911.—Advising that the petition of the widow of Wm. F. Brophy for a monthly pension under the provisions of Section 4, Chapter X, Article VIII of the Charter should not be allowed.

PUBLIC WORKS, BOARD OF.

July 30, 1910.—Advising that Holliday Avenue between Army Street and Peralta Avenue is City property and constitutes a part of California or Holliday Avenue as dedicated to the City by Harvey S. Brown, September 26, 1859.

August 17, 1910.—Advising that under Section 284 of the Building Laws it is only necessary to cover the joists of the next floor below any floor upon which work is being done with scaffold boards laid close together for the purpose of protecting the workmen from falling between joists and girders.

October 6, 1910.—Advising that Stevenson Street southwesterly from the southwesterly line of Eighth Street for a distance of 120 feet and having a uniform width of 35 feet is a public street.

October 20, 1910.—Advising that Section 78 of Ordinance 1008, limiting the height of wooden buildings in San Francisco to 40 feet, does not conflict with Section 33 of the Tenement House Act and limits the height of wooden tenement houses in San Francisco.

December 10, 1910.—Advising that the proceeds of the sale of water bonds of 1910 may not be used in the extension of the County water line system.

December 15, 1910.—Advising that the only method of procedure to secure a sewer right of way across lands of the Spring Valley Water Company in the event that it is impossible to construct said sewer over any other road is by their purchase or condemnation.

December 16, 1910.—Advising that in cases where street railroad corporations have street railway franchises on streets where assessment is to be levied under the provisions of the Charter for street improvements, that the railroad company must pay the cost of paving that portion of the street covered by its tracks for two feet on each side of its roadbed, the computation of the portion to be paid by the railroad company to be made by the City Engineer.

January 14, 1911.—Advising that the State of California is liable for its proportion of street and sewer work performed in front of property owned by the State and under the control of the State Board of Harbor Commissioners.

January 30, 1911.—Advising that Redwood Street in Western Addition Block No. 225 is an open public street from Laguna Street westerly to a point 110 feet easterly from Buchanan Street; thence southwesterly to a point on the southerly line of Redwood Street distant about 87 feet 10 inches easterly from Buchanan Street for its entire width of 35 feet.

February 28, 1911.—Advising method, by reference to opinion of December 20, 1910, rendered to the Board of Park Commissioners, how to secure access to Ocean Avenue along the border of Balboa Park.

March 11, 1911.—Advising that the last assessment roll or book preceding the levy of an assessment for street work must be used as the basis for computing the amount of street assessment under Section 8, Chapter 3, Article VI of the Charter.

April 17, 1911.—Advising that Le Roy Place from Sacramento Street northerly is an open public street.

April 20, 1911.—Advising that the claim of Dyer Bros. for placing temporary flooring in the Hall of Justice Building in accordance with the State law requiring the owner of a building under construction to provide temporary floors in buildings more than three stories high while in course of construction for the purpose of the protection to life and limb of workmen, is a valid claim and should be paid.

May 26, 1911.—Advising that the application of John Hayes to lay one-inch water pipe temporarily under the sidewalk of the southerly line of Grove Street for the purpose of conveying water to his property, may be granted on condition that no property owner shall be damaged and that full security for possible damage be given by Mr. Hayes.

June 14, 1911.—Advising that sureties on the bond of Michael Kiernan cannot be relieved from liability without Kiernan substituting other satisfactory sureties in their place.

RECORDER.

August 11, 1910.—Advising him that Tuesday, August 16, 1910, is a holiday within the meaning of the State law and that the Recorder's office may be closed on said day.

SUPERINTENDENT OF SCHOOLS.

January 24, 1911.—Advising that citizens are entitled to inspect and secure copies of public records in his office.

SUPERVISORS, BOARD OF.

July 23, 1910.—Advising the Board of Supervisors that they have power to fill vacancies of matron and superintendent of the Juvenile Detention Home upon the nomination of the Probation Committee and the approval of the Judge of the Juvenile Court.

August 4, 1910.—Advising that the purchase of land at the corner of Drumm and Commercial Streets for a necessary part of the Auxiliary Fire Protection System may be paid for out of the Auxiliary Fire Protection bond proceeds but not otherwise.

August 17, 1910.—Advising not to pay refund of license taxes claimed by Mercantile Trust Company until Court could pass upon the validity of Ordinance imposing license taxes on bankers.

August 17, 1910.—Advising said Board that plans and specifications of bond issue relative to proposed schools and school house sites should be strictly followed in all expenditures of school bond moneys.

August 19, 1910.—Advising that permission cannot be granted the United Railroads to connect tracks laid under separate franchises unless the work proposed is of the nature of a switch or turn-out necessary or convenient under each franchise.

September 17, 1910.—Advising that the Act of the Legislature of February 27, 1893, requiring all franchises for laying street railroad tracks through streets

or public highways contain stipulation to allow mail carriers in the employ of the United States while on duty to ride on their cars without paying fare must be complied with in the granting of all franchises by the Board, even though the Charter, be silent on the subject.

September 20, 1910.—Advising Fire Committee of the Board of Supervisors that the Board has power under Section 3 of Ordinance No. 1023 to revoke permits granted for the maintenance and use of steam engines and boilers without assigning any reason therefor if a sufficient reason for so doing actually exists.

September 21, 1910.—Advising Committee on Streets and Sewers that it is impossible to determine from information at hand whether or not Randall Street between Chenery Street and Mission Street has been used as a public highway or street to such an extent as to amount to a dedication by user, and that said determination could only be solved by taking of testimony.

September 21, 1910.—Advising that automobile owners may take advantage of the provisions of Ordinance No. 445, prohibiting the use of vehicles by the livery stable keepers or bailees while in their custody.

September 23, 1910.—Advising that messenger companies operating overhead wires in districts Nos. 1, 2, 3, 4 and 5 are doing so unlawfully, and that permits of the Board of Supervisors for the protection of overhead wires in district No. 6 are valid until December 31, 1910.

September 24, 1910.—Advising that upon failure of Shrader Bros. to live up to their contract with the City, the Board of Supervisors may purchase in open market or readvertise for supplies, charging the difference between the cost of the contract price to the surety.

September 28, 1910.—Advising that the Board of Supervisors has power to amend Ordinance No. 1301 by striking out all reference to proposed Charter Amendment No. 26, and to withdraw the same from the consideration of the electors.

September 30, 1910.—Advising that Ocean Shore Railway Company is not such street railway company as is contemplated by Section 499 of the Civil Code, and that City's use of a portion of the tracks may be secured only by agreement or by condemnation.

October 6, 1910.—Advising that Section 2 of Order 2521, requiring that owners of property fronting on Bernal Park should keep both roadways and sidewalk in order, is unconstitutional and invalid and that the repeal of said Ordinance will not destroy the status of Bernal Park as a public park and that the City and County is liable for the cost of all street work done in front of said Bernal Park.

October 13, 1910.—Advising that property owners complying with Ordinances relating to suitable construction and maintenance are entitled to permits to conduct stables irrespective of who conducts the business.

October 19, 1910.—Advising that proposed amendment to Section 1 of Ordinance No. 344 (N. S.), regulating stables is invalid and submitting proposed valid amendment.

October 22, 1910.—Advising that there is no legal liability on the part of the Board of Supervisors to refund an insurance broker's license fee if paid under a void Ordinance.

October 28, 1910.—Advising that corporations supplying heat only have no constitutional right to lay pipes in the streets and that said corporations must secure franchises from the city, and that the Act of the Legislature approved March 23, 1905, Stats, 1905, page 777, as amended by the Statutes of 1909, page 125, fully covers the granting of such franchises.

November 11, 1910.—Advising that there is no obligation upon the City and County to pay the claim of Louis Ferrari for \$300 for legal services rendered in the preparation of an appeal in the case of People vs. W. B. Nash.

November 14, 1910.—Advising that the appointment of additional deputies in the Auditor's office can be authorized by ordinance under Section 35, Article XVI of the Charter.

November 29, 1910.—Advising the Finance Committee that there has been no amendment to Section 21 of Chapter 181 of the Statutes of 1907, requiring one-half of the funds collected under the Pure Food Law be paid to the State Treasurer.

November 30, 1910.—Advising that the petition of Frank W. Aitken for the return of \$1,275 paid by him as purchaser at a tax sale held on August 20, 1909, under Section 3804 of the Political Code should be allowed.

December 16, 1910.—Advising that the water furnished a fire boat station is payable out of appropriation for water for public buildings, and water furnished fire boats for its boilers is payable out of appropriation for hydrants.

December 29, 1910.—Advising that the claim of Mills Building for rent of Mayor's office for month of March, 1910, is a legal obligation against the City.

January 23, 1911.—Advising that the Board has no power to grant the petition of Morris Levy for refund of \$1,200 license fees paid for holding public boxing exhibitions during the month of March, 1907.

January 30, 1911.—Advising that an ordinance providing for a three-cent fare for street railway passengers not provided with a seat is valid if the Board determines that the same is a necessary regulation and that it is reasonable.

January 31, 1911.—Advising that neither the Park Commissioners nor the Board of Supervisors have power to grant to the Great Highway Development Company permission to construct a railway over the Great Highway.

February 8, 1911.—Advising that the Board has no power either under the Charter or general law to authorize the execution of deeds from the City to owners of property abutting on streets proposed to be abandoned and that the Act proposed to be passed by the present Legislature on this subject would be sufficient to confer this power on said Board and that deeds executed under said Act would convey all title of the City in such matters.

February 27, 1911.—Advising that under the law the Spring Valley Water Company is compelled to supply water for the use of the inhabitants of the City and County of San Francisco but that it cannot be said how far the Courts will go to compel the Water Company to make expenditures in the performance of this duty.

March 1, 1911.—Advising that the payment of \$389.40 to Pullman Co. as a return of taxes illegally collected should be made.

April 17, 1911.—Advising that the sureties of the Metropolis Construction Company possess the right to perform the contract of the Metropolitan Construction Company upon its failure to do so and that the Surety Company has the right to collect and receive all moneys due under the contract.

April 28, 1911.—Advising that upon the failure of Oscar S. Levy to fulfill his contract for hauling and laying of high pressure mains, etc. the Board of Supervisors should pass a resolution reciting said delinquency and authorizing the Board of Public Works to enter into a new contract and notifying Levy's sureties of said delinquency and of the re-letting of the contract and that recovery may be had by the City from the surety company for the difference in the contract price between the new contract and the old.

April 29, 1911.—Advising that the Home Telephone Company should furnish a new bond in lieu of the bond of the Aetna Indemnity Company furnished by the Home Telephone Company under the terms of its franchise.

May 1, 1911.—Advising that the proposed ordinance imposing a license on the business of renting safe deposit boxes is a legal ordinance and suggesting certain amendments thereto.

May 5, 1911.—Advising that the bond of the Home Telephone Company given in lieu of the Aetna Indemnity Bond is sufficient.

May 8, 1911.—Advising that the claim of Mary J. Mollet for \$9.50 and Rev. W. Actom for \$43.15 for return of taxes cannot be paid as said taxes were not paid under any of the conditions giving the Board authority to refund.

May 15, 1911.—Advising that the rates fixed in Section 10 of the water rates ordinance adopted by the Board of Supervisors on June 22, 1910, should govern the charges for water furnished fire boats for their boilers.

May 20, 1911.—Advising that the United Railroads can claim no exemption under the State corporation tax law from percentages to the City and County of moneys due the City under the terms of the various United Railroad Company's street railroad franchises.

May 22, 1911.—Advising that the franchise contained in Order No. 2788 covering Bryant Street between 26th and Army Streets has been forfeited by the failure of the grantee to comply with the provisions of Section 502 of the Civil Code.

TREASURER.

November 22, 1910.—Advising that in the case of the consolidation of banks that the amount of deposits of municipal funds cannot exceed 50% of the paid up capital of said consolidated bank when paid in excess of 10% of the moneys available for deposit while other banks are requesting such deposits.

April 20, 1911.—Advising that he is not permitted under the law to deposit any moneys under his control which taken with other public moneys on deposit will exceed 50% of the paid up capital collected by a depository bank.

April 24, 1911.—Advising that it is his duty to withhold sufficient moneys to satisfy all claims, together with reasonable costs, in all cases where notices to withhold under Section 1184 of the Code of Civil Procedure are served upon him.

June 12, 1911.—Advising that the claim of Joseph Stevens for services rendered as stenographer in Police Court is illegal as Mr. Stevens was never legally appointed to this position.

TAX COLLECTOR.

September 20, 1910.—Advising that the claim of E. R. Zion for posting notices of City's intention to apply for tax deeds under Sec. 3785a of the Penal Code is a valid claim against City and County.

November 10, 1910.—Advising that it is his duty to pay the City Treasurer immediately upon the collection thereof of inheritance taxes and collections.

January 3, 1911.—Advising that Senate Constitutional Amendment No. 1 provides for the taxation of the property of corporations but does not take away the right of a municipality to levy license taxes on businesses or corporations.

February 17, 1911.—Advising that premises where ice cream and cake are sold are "places of refreshment" and are liable for the payment of license taxes under Ordinance No. 1677.

RECAPITULATION.

Of the actions noted above as determined adversely to the City or its officers thirteen were actions to recover taxes paid under protest and are now on appeal to the Supreme Court and four have been reversed by the Appellate Courts. The one decision of the District Court of Appeal adverse to the City was reversed by the Supreme Court.

Respectfully,

PERCY V. LONG, City Attorney.

Assessor's Report

San Francisco, August 4, 1911.

To His Honor P. H. McCarthy, Mayor,
City and County of San Francisco.

Honorable Sir:—In accordance with the law, I submit to you the following annual report:

The assessment roll for the fiscal year 1911-1912 amounts to \$544,900,000. This is the largest assessment roll in the history of the City. Prior to this year, our largest roll was in 1905 and amounted to \$525,000,000. This assessment includes the property of quasi-public and other corporations, the taxes on which are paid to the State. Such property, in the aggregate, amounts to \$83,200,000. This leaves available for the City's revenue an assessment roll of \$461,700,000. On this roll the City tax rate has been fixed at \$2 on the \$100 for municipal purposes. This, with the 6c. Panama-Pacific Exposition Tax, will make a total tax of \$2.06.

That our taxes will yearly become heavier, with the issuance of further municipal bonds, and with increasing municipal needs, appears inevitable, if present methods as to taxation are to continue.

Under our present system of taxation, high taxes are a heavy tax on enterprise, tending to retard our development, and check our growth. As tending to lessen these injurious results, I have two suggestions to offer:

First: Let the endeavor be made to raise a larger part of our City's revenue from sources other than direct taxation. Many of our American cities are readily collecting in this way a much higher percentage of their total revenue than is San Francisco. Such a course would serve to relieve all tax payers of a part of their burden.

Second: Let us strive to further amend our tax system, to the end that we may have "home-rule" in matters of county taxation. If we must have high taxes, let us amend our laws, so that the burden will not fall evenly on all classes of property. Let it bear lighter on the home, the industries which are easily movable, and on the products of industry and enterprise generally, if we as a community under "home-rule" decide to give partial or complete exemption to certain classes of property.

We have put our largest Quasi-Public Corporations in such a position, through our new revenue system. They may employ all the additional capital they wish in their enterprises: they may erect new buildings for their use, or enlarge and improve their plants, but their taxes are not directly increased thereby. Let us now relieve the property of individuals from all the evils of our antiquated general property tax, which were so graphically set forth in the discussions of Constitutional Amendment No. 1, prior to its adoption. These evils, however, were not removed or lessened except so far as they concerned Quasi-Public Corporations, as a result of the adoption of said amendment by the people. The greatest benefit to the people following the adoption of our new revenue system, separating as it does State from County revenues, is that it is the first step toward "home-rule" in matters of local taxation. Let us not now fail to strive for its accomplishment. We can attain through "home-rule" all the benefits which would follow a rational system of taxation. Give us the authority under the law to assess our local properties, for local purposes, by the method that we as a community decide to be for our best interests. This is what

“home-rule” in taxation will enable us to do. By this means we may so modify our system of taxation as to encourage building, develop manufactories, attract capital and labor, and remove the penalty that is now imposed on industry and enterprise. The result would be a great advance in our material progress and development.

In conclusion, I desire to report that this office has collected \$609,744 to date. This represents the taxes paid on unsecured Personal Property.

In addition, there has been collected to date \$101,038 in Poll Taxes.

Respectfully submitted,

WASHINGTON DODGE, Assessor.
City and County of San Francisco.

Park Commissioners' Report

San Francisco, August 10, 1911.

W. R. Hagerty, Esq., Clerk of the Board of Supervisors,
70 Eddy Street, City.

Dear Sir:—The Board of Park Commissioners herewith submit a report of receipts and disbursements for the construction and maintenance of Parks, Plazas, and Public Squares, for the fiscal year ending June 30, 1911.

Yours very truly,

E. H. LOMASNEY,
Secretary.

Water Rates

PROCEEDINGS OF THE BOARD OF SUPERVISORS IN THE MATTER OF
FIXING RATES TO BE CHARGED BY ANY PERSON OR CORPORATION
SUPPLYING WATER TO THE CITY AND ITS INHABITANTS FOR THE
YEAR ENDING JUNE 30, 1912.

WATER RATES.

The Board of Supervisors, pursuant to the requirements of the Constitution of the State of California, of the Act of the Legislature, approved March 7, 1881, and of Section 1, Chapter II, Article II of the Charter of the City and County and in compliance therewith, obtained statements from the corporations engaged in the business of supplying water during the year 1910, showing their receipts and expenditures and nature and character of properties, and after consideration and investigation, fixed the rates to be collected for furnishing water during the year commencing July 1, 1911, and ending June 30, 1912.

CONSTITUTIONAL PROVISIONS.

The following article of the Constitution of the State, adopted in 1879, and which went into effect on January, 1880, makes it the duty of the Board of Supervisors, in the month of February of each year, to fix the rates for the ensuing fiscal year, commencing on the first day of July, of compensation to be collected by any person, company or corporation engaged in the business of supplying water for the use of the City and County or its inhabitants.

ARTICLE XIV—WATER AND WATER RIGHTS.

Section. 1 The use of all water now appropriated, or that may be hereafter appropriated, for sale, rental or distribution, is hereby declared to be a public use and subjected to the regulation and control of the State, in the manner to be prescribed by law; provided, that the rates of compensation to be collected by any person, company or corporation in this State for the use of water supplied to any city and county, or city or town, or the inhabitants thereof, shall be fixed annually by the Board of Supervisors, or City and County, or City or Town Council, or other governing body of such city and county, or city or town, by ordinance or otherwise, in the manner that other ordinances or legislative acts or resolutions are passed by such body, and shall continue in force for one year and no longer. Such ordinances or resolutions shall be passed in the month of February of each year, and take effect on the first day of July thereafter. Any board or body failing to pass the necessary ordinances or resolutions fixing water rates, where necessary, within such time, shall be subject to peremptory process to compel action at the suit of any party interested and shall be liable to such further processes and penalties as the Legislature may prescribe. Any person, company or corporation collecting water rates in any city and county, or city or town in this State, otherwise than as so established, shall forfeit the franchise and water works of such person, company

or corporation to the city and county, or city or town, where the same are collected, for the public use.

Sec. 2. The right to collect rates or compensation for the use of water supplied to any county, city or county, or town, or the inhabitants thereof, is a franchise, and cannot be exercised except by authority of and in the manner prescribed by law.

The following section of Article XI of the Constitution, as amended in 1885, also granted the right to persons and corporations to use the public streets for supplying water or illuminating light to the inhabitants, on condition that the Legislature shall have the right to regulate the charges:

ARTICLE XI—RIGHT OF WATER AND GAS COMPANIES TO USE PUBLIC STREETS.

Section 19. In any city where there are no public works owned and controlled by the municipality, for supplying the same with water, or artificial light, any individual, or any company duly incorporated for such purpose under and by authority of the laws of this State, shall, under the direction of the Superintendent of Streets, or other officer in control thereof, and under such general regulations as the municipality may prescribe for damages and indemnity for damages, have the privilege of using the public streets and thoroughfares thereof, and of laying down pipes and conduits therein, and connections therewith, so far as may be necessary for introduction into and supplying such city and its inhabitants either with gas light or other illuminating light, or with fresh water for domestic and all other purposes, upon the condition that the municipal government shall have the right to regulate the charges thereof.

ACT OF LEGISLATURE.

The Legislature of the State, at the session of 1881, passed the following Act, providing for carrying out the objects of Article XIV of the Constitution, by imposing upon the Board of Supervisors the duty of requiring all persons or corporations engaged in supplying water to file statements in the month of January of each year, showing the names, residence and the amount paid by each ratepayer during the preceding year, the revenue derived from all sources, and an itemized statement of expenditures made for supplying water during the same time:

An Act to enable the Board of Supervisors, Town Council, Board of Aldermen or other legislative body of any city and county, city or town, to obtain data and information from any corporation, company or person supplying water to such city and county, city or town. Requiring such Board, Town Council, or other legislative body to perform duties prescribed by Section 1 of Article XIV of the Constitution, and prescribing penalties for the non-performance of such duties.—Approved March 7, 1881.

The People of the State of California, represented in Senate and Assembly, do enact as follows:

(Municipal Corporations to Fix Water Rates.)

Section 1. The Board of Supervisors, Town Council, Board of Aldermen or other legislative body of any city and county, city or town, are hereby authorized and empowered, and it is made their official duty, to annually fix the rates that shall be charged and collected by any person, company, association or corpora-

tion for water furnished to any such city and county, or city or town, or the inhabitants thereof. Such rates shall be fixed at a regular or special session of such Board or other legislative body, held during the month of February of each year, and shall take effect on the first day of July thereafter, and shall continue in full force and effect for the term of one year, and no longer.

(Annual Statement to be Made by Water Companies, etc.)

Sec. 2. The Board of Supervisors, Town Council, Board of Aldermen or other legislative body of any city and county, city or town, are hereby authorized, and it is hereby made their duty, at least thirty days prior to the fifteenth day of January of each year, to require by ordinance or otherwise any corporation, company or person supplying water to such city and county, city or town, or to the inhabitants thereof, to furnish to such Board or other governing body, in the month of January in each year, a detailed statement, verified by the oath of the president and secretary of such corporation or company, or of such person, as the case may be, showing the names of each water-rate payer, his or her place of residence, and the amount paid for water by each of such water-rate payers, during the year preceding the date of each statement, and also showing all revenues derived from all sources, and an itemized statement of expenditures made for supplying water during said time.

(Additional Statements to be Made by Water Companies, etc.)

Sec. 3. Accompanying the first statement made as prescribed in Section 2 of this Act, every such corporation, company or person shall furnish a detailed statement verified in like manner as the statement mentioned in Section 2 hereof, showing the amount of money actually expended annually since commencing business, in the purchase, construction and maintenance, respectively, of the property necessary to the carrying on of its business, and also the gross cash receipts annually, for the same period, from all sources.

(Refusal by Water Companies to Make Statement a Misdemeanor.)

Sec. 4. Every corporation, company or person who shall refuse or neglect to furnish the statements mentioned in Sections 2 and 3 of this Act, or either one of them, or shall furnish any false statements in relation thereto, within thirty days after having been required or requested to furnish the same, as prescribed in Sections 1, 2 and 3 of this Act, shall be deemed guilty of a misdemeanor.

(Copies of Statements to be Made and Filed with the County Recorder.)

Sec. 5. Upon receiving the statements provided for in Sections 2 and 3 of this Act, the Board of Supervisors, Town Council, Board of Aldermen, or other legislative body shall cause a copy thereof to be made and filed in the office of the County Recorder of such city and county, or of the county wherein such city or town is situated.

(Water Rates to be Equal and Uniform—Proviso.)

Sec. 6. Rates for the furnishing of water shall be equal and uniform. There shall be no discrimination made between persons, or between persons and corporations, or as to the use of water for private and domestic, and public or municipal purposes; provided, that nothing herein shall be so construed as to allow any person, company, association or corporation to charge any person,

corporation or association anything for water furnished them when by any present law, such water is free.

(Excess in Charging Rates Forfeits Franchise, etc.)

Sec. 7. Any person, company, association or corporation, charging or attempting to collect, from the persons, corporations or municipalities using water, any sum in excess of the rate fixed as hereinbefore designated, shall, upon the complaint of the said Board of Supervisors, Town Council, Board of Aldermen, or other legislative body thereof, or of any water-rate payer, and upon conviction, before any court of competent jurisdiction, shall forfeit the franchise and water works of such persons, company, association or corporation to the city and county, city or town, wherein the said water is furnished and used.

(Penalty to Supervisors for Neglecting to Enforce Provisions of Act.)

Sec. 8. Any Board of Supervisors or other legislative body of any city and county, city or town, which shall fail to refuse to perform any of the duties prescribed by this Act, at the time and in the manner hereinbefore specified, shall be deemed guilty of Malfeasance in office, and upon conviction thereof, at the suit of any interested party, in any court of competent jurisdiction, shall be removed from office.

(Act in Effect.)

Sec. 9. This Act shall take effect and be in force from and after its passage.

CHARTER PROVISION.

The following provision of the Charter of the City and County of San Francisco, in effect November 23, 1907, empowers the Board of Supervisors to fix and determine by ordinance the rates or compensation to be collected by any persons, company or corporation for the use of water, heat, light or power, and to prescribe the quality of the service.

ARTICLE II, CHAPTER II—POWERS OF THE SUPERVISORS.

Section 1—Sub. 14. To fix and determine by ordinance in the month of February of each year, to take effect on the first day of July thereafter, the rates or compensation to be collected by any person, company or corporation in the City and County, for the use of water, heat, light, power, or telephone service, supplied to the City and County or to the inhabitants thereof, and to prescribe the quality of the service.

INVESTIGATION OF WATER RATES.

As preliminary to commencing the investigation of water rates for the year commencing July 1, 1911, and ending June 30, 1912, the Board of Supervisors adopted the following resolutions in order to procure the information necessary to enable it to act intelligently and fairly in fixing such rates:

Resolution No. 6999 (New Series) requiring statements to be filed by all persons, companies or corporations engaged in the business of supplying water to the inhabitants of the City and County.—Adopted December 5, 1910.

Resolution No. 7220 (New Series), directing the Board of Public Works to make an appraisal of certain properties of the Spring Valley Water Company.—Adopted January 16, 1911.

Resolution No. 7000 (New Series), directing the Spring Valley Water Company to furnish an inventory of all its property actually used in supplying water to the inhabitants of the City and County.—Adopted December 5, 1910.

INVESTIGATION COMMENCED.

On January 9, 1911, the Board of Supervisors adopted Resolution No. 7156 (New Series), fixing Wednesday, February 1, 1911, as the date for commencing the investigation for the purpose of fixing water rates for the following fiscal year.

Accordingly the Board of Supervisors met on the date set and adjourned to meet on February 17th, on which date the investigation commenced. The Board resolved itself into the committee of the whole with Supervisor Nelson in the chair. After the consideration of the matter the committee reported that a number of communications had been filed and presented as exhibits as follows:

EXHIBIT NO. 1.

Protest of Mrs. R. Greenfuld against alleged excessive rates charged for water service.

EXHIBIT NO. 2.

Petition of Lincoln Park Improvement Club, requesting that Board have Spring Valley Water Company install four (4) inch castiron water main in crossing of Clement Street and Thirty-second Avenue, north on Thirty-second Avenue to Lake Street, alleging that present service is inadequate.

EXHIBIT NO. 3.

Petition of Richmond Central Improvement Club, for the extension of a four-inch water main now in the Park and Presidio out California Street from Fourteenth to Thirty-second Avenues and the installation of hydrants thereon for fire protection.

EXHIBIT NO. 4.

Petition of Ocean View Improvement Club, requesting that steps be taken to have Spring Valley Water Company put in a six-inch water main in San Jose Avenue, from Plymouth Avenue to County line, for fire protection.

EXHIBIT NO. 5.

Communication from John Biniariz and others, for more adequate water service in the Fairmount Tract.

EXHIBIT NO. 6.

Communication from Spring Valley Water Company, acknowledging receipt of Resolutions Nos. 6999 and 7000 requesting certain data and information preliminary to investigation of water rates for fiscal year 1911-1912.

EXHIBIT NO. 7.

Communication from Margaret Mahoney, M. D., alleging that one-third of Laguna de la Merced property belongs to the heirs of David Mahoney, and matter is now in litigation.

EXHIBIT NO. 8.

Communication from Spring Valley Water Company, acknowledging receipt of communication and resolution fixing date for commencement of water rates investigation.

EXHIBIT NO. 9.

Communication from Assessor, advising as to assessment of Spring Valley Water Company in San Francisco for year 1910-1911.

EXHIBIT NO. 10.

Communication from Assessor of Santa Clara County, transmitting statement of assessment of properties of Spring Valley Water Company for year 1910.

EXHIBIT NO. 11.

Communication from Assessor of San Mateo County, transmitting statement of assessment of properties of Spring Valley Water Company in San Mateo for year 1910.

EXHIBIT NO. 12.

Communication from Police Department transmitting certificate of official water test made by Stephen A. Byrne, Light and Water Inspector of Board of Public Works, showing 8 out of 11 meters in use at police stations are incorrect.

EXHIBIT NO. 13.

Statement of Spring Valley Water Company, showing list of rate payers and receipts from such source and expenditures for supplying water for year preceding January 1, 1911.

EXHIBIT NO. 14.

Communication from Board of Public Works, transmitting City Engineer's appraisalment of the value of properties of Spring Valley Water Company.

EXHIBIT NO. 15.

Statement of Spring Valley Water Company, showing operating expenses for 1910, and for six months ending December 31, 1910, also permanent improvements, inventory of properties actually used in supplying water to San Francisco, also, receipts and expenditures for year 1910.

EXHIBIT NO. 16.

Statement of Spring Valley Water Company, showing properties, water rights, rights of way and inventory of the works of the Spring Valley Water Company.

EXHIBIT NO. 17.

Communication from J. T. Harmes, trustee of Jas. P. Treadwell estate, complaining of inadequate water service in district bounded by southerly line Masonic Cemetery, Cole Street, Masonic Avenue and Hayes Street and requesting relief.

WATER RATES

The exhibits and testimony taken at previous investigations were admitted in evidence for the purpose of this investigation.

Adjournment was taken until February 28th, when the investigations was resumed and additional exhibits filed as follows:

EXHIBIT NO. 18.

Communication from Stephen A. Byrne, Light and Water Inspector of the Board of Public Works, transmitting complaints filed with him against the Water Company since the last investigation.

EXHIBIT NO. 19.

Communication from Spring Valley Water Company, relative to alleged incorrect condition of the meters in various police stations.

EXHIBIT NO. 20.

Petition of Daniel O'Connell, requesting that City Attorney be directed to cause a dissolution of injunctions and dismissal of suits in United States Circuit Court, under which Spring Valley Water Company and San Francisco Gas and Electric Company are collecting rates in excess of those established by the Board of Supervisors.

EXHIBIT NO. 21.

Communication from Geo. H. Roundy, complaining of alleged excessive rate charged for water used by small consumers.

EXHIBIT NO. 22.

Communication from City Attorney, with opinion that public obligation assumed by the Spring Valley Water Company is such as to compel it to supply the needs of the City and County of San Francisco.

EXHIBIT NO. 23.

Communication from Spring Valley Water Company, transmitting statement showing result of tests made of meters where complaints have been received because of sudden increase in water bills.

EXHIBIT NO. 24.

Communication from Spring Valley Water Company, as to terms on which it will make necessary extensions into districts now inadequately supplied with water.

The hearing was thereupon closed. The following are the principal exhibits filed in the matter:

EXHIBIT NO. 9.

San Francisco, January 12, 1911.

William R. Hagerty, Esq.,
Clerk of the Board of Supervisors,
San Francisco, Cal.

Dear Sir:—I have yours of January 11th, and give you, herewith, the data requested.

WATER RATES

1267

The assessment for the year 1910-1911 of the properties of the Spring Valley Water Company in the City and County of San Francisco was made as follows:

Real Estate and Improvements	\$ 3,778,000
Personal Property	4,409,673
Franchise	2,500,000
	<hr/>
Total	\$10,687,673

Very truly yours,

WASHINGTON DODGE, Assessor.

EXHIBIT NO. 10.

San Jose, Cal., Jan. 12, 1911.

Mr. W. R. Hagerty,
Clerk, Board of Supervisors,
San Francisco, Cal.

Dear Sir:—The total assessment of the Spring Valley Water Company in this County for 1910, as made by the County Assessor, was \$286,525.

Respectfully,

F. E. SPITZER, Deputy Assessor.

EXHIBIT NO. 11.

Redwood City, Cal., Jan. 12, 1911.

Mr. W. R. Hagerty,
Clerk of Board of Supervisors,
San Francisco, California.

Dear Sir:—Yours of the 11th inst. with enclosed resolution was received this p. m. The assessed valuation of the Spring Valley Water Company in San Mateo County for the year 1910 was approximately Three Million Dollars (\$3,000,000).

Should you wish a detailed statement, communicate with The Abstract of Title Co., of San Mateo Co., whose card I enclose.

Very truly yours,

C. D. HAYWARD, County Assessor.

EXHIBIT NO. 12.

Hall of Justice, January 27th, 1911.

To the Honorable, The Board of Supervisors.
No. 70 Eddy Street, San Francisco.

Gentlemen:—Permit me to hand you herewith eleven certificates of official water test made by Mr. S. A. Byrne, Light and Water Inspector of the Board of Public Works, from which it appears that eight out of eleven meters are running wrong.

INVENTORY OF PROPERTIES NOT NOW ACTUALLY USED IN SUPPLYING SAN FRANCISCO WITH WATER, SOME OF WHICH ARE CAPABLE OF DEVELOPMENT INTO A SOURCE OF WATER SUPPLY FOR THE CITY AND COUNTY IN THE FUTURE.

JANUARY 1, 1911.

Alameda County—

Arroyo Valle Lands, about 4,400 acres available for future supply.
Land on Alameda Creek—134.65 acres available for future supply.
Lands known as Poorman Tract—577.75 acres available for future supply.
Tract of land near Niles, 10.65 acres may be available for future supply.

San Mateo County—

Three lots on Pilarcitos Pipe Line, not necessary for future supply.
Baden and other Rights of Way may be available for future supply.
Locks Creek Lands, available for future supply.
Polhemus Tract—775.77 acres, not directly used for supply. Purchased to obtain 43 acres of land necessary for water shed and for diversion of road caused by Crystal Springs Dam.
Tract on Newhall Ranch. Interest in 65.95 acres. Intended for future supply.
Portola Lands—939 acres of value for future supply.
Camp Howard Tract—640 acres probably not of value for future use.
Land on Pescadero Creek—40 acres and Riparian Rights on Pescadero Creek of value for future use.
Ravenswood Lands and Rights of Way of value for future supply.

Marin County—

Sausalito lots not required for supply.

Santa Clara County—

Lands on and about Coyote Creek—about 11,472 acres—of value for future use.
Lands on Stevens Creek—240 acres not of value for future use in San Francisco.
Land forming part of Rancho Laguna Seca—30 acres—for future use.

Santa Clara and San Benito Counties—

Tequesquito Lands—953.27 acres of value for future supply.

City and County of San Francisco—

Market Street Lot.
Precita Valley Lot.
Fulton Street Lot.
Industrial School Reservoir Site.
The above are of value for future supply.

Lobos Creek—

Of value for future use.

San Miguel Lots—

Of value for future supply.

EXHIBIT NO. 16

San Francisco, February 1, 1911.

To the Honorable, The Board of Public Works,
City and County of San Francisco.

Gentlemen:—Under Resolution No. 7220 (New Series), your Honorable Board has been directed to submit to the Board of Supervisors an appraisalment of the value of the properties of the Spring Valley Water Company actually used in furnishing the City and County of San Francisco and the inhabitants thereof with a pure and wholesome supply of water, for the purpose of enabling said Board of Supervisors to establish a basis of value of said properties and upon which it may fix and determine water rates to be charged to said City and County and its inhabitants for the fiscal year commencing July 1, 1911, and ending June 30, 1912.

In 1900-01 the sum of Thirty Thousand Dollars was made available by the Board of Supervisors with which a very careful estimate was made of these values as published in Municipal Reports 1900-1901, App. pp. 213-222, to which appraisalment special reference is now made. This appraisalment, in the absence of means for further examinations, has been made the basis for the values of the properties of the Spring Valley Water Company for rate fixing purposes. To this has been added the cost of permanent improvements as reported by the Company from year to year.

These valuations have been as follows:

1901,	\$24,667,800.00.
1902,	\$24,666,210.00 (includes \$2,250,000.00 as franchise value).
1903,	\$28,024,389.00 (includes suggested value of franchise, \$2,500,000.00 and value of established business \$1,400,000.00, leaving \$24,124,389.00).
1904,	\$24,673,212.00.
1905,	25,001,441.00.
1906,	25,450,327.00.
1907,	24,569,828.00.
1908,	24,925,321.00.
1909,	25,154,739.32.
1910,	25,398,572.56.

From the reports of the Company, it is found that the permanent improvements for 1910 are as follows:

New Construction—

City Pipe System	\$36,201.87	
Meters (installation)	38,511.95	
Sunol Filter Bed Galleries	13,133.14	
Pleasanton Wells N. C.	668.83	
City Pumps N. C.	1,027.31	
Calaveras Improvements	35,608.15	
Pilarcitos Pipe Line	5,453.28	\$130,604.53
City and County of San Francisco—		
Purchase of house at S. W. Cor. Hyde and Bay Sts..		200.00

Added to the valuation approved by the Honorable Board of Supervisors in 1910	25,398,572.56
	\$25,640,910.45

Your attention is further called to the list of properties given on pages 3, 4, 5, 6 and 7 in the report of this office, of January 29, 1910.

In this connection, the full details of the location of properties reported to have been acquired by the Company within the last year for extending its holdings and protecting its rights in Alameda County are not known.

Respectfully submitted,

MARSDEN MANSON,
City Engineer.

San Francisco, February 2, 1911.

To the Honorable, The Board of Supervisors of the
City and County of San Francisco.

Gentlemen: In conformity with the provisions of Resolution No. 7270, New Series, of your Honorable Board, there is herewith transmitted a report prepared by the City Engineer, showing the value of the properties of the Spring Valley Water Company actually used in furnishing the City and County of San Francisco, and its inhabitants thereof, with a pure and wholesome supply of fresh water, for the purpose of enabling your Honorable Board to establish a basis of value of said properties, and upon which you may fix and determine water rates to be charged to said City and County, and its inhabitants, for the fiscal year commencing July 1, 1911, and ending June 30, 1912.

This report was approved by the Board of Public Works by Resolution No. 9513, Second Series, passed February 1, 1911.

Respectfully,

BOARD OF PUBLIC WORKS,

By J. L. McCORMICK, Secretary.

EXHIBIT NO. 24

San Francisco, Cal., February 28, 1911.

Hon. P. H. McCarthy, Mayor,
and the Honorable, The Board of Supervisors of the
City and County of San Francisco.

Gentlemen:—Your letter of February 20th is difficult to answer in view of the very general nature of the inquiry contained in it. It asks the terms upon which the company will make necessary extensions into districts now inadequately supplied with water.

We may answer generally that the company cannot make additional capital expenditures unless assured of adequate returns upon the value of its property, nor unless protected against loss of any further investment which it may make. Dependent upon these conditions being adjusted to the satisfaction of your Honorable Board and ourselves, we are willing to make extensions to supply portions of the city into which our mains do not now extend.

We have said your inquiry is very general in its nature. We think more progress might be made if you would indicate the localities into which extensions should be made and the character of the extensions in each case. Your suggestions may involve an outlay beyond the ability of the company to make.

The subject matter of your letter brings up the water situation of the City and County of San Francisco in all its phases. The situation that confronts the city as relates to its water supply can be weighed by you and your engineers, and any data or statistics which we can render will be cheerfully furnished.

As to the direct question of what the company will do, we reply we will do anything within our power that is reasonably fair as between the City and County of San Francisco and the Spring Valley Water Company. The basis of any agreement must rest on two fundamental principles:

1. A reasonable return on the value of the property now used in rendering services, and
2. Protection against loss of any additional capital invested.

We are willing to agree to develop a daily delivery of at least 150,000,000 gallons per day, provided the investment and the income can be made secure.

WATER RATES

We are willing to sell our distributing system in the City and County of San Francisco to the city and make a contract for the delivery of water at the county line of any amount that the city may require.

We are willing to consider any other suggestion that your Honorable Board may make, keeping in mind the two fundamental principles, from which we cannot depart.

Yours very truly,

SPRING VALLEY WATER COMPANY,
By W. B. BOURN, President.

COMMUNICATION FROM SPRING VALLEY WATER COMPANY

San Francisco, Cal., April 11, 1911.

To the Honorable P. H. McCarthy, Mayor,
and the Honorable Board of Supervisors,
City and County of San Francisco.

Gentlemen:—We beg to submit the following statement of Revenues and Expenditures, based upon the present rate which is being collected, plus an increase of 10% and a \$5 hydrant rate, as our requirements for the fiscal year 1911-1912:

Revenue—

From Water Sales	\$2,883,730	
From Hydrants	263,000	
From other sources	106,000	\$3,252,730

Expenditures—

Operating	\$897,380	
Depreciation—Obsolescence, Contingent and Insurance	300,000	
Taxes	400,000	1,597,380
Net Revenue		\$1,655,350

We will be glad to submit details of the above estimate to you at your request.

Yours very truly,

S. P. EASTMAN.

REPORT OF COMMITTEE.

On June 12, 1911, the Committee on Water Rates submitted the following report:

To the Honorable Board of Supervisors of the
City and County of San Francisco.

Gentlemen:—Your Committee on Water Rates, having had under consideration the question of water rates for the fiscal year commencing July 1, 1911, begs leave to report thereon as follows:

The matters before your Committee and taken into consideration in making these rates, comprise the following:

(1) Three vols. of testimony taken before the Board sitting as a Committee of the Whole.

(2) Communication—From Mrs. R. Greenfield, protesting against excessive charge for water at premises 2325-30 Fillmore Street.

(3) Lincoln Park Improvement Club, requesting that the Spring Valley Water Co. install four-inch main in crossing of Clement Street and Thirty-second Avenue and complaining of insufficient water supply.

(4) Richmond Central Improvement Club, for extension of four-inch main in the Park and Presidio Extension of California Street from Fourteenth to Thirty-second Avenues and for installation of fire hydrants.

(5) Ocean View Improvement Club, requesting that the Spring Valley Water Co. put a six-inch water main in San Jose Avenue from Plymouth Avenue to the County line.

(6) Petition—Of John Biniariz and others, for a more adequate supply of water in the Fairmount District.

(7) Communication—From John E. Behan, acknowledging the receipt of resolutions of the Board, requesting necessary data and information preliminary to water investigation.

(8) Communication Margaret Mahoney, M. D., claiming title to portion of Laguna de la Merced.

(9) Communication—From Spring Valley Water Co., acknowledging receipt of communications stating time set for commencement of water investigation.

(10) Communication—From Assessor, with statement of valuation of properties of Spring Valley Water Co. in this City and County.

(11) Communication—From Assessor of Santa Clara County, with statement of properties of Spring Valley Water Co. in Santa Clara County.

(12) Communication—From Assessor of San Mateo County with statement of properties of Spring Valley Water Co. in San Mateo County.

(13) Communication—From Chief of Police, transmitting certificate of official water test made by Stephen A. Byrne, Light and Water Inspector, showing that eight of the eleven meters in use in police stations are incorrect.

(14) Statement from Spring Valley Water Co., showing operating expenses and inventory of property of the said Company not now in actual use in supplying San Francisco with water.

(15) Statement of Spring Valley Water Company showing the receipt from all sources and an itemized list of expenditures during the year preceding January 1, 1911.

(16) Statement of Spring Valley Water Company showing receipts from all sources and an itemized statement of expenditures made during the six months ending December 31, 1910.

(17) Statement of Spring Valley Water Company of the valuation of properties of said company as shown by the books of the company.

(18) Statement of Spring Valley Water Company showing the operating expenses for the fiscal year 1909-1910.

(19) Statement of the Spring Valley Water Company showing the properties and works now in use in supplying water to the City and County of San Francisco.

(20) Communication—From City Engineer Marsden Manson, transmitting to the Board of Works, appraisement of the value of the properties of the Spring Valley Water Company under date of February 1, 1911.

(21) Communication—From John T. Harms, as trustee of the Treadwell Tract, complaining of the refusal of the Spring Valley Water Company to lay mains for furnishing water to the district known as the "Treadwell Tract."

(22) Testimony of Marsden Manson, taken at the water investigation in 1910.

(23) Showing of the Spring Valley Water Company at the last investigation. These two last matters were considered at the request of Mr. McCutcheon, counsel in behalf of the company.

(24) Communication—From Stephen A. Byrne, Light and Water Inspector, transmitting complaints of consumers against water company for overcharges, etc.

The question of making rates that will be just to the company and to the consumers alike seems to be one on which so much may be said on both sides that your committee have found much difficulty in reaching a conclusion.

The company has always contended that the rates are too low to produce a revenue which will give what it terms a percentage justified by its expenditure and the present value of its plant.

Through its attorney, it makes a demand based upon its revenues and expenditures for an increase of 10 per cent over the rates now collected and a five-dollar hydrant rate, which means a 25 per cent increase over the rates provided in the present ordinance and an increase approximately of \$130,500 for hydrants or double the amount now paid.

From testimony taken before your committee it was shown that many residents in outlying districts and others within easy distance of the company's mains are wholly unsupplied or inadequately supplied with water for household purposes and fire protection, and the only answer the company gives to these conditions is that pending the intention of the city to install its own water systems, it does not feel justified in making any capital investment for the improvement of its service.

This answer from a company collecting equitable rates from consumers is poor satisfaction to a large portion of our population, who by force of circumstances have settled in the outlying districts since the date of the great fire.

It has been shown that people in parts of the Ingleside District are compelled to carry water in buckets for household purposes and that some who have laid their own pipes are unable to get water for lack of pressure. The Laguna Honda reservoir is too low for this service. At the lower elevation of the University Mount District the people are adequately supplied, but the adjoining hills, which in places are thickly populated, are without service and the people are compelled to depend on springs and wells in the neighborhood which in portions of the year run dry. The reservoir in this district is constructed at a low elevation.

Basing its action on the fact that the company have made no investments since the passage of the last ordinance and feeling that until the courts render a decision indicating an increased valuation of the property, the city is not justified in increasing water rates, your committee recommends the passage of the accompanying ordinance for rates for the year commencing July 1, 1911.

Respectfully submitted,

CHAS. A. NELSON,
T. P. O'DOWD,
CHAS. A. MURDOCK,
Water Rates Committee.

The ordinance fixing water rates for the ensuing year was then passed for printing and on June 19th was finally passed. The ordinance is as follows:

BILL NO. 1787, ORDINANCE NO. 1596 (New Series), Regulating the monthly rates of compensation to be collected by any person, company or corporation engaged in the business of supplying water to the inhabitants of the City and County of Can Francisco for family uses, for private purposes, for municipal uses and for all public purposes of said City and County for the year commencing July 1, 1911, and ending June 30, 1912.

Be it ordained by the People of the City and County of San Francisco as follows:

That the monthly rates of compensation for supplying water shall be as follows:

GENERAL RATES

Section 1. For buildings occupied by a single family covering a ground surface of (not including porches):

Square Feet.	One Story.	Two Stories.	Three Stories.	Four Stories.	Five Stories.
0 to 400.....	\$0.22	\$0.27	\$0.36	\$0.41	\$0.45
400 to 500.....	.27	.36	.41	.45	.54
500 to 600.....	.36	.41	.45	.54	.63
600 to 700.....	.41	.45	.54	.63	.68
700 to 800.....	.45	.54	.63	.68	.72
800 to 900.....	.54	.63	.68	.72	.76
900 to 1000.....	.63	.68	.72	.76	.86
1000 to 1200.....	.68	.72	.76	.86	.90
1200 to 1400.....	.72	.76	.86	.90	.94
1400 to 1600.....	.76	.86	.90	.94	.99
1600 to 1800.....	.86	.90	.94	.99	1.03
1800 to 2000.....	.90	.94	.99	1.03	1.08

The foregoing rates also apply to public buildings. No single rate less than twenty-two (22) cents.

For all houses one-story in height, covering a greater area than two thousand square feet, there shall be added nine (9) cents for each additional two hundred square feet or fraction thereof, and the further sum of nine (9) cents for each additional story.

ADDITIONAL FAMILIES.

Where a house or building is occupied by more than one family the general rate for each additional family shall be three-quarters ($\frac{3}{4}$) of the foregoing rates, except:

First—Where a house or building is divided into flats, each flat having a separate entrance, and occupied by a separate family, the general rate charged shall be the same for each flat as for a single house of like dimensions.

Second—Where two or more families occupy the same floor the general rates for each family on such floor shall be the rate for the floor surface occupied by such family (the same as for a single one-story house), according to the foregoing table.

Note.—The general rate includes water for general household purposes, but does not include any of the following specified rates:

WATER RATES

SPECIAL RATES—BATHING TUBS.

Section 2. Bathing tubs in private houses, each tub, \$0.32.

In public houses, boarding houses, lodging houses, hotels and bathing establishments where meters are not used, each tub, \$0.45.

FOR HORSES AND COWS.

All drain closets to be charged at the same rate as privy vaults.	

URINALS AND STATIONARY WASHSTANDS.

Section 7.—For use of public buildings, each	\$0.09
For use of private dwellings, each05

BUILDING PURPOSES.

Section 8. Water furnished for building purposes:	
Each barrel of lime or cement	\$0.14
Each thousand of brick09

STORES, BANKS, SALOONS, HOTELS, ETC.

Stores, banks, bakeries, offices, warehouses, saloons, groceries, eating houses, barber shops, butcher shops, book binderies, blacksmith shops, confectioneries, hotels, lodging houses, boarding houses, churches, halls, laundries, photograph galleries, printing offices, steam engines, greenhouses, markets, market stalls, horse troughs, soda fountains and other places of business, each to be charged according to the estimated quantity used, from eighty-one cents (\$0.81 to five and 40-100 dollars (\$5.40), or by meter at meter rates.

FIRE PIPES.

Section 9. Meters shall be applied to all pipes used specially for fire protection, and monthly bills shall be charged for the same at regular meter rates, provided, however, that the monthly bill shall not be less than fifty (50) cents for each one-half ($\frac{1}{2}$) inch of diameter of pipe used.

METER RATES.

Section 10. Water furnished for any and all purposes not embraced in the above shall be supplied by meter at the following rates:

The first 2,000 cubic feet used (between 0 and 2,000 cubic feet) shall be charged for at the rate of twenty-five (25) cents per 100 cubic feet.

The next 2,000 cubic feet used (between 2,000 and 4,000 cubic feet) shall be charged for at the rate of twenty-four (24) cents per 100 cubic feet.

The next 2,000 cubic feet used (between 4,000 and 6,000 cubic feet) shall be charged for at the rate of twenty-two (22) cents per 100 cubic feet.

The next 2,000 cubic feet used (between 6,000 and 8,000 cubic feet) shall be charged for at the rate of twenty-one (21) cents per 100 cubic feet.

The next 2,000 cubic feet used (between 8,000 and 10,000 cubic feet) shall be charged for at the rate of twenty (20) cents per 100 cubic feet.

The next 5,000 cubic feet used (between 10,000 and 15,000 cubic feet) shall be charged for at the rate of nineteen (19) cents per 100 cubic feet.

The next 5,000 cubic feet used (between 15,000 and 20,000 cubic feet) shall be charged for at the rate of eighteen (18) cents per 100 cubic feet.

The next 5,000 cubic feet used (between 20,000 and 25,000 cubic feet) shall be charged for at the rate of seventeen (17) cents per 100 cubic feet.

The next 5,000 cubic feet used (between 25,000 and 30,000 cubic feet) shall be charged for at the rate of sixteen (16) cents per 100 cubic feet.

The next 10,000 cubic feet used (between 30,000 and 40,000 cubic feet) shall be charged for at the rate of fifteen (15) cents per 100 cubic feet.

The next 10,000 cubic feet used (between 40,000 and 50,000 cubic feet) shall be charged for at the rate of fifteen (15) cents per 100 cubic feet.

The next 10,000 cubic feet used (between 50,000 and 60,000 cubic feet) shall be charged for at the rate of fourteen (14) cents per 100 cubic feet.

The next 10,000 cubic feet used (between 60,000 and 70,000 cubic feet) shall be charged for at the rate of thirteen (13) cents per 100 cubic feet.

All water used in excess of 70,000 cubic feet per month to be charged for at the rate of twelve (12) cents per 100 cubic feet.

No monthly meter bill to be less than one and 80-100 dollars (\$1.80), except as hereinafter provided.

Upon application of any ratepayer the Board of Supervisors shall reserve the right, upon a proper showing of cause, to require the company to put in a meter and charge meter rates for any consumer of water, on such conditions as the Board may impose as to the rental when meter is not actually used.

METER RATES FOR SHIPPING.

Water shall be furnished and delivered by meter measurement to shipping lying alongside of the bulkhead or any of the wharves on the water front where water pipes or mains are laid, between the hours of 6 o'clock a. m. and 6 o'clock p. m., daily, upon application being made therefor, at the following rates: When supplied by reel and hose cart, \$1.50 per 1000 gallons. When supplied by connection with water pipes, at rates that shall not exceed double the regular meter rates established by Section 10. The minimum charge for each separate delivery to be fifty (50) cents.

No water boat furnishing and supplying water to shipping lying at anchor within the limits of the wharves of the City and County of San Francisco shall charge a rate to exceed three dollars (\$3.00) per 1000 gallons.

HYDRANT RATES.

Section 11. The rates of compensation to be collected for water supplied by and through hydrants to the City and County of San Francisco shall be two

dollars and fifty cents (\$2.50) per month for each hydrant for fire purposes and flushing of sewers.

PREVENTION OF WASTE.

Section 12. Prevention of waste or excessive use:

In no case where the fixed rates above provided, other than meter rates, are applicable, shall any charge for water be made by meter rates, it being the purpose of this Ordinance to provide for all dwelling houses a fixed monthly rate which shall not be increased by the person, company or corporation supplying water.

Provided, however, that for the purpose of discovering and repressing waste or excessive use, all persons, companies of corporations shall have the right in all cases to apply and maintain meters to measure the water used or consumed, and to charge and collect for waste or excessive use under the condition and to the extent hereafter provided in this section, and not otherwise.

No consumer shall be deemed guilty of waste or excessive use unless the water used or consumed upon his premises in any month shall exceed by fifty (50) per cent the number of cubic feet which at regular meter rates amount to his rated bill, in which case such excess shall be deemed waste or excessive use.

Immediately after the discovery of any waste or excessive use, the consumer shall be notified thereof by the person, company or corporation supplying water, by notice mailed to his address, or to the agent or person to whom his water bills are presented for collection.

After such notice the consumer may be charged and there may be collected from him for any waste or excessive use thereafter occurring upon his premises at regular meter rates, but such charge or collection shall not exceed for the first month the sum of two dollars (\$2.00), for the second month the sum of four dollars (\$4.00), or for any following month the sum of five dollars (\$5.00).

BOARD OF PUBLIC WORKS TO EXAMINE COMPLAINTS, ETC.

It shall be the duty of the Board of Public Works, by its Gas, Water and Electrical Inspector of this City and County to inquire into all cases of complaints by water consumers as to charges made against them for waste or excessive use under the foregoing provisions of this section, and to adjust such charge as follows:

Any water consumer against whom a water bill is presented containing a charge for waste or excessive use of water may within five days after such bill is presented to him (provided that he first pay the fixed rate charged on such bill, exclusive of the charge made for said alleged waste or excessive use) make complaint to said inspector that such charge is incorrect, whereupon the said inspector shall promptly inspect the premises of the consumer so complaining and cause a test to be made of the water meter upon said premises, and from such inspection and test and subsequent inspection and test as said inspector may see fit and proper to make shall determine as near as can be the amount of water used, consumed or wasted upon said premises during the period covered by said bill. As soon as such determination is made and within twenty (20) days after the said complaint is made said inspector shall make a certificate stating the amount of water so determined to have been used, consumed or wasted, and showing the true and correct amount, if anything, which may be charged against and collected from said consumer under the foregoing provisions of this section for waste or excessive use, and shall immediately transmit such certificate to the person, company or corporation supplying water, and also a copy thereof by mail to the water consumer.

The said certificate shall be conclusive between the water consumer and said person, company or corporation as to the amount, if anything, which said person, company or corporation shall be entitled to collect from the consumer for waste or excessive use of water during the period covered by the bill of which complaint is made: provided, however, that if either the consumer or the water company is dissatisfied with the certificate of the water inspector appeal may be taken within five (5) days to the Committee on Water Rates of the Board of Supervisors, which shall, within five (5) days after such appeal, hear and finally determine the matter in dispute.

The said inspector shall keep in his office a proper record or records, showing the date of each complaint made to him, the name of the consumer complaining, the location of his premises, and stating briefly the inspection made by him of the premises and the tests applied to the meter, the time or times of such inspection and tests, and the results thereof, with the reading of the meter at each test or inspection, and all other material facts connected therewith. Such records so kept to be open for public examination in his office.

RATES—WHEN PAYABLE.

Section 13. All water rates, except meter rates and City and County rates, are due and payable monthly in advance.

Meter and City and County rates are due and payable at the end of each month, and upon meter rates a deposit not exceeding three-fourths ($\frac{3}{4}$) of the value of the estimated quantity of water to be consumed may be required.

NOTICE OF DISCONTINUANCE.

Section 14. Any consumer may at any time, upon payment of accrued rates, notify the company in writing to cut off or discontinue the water supply upon his premises, after which no charge shall be made for water for said premises until the use of water is resumed.

MAXIMUM RATES FIXED.

Section 15. This Ordinance fixes the maximum beyond which no person, company or corporation shall be permitted to charge for water supplied.

Section 16. This Ordinance shall take effect and be in force on and from July 1, 1911, to June 30, 1912.

In Board of Supervisors, San Francisco, June 19, 1911.

After having been published five successive days, according to law, taken up and finally passed by the following vote:

Ayes—Supervisors Bancroft, Cutten, Deasy, Hayden, Healy, Herget, Hocks, Kelly, Knowles, Loughery, Minehan, Murdock, Nelson, Nolan, O'Dowd, Pugh, Walsh.

Absent—Supervisor Harris.

W. R. HAGERTY, Clerk.

Approved, San Francisco, June 21, 1911.

P. H. McCARTHY.

Mayor and ex-officio President of the Board of Supervisors.

Gas and Electricity Rates

Light, Heat and Power Rates, 1911-1912

The Charter of the City and County of San Francisco, Article II, Chapter II, Sec. 1, Sub. 14, empowers the Board of Supervisors "to fix and determine by Ordinance, in the month of February of each year, to take effect on the 1st day of July thereafter, the rates or compensation to be collected by any person, company or corporation in the City and County, for the use of water, heat, light, power, or telephonic service, supplied to the City and County, or to the inhabitants thereof, and to prescribe the quality of the service."

In order that the Board of Supervisors might obtain information upon which to intelligently fix the rates or compensation to be collected by any person, company or corporation, for the use of gas or electric light or power supplied to the City and County, or the inhabitants thereof, for the year commencing July 1, 1911, the Board, on December 13, 1910, adopted the following Resolution "requiring persons, companies and corporations furnishing heat, light or power, to furnish information as to the revenue derived, the expenditure and the costs of the plant, etc.," viz.:

RESOLUTION NO. 7028. (New Series).

RESOLVED, That the San Francisco Gas and Electric Company, the Metropolitan Light and Power Company, the Metropolitan Electric Light Company, the City Electric Company, the Standard Electric Light Company, the Alaska Light Company, the Equitable Light and Power Company, the Consumers' Light and Power Company, the South Side Light and Power Company, the Mutual Electric Light Company, the United Railroads of San Francisco, the Sutro Baths and all other persons, companies or corporations supplying heat, light or power to this City and County or to the inhabitants thereof, be and they are hereby required to furnish this Board on or before February 13, 1911, with the following information, to-wit:

First—A detailed statement showing all revenue derived by such person, company or corporation supplying heat, light or power, from all sources, for the year ending December 31, 1910.

Second—An itemized statement showing all expenditures made for the manufacture and supply of heat, light or power for the year ending December 31, 1910.

Third—The original cost and the estimated present value of the plant used for the manufacture and supply of heat, light and power.

Fourth—If it be a company or corporation the amount of the capital stock of the company or corporation outstanding, the amount of the bonds of the company or corporation outstanding, and the amount of the floating debt of the company or corporation.

The above statements to be verified by the oath of the president of such company or corporation, or of such person, as the case may be.

The object of this inquiry is in order that this Board may obtain information upon which to fix and determine, in the month of February, the rates or compensation to be collected by any person, company or corporation in this City and County for the use of heat, light or power supplied to this City and County

or to the inhabitants thereof, and to prescribe the quality of the service, as provided under the provisions of the new Charter of the City and County of San Francisco, Article II, Chapter II, Section 1, Subdivision 14, under the title "Powers of the Supervisors."

Further Resolved, That the Clerk of this Board be and he is hereby directed to forthwith serve a certified copy of this Resolution upon the president and secretary of each company or corporation, or upon such person hereinbefore mentioned, and upon all other companies or corporations, or such persons, as the case may be, furnishing heat, light or power to this City and County or to the inhabitants thereof.

INVESTIGATION COMMENCED.

The Board of Supervisors met on February 7, 1911, for the purpose of taking testimony and of making such investigation as would enable it to fix and determine, heat, light and power rates for the year commencing July 1, 1911, and ending June 30, 1912. The Board resolved itself into a Committee of the Whole with Supervisor J. O. Walsh in the chair.

The Committee of the Whole subsequently reported to the Board as follows:

That it has heard the testimony of Fred W. Cartwright, manager of the Equitable Light & Power Company, the Southside Light & Power Company and the Consumers Light & Power Company, also of John A. Britton, president of the San Francisco Gas & Electric Company.

That the following matters heretofore filed with the Board of Supervisors have been duly considered, admitted in evidence in the pending investigation, and designated exhibits as follows:

John Rapp & Sons, Rainier Beer, Kansas Street, near 8th Street.
Phelan Building, Market and O'Farrell Streets.
West Bank Building, 830 Market Street.
Chronicle Building, Market and Kearny Streets.
Charleston Building, 251 Kearny Street.

Respectfully submitted,

STEPHEN A. BYRNE,
Light and Water Inspector,
Board of Public Works.

EXHIBIT NO. 9

PETITION

Of W. D. Brown for the passage of an ordinance prohibiting electric light companies from charging \$2.50 for installation of meters. (Filed Feb. 10, 1911.)

EXHIBIT NO. 10

PROTEST

Of W. D. Brown against fixing an electric light rate to exceed 6c per kilowatt hour in any part of San Francisco. (Filed Feb. 10, 1911.)

EXHIBIT NO. 11

COMMUNICATION OF ALASKA COMMERCIAL BUILDING.

February 10, 1911.

Mr. W. R. Hagerty,
Clerk, Board of Supervisors,
No. 70 Eddy Street, City.

Dear Sir: Replying to your letter of the 9th instant and to comply with Resolution No. 7028, we beg to give you herewith the following figures:

First—The revenue derived by us for the year ending December 31, 1910, was: For steam heat, \$3,726.00; for power and light, \$8,568.89; a total of \$12,294.89.

Second—Expended for manufacture and supply, including pay roll, fuel oil, maintenance, water, and supplies, \$13,267.79.

Third—Original cost of plant, \$61,609.18. Present value of plant, \$60,000.00.

Trusting this will comply with the requirements of the resolution, we are,

Very respectfully,

ALASKA COMMERCIAL BUILDING,
Louis Meertaum, Secretary.

INVESTIGATION RESUMED

The investigation was resumed on February 24, the Board sitting as a committee of the whole, Supervisor J. O. Wash presiding. The committee reported as follows:

That it had heard the testimony of John A. Britton, president of the San Francisco Gas and Electric Company, W. D. Brown representing the Ellis Hotel Apartments, Fred G. Cartwright, general manager of the Equitable Light and Power Company, and Samuel L. Napthaly, manager of the City Electric Company.

That the following statement heretofore filed with the Board of Supervisors has been admitted in evidence, duly considered and designated exhibits as follows:

EXHIBIT NO. 14

COMMUNICATION FROM MISSION HOTEL.

San Francisco, February 17, 1911.

To the Honorable Board of Supervisors,
San Francisco, Cal.

Gentlemen: In reply to your favor of the 15th inst., relative to the cost of producing light and power I would state in my case I am unable to give you the exact cost for each item owing to conditions. I have a small plant with which we generate the light used for the hotel, furnish current for a small laundry in connection, pump water, heat water and heat the building. We supply a few of our neighbors at a flat rate, and only in one instance is it metered. To that party we charge .04½ per kilowatts I could give you the cost of the plant, the amount of oil used per month, the payroll, etc., but that would not determine the cost of light owing to the different uses to which it is applied and not having them segregated. I could not tell you the exact cost per kilowatt for light, neither could I tell you the exact cost of pumping water, heating water or heating the building. At best it would only be an estimate which is practically a guess, which would not be reliable information.

Very respectfully,

MISSION HOTEL,
San Francisco.
Geo. Warren Hooper, Prop.

EXHIBIT NO. 15

COMMUNICATION FROM MERCHANTS ICE AND COLD STORAGE
COMPANY

San Francisco, Feb. 16, 1911.

Honorable Board of Supervisors,
70 Eddy St., San Francisco, Cal.

Honorable Sirs: We are in receipt of your letter of the 15th inst., calling our attention to resolution No. 7028, new series, requiring all persons, firms or corporations furnishing heat, light and power in San Francisco to file a statement.

While we generate electric current for our own use, we do not consider that we come within the meaning of this resolution.

Part of our warehouses are across Sansome Street from our main plant, and we transmit power across the street for the lighting of this building, and also for running a pump motor on pier No. 27. This light and power is used solely for the conduct of our own business.

Believing this to be in order, we remain,

Respectfully yours,

MERCHANTS ICE AND COLD STORAGE CO.
H. W. Westphal, Manager.

December receipts	71.23
	<u>\$124.63</u>

DEBIT

Municipal Light and Power, November account.....	\$ 74.25
Municipal Light and Power, December account.....	82.65
	<u>\$156.90</u>

The above expenditures include our own consumption of current for elevator motor and steam and hot water motor, amount consumed not being measured by us.

Current is sold to consumers at legal rates.

Current is purchased by us from Municipal Light and Power Co. at 3½ cents per kilowatt, the same price at which the S. F. Gas and Electric Company formerly supplied us, also all hall lights.

State of California,
City and County of San Francisco—ss.

W. D. Brown, being duly sworn, deposes and says: That he is the manager of the Ellis Hotel Apartments, owned by the Aden Company, a corporation, and that the statements above set forth are true of his own knowledge, except as to those matters which are therein stated on his information and belief, and as to those matters he believes it to be true.

W. D. BROWN.

Subscribed and sworn to before me, a Notary Public in and for the City and County of San Francisco, State of California, this 18th day of February, 1911.

W. N. PYBURN,
Notary Public in and for the City and County
of San Francisco, State of California.

EXHIBIT NO. 17

COMMUNICATION FROM THE WESTBANK COMPANY

February 16, 1911.

Mr. W. R. Haggerty, Clerk,
The Board of Supervisors,
70 Eddy Street, City.

Dear Sir: Replying to your letter of February 15th, we beg to state that the steam heating plant located in the basement of the Westbank Building, at the gore of Ellis and Market Streets, is under lease to the Equitable Light and Power Company, at a monthly rental of \$100.

The Westbank Company is not engaged in any way in the business of selling heat, and we presume that the Equitable Light and Power Company's representative will give you the necessary data concerning the plant in question.

Very truly yours,

THE WESTBANK COMPANY,
W. C. Murdock, Jr., Secretary.

EXHIBIT NO. 18

COMMUNICATION FROM J. A. FOLGER & CO.

San Francisco, Feb. 21, 1911.

Mr. W. R. Haggerty,
Clerk, Board of Supervisors,
70 Eddy St., San Francisco.

Dear Sir: Referring to your circular letter of February 15th, 1911, in reference to resolution No. 7028 (New Series), we wish to say, that we are supplying the Payne's Bolt Works with power; their building adjoins ours on the

west. We are supplying the Goodyear Rubber Co. with steam; their building adjoins ours on the south.

The total value and cost of our power and steam plant is \$14,902.76. Our expenses for the past year have been \$5,834.39; our receipts for the power and steam sold have been \$2,460.65.

Very truly yours,

J. A. FOLGER & CO.,

By J. A. Folger, Pres.

EXHIBIT NO. 19

COMMUNICATION FROM HOTEL ST. FRANCIS

February 24, 1911.

To the Honorable Board of Supervisors,
70 Eddy Street, San Francisco.

In answer to yours of the 15th inst., relative to Resolution 7028 (New Series), wish to say that the only places we are supplying heat are the Hotel Stewart and Columbia Theatre. We are not in the heating business, and only supplied these parties as an accommodation, when there was no other source available.

The total revenue derived from this source is \$250.00 per month.
Our entire plant is leased from the Crocker Hotel Company.

Yours respectfully,

SAN FRANCISCO HOTEL COMPANY,
Chas. E. Adcock, Assistant Secretary.

The investigation was thereupon ordered closed and the Committee on Artificial Lights was ordered to present the necessary ordinance fixing rates.

RESOLUTION COMPROMISING LITIGATION

On May 8, 1911, the Committee on Artificial Lights presented to the Board a resolution relating to the litigation pending between the City and County and the San Francisco Gas and Electric Company. The resolution was adopted and is as follows:

RESOLUTION NO. 7789. (NEW SERIES).

BE IT RESOLVED: FIRST—If and whenever any person or corporation engaged in the business of supplying gas to the City and County of San Francisco and its inhabitants, shall deliver or offer to deliver to the Mayor of the City and County of San Francisco a waiver and relinquishment of the right to call into question or dispute the validity of rates fixed or to be fixed by this Board for gas to be supplied to the City and County of San Francisco and its inhabitants for the year commencing July 1, 1911, and ending June 30, 1912, then and in that event the City Attorney be and he is hereby empowered and requested in any and all actions which may be pending on the part of said person or corporation against the City and County of San Francisco and its officers,

agents and representatives brought to impeach, invalidate or set aside the ordinances of this Board fixing gas rates for the years ending June 30, 1909, June 30, 1910, and June 30, 1911, to enter into agreements, stipulations, judgments and decrees in said actions upon terms which shall secure a division of the difference between the rates authorized by the ordinances of this Board, for the respective years and the rates collected by the companies and impounded in said actions. Such difference shall be divided so that one-half thereof shall be paid to the person or corporation, plaintiff in said actions and each of them, and the other one-half thereof shall be returned to the person or persons by whom the same shall have been paid.

SECOND—As a part of such stipulations, judgments and decrees and upon the conditions and terms aforesaid, the City Attorney is authorized and requested to consent to a judgment setting aside said ordinances with respect to gas rates for said three years above mentioned, viz., the years ending June 30, 1909, June 30, 1910, and June 30, 1911.

The foregoing division shall apply only to the principal of the amounts collected in excess of the rates fixed by the ordinance, but not to the interest which shall be dealt with and covered by the provisions hereinafter contained.

THIRD—The only actions pending to invalidate the rates above mentioned are five in number—three wherein the San Francisco Gas and Electric Company is complainant, and two wherein the Metropolitan Light and Power Company is complainant. Said actions are pending in the Circuit Court of the United States, Ninth Judicial Circuit, Northern District of California, and are numbered respectively as follows, viz.:

Those by the San Francisco Gas and Electric Company, Numbers 14742, 14903 and 15121.

Those of the Metropolitan Light and Power Company, Numbers 14922 and 15139.

There is pending a clause in each of said actions in substance and effect the same as a clause contained in the restraining order in case No. 15121, reading as follows:

“In order to facilitate the return of moneys so deposited, in the event of a decision or order of this Court directing such return, Walter B. Malling, Deputy Clerk of this Court, is hereby appointed a special master to ascertain and report as to the amounts to be paid to each individual claimant, and as to the identity of such claimant, and is thus selected as special master for the reason that the claimants of the fund will be extremely numerous and their identity and the amount of their claims will have to be established by incessant reference to the books of complainant, and such books can be most expeditiously and economically consulted by a special master who is an officer of this Court.”

The interest earned upon the impounded excess above mentioned shall be first devoted to the payment of any compensation payable to the said Walter B. Maling under the provision aforesaid, and the balance shall be divided into two parts; one-half whereof shall go to the complainant company and the other half be paid to the Treasurer of the City and County of San Francisco to be there credited to the general fund.

ORDINANCES ADOPTED

On the same day the committee presented ordinances fixing the rates to be charged and collected for gas and electricity, which were passed for printing, and on May 15th were finally adopted. The ordinances are as follows:

BILL NO. 1754. ORDINANCE NO. 1558 (New Series), fixing the maximum rate and price to be charged for incandescent and electric lights, and for electricity for heat and power purposes for the year commencing July 1, 1911, and ending June 30, 1912.

Be it ordained by the People of the City and County of San Francisco as follows

Section 1. The maximum rate and price to be charged by any person, company or corporation for furnishing incandescent electric light to the City and County of San Francisco and the inhabitants thereof for the year commencing July 1, 1911, and ending June 30, 1912, is hereby fixed at nine (9) cents per one thousand (1000) watt hours.

From this rate discounts shall be allowed for quantity consumed per sixteen candle power lamp as follows:

On a consumption per 16 candle power incandescent lamp of 2000 to 3000 watt hours in one month, 5 per cent.

On a consumption per 16 candle power incandescent lamp of 3000 to 4000 watt hours in one month, 10 per cent.

On a consumption per 16 candle power incandescent lamp of 4000 to 5000 watt hours in one month, 15 per cent.

On a consumption per 16 candle power incandescent lamp of 5000 to 6000 watt hours in one month, 20 per cent.

On a consumption per 16 candle power incandescent lamp of 6000 to 7000 watt hours in one month, 25 per cent.

On a consumption per 16 candle power incandescent lamp of 7000 to 8000 watt hours in one month, 30 per cent.

On a consumption per 16 candle power incandescent lamp of 8000 to 9000 watt hours in one month, 35 per cent.

On a consumption per 16 candle power incandescent lamp of over 9000 watt hours per month, 40 per cent.

In estimating the discounts, one arc lamp shall be equivalent to two sixteen incandescent lamps for each ampere of current used by said arc lamp.

A charge of \$1.00 for the maintenance of a meter during any month may be made to any consumer whose bill for current furnished during such month does not exceed \$1.00, but in the event of such charge being made no further charge shall be made for current furnished during said month to said consumer.

Section 2. The maximum rate and price to be charged by any person, company or corporation for furnishing arc lights of 7 amperes and pressure at each lamp of not less than 70 volts, or lamps of equal wattage, to the City and County of San Francisco and the inhabitants thereof for the year commencing July 1, 1911, and ending June 30, 1912, is hereby fixed as follows:

For each arc light burning twenty-four hours, \$5.00 per week.

For each arc light burning from sunrise to sunset, \$3.00 per week.

For each arc light burning from sunset to sunrise, \$2.25 per week.

For each arc light burning from sunset to midnight, \$1.75 per week.

For each arc light burning for six nights from sunset to 9:30 p. m., \$1.40 per week.

Section 3. The maximum rate and price to be charged by any person, company or corporation for furnishing electricity for heat and power purposes to the City and County of San Francisco and the inhabitants thereof for the year commencing July 1, 1911, and ending June 30, 1912, is hereby fixed at 9 cents per 1000 watt hours, subject to the above discounts, each horsepower of motor capacity connected being considered as equivalent to twelve and one-half sixteen candle power incandescent lamps.

Section 4. All ordinances or parts of ordinances in conflict with the provisions of this ordinance are hereby repealed.

Section 5. This ordinance shall take effect and be in force on the first day of July, 1911.

In Board of Supervisors, San Francisco, May 15, 1911.

After having been published five successive days, according to law, taken up and finally passed by the following vote:

Ayes—Supervisors Baneroft, Cutten, Deasy, Hayden, Healy, Hocks, Kelly, Knowles, Loughery, Minehan, Murdock, Nelson, Nolan, O'Down, Pugh, Walsh.

Absent—Supervisors Harris, Herget.

W. R. HAGERTY, Clerk.

Approved, San Francisco, May 16, 1911.

P. H. McCARTHY,

Mayor and ex-officio President of the Board of Supervisors.

BILL NO. 1755. ORDINANCE NO. 1559 (New Series), fixing the minimum standard quality and illuminating power of gas and the maximum rate and price to be charged therefor, for the year commencing July 1, 1911, and ending June 30, 1912.

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The minimum standard quality and illuminating and heating power of gas to be furnished by any person, company or corporation, to be used in the City and County of San Francisco, is hereby established at nineteen (19) candles, with a minimum heat value of 600 British thermal units, said candle and heating power to be determined by the Board of Public Works of the City and County of San Francisco, and the maximum rate and price to be charged and collected therefor from consumers by any such person, company or corporation, for the year commencing July 1, 1911, and ending June 30, 1912, is hereby fixed and established at eighty-five (85) cents to December 31, 1911, and eighty (80) cents from January 1, 1912, to June 30, 1912, per one thousand cubic feet.

Section 2. The maximum rate and price to be charged by any person, company or corporation for furnishing gas for lighting public buildings for the year commencing July 1, 1911, and ending June 30, 1912, is hereby fixed at eighty-five (85) cents per one thousand cubic feet from July 1, 1911, to December 31, 1911, and eighty (80) cents from January 1, 1912, to June 30, 1912.

Section 3. The maximum rate and price to be charged by any person, company or corporation for furnishing incandescent gas lamps for lighting the public streets, parks or squares for the year commencing July 1, 1911, and ending June 30, 1912, is hereby fixed at eight and seven-tenths (8.7) cents per lamp per night, including care, lighting and extinguishing, each lamp to be kept burning from thirty (30) minutes after sunset until thirty (30) minutes before sunrise on the next day, and the number of such gas lamps may be increased or diminished by the Board of Supervisors, and subject to any moonlight schedule the Board may adopt, provided that the price of incandescent gas lamps of three lights each is hereby fixed at fifteen (15) cents a cluster lamp per night.

Section 4. The maximum rate and price to be charged by any person, company or corporation for furnishing gas for heating purposes for the year commencing July 1, 1911, and ending June 30, 1912, is hereby fixed at eighty-five (85) cents from July 1, 1911, to December 31, 1911, and eighty (80) cents from January 1, 1912, to June 30, 1912, per one thousand cubic feet.

Section 5. All ordinances and parts of ordinances in conflict with the provisions of this ordinance are hereby repealed.

Section 6. Any person, company of corporation or any officer or agent of any person, company or corporation violating any of the provisions of this ordinance shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding five hundred (\$500) dollars, or by imprisonment not exceeding six (6) months, or by both such fine and imprisonment, and such person, company or corporation, or officer or agent of any such person, company or corporation, shall be guilty of a separate offense for every day that such violation shall continue, and shall be subject to the penalty imposed by this section for each and every separate offense.

Section 7. This ordinance shall take effect and be in force on the first day of July, 1911.

In Board of Supervisors, San Francisco, May 15, 1911.

After having been published five successive days, according to law, taken up and finally passed by the following vote:

Ayes—Supervisors Bancroft, Cutten, Deasy, Hayden, Healy, Hocks, Kelly, Knowles, Loughery, Minehan, Murdock, Nelson, Nolan, O'Dowd, Pugh, Walsh.

Absent—Supervisors Harris, Herget.

W. H. HAGERTY, Clerk.

Approved, San Francisco, May 16, 1911.

P. H. McCARTHY,

Mayor and ex-officio President of the Board of Supervisors.

Telephone Rates

TELEPHONE RATES FOR 1911-1912.

The Charter of the City and County of San Francisco was amended in 1907 so as to permit the Board of Supervisors to fix the rates to be charged and collected for telephonic service.

Subdivision 14 of Chapter II of Article II of the Charter is as follows:

14. To fix and determine by ordinance in the month of February of each year, to take effect on the first day of July thereafter, the rate or compensation to be collected by any person, company or corporation in the City and County, for the use of water, heat, light, power or telephonic service, supplied to the City and County, or to the inhabitants thereof, and to prescribe the quality of the service.

Under the authority of the above provision the Board of Supervisors in February commenced an investigation preliminary to the fixing of rates for telephonic service for the year commencing July 1, 1911, and ending June 30, 1912.

By the provisions of Ordinance 342 (New Series) all persons and corporations engaged in the business of furnishing telephonic communication are required to file statements during the month of January in each year showing in detail the receipts and expenditures for the previous year; also an itemized inventory of all property used in such business. In compliance with the requirements of this ordinance communications were received from the companies engaged in the telephone business.

The Board of Supervisors met on February 8, 1911, for the purpose of making the necessary investigation prior to fixing the rates to be paid for telephonic service during the year 1911-1912.

The Board resolved itself into a committee of the whole, with Supervisor Loughery in the chair. The committee reported that it had heard the testimony of F. L. McNally, District Superintendent, representing Pacific Telephone and Telegraph Co.; F. C. Phelps, Auditor, and G. B. Bush, Superintendent of Commercial Construction of the same company, also of S. McMeen, Vice-President of Bay Cities Home Telephone Co., relative to statements filed by their companies.

That the following matters heretofore filed have been duly considered, admitted in evidence in the pending investigation, and designated exhibits as follows:

Exhibit No. 1. Protest, of Marion Thrasher, M, D., against excessive rates charged for telephone service. (Filed June 3, 1910.)

Exhibit No. 2. Communication, from H. M. Alexander for reduction in Pacific Telephone service rate for business phones.

Exhibit No. 3. Communication, from Columbia Ribbon and Carbon Company, requesting information as to rates for business telephones of Pacific Telephone and Telegraph service.

Exhibit No. 4. Communication, from Direct Line Telephone Company, advising that it merely rents interior or house telephones, and therefore does not operate under a municipal franchise.

Exhibit No. 5. Communication from Christ & Johnson, complaining that they are unable to obtain satisfactory telephone service under last year's telephone ordinance, and requesting that matter be given consideration.

Exhibit No. 6. Pacific Telephone and Telegraph Co., statement showing earnings and expenses for year 1910 and plant and property statement showing additions.

Exhibit No. 7. Bay Cities Home Telephone Company, statement showing earnings and expenditures for six months ending December 31, 1910, and plant and property investment.

The last numbered exhibits are as follows: .

San Francisco, February 4, 1911.

Telephone Rates Committee of Board of Supervisors,

Mr. Robert J. Loughery, Chairman,

70 Eddy Street, San Francisco, Cal.

Dear Sir:—I enclose copy of annual statement filed with the City of San Francisco covering the revenue, expenses and plant of the Pacific Telephone and Telegraph Company in the City and County of San Francisco for the year 1910.

Referring to the revenue statement, you will note that the gross revenue for 1910 increased \$255,118.07 over 1909. Expenses increased \$276,499.18 and net revenue decreased \$21,421.11.

Referring to the plant and property statement, there was added during the year 1910, physical plant to the amount of \$881,222.34. The net revenue for the year 1910 gave a return of 6.8% upon the physical property compared with 7.4% in 1909 and 8.9% in 1908.

Statement "A" enclosed shows the average exchange revenue per station from January 1, 1909, to December 31, 1910, amounting to an average decrease in annual revenue on all telephones of \$8.76. This decrease has resulted principally from reduction in the ordinance rates, also from competition and the large increase in the number of cheap telephones. The loss of revenue due to competition became more marked during the latter months of 1910, as the statement plainly shows. Statement "B" enclosed shows the rapid increase in number of lower compared with higher rate telephones.

At the present time we are operating our plant in San Francisco at practically no profit over and above a reasonable rate of interest upon the money invested, and in consideration of the hazards incident to the business, such as competition, decrease in switching revenue and extraordinary damage to plant from natural causes, we feel justified in claiming that any municipal regulation which compels the Telephone Company to operate under normal conditions for a net return of less than 10% upon the actual cash invested is unwarranted.

The Telephone Company recognizes its obligations to furnish service upon reasonable request to any one within the city limits, and the capital necessary to permit of fulfilling this obligation cannot be secured where it has to face a low maximum return coupled with danger of loss.

San Francisco has today the highest ratio of telephones to population of any large city in the United States. This is clearly the result of the low rate for certain classes of service which the Telephone Company is now furnishing under a direct loss to itself. We refer particularly to the four party line business and residence service, and we respectfully request that these classes of service be omitted from the ordinance to become effective July 1st this year. Aside from the question of revenue it is practically an impossibility to furnish first-class service in an exchange of this size if our lines carry more than two subscribers each. The elimination of the four party rates will still leave for the small user a low rate on two party lines, viz: \$4.50 for business and \$2.25 for residence.

The present ordinance provides that: "It shall be the duty of the Telephone Company to advise their subscribers by written notice if it is found that for three consecutive months the schedule charge is higher than the number of contract switches shown, said notice to state (1) the rate charged, (2) the number of contract switches, (3) the number of excess switches, (4) advice as to average number monthly switches, (5) advice as to what proper schedule subscriber should be under."

In actual practice we find the subscribers rarely use the information thus furnished and the cost to the Telephone Company of complying with this provision, which is considerable, is in our opinion unwarranted and I would request that this provision be eliminated from this year's ordinance.

It has been our endeavor to observe the spirit as well as the letter of the existing ordinance in every particular, and I can safely say the service in San Francisco today is equal, if not superior, to that in any other large city in the United States, and in view of our obvious desire to live up to our obligations as a telephone company, I trust the above changes in the ordinance, proposed for the good of the service, may have the sanction of the municipal authorities.

Yours respectfully,

E. C. BRADLEY,
Vice President & General Manager.

STATE OF CALIFORNIA,
CITY AND COUNTY OF SAN FRANCISCO—ss.

G. B. Ocheltree, being first duly sworn, deposes and says: That he is an officer, to wit: the Secretary, of the Bay Cities Home Telephone Company, a corporation, and that he makes this affidavit for and on behalf of said corporation: That he has read the attached statement of earnings and expenses for the six months ending December 31st, 1910, and statement of plant and property as of December 31st, 1910, and a statement of additions to plant and property, for six months ending December 31st, 1910, made by the Bay Cities Home Telephone Company; that the same are correct to the best of his knowledge and belief.

(Signed) G. B. OCHELTREE.

Subscribed and sworn to before me this eighth day of February, 1911.

(Seal)

(Signed) C. B. SESSIONS,

Notary Public in and for the City and County of San Francisco, State of California.

The investigation conducted by the Board was closed on February 8th, but numerous sessions were held by the Committee on Telephone Rates at which complaints were investigated and testimony given. The following communication was received by the said committee in the course of its investigation:

San Francisco, February 25, 1911.

Telephone Rates Committee Board of Supervisors,
Mr. Robert J. Loughery, Chairman,
70 Eddy Street, San Francisco, Cal.

Dear Sir:—In accordance with your request I send you herewith statement in duplicate showing the number of telephones of each grade in service on December 31, 1909, and December 31, 1910; the number of telephones increased or decreased in each class, and the per cent of increase or decrease.

In letter to you, dated February 4th, from our Vice President and General Manager, Mr. Bradley, he asks your consideration of our request to eliminate

the rates for four-party service, that is, rates Nos. 23, 24, 33 and 34. If these rates are eliminated, the lowest business rate would be No. 25, \$4.50 per month, including 60 switches on a two-party line. The lowest residence rate would be No. 36, 7½ cents per day or \$2.25 per month, including 60 switches on a two-party line.

Kindly note the large increase in the number of four-party stations as compared with other classes of service. In the four-party residence rate of 5 cents per day or \$1.50 per month, there was an increase of 3,805 telephones or 29.17%. As stated in Mr. Bradley's letter, we are operating these telephones below cost, and their existence has a bad effect upon the general service. We find that a great many subscribers who take the four-party service at first afterwards change to a higher class of service, and of course this change of subscribers from one class to another is an additional and unnecessary expense which would be avoided if the subscriber took the proper class of service in the first place.

Under the four-party residence rate of 5 cents per day or \$1.50 per month, the subscriber receives 30 switches free and pays 5 cents for each additional switch. This makes the cost of 60 switches \$3.00, while if he takes the two-party the cost of 60 switches is only \$2.25, and in addition he receives two-party service instead of four-party. In other words, for the same amount of service the two-party rate is cheaper than the four-party, and the elimination of the four-party rate cannot be considered in any sense an increase in rate.

If our request has the approval of the Board, it would be our plan to give the subscribers who now have the four-party rate the option of continuing at their present rate or taking another rate, but that no new four-party contracts would be accepted. Were we to eliminate the four-party rate on all new contracts this year, it would probably be several years before all existing four-party subscribers were changed to other classes of service.

The prospective demands upon our operating force to furnish satisfactory service will probably be severe during the next few years, on account of the Exposition, and it is our earnest desire to remove, as far as possible, any obstacle in the way of giving first class service.

As testified before the Board, practically all of our complaints of service are in connection with four-party lines and, although everything possible is done to give good service on these lines, the fact that there are three or four people on the circuit frequently interfering with each other and answering the wrong bells makes it difficult to keep our subscribers satisfied, and those subscribers who have one or two-party service are subject to these annoyances when they call a four-party subscriber.

We will be glad to furnish any further information which you may desire, and trust that the matter will have your favorable consideration.

Yours truly,

G. B. BUSH,
General Commercial Superintendent.

REPORT OF TELEPHONE RATES COMMITTEE.

On June 12, 1911, the following report was presented by Supervisor Loughery and read by the Clerk:

Office of the Board of Supervisors,
70 Eddy Street.
San Francisco, Cal., June 5, 1911.

To the Honorable, The Board of Supervisors,
of the City and County of San Francisco.

Gentleman:—Your Committee on Telephone Rates whom your Honorable Board instructed to prepare a bill fixing and determining the maximum rates or compensation to be collected for telephone service in the City and County of San Francisco for the year commencing July 1, 1911, and ending June 30, 1912, begs leave to report that it has considered carefully the various matters referred to it, and has heard the complaints of subscribers, among whom were representatives of the Hotelmen's Association, in regard to a request for a reduction in rates on extension stations in rooms of hotel guests. After several conferences with the representatives of the telephone companies, your committee was enabled to secure a satisfactory rate for the hotel men. The hotel men will be allowed, in addition to the reduction in rates on extension stations, a rebate, equal to ten per cent off their bills, to cover the expense incurred by them in keeping the telephone accounts of the hotel guests. This reduction in the hotel telephone rates will mean a saving of approximately \$21,000.00 for the next fiscal year for hotel men.

The present rates for hotel extension stations are:

Fifty cents per month each, for the first 100 telephones or less.

Thereafter they are graduated down to 25 cents each, according to the number installed.

Under the proposed ordinance, the rates will be:

Fifty cents per month each, for the first 50 telephones or less.

Twenty-five cents per month each, for telephones over 50.

In view of the fact that last year your Honorable Board, on the recommendation of your committee, made certain modifications and changes in telephone rates fixed by ordinance of the previous year, whereby a reduction or saving was effected, to the telephone subscribers or users, in the business and residence sections, of approximately \$70,000.00 and \$45,000.00 per year, respectively, or a total of \$115,000.00 for both sections, your committee has concluded that it would not be advisable to recommend any further reductions in these two classes of telephone service, leaving it to healthy competition to effect further reductions.

A new provision in the new ordinance, as recommended by your committee, will provide against exclusive contracts being entered into. The provision is as follows:

"No contract shall be enacted, made or enforced that will exclude or in any manner prohibit or restrict any patron or subscriber from receiving telephonic service from any other person or corporation engaged in such business, or from installing and using in any manner that may be desired the telephones or instruments of two or more different telephone systems; nor shall telephonic service be refused for the reason that the person requesting same is a patron of another person or corporation, or using another or different telephone system."

The enforcement of this provision will enable the competing company to install its system of telephone service in "public pay stations," where heretofore it has been denied that privilege, owing to an exclusive contract entered

into between the Pacific Telephone and Telegraph Company and its public pay station subscribers. It might be mentioned that the older company has already at the suggestion of your committee, discontinued the practice of exacting exclusive contracts. Notwithstanding the urgent appeals of the representatives of the Pacific Telephone & Telegraph Company to discontinue the use of the four-party lines at \$1.50 per month, and substitute therefor the two-party line at \$2.25 per month, in order, as they claim, that the service may be improved, your committee has concluded to recommend that both the two-party and four-party lines be retained and let the subscribers decide themselves what class of service will suit them best. There are about 25,000 four-party lines at the present time in use.

The attention of your Honorable Board is directed to the provision of the Home Telephone Company's franchise wherein it is mentioned that the company is to pay to the City and County of San Francisco 2 per cent of the gross receipts yearly during the life of its franchise. The first payment will be due at the end of the fiscal year ending June 30, 1912. The estimated gross receipts will be \$350,000.00 for the coming year.

In conclusion, your committee would state that it has been forcibly impressed with the very important duty assigned to it, of preparing a bill for fixing and determining telephone rates, while conducting the various investigations, and at times during these investigations felt that the assistance of an expert on telephonic matters to aid in arriving at definite and justifiable conclusions in fixing rates would be desirable. Your committee therefore would recommend that your Honorable Board proceed to secure the services of a man familiar with telephonic maintenance and construction and other matters or details kindred to a telephone system, in order that a basis may be established in fixing rates in the future which would be justifiable and unassailable. The man selected for the place should be employed permanently, and should have supervision over all public service telephone systems in the City and County, and investigate complaints of telephone users and perform such other duties as may from time to time be prescribed by your Honorable Board.

Your committee desires at this time to express its appreciation of the courtesies and assistance extended it by Mr. D. A. Hagens of the Merchants' Association and Mr. A. D. L. Hamilton of the Civic League in furnishing telephonic data from other cities.

Your committee recommends the passage of a bill, herewith submitted, fixing and determining telephone rates for the year commencing July 1, 1911, and ending June 30, 1912.

Respectfully submitted,

ROBT. J. LOUGHERY,
T. B. HEALY,
T. P. MINEHAN.

Committee on Telephone Rates.

At the same time the ordinance fixing telephone rates for the ensuing year was introduced and passed to print. On June 19th it was finally passed and is as follows:

BILL NO. 780. ORDINANCE NO. 1595. (New Series.)

Fixing and determining the maximum rates or compensation to be collected for telephonic service in the City and County of San Francisco for the year commencing July 1, 1911, and ending June 30, 1912, and prescribing the quality of said telephonic service during said year.

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The maximum rates or compensation to be collected by any person, company or corporation for telephonic service supplied to the City and County of San Francisco, or to the inhabitants thereof, for the year commencing July 1, 1911, and ending June 30, 1912, shall be as follows:

Business and Professional Rates.

The following maximum charges shall be made for business or professional measured service:

For a single party line telephone, business or professional, including 75 exchange switches, \$5.00 per month, and for all exchange switches in excess of the number included in this rate a sum not to exceed 5 cents each.

For a single party line telephone, business or professional, including 175 exchange switches, \$7.50 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 4 cents each.

For a single party line telephone, business or professional, including 240 exchange switches, \$9.15 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 3½ cents each.

For a single party line telephone, business or professional, including 380 exchange switches, \$12.47 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 3 cents each.

For a single party line telephone, business or professional, including 530 exchange switches, \$15.00 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 2½ cents each.

For a single party line telephone, business or professional, including 750 exchange switches, \$17.48 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 2 cents each.

For a single party line telephone, business or professional, including 1,080 exchange switches, \$19.57 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 1½ cents each.

Business or Professional Service, With Coin-Collecting Attachment.

The following maximum charges shall be made for business or professional measured service with coin or token-collecting attachment:

For a single party line telephone, business or professional, including 60 exchange switches, \$5.50 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 5 cents each.

For a two-party line telephone, business or professional, including 60 exchange switches, \$4.50 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 5 cents each.

For a single-party line telephone, business or professional, including five exchange switches per day, 25 cents per day, and for each exchange switch in excess of the number included in this rate a sum not to exceed 4 cents each.

For two-party line telephone, business or professional, including four exchange switches per day, 20 cents per day, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 5 cents each.

For a four-party line telephone, business or professional, including two exchange switches per day, 10 cents per day, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 5 cents each.

For a four-party line telephone, business or professional, \$1.00 per month, and for each exchange switch a sum not to exceed 5 cents.

Extension Telephones.

For each extension telephone on a business or professional line the maximum charge shall be a sum not to exceed 50 cents per month.

Private Branch Exchange and Extension Service.

The following charges shall be made for private branch exchanges and for extension telephones connected with said exchanges and equipped and installed:

MONTHLY RENTAL RATES—For each switchboard and operator telephone, a sum not to exceed \$5.00 per month.

For each trunk line connecting a private exchange with the telephone company exchange, a sum not to exceed \$2.50 per month.

For each additional telephone connected with a private exchange and installed in the same premises (except in hotels), a sum not to exceed 50 cents per month.

For each additional telephone installed in hotels and connected with the private exchange therein:

50 cents per month each for the first fifty telephones or less.

25 cents per month each for telephones over fifty.

For each desk set in place of wall set, 10 cents per month in addition to the above rates.

MONTHLY SWITCHING RATES—For exchange switching over trunk lines of private branch exchanges, a sum not to exceed 2½ cents per month for the first 1,000 exchange switches, or less, made in any one month; for the second and third thousand exchange switches, or less, made in any one month, a sum not to exceed 2 cents per switch; and for all exchange switches in excess of 3,000 made in any one month, a sum not to exceed 1½ cents per switch, except that in the case of hotels the charge shall not exceed 2½ cents for each and every exchange switch.

Public Telephone Service.

The charge for a single exchange switch from any telephone located in the City and County shall not exceed 5 cents, and all persons, companies or corporations engaged in the business of supplying telephonic service in the City and County are hereby expressly forbidden to authorize or permit any of their lessees, subscribers or patrons to charge any person more than the rate above described; provided, however, that from any telephone in a hotel room connected with a hotel private branch exchange the charge for a single exchange switch shall not exceed 10 cents.

Residence Rates—Unlimited Exchange Switching.

The following maximum charges shall be made for residence flat rate service:

For a single-party line residence telephone, including unlimited exchange switching, \$3.50 per month.

For a two-party line residence telephone, including unlimited exchange switching, \$3.00 per month.

For a four-party line residence telephone, including unlimited exchange switching, \$2.50 per month.

Residence Measured Service.

For a single-party line residence telephone, including 125 exchange switches, \$3.00 per month, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 3 cents each.

Residence Service With Coin-Collecting Attachment.

The following maximum charges shall be made for residence measured service with coin or token-collecting attachment:

For a two-party line residence telephone, including two exchange switches per day, 7½ cents per day, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 5 cents each.

For a four-party line residence telephone, including one exchange switch per day, 5 cents per day, and for all exchange switches in excess of the number included in this rate, a sum not to exceed 5 cents each.

Extension Telephones.

For each extension telephone on a residence telephone line the maximum charge shall be a sum not to exceed 50 cents per month.

Names in Telephone Directory.

Any person, company or corporation supplying telephonic service in this City or County shall at least three times a year furnish free of charge to each subscriber a complete directory of all subscribers in San Francisco, and an additional copy of said directory for each extension telephone; provided, however that for every name listed in said directory under the telephone number of a subscriber, in excess of the number of main and extension telephones installed on the premises of the subscriber, a sum not to exceed 25 cents per month for each such name shall be charged.

Private Lines.

The following maximum charges shall be made for private telephones and lines not connected with a telephone exchange:

For private-line telephones, a sum not to exceed 50 cents per month each.

For private lines, a sum not to exceed \$2.50 per mile per month.

Quality of Service.

Section 2. The term "Telephone" as used in this Ordinance is hereby defined to mean both a transmitter and a receiver. It shall be optional with the person demanding telephonic service to elect to take or use either portable or stationary telephonic apparatus and it shall be the duty of the person, company or corporation supplying telephonic service in the City and County to furnish such apparatus without additional cost, except as in this Ordinance provided.

The term "Exchange Switch," as used in this Ordinance, is hereby defined to mean an availing call, that is to say, a call whereby an outgoing conversation or message is transmitted from one telephone station within the City and County and received at another telephone station within the City and County.

No switching charge shall be made for an unavailing call, and when a nickel or token is deposited in the coin-collecting attachment for an unavailing call the same shall be returned to the person by whom it was deposited. Single conversations on party lines shall not exceed five minutes.

Upon the application in writing of the owner or occupant of any building or premises distant not more than 300 feet from any underground conduit or pole line of the person, company or corporation furnishing telephonic service, and payment by the applicant of all money due from him, the person, company or corporation must within thirty days supply telephonic service as required for such building or premises and cannot refuse on the ground of any indebtedness of any former owner or occupant thereof, unless the applicant has undertaken to pay the same.

No restriction shall be placed by any company, person or corporation supplying telephonic service upon their right of subscribers to employ operators, provided that any operator or substitute operator to be employed and paid by the subscriber shall conform to the reasonable rules and regulations pertaining to the service of such person, company or corporation.

No contract shall be exacted, made or enforced that will exclude or in any manner prohibit or restrict any patron or subscriber from receiving telephonic service from any other person or corporation engaged in such business, or from installing and using in any manner that may be desired the telephones or instruments of two or more different telephone systems; nor shall telephonic service be refused for the reason that the person requesting same is a patron of another person or corporation, or using another or different telephone system.

It shall be the duty of the telephone company to advise their subscribers by written notice if it is found that for three consecutive months the schedule charged is higher than the number of contract switches shown. Said notice to state:

1. The rate charged.
2. The number of contract switches.
3. The number of excess switches.
4. Advice as to average number monthly switches.
5. Advice as to what proper schedule subscriber should be under.

The telephone company shall print on the reverse side of their billheads their schedules, showing the various grades of monthly rental, contract switching and excess switching, so the same can easily be understood by their subscribers, and on the front of such billheads shall appear in large type the words, "See Schedule of Rates on Other Side."

Upon demand of any person, company or corporation using business or professional measured telephonic service (excepting prepayment service) every person, company or corporation supplying telephonic service within the City and County shall install and maintain in connection with each such measured service line, a meter which shall prove effective in actual use for accurately and correctly recording the number of outgoing messages and conversations over said line, and said meter shall be subject to inspection at all reasonable times by the subscriber upon whose line the same is installed.

Section 3. Any person, company or corporation, or any officer or agent of any person, company or corporation, violating any of the provisions of this Ordinance shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine not exceeding five hundred (\$500) Dollars, or by imprisonment not exceeding six (6) months, or by both such fine and imprisonment, and such person, company or corporation, or officer or agent of any such person, company or corporation, shall be guilty of a separate offense for every day that such violation shall continue, and shall be subject to the penalty imposed by this section for each and every separate offense.

Section 4. This Ordinance shall take effect and be in force from and after July 1, 1911.

In Board of Supervisors, San Francisco, June 19, 1911.

After having been published five successive days according to law, taken up and finally passed by the following vote:

Ayes—Supervisors Bancroft, Cutten, Deasy, Hayden, Healy, Herget, Hocks, Kelly, Knowles, Loughery, Minehan, Murdock, Nelson, Nolan, O'Dowd, Pugh, Walsh.

Absent—Supervisor Harris.

W. R. HAGERTY, Clerk.

Approved, San Francisco, June 21, 1911.

P. H. McCARTHY,

Mayor and ex-officio President of the Board of Supervisors.

Parnassus Avenue Franchise

On April 16, 1910, Thomas W. Forsyth petitioned the Board of Supervisors to grant a franchise for a street railroad commencing at the intersection of Parnassus and Third Avenues, running thence along Parnassus Avenue to Judah Street; thence along Judah Street to Ninth Avenue; thence along Ninth Avenue to Pacheco Street.

The petition was supplemented by petitions of property owners and various civic organizations in the district contiguous to the proposed line of railway.

The petition received the favorable report of the Public Utilities Committee of the Board and thereafter on August 8, 1910, Resolution No. 6385 (New Series), was adopted reciting that it was the intention of the Board of Supervisors to grant the franchise applied for subject to all the conditions imposed by the charter and directing the clerk to advertise the franchise for sale as required by said charter.

Notice was accordingly given that sealed bids for the purchase of such franchise would be received by the Board on September 3, 1910. On said date Thomas W. Forsyth submitted a bid in accordance with the terms and conditions of the notice and agreed to pay therefor three per cent of the gross earnings of the proposed railway for the first five years of the term thereof, four per cent during the next ten years and five per cent during the remaining ten years. The bid was accepted and the ordinance granting the franchise was passed to print on October 3, 1910.

On January 23, 1911, the ordinance was finally passed and is as follows:

BILL NO. 1491. ORDINANCE NO. 1460. (New Series.)

Granting to Thomas W. Forsyth a franchise for a right of way, and the right of way, and the right to construct, maintain and operate a double track, standard-gauge street railroad, for the term of twenty-five years, over and upon the following described route, to wit:

Commencing at the intersection of Parnassus and Third Avenues, running thence along Parnassus Avenue to Judah Street, thence along Judah Street to Ninth Avenue, thence along Ninth Avenue to Pacheco Street.

Be it ordained by the People of the City and County of San Francisco as follows:

Section 1. The right of way is hereby granted unto Thomas W. Forsyth, his successors or assigns, for the term of twenty-five (25) years, to use portions of the streets hereinafter named and described for street railroad purposes, as hereinafter set forth, and to that end the said Thomas W. Forsyth, his successors or assigns, is hereby granted the right to construct, erect, maintain and operate, by means of electricity or such other improved motive power as science has now or may hereafter discover and the laws sanction, a double track, standard-gauge railroad along the following described route, to wit:

Commencing at the intersection of Parnassus and Third Avenues, running thence along Parnassus Avenue to Judah Street, thence along Judah Street to Ninth Avenue, thence along Ninth Avenue to Pacheco Street.

Section 2. It shall be lawful, and said Thomas W. Forsyth, his successors or assigns, shall have the right to build, construct, erect and maintain all neces-

sary poles, feed, trolley, guy, stay and sustaining wires, overhead construction, connecting tracks, Y tracks, side tracks, turnouts, curves, switches, crossings, and to connect any or all of said tracks with the existing tracks on Parnassus and Third Avenues.

Section 3. The foregoing grants are made upon the following express conditions, to be strictly complied with by the said grantee, his successors or assigns, viz:

First—The grantee, his successors or assigns, shall pay to the City and County of San Francisco, in lawful money of the United States, a percentage upon the gross annual receipts of said grantee, his successors or assigns, arising from the use, operation, possession or enjoyment of such franchise, as follows:

Three per centum thereof during the first five years of the period for which said franchise is granted; four per centum thereof during the next succeeding ten years of said period and five per centum thereof during the next succeeding ten years of such period.

All such per centum of said gross receipts shall be paid into the treasury of the City and County of San Francisco on or before the tenth day of the next ensuing month after such gross receipts shall have been earned.

Second—The grantee, his successors or assigns, shall continuously operate the whole of the railway hereby authorized, and at the end of the term of this franchise the road, track and bed of said railway and all its stationary fixtures upon the public streets shall become the property of the City and County.

The grantee, his successors or assigns, shall within one hundred days after the date of the grant hereby made, commence the construction of the railway hereby authorized, and continuously thereafter in each and every month until the completion thereof expend in such construction at least the sum of three thousand dollars.

A failure to comply with any of the conditions in the foregoing paragraphs shall work an immediate forfeiture of such franchise and the road or track constructed thereunder, and there shall be no power in the Board of Supervisors to relieve from such forfeiture or from any of said conditions.

On or before the tenth day of each month, after said receipts shall have been earned, the president and secretary of said railway company shall make and file with the Clerk of the Board of Supervisors a sworn statement of the gross receipts of such railway for the preceding month.

Third—The franchise hereby granted shall not, upon expiration of the term thereof, be renewed or regranted, and the Board of Supervisors of the City and County of San Francisco shall at all times have power to regulate the rates of fare to be charged by those using, operating, possessing or enjoying this franchise, and the Finance Committee of said Board shall at all times be permitted to examine and inspect their books as to their gross receipts.

Fourth—The grantee, his successors or assigns, shall be required to pave the space between the rails and for two feet each side thereof, and between the tracks if there be more than one, upon the streets whereon said tracks are to be laid, and to keep the same in good condition and repair under the supervision and to the satisfaction of the Board of Public Works of the City and County.

Fifth—The grantee, his successors or assigns, shall pay to the City and County as a license upon each car such sum as the Board of Supervisors may fix, provided, however, that such sum shall not exceed fifty (\$50.00) dollars per annum, nor be less than fifteen (\$15.00) dollars per annum.

Sixth—Said street railroad franchise is hereby granted, subject to the conditions and restrictions provided in the Charter of the City and County of San Francisco, with particular reference to the following subdivisions and sections

of Chapter 2, Article II of said Charter, relating to the powers of the Board of Supervisors, to wit:

Subdivision 2 and Subdivision 27, as amended February 5, 1903, of Section 1 thereof, and Section 6 thereof.

Section 4. This Ordinance shall take effect and be in force from and after its passage.

In Board of Supervisors, San Francisco, January 23, 1911. ,

After having been published five successive days, according to law, taken up and finally passed by the following vote:

Ayes—Supervisors Cutten, Deasy, Harris, Hayden, Healy, Herget, Hocks, Kelly, Knowles, Loughery, McLaughlin, Minehan, Murdock, Nelson, O'Dowd, Walsh.

Absent—Supervisors Baneroft, Pugh.

W. R. HAGERTY, Clerk.

Approved, San Francisco, January 23, 1911.

J. A. KELLY,

Acting Mayor and ex-officio President of the Board of Supervisors.

Financial Condition

FINANCIAL CONDITION OF THE CITY AND COUNTY ON OCTOBER 1, 1911.

RESOLUTION NO. 8665. (New Series.)

RESOLVED, That the following statement showing the financial condition of the City and County of San Francisco be and is hereby approved, and the Clerk is hereby directed to transmit a copy thereof to the State Controller:

TIMOTHY P. MINEHAN,

JOHN O. WALSH,

CHARLES A. MURDOCK,

Committee on Printing.

IN MEMORIAM

MATTHEW HARRIS, SR.

Matthew Harris, Sr., a member of the Board of Supervisors, died August 14, 1911, after an illness extending over a period of several months and following the death of his wife, which occurred less than two months before.

He was born in Wisconsin in 1842, but all except nine years of his life was spent in California. While a young man he was employed in connection with the lumbering business and in 1876 engaged in the business in association with others. His business interests gradually extended and became incorporated in the Van Arsdale-Harris Lumber Co., and succeeded to the management of the vast properties of the company upon the death of Mr. Van Arsdale.

He married in 1868, Miss Arminda Moore, of Nevada City, and their two sons, Matt Jr., and Frank H. Harris survive their late parents.

Mr. Harris was elected a member of the Board of Supervisors at the election of November, 1909. Shortly afterwards a vacancy occurred in the Board by the resignation of Supervisor Payot and Mr. Harris was appointed to fill the vacancy by Mayor Taylor and he served until the January following when his regular term commenced to which he had been elected.

The esteem in which he was held by his colleagues upon the Board and the appreciation felt for his public services are properly set out in the following resolution adopted by the Board of Supervisors on the day of his death:

RESOLUTION NO. 8314. (New Series.)

The members of the Board of Supervisors would express their sincere respect for the memory of their late associate Matthew Harris Sr. A man of sterling integrity whose qualities of mind and heart endeared him to all who knew him, his removal from the scene of his activities is a distinct loss to the community. Self-reliant, self-respecting, with great industry and energy he wrought out an honorable career in life. His early years were marked with great difficulties, patiently overcome, and with hard tasks resolutely performed. Success left him unspoiled and unhardened. He was a sympathetic and liberal employer, always ready to do a kindness, and generous in all his intercourse with his fellow man. He was broad-minded, manly and strong, above small prejudices, and ready to co-operate with any of his fellow men for anything that his judgment approved as right. As a member of the Board of Supervisors he was anxious to do his full part, and until declining health compelled him to give up his characteristic activity he was faithful to every duty and especially devoted to the responsibilities resting upon him as a member of the Building Committee. He came to the meetings of the Board as long as it was physically possible and maintained his interest in municipal affairs to the last. He bore his long and trying illness with great fortitude and was hopeful and courageous to the end. His long and arduous life has been characterized by honor, sincerity and helpfulness. A fond and devoted husband and father, his domestic life was spotless and singularly happy. As a business man he established an enviable reputation, and by his neighbors and associates he was held in high regard. He was the highest type of honorable, useful, helpful manhood, whose memory will be ever cherished by those who were privileged to know him.

We respectfully move the adoption of this memorial and that it be spread upon the minutes of the Board, a copy being transmitted to the members of his family, and that when we adjourn it be in memory of this good and kindly man.

MATTHEW HARRIS, SR.
